8	Subtract line 7 from line 6 » Transfer Fee:	8	\$3,540

*Example for Line 5a calculation to transfer 45.0 acres of Primary Certificate 12345 (total 1.25 cfs for 100 acres) and 45.0 acres of Supplemental Certificate 87654 (1/80 cfs per acre) on the same land:

- For irrigation calculate cfs for each water right involved as follows:
 - Divide total authorized cfs by total acres in the water right (*for C12345, 1.25 cfs ÷ 100 ac*); then multiply by the number of acres to be transferred to get the transfer cfs (*x 45 ac = 0.56 cfs*).
 - If the water right certificate does not list total cfs, but identifies the allowable use as 1/40 or 1/80 of a cfs per acre; multiply number of acres proposed for change by either 0.025 (1/40) or 0.0125 (1/80). (*For C87654, 45.0 ac x 0.0125 cfs/ac = 0.56 cfs*)
- Add cfs for the portions of water rights on all the land included in the transfer; however **do not count cfs for supplemental rights on acreage for which you have already calculated the cfs fee for the primary right on the same land**. The fee should be assessed only once for each "on the ground" acre included in the transfer. (*In this example, blank 5a would be only 0.56 cfs, since both rights serve the same 45.0 acres. Blank 5b would be 0 and Line 5 would then also become 0*).

FEE WORKSHEET for SUBSTITUTION			
1	Base Fee (includes change to one well)	1	\$990.00

Explain in your own words what you propose to accomplish with this transfer application, and why:
We purchased tax lot 500 in 2020 without any water rights and will transfer half of the water rights we have on tax lot 525 to tax lot 500. We currently purchase bottled water for our household use on tax lot 525 and will change some of the irrigation water to domestic use for that household. We will move the POD uphill to be above tax lot 500 to get gravity flow water. We had well JOSE 59411 drilled in 2014 on tax lot 525 and it produce insignificant water yield, ie 0.1 gpm.

If you need additional space, continue on a separate piece of paper and attach to the application as "Attachment 1".

Description of Water Delivery System

System capacity: _____ cubic feet per second (cfs) OR

OWRD

Describe the current water delivery system or the system that was in place at some time within the last five years. Include information on the pumps, canals, pipelines, and sprinklers used to divert, convey, and apply the water at the authorized place of use. Water is diverted from the spring at POD2 with an above ground 1.25" poly hose downhill into a wooden 1000 gallon water tank. From the tank a buried 2" PVC pipe delivers water downhill to irrigate the 0.6 acre field at 55 psi. Impact sprinklers apply water at 4 gpm each. One or two sprinklers are normally used at a time. The system is shared with a neighbor on their portion of the same water right.

Additional remarks: POD1 has not been used for more than 42 years. We purchased tax lot 525 in 1977 and POD2 has been used since 1980. The decree map indicates POD1 is the POD but the original certificate 13896 did not specify a POD. Transfer N-30 in 1966 created domestic water for one household and identified POD1 as shown on certificate 47289. The Watermaster in 1980 is said to have verbally approved using POD2. POD2 is 350 feet northwest of POD1 and was recently located from the W¼ corner of section 22 by GPS. POD2 is considered the existing POD. Each proposed domestic use rate will be 0.001 cfs and each ¼ acre irrigation rate will be 0.005 cfs.

For Place of Use or Character of Use Changes

Are there other water right certificates, water use permits or ground water registrations associated with the "from" or the "to" lands? ☐ Yes ☒ No

If YES, list the certificate, water use permit, or ground water registration numbers: NA.

Pursuant to ORS 540.510, any "layered" water use such as an irrigation right that is supplemental to a primary right proposed for transfer must be included in the transfer or be cancelled. Any change to a ground water registration must be filed separately in a ground water registration modification application.

For a change in point(s) of appropriation (well(s)) or additional point(s) of appropriation:

- ☐ Well log(s) are attached for each authorized and proposed well(s) that are clearly labeled and associated with the corresponding well(s) in Table 1 above and on the accompanying application map.

Tip: You may search for well logs on the Department's web page at:

http://apps.wrd.state.or.us/apps/gw/well_log/Default.aspx

AND/OR

- ☐ Describe the construction of the authorized and proposed well(s) in Table 3 for any wells that do not have a well log. For *proposed wells not yet constructed or built*, provide "a best estimate" for each requested information element in the table. The Department recommends you consult a licensed well driller, geologist, or certified water right examiner to assist with assembling the information necessary to complete Table 3.

Table 3. Construction of Point(s) of Appropriation

Any well(s) in this listing must be clearly tied to corresponding well(s) described in Table 1 and shown on the accompanying application map. Failure to provide the information will delay the processing of your transfer application until it is received. The information is necessary for the department to assess whether the proposed well(s) will access the same source aquifer as the authorized point(s) of appropriation (POA). The Department is prohibited by law from approving POA changes that do not access the same source aquifer.
