

Application for  
**Surface Water**  
**Allocation of Conserved Water**  
 Part 1 of 4 – Minimum Requirements Checklist

**This application will be returned if Parts 1 through 4 and all required attachments are not completed and included.**  
 For questions, please call (503) 986-0900, and ask for Allocation of Conserved Water Section.

Check all items included with this application. (N/A = Not Applicable)

- Part 1 – Completed Minimum Requirements Checklist.
- Part 2 – Completed Applicant Information and Signature.
- Part 3 – Completed Water Right Information and Conservation Measures. Please include a separate Part 3 for each water right. List all water right certificates involved in this application here: **95971**.
- Part 4 – Completed Mitigation, Proposed Use, Project Schedule, Funding, and Fee Calculation.

**Attachments:**

- Fees – Amount enclosed: \$ 600 (From last page of application).
- Application Map. Must have sufficient detail to locate and describe the facilities and areas involved in the conservation measures. Must show the place of use where water is being used if the rate or duty are changing.
- Land Use Information Form with approval and signature. (Not required if 100% of Conserved Water is being transferred instream.) **or**  
 Land Use Notice - Notice of the intent to create an instream water right must be provided to each affected county, city, municipal corporation, or tribal government along the proposed instream reach.
- Completed Evidence of Use Affidavit and Supporting Documentation.
- N/A Affidavit(s) of Consent.
- N/A Letter of approval from Irrigation or Water Control District. For water rights served by or issued in the name of a District; this must be provided when the applicant is not the District.
- N/A Irrigation or Water Control District’s adopted policy on allocation of conserved water.
- N/A If construction of the project has begun or been completed and if more than 25 percent of the project costs have been expended before applying for allocation of conserved water, evidence that you have attempted to identify and resolve the concerns of water right holders in the area, governmental entities or other organizations who have asked to be consulted regarding the allocation of conserved water.
- N/A Evidence for Fee Waiver.
- N/A Notice of Completion.
- N/A Request for Finalization. (The entire conservation project listed on the application must be complete. No partial finalization will be recognized.)

## Part 2 of 4 – Applicant Information and Signature

### Applicant Information

APPLICANT/BUSINESS NAME <b>Three Sisters Irrigation District</b>			PHONE NO. 541-549-8815	ADDITIONAL CONTACT NO.
ADDRESS P.O. Box 2230			FAX NO.	
CITY SISTERS	STATE OR	ZIP 97759	E-MAIL OFFICE@TSIDWEB.ORG	

The applicant is an irrigation district organized under ORS Chapter 545 or a water control district organized under ORS Chapter 553. The District's OAR 690-018-0025 allocation of conserved water policy was adopted: 09/01/2015.

OR

The applicant is the sole owner of the land on which the water right, or portion thereof, proposed for conservation measures is located?  Yes  No

If NO, include signatures of all landowners (and mailing address if different than the applicant's) or attach affidavits of consent (and mailing addresses) from all landowners or individuals/entities to which the water right(s) has been conveyed.

LANDOWNER NAME		PHONE NO.		
ADDRESS				
CITY	STATE	ZIP	E-MAIL	

**Representative Information** – The person(s) listed below is/are authorized to represent the applicant in all matters relating to this application.

REPRESENTATIVE/BUSINESS NAME DESCHUTES RIVER CONSERVANCY			PHONE NO. 541-382-4077 x116	ADDITIONAL CONTACT NO.

