**Part 2 of 5 – Temporary Transfer Application Map Checklist**

**Your temporary transfer application will be returned if any of the map requirements listed below are not met.**

**Please be sure that the temporary transfer application map you submit includes all the required items and matches the existing water right map. Check all boxes that apply.**

- N/A If **more than three** water rights are involved, separate maps are needed for each water right.
- Permanent quality printed with dark ink on good quality paper.
- The size of the map can be 8½ x 11 inches, 8½ x 14 inches, 11 x 17 inches, or up to 30 x 30 inches. For 30 x 30 inch maps, one extra copy is required.
- A north arrow, a legend, and scale.
- The scale of the map must be: 1 inch = 400 feet, 1 inch = 1,320 feet; the scale of the Final Proof/Claim of Beneficial Use Map (the map used when the permit was certificated); the scale of the county assessor map if the scale is not smaller than 1 inch = 1,320 feet; or a scale that has been pre-approved by the Department.
- Township, Range, Section, ¼ ¼, DLC, Government Lot, and other recognized public land survey lines.
- Tax lot boundaries (property lines) are required. Tax lot numbers are recommended.
- Major physical features including rivers and creeks showing direction of flow, lakes and reservoirs, roads, and railroads.
- Major water delivery system features from the point(s) of diversion/appropriation such as main pipelines, canals, and ditches.
- Existing place of use that includes separate hachuring for each water right, priority date, and use including number of acres in each quarter-quarter section, government lot, or in each quarter-quarter section as projected within government lots, donation land claims, or other recognized public land survey subdivisions. If less than the entirety of the water right is being changed, a separate hachuring is needed for lands left unchanged.
- N/A Proposed temporary place of use that includes separate hachuring for each water right, priority date, and use including number of acres in each quarter-quarter section, government lot, or in each quarter-quarter section as projected within government lots, donation land claims, or other recognized public land survey subdivisions.
- Existing point(s) of diversion or well(s) with distance and bearing or coordinates from a recognized survey corner. This information can be found in your water right certificate or permit.
- N/A If you are proposing a change in point(s) of diversion or well(s) to convey water to the new temporary place of use, show the proposed location and label it clearly with distance and bearing or coordinates. If GPS coordinates are used, latitude-longitude coordinates may be expressed as either degrees-minutes-seconds with at least one digit after the decimal (example – 42°32'15.5") or degrees-decimal with five or more digits after the decimal (example – 42.53764°).

FEE WORKSHEET for TEMPORARY DROUGHT TRANSFERS			
1	Base Fee (includes drought application and recording fee for up to 1 cfs)	1	\$200.00
2	Enter the cfs for the portions of the rights to be transferred (see example below*): <u>0.2</u> (2a) Subtract 1.0 from the number in 2a above: <u>0</u> (2b) If 2b is 0, enter 0 on line 2 » » » » » » » » » » » » » » » » If 2b is greater than 0, round up to the nearest whole number: _____ (2c) and multiply 2c by \$50, then enter on line 2 » » » » » » » » » » » » » » » »	2	0
3	Add entries on lines 1 through 2 above » » » » » » » » » » » » » » » » <b>Transfer Fee:</b>	3	\$200.00

\*Example for Line 2a calculation to transfer 45.0 acres of Primary Certificate 12345 (total 1.25 cfs for 100 acres) and 45.0 acres of Supplemental Certificate 87654 (1/80 cfs per acre) on the same land:

1. Divide total authorized cfs by total acres in the water right (for C12345,  $1.25 \text{ cfs} \div 100 \text{ ac}$ ); then multiply by the number of acres to be transferred to get the transfer cfs ( $\times 45 \text{ ac} = 0.56 \text{ cfs}$ ).
2. If the water right certificate does not list total cfs, but identifies the allowable use as 1/40 or 1/80 of a cfs per acre; multiply number of acres proposed for change by either 0.025 (1/40) or 0.0125 (1/80). (For C87654,  $45.0 \text{ ac} \times 0.0125 \text{ cfs/ac} = 0.56 \text{ cfs}$ )
3. Add cfs for the portions of water rights on all the land included in the transfer; however **do not count cfs for supplemental rights on acreage for which you have already calculated the cfs fee for the primary right on the same land.** The fee should be assessed only once for each "on the ground" acre included in the transfer. (In this example, blank 2a would be only 0.56 cfs, since both rights serve the same 45.0 acres. Blank 2b would be 0 and Line 2 would then also become 0).

Explain in your own words what you propose to accomplish with this transfer application and why:  
**The Applicant is requesting to temporarily change the place and character of use for Certificates 83252, 83560, and 65327, and temporarily change the point of diversion for Certificate 65327. The proposed changes will allow the Applicant to temporarily transfer the water associated with 8 acres of irrigation (up to 40 AF and 0.20 cfs) to support a ranch camp and temporarily change the use to quasi-municipal in response to a drought declaration in Wasco County. The changes to these certificates will last only for the 2023 irrigation season (April through September).**

If you need additional space, continue on a separate piece of paper and attach to the application as "Attachment 1".

