Check all items included with this application. (N/A = Not Applicable)

- Part 1 – Completed Minimum Requirements Checklist.
- Part 2 – Completed Applicant Information and Signature.
- Part 3 – Completed Water Right Information and Conservation Measures. Please include a separate Part 3 for each water right. List all water right certificates involved in this application here: **92000**.
- Part 4 – Completed Mitigation, Proposed Use, Project Schedule, Funding, and Fee Calculation.

Attachments:

- Fees – Amount enclosed: \$ **680** (From last page of application).
- Application Map. Must have sufficient detail to locate and describe the facilities and areas involved in the conservation measures. Must show the place of use where water is being used if the rate or duty are changing.
- Land Use Information Form with approval and signature. (Not required if 100% of Conserved Water is being transferred instream.) **or**

Land Use Notice - Notice of the intent to create an instream water right must be provided to each affected county, city, municipal corporation, or tribal government along the proposed instream reach.
- Completed Evidence of Use Affidavit and Supporting Documentation.
- N/A Affidavit(s) of Consent.
- N/A Letter of approval from Irrigation or Water Control District. For water rights served by or issued in the name of a District; this must be provided when the applicant is not the District.
- N/A Irrigation or Water Control District’s adopted policy on allocation of conserved water.
- N/A If construction of the project has begun or been completed and if more than 25 percent of the project costs have been expended before applying for allocation of conserved water,
- N/A Evidence for Fee Waiver.
- N/A Notice of Completion.
- N/A Request for Finalization. (The entire conservation project listed on the application must be complete. No partial finalization will be recognized.)

Part 2 of 4 – Applicant Information and Signature

Applicant Information

APPLICANT/BUSINESS NAME East Fork Irrigation District			PHONE NO. 541-354-1185	ADDITIONAL CONTACT NO. MAILING: PO BOX 162, ODELL, OR 97044
ADDRESS 3500 GRAVES ROAD			FAX NO. 541-354-5833	
CITY HOOD RIVER	STATE OR	ZIP 97031	E-MAIL VERONICA@EFIDHR.ORG	

The applicant is an irrigation district organized under ORS Chapter 545 or a water control district organized under ORS Chapter 553. The District's OAR 690-018-0025 allocation of conserved water policy was adopted: 08/11/2020.

OR

The applicant is the sole owner of the land on which the water right, or portion thereof, proposed for conservation measures is located? Yes No

If NO, include signatures of all landowners (and mailing address if different than the applicant's) or attach affidavits of consent (and mailing addresses) from all landowners or individuals/entities to which the water right(s) has been conveyed.

In your own words tell us what physical conservations measures you have made or propose to make and the reason for the change(s): The Sheirbon Hill Water Conservation Project will increase summer stream flows for threatened salmon and steelhead and increase long-term irrigation water reliability by replacing East Fork Irrigation District's Sheirbon Hill sublateral pipeline. The pipeline project includes the installation of one pressure reducing valve and replacement of 5,217 feet of existing wood, concrete, and non-pressurized PVC pipe with pressure-rated pipe, which will eliminate five end spills and five open water boxes that lose an estimated 2 cfs.

To meet State Land Use Consistency Requirements, you must list all local governments (each county, city, municipal corporation, or tribal government) within whose jurisdiction the conservation project and/or proposed instream reach will be located.

WATER RIGHT INFORMATION:

Water Right Subject to Transfer (check and complete ONE of the following):

<input checked="" type="checkbox"/> Certificated Right	92000 <small>Certificate Number</small>	Hood River, VolPage:6-199 <small>Permit Number or Decree Name</small>
<input type="checkbox"/> Adjudicated, Un-certificated Right	_____ <small>Name of Decree</small>	_____ <small>Page Number</small>
<input type="checkbox"/> Permit for which Proof has been Approved	_____ <small>Permit Number</small>	_____, Page ____ <small>Special Order Volume</small>
<input type="checkbox"/> Transferred Right for which Proper Proof of the change has been filed	_____ <small>Previous Certificate / Transfer Number</small>	_____ <small>Date Claim of Beneficial Use Submitted</small>