Salem, OR

In your own words tell us what physical conservations measures you have made or propose to make and the reason for the change(s): The District is replacing approximately 24,300 feet of open ditch on its Cloverdale Lateral with buried high-density polyethylene (HDPE) starting with 24" pipe and diminishing to 12" pipe near McKenzie Reservoir. The piped lateral will then be backfilled and reseeded where necessary. Approximately 2,615 feet of the piping project is funded by OWEB and the National Fish and Wildlife Foundation (NFWF) with its conserved water to be protected instream. This is a multi-phase 2021 to 2024 project. The piping eliminates water seepage and evaporation losses, and results in the conservation of 0.33 cubic feet per second (cfs) of water, 100% of which will be dedicated instream. The amount of conserved water is based on a seepage loss study completed for CW-33. This project completes the piping of the entire remaining length of the Cloverdale Lateral(s) and works with the NRCS to improve farm deliveries to about 641 acres acres of farms. Combined with CW-33 piping, the Cloverdale lateral serves 760.7 acres of farms. The District will allocate the Conserved Water to instream use through Oregon's Allocation of Conserved Water statutes (ORS 537.455-537.500) and permanently reduce the rate for the 1895 priority date on The District's Water Right Certificate number 95971 by 0.33 cfs. This flow will add to instream flows necessary for reintroduced steelhead as well as for resident redband and the occasional bull trout that makes its way up Whychus Creek. This conservation has also paved the way to further on-farm conservation. Combined, this work will result in improved flow in Whychus Creek, improved reliability and ability to measure and manage water use on farms, reduced energy use with the delivery of pressurized water and reduced reliance on pumps. NRCS provided project engineering including for landowner efficiency improvements. Landowners are participating through separate agreements with the NRCS and are notified of project happenings through NRCS. These are private agreements between NRCS and landowners and not available to the DRC/TSID. Construction of this project began in the winter of 2021/2022 and will be completed by winter 2023/2024.

 To meet State Land Use Consistency Requirements, you must list all local governments (each county, city, municipal corporation, or tribal government) within whose jurisdiction the conservation project and/or proposed instream reach will be located.

County: Deschutes

Describe the pre-project water delivery system. Include information on the diversion structure, pumps, and conveyance facilities (including canals, pipelines and sprinklers used to divert, convey and apply the water at the authorized place of use). *Provide sufficient detail for the Department to determine the system capacity.* The TSID Main Canal diversion structure is located south of the town of Sisters on Whychus Creek at approximate river mile 24.5 at T.15S, R10E, Sec.21, SW/SW. Diverted water passes through a horizontal dual bay fish screen and into dual 54" buried pipelines with 160 cfs capacity. After approximately 3.8 miles, the water flows into Watson Reservoir at the TSID main office about 4 miles East of Sisters. From Watson Reservoir, water runs through the Main Canal and Cloverdale Lateral (capacity of 15.5 cfs) diminishing in size to the McKenzie Reservoir. Along the way, the canals feed a series of private ditches, each with their own head gates and measuring devices. The Cloverdale Lateral originates between TSID main canal piped Phases 7 and 8 to feed a series of private ditches before ending at the McKenzie Canyon Reservoir. Several miles of the Cloverdale lateral were piped in CW-33 – the rest of the ditch and ditch spur were still an open dirt and rock ditch. With the completion of the Cloverdale piping, a total of 24,300 additional feet of lateral canals and ditches will be piped, and irrigators will have pressurized water from the installed pipelines and will have reduced reliance on electric pumps.

**Table 1: Pre-Project Description**

List: A) the maximum rate and annual duty (volume) of water that may be diverted **as stated on the water right of record**; and B) the maximum amount of water that can be diverted using the pre-project facilities ("**system capacity**"). If there are multiple priority dates on the water right, list the rate and duty associated with each priority date. (If the water right is only limited by rate, do not list a duty. Conversely, if the water is only limited by duty, do not list a rate).

PRE-PROJECT DESCRIPTION								
			Column A Water Right of Record				Column B System Capacity	
			Rate		Duty		Rate	Duty
Originating Water Right #	Priority	Acres	Maximum CFS	CFS/AC	Maximum AF	AF/AC	Maximum CFS	Maximum AF

Describe the type of conservation measures, check all that apply:

- On-Farm efficiency project
- Distribution project, such as a ditch piping or lining project
- Other: \_\_\_\_\_

Received by OWRD

MAY 26 2023

Salem, OR

Describe the proposed changes to the physical system, operations and application methods that will result in the conservation of water. If these proposed changes will change the point of diversion, you must meet the ODFW fish screen and bypass requirements pursuant to ORS 540.525. *Please include a description and details of how the estimate of water conserved was determined. Please provide sufficient detail for the Department to provide notice of the project.*