Describe the current water delivery system or the system that was in place at some time within the last five years. Include information on the pumps, canals, pipelines, and sprinklers used to divert, convey, and apply the water at the authorized place of use. **Water is diverted using a 50 HP Cornell pump with a capacity of 800 gpm. One field is irrigated with a 570 foot Zimmatic pivot that has a capacity of 241 gpm at 60 PSI, and is equipped with a 2 HP booster pump and end gun. Another field is irrigated with a 708 foot Zimmatic pivot that has a capacity of 347 gpm at 60 psi, and is equipped with a 2 HP booster pump and end gun. Water is applied to other fields using a 750 foot wheel line with 19 heads and a total capacity of 95 gpm, a hand line with 15 heads and a total capacity of 75 gpm, and 750 foot k-line pponds with 19 heads and a total capacity of 76 gpm.**

**For Place of Use Changes**

Are there other water right certificates, water use permits or ground water registrations associated with the "from" or the "to" lands?  Yes  No

If YES, list the certificate, water use permit, or ground water registration numbers:

Pursuant to ORS 540.525, any "layered" water use such as an irrigation right that is supplemental to a primary right proposed for temporary transfer can be included in the transfer or remain unused on the authorized place of use. If the primary water right does not revert soon enough to allow use of the supplemental right within five years, the supplemental right shall become subject to cancellation for nonuse under ORS 540.610.

**If a change in point(s) of appropriation (well(s)) or additional point(s) of appropriation is necessary to convey the water to the new temporary place of use you must provide: N/A**

- Well log(s) for each authorized and proposed well(s) that are clearly labeled and associated with the corresponding well(s) in Table 1 above and on the accompanying application map. (Tip: You may search for well logs on the Department's web page at: [http://apps.wrd.state.or.us/apps/gw/well\\_log/Default.aspx](http://apps.wrd.state.or.us/apps/gw/well_log/Default.aspx))

**AND/OR**

- Describe the construction of the authorized and proposed well(s) in Table 3 below for any well that does not have a well log. For a *proposed well(s) not yet constructed or built*, provide "a best estimate" for each requested information element in the table. The Department recommends you consult a licensed well driller, geologist, or certified water right examiner to assist with assembling the information necessary to complete Table 3.

**Table 3. Construction of Point(s) of Appropriation N/A**

Any well(s) in this listing must be clearly tied to corresponding well(s) described in Table 1 and shown on the accompanying application map. Failure to provide the information will delay the processing of your transfer application until it is received. The information is necessary for the Department to assess whether the proposed well(s) will access the same source aquifer as the authorized point(s) of appropriation (POA). The Department is prohibited by law from approving POA changes that do not access the same source aquifer.

**Description of Water Delivery System**

System capacity: 0.15 cubic feet per second (cfs) **OR** (under this water right)  
\_\_\_\_\_ gallons per minute (gpm)

Describe the current water delivery system or the system that was in place at some time within the last five years. Include information on the pumps, canals, pipelines, and sprinklers used to divert, convey, and apply the water at the authorized place of use. Water is diverted using a 40 HP Cornell pump with a capacity of 600 gpm, and a 30 HP Cornell pump with a capacity of 500 gpm is used as a backup. A 460 foot Zimmatic pivot with a capacity of 166 gpm and a 2 HP booster pump and end gun is used to irrigate one field. Water is conveyed to this field with a 5 9/16 inch pipe. Water is conveyed to the larger field with a 6 5/8 inch pipe. The larger field is irrigated with a 915 foot Zimmatic pivot with a 2 HP booster pump and end gun. Another area is irrigated with a Big Gun cart with a 1 inch nozzle and 6 sticks and a 3 inch handline with 5 gpm heads.

Additional remarks: The Applicant will change the use from irrigation to quasi-municipal during the irrigation season of the drought year, and will not irrigate 0.8 acres of Certificate 65327 during this time. The Applicant understands they will be limited to a combined rate of 0.20 cfs from Certificates 83252, 83560, and 65327 (0.025 cfs/acre x 8 acres total transferred from all three Certificates). The Applicant understands they are limited to this rate and a volume of 40 AF (8 acres x 5 acre-feet/acre allowed = 40 AF) only for the irrigation season of the drought year in 2023. See the maps in Attachment B for the authorized places of use and the proposed temporary place of use.