County: Hood River

Describe the pre-project water delivery system. Include information on the diversion structure, pumps, and conveyance facilities (including canals, pipelines and sprinklers used to divert, convey and apply the water at the authorized place of use). *Provide sufficient detail for the Department to determine the system capacity.* During peak irrigation (early July through mid-September) in an average summer, EFID diverts approximately 110 cfs from the East Fork Hood River, which amounts to an average of 80-85% of the East Fork Hood River's flow. The District operates a single diversion at its headworks on the East Fork Hood River (River Mile 6.6). A rock push-up dam and wood headgate were replaced in 2013 with an Obermeyer weir, four steel headgates, and a vertical slot fish ladder. From the sand trap and fish screen facility below the diversion, the water diverted for irrigation enters EFID's open Main Canal and is conveyed 6.8 miles north to a distribution center where the system splits into two laterals: the 4.5-mile Central Lateral Pipeline and the 5-mile open Dukes Valley Canal. The Dukes Valley Canal (DVC) generally conveys water to the northwestern extent of the District. The DVC is unlined and is estimated to be 10 feet wide and 2 feet deep for most of its course. The Cameron Hill, Cherry Hill, Marsh/Chamberlin, Sheirbon Hill, and Shute Road lateral pipelines receive water from the DVC. The DVC and its laterals supply water to approximately 1,900 acres. The lateral piping is primarily schedule 40 or 80 polyvinyl chloride (PVC) with small sections piped with asbestos cement (i.e., transite), concrete, or wood. Sheirbon Hill was originally piped with 2600 feet of reinforced concrete, wood, and 10-inch non-pressurized PVC pipe. There were five open water boxes along the line as well as pumps to serve patrons with more than five-acre parcels.

Table 1: Pre-Project Description

List: A) the maximum rate and annual duty (volume) of water that may be diverted as stated on the water right of record; and B) the maximum amount of water that can be diverted using the pre-project facilities (“system capacity”). If there are multiple priority dates on the water right, list the rate and duty associated with each priority date. (If the water right is only limited by rate, do not list a duty. Conversely, if the water is only limited by duty, do not list a rate).

PRE-PROJECT DESCRIPTION								
			Column A Water Right of Record				Column B System Capacity	
			Rate		Duty		Rate	Duty
Originating Water Right #	Priority	Acres	Maximum CFS	CFS/AC	Maximum AF	AF/AC	Maximum CFS	Maximum AF
92000	11/25/1895	8,546.77	100.5	1/80	23,936.78	3.0	132.745	
Totals		8,546.77	100.5	1/80	23,936.78	3.0	132.745	

Note: 1 miner's inch = 1/40 cfs; 1 cfs = 448.8 gpm 1 cfs = 1.983471 ac-ft/day

CONSERVATION MEASURES:

Describe the type of conservation measures, check all that apply:

- On-Farm efficiency project
- Distribution project, such as a ditch piping or lining project
- Other: _____

RECEIVED
JAN 23 2023
OWRD

Describe the proposed changes to the physical system, operations and application methods that will result in the conservation of water. If these proposed changes will change the point of diversion, you must meet the ODFW fish screen and bypass requirements pursuant to ORS 540.525. *Please include a description and details of how the estimate of water conserved was determined. Please provide sufficient detail for the Department to provide notice of the project.*

The project will replace approximately 5,217 feet of existing wood, concrete, and nonpressurized PVC pipe with 180-200 PSI PVC pipe. In addition, EFID will install one pressure reducing valve and several new valves along with a flow meter to regulate water usage. This would eliminate the five overflows at the existing water boxes and allow EFID to pressurize the sublateral fed from Dukes Valley.