Diverted water passes through a horizontal dual bay fish screen and into dual 54" buried pipelines with 160 cfs capacity. After approximately 3.8 miles, the water flows into Watson Reservoir at the TSID main office about 4 miles East of Sisters. From Watson Reservoir, water runs through the Main Canal and Cloverdale Lateral to the McKenzie Reservoir. Along the way, the canals feed a series of private ditches, each with their own head gates and measuring devices. The Cloverdale Lateral originates between TSID main canal piped Phases 7 and 8 to feed a series of private ditches before ending at the McKenzie Canyon Reservoir and has a capacity of 15.5 cfs. The District will complete the replacement of approximately 24,300 feet of open ditches on its Cloverdale lateral with buried high density polyethylene (HDPE) pipe (24" diminishing to 12") eliminating water seepage and evaporation losses, and resulting in the conservation of 0.33 cubic feet per second (cfs) of water. The District will allocate 100% of the Conserved Water for the portion of the project funded by OWEB and the National Fish and Wildlife Foundation to instream use through Oregon's Allocation of Conserved Water statutes (ORS 537.455-537.500) and permanently reduce the rate for the 1895 priority date on The District's Water Right Certificate number 95971 by 0.33 cfs. Refer to Exhibit K for additional details.

**Existing Point(s) of Diversion:**

Twp		Rng		Sec	¼	¼	Tax Lot	Gvt Lot or DLC	Measured Distances or Latitude and Longitude
15	S	10	E	21	SW	SW			998 feet North and 1211 feet East from the SW Corner of Section 21

**Place of Use Involved in Conservation Measures:**

List only the part of the right that will be affected. If the entire right is being affected, just state "entire Certificate."

Twp		Rng		Sec	¼	¼	Tax Lot	Gvt Lot or DLC	Acres	Type of Use listed On Certificate	Priority Date
2	S	9	E	15	NE	NW	290	43	153.0	EXAMPLE	1/1/1865
Entire Certificate											
<b>Total</b>											

Are there other water right certificates, water use permits, ground water registrations, or uncertificated decreed rights associated with the above lands?  Yes  No. If YES, list the certificates, water use permits, groundwater registrations, or uncertificated decree numbers: \_\_\_\_\_

Is the project within the boundaries of an irrigation district or water control district?  Yes  No. If YES, and applicant is not a District, you must provide a letter of approval from the District.

**Table 2: Conserved Water**

In Column A, list the smaller of A or B from Table 1 (Pre-Project Description). In Column B, list the amount of water that will be needed for the existing, authorized use(s) after implementing the conservation measures. In Column C, subtract Column B from Column A and enter the results (e.g., A – B = C). (If the water right is only limited by rate, do not list a duty; and conversely, if the water is only limited by duty, do not list a rate.)

Conserved Water Description										
	Column A				Column B				Column C	
	Table 1 – Smaller of A or B				Needed				Conserved Water	
	Rate		Duty		Rate		Duty		Rate	Duty
Priority	Maximum CFS	CFS/AC	Maximum AF	AF/AC	Maximum CFS	CFS/AC	Maximum AF	AF/AC	Maximum CFS	Maximum AF
1895	88.21	0.02	NA	NA	87.88	0.02	NA	NA	0.33	NA
<b>*Totals</b>	88.21				87.88				0.33	

\*All priority dates on the certificate total 118.95 cfs, after this ACW the total will be 118.62 cfs.

**Table 3: Allocation of Conserved Water**

List the portions of the conserved water that will be allocated to the state and applicant. Note: Column A plus Column B should total Column C (e.g., A + B = C).

Conserved Water Allocation								
Column A			Column B			Column C		
State's Portion			Applicant's Portion			Conserved Water		
Percentage*	Maximum Rate	Maximum Duty (Volume)	Percentage	Maximum Rate	Maximum Duty (Volume)	Percentage	Maximum Rate	Maximum Duty (Volume)
100%	0.33	140.1	%			100%	0.33	140.1

\* must be at least 25%

Received by OWRD

The priority for the conserved water is requested to be:

MAY 26 2023

- The same as the original right, or
- One minute junior to the original right.