**For Place of Use Changes**

Are there other water right certificates, water use permits or ground water registrations associated with the "from" or the "to" lands?  Yes  No

If YES, list the certificate, water use permit, or ground water registration numbers:

Pursuant to ORS 540.525, any "layered" water use such as an irrigation right that is supplemental to a primary right proposed for temporary transfer can be included in the transfer or remain unused on the authorized place of use. If the primary water right does not revert soon enough to allow use of the supplemental right within five years, the supplemental right shall become subject to cancellation for nonuse under ORS 540.610.

**If a change in point(s) of appropriation (well(s)) or additional point(s) of appropriation is necessary to convey the water to the new temporary place of use you must provide: N/A**

- Well log(s) for each authorized and proposed well(s) that are clearly labeled and associated with the corresponding well(s) in Table 1 above and on the accompanying application map. (Tip: You may search for well logs on the Department's web page at: [http://apps.wrd.state.or.us/apps/gw/well\\_log/Default.aspx](http://apps.wrd.state.or.us/apps/gw/well_log/Default.aspx))

**AND/OR**

- Describe the construction of the authorized and proposed well(s) in Table 3 below for any well that does not have a well log. For a *proposed well(s) not yet constructed or built*, provide "a best estimate" for each requested information element in the table. The Department recommends you consult a licensed well driller, geologist, or certified water right examiner to assist with assembling the information necessary to complete Table 3.

**Table 3. Construction of Point(s) of Appropriation N/A**

Any well(s) in this listing must be clearly tied to corresponding well(s) described in Table 1 and shown on the accompanying application map. Failure to provide the information will delay the processing of your transfer application until it is received. The information is necessary for the Department to assess whether the proposed well(s) will access the same source aquifer as the authorized point(s) of appropriation (POA). The Department is prohibited by law from approving POA changes that do not access the same source aquifer.

## For Local Government Use Only

The following section must be completed by a planning official from each county and city listed unless the project will be located entirely within the city limits. In that case, only the city planning agency must complete this form. This deals only with the local land-use plan. Do not include approval for activities such as building or grading permits.

**Please check the appropriate box below and provide the requested information**

- Land uses to be served by the proposed water uses (including proposed construction) are allowed outright or are not regulated by your comprehensive plan. Cite applicable ordinance section(s):
- Land uses to be served by the proposed water uses (including proposed construction) involve discretionary land-use approvals as listed in the table below. (Please attach documentation of applicable land-use approvals which have already been obtained. Record of Action/land-use decision and accompanying findings are sufficient.) **If approvals have been obtained but all appeal periods have not ended, check "Being pursued."**

RE: Drought Temporary Transfer Application - WFR Water, LLC

Dear Kelly:

WFR Water, LLC is seeking to temporarily change the place and character of use for Certificates 83252, 83560, and 65327, and temporarily change the point of diversion for Certificate 65327. The proposed changes will allow the Applicant to temporarily transfer the water associated with 8 acres of irrigation to support a ranch camp and temporarily change the use to quasi-municipal in response to a drought declaration in Wasco County. The changes to these Certificates will last only for the 2023 irrigation season (April through September).

Please find enclosed a drought temporary transfer application and related documents. Also enclosed is a check for the required processing fee of \$200.00.

Please contact me if you have any questions or concerns. My email address is KGrigsby@gsiws.com.

Sincerely,

A handwritten signature in black ink that reads "Kimberly Grigsby". The signature is written in a cursive, flowing style.

3	If 2b is 0 or less than 0, enter 0. If 2b is greater than 0, round up to the nearest whole number	_____	x \$50.00 = \$0.00
4		Total =	\$200.00

- \*Example for Line 2a calculation to transfer 45.0 acres of Primary Certificate 12345 (total 1.25 cfs for 100 acres) and 45.0 acres of Supplemental Certificate 87654 (1/80 cfs per acre) on the same land:
1. Divide total authorized cfs by total acres in the water right (for C12345,  $1.25 \text{ cfs} \div 100 \text{ ac}$ ); then multiply by the number of acres to be transferred to get the transfer cfs ( $\times 45 \text{ ac} = 0.56 \text{ cfs}$ ).
  2. If the water right certificate does not list total cfs, but identifies the allowable use as 1/40 or 1/80 of a cfs per acre; multiply number of acres proposed for change by either 0.025 (1/40) or 0.0125 (1/80). (For C87654,  $45.0 \text{ ac} \times 0.0125 \text{ cfs/ac} = 0.56 \text{ cfs}$ )
  3. Add cfs for the portions of water rights on all the land included in the transfer; however **do not count cfs for supplemental rights on acreage for which you have already calculated the cfs fee for the primary right on the same land**. The fee should be assessed only once for each "on the ground" acre included in the transfer. (In this example, blank 2a would be only 0.56 cfs since both rights serve the same 45.0 acres. Blank 2b would be 0 and Line 2 would then also become 0).