EFID determined the conserved water associated with this project based on their evaluations of diversions and deliveries to the acreage served by the Sheirbon Hill sublateral. EFID has established a 1.13gpm/acre loss associated with seepage and spills and conducted an endspill analysis report that recorded maximum and average flow rates from key endspills within the District (FCA, 2017).

EFID proposes to allocate 1 cfs of the total conserved water to permanent in-stream use in the East Fork Hood River to benefit both streamflow and water quality. This would also have a significant positive impact on spawning and rearing habitat availability for ESA-listed spring Chinook, coho, and winter steelhead. Additionally, energy savings from eliminating patron pumping is estimated at 572 kWh (Draft Watershed Plan - EA, 2020).

Existing Point(s) of Diversion:

Twp		Rng		Sec	¼	¼	Tax Lot	Gvt Lot or DLC	Measured Distances or Latitude and Longitude
1	S	10	E	4	NW	SW		1	3750 Feet South and 430 Feet East from the NW Corner of Section 4

Place of Use Involved in Conservation Measures:

List only the part of the right that will be affected. If the entire right is being affected, just state "entire Certificate."

Twp		Rng		Sec	¼	¼	Tax Lot	Gvt Lot or DLC	Acres	Type of Use listed On Certificate	Priority Date
2	S	9	E	15	NE	NW	200	43	153.0	EXAMPLE	1/1/1865
										ENTIRE	CERTIFICATE
Total											

Are there other water right certificates, water use permits, ground water registrations, or uncertificated decreed rights associated with the above lands? Yes No. If YES, list the certificates, water use permits, groundwater registrations, or uncertificated decree numbers: 80929, 84803, 80927

Is the project within the boundaries of an irrigation district or water control district? Yes No. If YES, and applicant is not a District, you must provide a letter of approval from the District.

Table 2: Conserved Water

In Column A, list the smaller of A or B from Table 1 (Pre-Project Description). In Column B, list the amount of water that will be needed for the existing, authorized use(s) after implementing the conservation measures. In Column C, subtract Column B from Column A and enter the results (e.g., A – B = C). (If the water right is only limited by rate, do not list a duty; and conversely, if the water is only limited by duty, do not list a rate.)

Conserved Water Description										
	Column A				Column B				Column C	
	Table 1 – Smaller of A or B				Needed				Conserved Water	
	Rate		Duty		Rate		Duty		Rate	Duty
	Maximum CFS	CFS/AC	Maximum AF	AF/AC	Maximum CFS	CFS/AC	Maximum AF	AF/AC	Maximum CFS	Maximum AF
Priority										
11/25/1895	100.5	1/80	23,936.78	3.0	99.5	1/80	23,603.78		1.0	333.0
Totals	100.5		23,936.78		99.5		23,603.78		1.0	333.0

Table 3: Allocation of Conserved Water

List the portions of the conserved water that will be allocated to the state and applicant. Note: Column A plus Column B should total Column C (e.g., A + B = C).

Conserved Water Allocation								
Column A			Column B			Column C		
State's Portion			Applicant's Portion			Conserved Water		
Percentage*	Maximum Rate	Maximum Duty (Volume)	Percentage	Maximum Rate	Maximum Duty (Volume)	Percentage	Maximum Rate	Maximum Duty (Volume)
100%	1.0	333.0	0	0	0	100%	1.0	333.0

* must be at least 25%

The priority for the conserved water is requested to be:

- The same as the original right, or
- One minute junior to the original right.

OWRD

**Part 4 of 4 – Mitigation, Proposed Use,
Project Schedule, Funding, and
Fee Calculation**

MITIGATION:

Describe any expected effects from the proposed allocation of conserved water on other water rights. Describe what currently happens to the water that is proposed to be conserved.

Water that is proposed to be conserved is currently lost as part of five overflows at existing water boxes in the Sheirbon Hill sublateral system. Proposed allocation of conserved water is less than the total amount of water currently lost to end spills, and therefore there will be no expected effects on other water rights.

