SUBJECT: Water Right Transfer Application T-13416

Please find enclosed the Preliminary Determination indicating that, based on the information available, the Department intends to approve application T-13416. This document is an intermediate step in the approval process; water may not be used legally as proposed in the transfer application until a Final Order has been issued by the Department. Please read this entire letter carefully to determine your responsibility for additional action.

A public notice is being published in the Department's weekly publication and in the **Scio Tribune** newspaper, simultaneously with issuance of the Preliminary Determination. The notice initiates a period in which any person may file either a protest opposing the decision proposed by the Department in the Preliminary Determination or a standing statement supporting the Department's decision. The protest period will end 30 days after the last date of newspaper publication.

If no protest is filed, the Department will issue a Final Order consistent with the Preliminary Determination. You should receive a copy of the Final Order about 30 days after the close of the protest period.

If a protest is filed, the application may be referred to a contested case proceeding. A contested case provides an opportunity for the proponents and opponents of the decision proposed in the Preliminary Determination to present information and arguments supporting their position in a quasi-judicial proceeding.

Please do not hesitate to contact me, at corey.a.courchane@water.oregon.gov or (503) 979-3917, if I may be of assistance.

Sincerely,

Corey Courchane

**BEFORE THE WATER RESOURCES DEPARTMENT
OF THE
STATE OF OREGON**

In the Matter of Groundwater)	PRELIMINARY DETERMINATION
Registration Modification Application)	PROPOSING APPROVAL OF RECOGNITION
T-13416, Marion County)	OF A MODIFICATION FOR ADDITIONAL
)	POINTS OF APPROPRIATION

Authority

Oregon Revised Statutes (ORS) 537.610, 537.705 and 540.505 to 540.580 establish the process in which the holder of a certificate of registration may submit a request for recognition of modifications to the place of use, character of use or point of appropriation under a groundwater certificate of registration.

Oregon Administrative Rules (OAR) Chapter 690, Divisions 382 and 380 implement the statutes and provide the Department's procedures and criteria for evaluating groundwater registration modification applications.

Applicant

FULL HARVEST AGRICULTURAL HOLDCO II, LLC
PO BOX 4967
KANSAS CITY, MO 64120

Findings of Fact

1. On May 7, 2020, FULL HARVEST AGRICULTURAL HOLDCO II, LLC filed a groundwater registration modification application for additional points of appropriation under Registration Application GR-1220 (Certificate of Registration GR-1180). The Department assigned the application number T-13416.
2. On June 24, 2020, Registration Application GR-1220 (Certificate of Registration GR-1180) was assigned from WALTER GLASGOW to FULL HARVEST AGRICULTURAL HOLDCO II, LLC.
3. Notice of the application for groundwater registration modification was published on May 12, 2020, pursuant to OAR 690-382-0600. No comments were filed in response to the notice.

Pursuant to OAR 690-380-4030, any person may file a protest or standing statement within 30 days after the last date of publication of notice of this preliminary determination.
--

4. On October 1, 2021, the Department mailed a copy of the draft Preliminary Determination proposing to deny Transfer Application T-13416 to the applicant. The Department determined the proposed additional point of appropriation (APOA) identified as South Well, would likely cause an overall increase in interference with the Santiam River. The draft Preliminary Determination cover letter set forth a deadline of November 1, 2021, for the applicant to respond.
5. On October 12, 2021, the applicant contacted the Department. They inquired whether the use could be reduced from the South Well under the applicable groundwater registration, to keep the impact to the Santiam River at its current authorized degree or less. The Department determined the impact to the river could be modeled, to determine what rate would not exceed that impact with the proposed APOA. The applicant intends to convert the acreage to drip irrigation, indicating that they intend to pump less.
6. On August 16, 2022, the Department completed the modeling to determine what pumping rate for the South Well would likely cause similar or lesser depletions of the Santiam River. The Department determined that restricting pumping of the South Well (MARI 65694) to a maximum rate of not to exceed 0.3218 cubic foot per second (144.4 gallons per minute) under T-13416, will likely prevent a substantial increase in depletions of the Santiam River.
7. On August 18, 2022, the applicant responded that the reduced rate for the South Well is acceptable and asked the Department to proceed.
8. On October 20, 2022, the Department mailed a copy of the revised draft Preliminary Determination proposing to approve Groundwater Registration Modification Application T-13416 to the applicant. The revised draft Preliminary Determination cover letter set forth a deadline of November 21, 2022, for the applicant to respond. The applicant requested that the Department proceed with issuance of a Preliminary Determination and provided the necessary information to demonstrate that the applicant is authorized to pursue the transfer.
9. The groundwater registration to be modified is as follows:

Registration: Application GR-1220 (Certificate of Registration GR-1180), in the name of WALTER GLASGOW (*assigned to* FULL HARVEST AGRICULTURAL HOLDCO II, LLC)

Use: IRRIGATION of 22.0 ACRES

Tentative

Priority Date: JUNE 1945

Quantity: 300 GALLONS PER MINUTE

Source: PUMP WELL # 3

Original Point of Appropriation:

Twp	Rng	Mer	Sec	Q-Q	Measured Distances
10 S	3 W	WM	13	SW SW	PUMP WELL # 3 - 4000 FEET SOUTH AND 850 FEET EAST FROM THE NW CORNER OF SECTION 13

Original Place of Use:

IRRIGATION					
Twp	Rng	Mer	Sec	Q-Q	Acres
10 S	3 W	WM	13	SW SW	22.0

10. Groundwater Registration Modification Application T-13416 proposes additional points of appropriation from the original well as follows:

Twp	Rng	Mer	Sec	Q-Q	Measured Distances	Approximate distance from original point of appropriation in miles (mi.)
10 S	3 W	WM	13	NW SW	NORTH WELL - 1380 FEET NORTH AND 730 FEET EAST FROM THE SW CORNER OF SECTION 13	0.1 mi.
10 S	3 W	WM	24	NW NW	SOUTH WELL - 300 FEET SOUTH AND 670 FEET EAST FROM THE NW CORNER OF SECTION 24	0.3 mi.

Review Criteria for Groundwater Registration Modification Applications [OAR 690-382-0700(2)]

11. The proposed modification would not result in enlargement of the groundwater registration.
12. The proposed modification would not result in a state Scenic Waterway not receiving previously available water during periods in which streamflows are less than the quantities determined by the Department to be necessary to meet the requirements of ORS 390.835.
13. The proposed modification, as conditioned, would not result in injury to other water rights.

Determination and Proposed Action

The additional points of appropriation proposed in Groundwater Registration Modification T-13416 appear to be consistent with the requirements of ORS 537.610, 537.705, 540.505 to 540.580 and OAR 690-382-1000. If protests are not filed pursuant to OAR 690-382-0900, the modification will be approved.

If Groundwater Registration Modification T-13416 is approved, the final order will include the following:

1. The modification to Registration Application GR-1220 (Certificate of Registration GR-1180) proposed in Groundwater Registration Modification Application T-13416 is recognized. Recognition of the modification shall not be construed as a final determination of the right to appropriate groundwater under the certificate of registration or modification. Such a determination will occur in an adjudication proceeding under ORS 537.670 to 537.695.
2. The use of the water is restricted to beneficial use at the place of use described, and is subject to all other conditions and limitations contained in Registration Application GR-1220 (Certificate of Registration GR-1180) and any related decree.
3. Water shall be acquired from the same aquifer (water source) as the original point of appropriation.
4. The quantity of water diverted at the new additional points of appropriation (North Well and South Well), together with that diverted at the original point of appropriation (Pump Well #3), shall not exceed the quantity of water lawfully available at the original point(s) of appropriation (Pump Well #3).
5. The quantity of water diverted at the new additional point of appropriation (South Well) is authorized a maximum rate of not to exceed 144.4 gallons per minute (0.3218 cubic foot per second).