Describe any mitigation or other measures that are planned to avoid harm to other water rights. There will be no harm to other water rights.

PROPOSED USE:

New Out-of Stream Uses:

N/A For new out-of-stream uses, describe the intended use and boundaries of the expected area within which the diversion structures and places of use of the applicants' conserved water right will be located. This is land other than that to which this water right is appurtenant. Intended Use: _____; Boundaries: _____.

Will the new use require a change or additional point of diversion/appropriation?

Yes No Unknown at this time

RECEIVED
JAN 23 2023

New Point of Diversion:

OWRD

New Instream Uses to be Created (State's Portion):

Originating Surface Water Right (as identified in Part 3)	Priority Date	Source	Proposed Instream Period	Rate (cfs)*	Volume (ac-ft)**
92000	11/25/1985	East Fork Hood River	4/15 - 9/30 (168 d)	1.0	333.0
TOTAL VOLUME					333.0

* To calculate rate (if other than the rate allowed by the right), divide the volume by the number of days in the period and then divide by 1.983471; or

** To calculate volume, multiply the rate by the number of days in the instream period and then multiply by 1.983471.

Note: The instream rate may not exceed the maximum rate conserved and the total volume may not exceed to maximum duty or volume conserved (Table 3, Column C).

Location of the proposed instream water right.

Water is requested to be protected within a reach. Location of the proposed reach (identify the extent of the reach): (e.g., from the upstream POD located at RM ___ to downstream location at

the mouth at RM _____) From the POD located at RM 6.4 of the East Fork Hood River to the mouth of the mainstem Hood River at RM 0 (21.3 miles).

OR

- Water is requested to be protected at a point at the following location (i.e. legal description of the point of diversion (POD)): _____

Public Use for which conserved water right should be managed under an instream right (check at least one box):

- Conservation, maintenance and enhancement of aquatic and fish life, wildlife, fish and wildlife habitat, and other ecological values.
- Recreation and scenic attraction.
- Water Quality (e.g. pollution abatement).

List any existing instream water rights at the same point or within the same requested reach(es):

- None.
- Instream Water Right Certificates: CW93, CW117

- N/A Is it your intent to have the proposed instream water right transfer be additive to any instream water right established under ORS 537.348 (instream transfer application process) and ORS 537.470 (allocation of conserved water) and replace a portion of any instream water right established under ORS 537.341 (state agency application process) and ORS 537.346 (conversion of minimum perennial streamflows) with an earlier priority date?

- Yes No. If no, please explain your intent below:

Is the requested instream flow intended to exceed the estimated average natural flow or natural lake level occurring from the drainage system?

- No; OR
- Yes (Provide supporting documentation that demonstrates why additional flows are significant for the public use requested.); OR
- Yes, and it is presumed that flows that exceed the estimated average natural flow or natural lake levels are significant because:
- The requested flow does not exceed the maximum amount of any instream water right applied for under ORS 537.338 (state agency instream water right application process); the requested public use is for the same public use; and the requested reach covers a portion or same reach as the state agency instream water right; **and**
- The stream is in an ODFW flow restoration priority watershed during the requested instream period; **or**
- The stream is listed as water quality limited by DEQ.

FUNDING

- N/A Federal or state public funds that are not subject to repayment are to be used for the project. Refer to OAR 690-018-0040(18)(a)-(d) for further information in completing this section.
 - Source of Funding: Federal: State: OWEB
 - Total cost for project engineering \$0
Total cost for construction \$92,310
 - The present value of any incremental changes in the cost of operations and maintenance that are directly attributable to the project that would not be incurred or realized in the absence of the project is \$____.
 - The amount of funding and the value of any in-kind contributions for project engineering and construction and for any incremental changes in the costs of operations and maintenance to be provided from federal or state public funds that are not subject to repayment is \$____.
 - The amount of funding and the value of any in-kind contributions for project engineering and construction and for any incremental change since costs of operations and maintenance to be provided from other funds is \$27,000.

- N/A Enter the percentage from Table 3, Column B (Applicant's Portion of Conserved Water) 0%. If this is more than 25%, what portion of project funds (expressed as a percentage) come from federal or state public sources? _____%

- N/A The Oregon Watershed Enhancement Board (OWEB) has a contractual interest in this project. The OWEB project number is 222-8601-22475.

FEE CALCULATION

RECEIVED
JAN 23 2023
OWRD

Fee Schedule – ORS 536.050 https://www.oregon.gov/OWRD/Forms/Pages/default.aspx	
\$1,360.00 - Base (1 st Water Right)	Add \$480.00 for each additional right
$\$1,360 + (0 \times \$480) = \text{Total Fee } \$ 1360$	

Fee Waiver Worksheet	
To qualify for a waiver of up to 50%, you must provide evidence to establish your application meets the following criteria:	
	(a) Will be converted to an instream right pursuant to ORS 537.348; or
	(b) Is necessary to complete a project funded under ORS 541.375 (OWEB); or
	(c) Is approved by the Oregon Department of Fish and Wildlife as a project that will result in a net benefit to fish and wildlife habitat. See OAR 690-018-0040(25).
If the project meets one of the above standards, use the following formula to calculate the fees:	
	(d) Enter Percentage from Table 3, Column A = <u>100%</u>
	(e) Deduct 25% from percentage in (d) above = <u>75%</u>
	(f) Enter the lesser of (e) above or 50% <u>50%</u>
	(g) Total Fee x % waived (f) = Fee Waiver <u>\$680</u>
<i>Example: (d) = 100% - 25% (e) = 75% (max 50% waived) = Fee x 50% = Fee Waiver</i>	
Total Fee \$1360 – Fee Waiver (g) \$680 = Amount Due \$680

NOTE TO APPLICANTS

In order for your application to be processed by the Water Resources Department (WRD), this Land Use Information Form must be completed by a local government planning official in the jurisdiction(s) where your water right will be used and developed. The planning official may choose to complete the form while you wait, or return the receipt stub to you. Applications received by WRD without the Land Use Form or the receipt stub will be returned to you. Please be aware that your application will not be approved without land use approval.

This form is NOT required if:

- 1) Water is to be diverted, conveyed, and/or used only on federal lands; **OR**
- 2) The application is for a water right transfer, allocation of conserved water, exchange, permit amendment, or ground water registration modification, and **all** of the following apply:
 - a) The existing and proposed water use is located entirely within lands zoned for exclusive farm-use or within an irrigation district;
 - b) The application involves a change in place of use only;
 - c) The change does not involve the placement or modification of structures, including but not limited to water diversion, impoundment, distribution facilities, water wells and well houses; and
 - d) The application involves irrigation water uses only.

NOTE TO LOCAL GOVERNMENTS

The person presenting the attached Land Use Information Form is applying for or modifying a water right. The Water Resources Department (WRD) requires its applicants to obtain land-use information to be sure the water rights do not result in land uses that are incompatible with your comprehensive plan. Please complete the form or detach the receipt stub and return it to the applicant for inclusion in their water right application. You will receive notice once the applicant formally submits his or her request to the WRD. The notice will give more information about WRD's water rights process and provide additional comment opportunities. You will have 30 days from the date of the notice to complete the land-use form and return it to the WRD. If no land-use information is received from you within that 30-day period, the WRD may presume the land use associated with the proposed water right is compatible with your comprehensive plan. Your attention to this request for information is greatly appreciated by the Water Resources Department. If you have any questions concerning this form, please contact the WRD's Customer Service Group at 503-986-0801.

 Surface Water (name) East Fork Hood River

Estimated quantity of water needed: 1.0
 cubic feet per second
 gallons per minute
 acre-feet

Intended use of water: Irrigation
 Commercial
 Industrial
 Domestic for _____ household(s)
 Municipal
 Quasi-Municipal
 Instream
 Other _____

Briefly describe:

The Sheirbon Hill Water Conservation Project will increase summer stream flows for threatened salmon and s and increase long-term irrigation water reliability by replacing East Fork Irrigation District's Sheirbon Hill sub pipeline and installing supervisory control and data acquisition (SCADA) throughout the District. The pipeline includes the installation of one pressure reducing valve and replacement of 5,217 feet of existing wood, concrete non-pressurized PVC pipe with pressure-rated pipe, which will eliminate five end spills and five open water b lose an estimated 2 cfs. The SCADA project will install flow monitoring devices across the District, which will remote, automatic control of the District's diversion rate on the East Fork Hood River. This will help the Distri based on demand instead of their maximum allowed rate.

Note to applicant: If the Land Use Information Form cannot be completed while you wait, please have a local government representative sign the receipt at the bottom of the next page and include it with the application filed with the Water Resources Department.

For Local Government Use Only

The following section must be completed by a planning official from each county and city listed unless the project will be located entirely within the city limits. In that case, only the city planning agency must complete this form. This deals only with the local land-use plan. Do not include approval for activities such as building or grading permits.

Please check the appropriate box below and provide the requested information

- Land uses to be served by the proposed water uses (including proposed construction) are allowed outright or are not regulated by your comprehensive plan. Cite applicable ordinance section(s): HRCZO Section 3.02 - Irrigation canals... associated with a district.
- Land uses to be served by the proposed water uses (including proposed construction) involve discretionary land-use approvals as listed in the table below. (Please attach documentation of applicable land-use approvals which have already been obtained. Record of Action/land-use decision and accompanying findings are sufficient.) **If approvals have been obtained but all appeal periods have not ended, check "Being pursued."**

Local governments are invited to express special land-use concerns or make recommendations to the Water Resources Department regarding this proposed use of water below, or on a separate sheet.

Project involves property identified as 2N 10E 27 #4700 and 2N 10E 28 #1400 & #3900. All properties are zoned Exclusive Farm Use (EFU).

Name: ERIC WALKER Title: DIRECTOR
 Signature: [Signature] Phone: 541-387-6840 Date: 12/8/22
 Government Entity: HOOD RIVER COUNTY COMMUNITY DEVELOPMENT

Note to local government representative: Please complete this form or sign the receipt below and return it to the applicant. If you sign the receipt, you will have 30 days from the Water Resources Department's notice date to return the completed Land Use Information Form or WRD may presume the land use associated with the proposed use of water is compatible with local comprehensive plans.

 OWRD

I, Steve Pappas, in my capacity as Manager of East Fork Irrigation District,
 mailing address P.O. Box 162, Odell, OR 97044 telephone number (541)354-1185, being first duly sworn
 depose and say:

1. My knowledge of the exercise or status of the water right is based on (check one):

- Personal observation Professional expertise

2. I attest that:

Water was used during the previous five years on the **entire** place of use for Certificate # 92000 **OR**

My knowledge is specific to the use of water at the following locations within the last five years:

Certificate #	Township	Range	Mer	Sec	¼ ¼	Gov't Lot or DLC	Acres (if applicable)

OR

- Confirming Certificate # _____ has been issued within the past five years; **OR**
- Part or all of the water right was leased instream at some time within the last five years. The instream lease number is: _____ (Note: If the entire right proposed for transfer was not leased, additional evidence of use is needed for the portion not leased instream.); **OR**
- The water right is not subject to forfeiture and documentation that a presumption of forfeiture for non-use would be rebutted under ORS 540.610(2) is attached.
- Water has been used at the actual current point of diversion or appropriation for more than 10 years for Certificate # _____ (For Historic POD/POA Transfers)

(continues on reverse side)

3. The water right was used for: (e.g., crops, pasture, etc.): Irrigation and Industrial Use.

4. I understand that if I do not attach one or more of the documents shown in the table below to support the above statements, my application will be considered incomplete.