Salem, OR

MAY 26 2023

Salem, OR

**Part 4 of 4 – Mitigation, Proposed Use,  
Project Schedule, Funding, and  
Fee Calculation**

**MITIGATION:**

Describe any expected effects from the proposed allocation of conserved water on other water rights. Describe what currently happens to the water that is proposed to be conserved.

The water conserved from this project is currently lost from the system, primarily through seepage into the porous, volcanic soil underlying the canal. The water that is lost from the system through seepage is not available to other appropriators on Whychus Creek. It eventually enters the Deschutes River or its tributaries near Lake Billy Chinook. Conservation projects that apply this conserved water to a new consumptive use have the potential to reduce stream flows entering the lower Deschutes River, potentially injuring instream water rights. This project expressly intends to produce no net change in consumptive use. As a whole, this project ensures that no harm to lower Deschutes River water rights will occur.

Describe any mitigation or other measures that are planned to avoid harm to other water rights. No harm to other water rights will occur from this project.

**PROPOSED USE:**

**New Out-of Stream Uses:**

N/A For new out-of-stream uses, describe the intended use and boundaries of the expected area within which the diversion structures and places of use of the applicants' conserved water right will be located. This is land other than that to which this water right is appurtenant. Intended Use: \_\_\_\_\_; Boundaries: \_\_\_\_\_.

Will the new use require a change or additional point of diversion/appropriation?

Yes  No  Unknown at this time

**New Point of Diversion:**

Twp	Rng	Sec	¼	¼	Tax Lot	Gvt Lot or DLC	Measured Distances or Latitude and Longitude

**New Instream Uses to be Created (State's Portion):**

Originating Surface Water Right (as identified in Part 3)	Priority Date	Source	Proposed Instream Period	Rate (cfs)*	Volume (ac-ft)**
95971	1895	Whychus Creek	4/1-10/31	0.33	140.1
<b>TOTAL VOLUME</b>					140.1

\* To calculate rate (if other than the rate allowed by the right), divide the volume by the number of days in the period and then divide by 1.983471; or

\*\* To calculate volume, multiply the rate by the number of days in the instream period and then multiply by 1.983471.

**Note:** The instream rate may not exceed the maximum rate conserved and the total volume may not exceed to maximum duty or volume conserved (Table 3, Column C).

**Location of the proposed instream water right.**

Water is requested to be protected within a reach. Location of the proposed reach (identify the extent of the reach): *(e.g., from the upstream POD located at RM \_\_\_ to downstream location at the mouth at RM \_\_\_)* The proposed permanent instream water right will be for 0.33 cfs and 140.1 acre-feet. This quantity of water will be protected instream from the TSID POD south of the town of Sisters on Whychus Creek at approx. river mile 23.5 at T.15S, R10E, Sec.21, SW/SW and permanently protected instream to the confluence of Whychus Creek and then into the mainstem Deschutes River to Lake Billy Chinook. The season of use will be from April 1st through October 31st and any other time (such as during stock runs) that TSID is diverting water from Whychus Creek

**OR**

Water is requested to be protected at a point at the following location (i.e. legal description of the point of diversion (POD)): \_\_\_\_\_

**Public Use for which conserved water right should be managed under an instream right (check at least one box):**

- Conservation, maintenance and enhancement of aquatic and fish life, wildlife, fish and wildlife habitat, and other ecological values.
- Recreation and scenic attraction.
- Water Quality (e.g. pollution abatement).

Received by OWRD

MAY 26 2023

**List any existing instream water rights at the same point or within the same requested reach(es):**

- None.
- Instream Water Right Certificates: There are multiple permanent instream water right certificates and instream leases within all or a portion of the requested reach. They are managed and tracked by OWRD.

Salem, OR

N/A Is it your intent to have the proposed instream water right transfer be additive to any instream water right established under ORS 537.348 (instream transfer application process) and ORS 537.470 (allocation of conserved water) and replace a portion of any instream water right established under ORS 537.341 (state agency application process) and ORS 537.346 (conversion of minimum perennial streamflows) with an earlier priority date?

Yes       No. If no, please explain your intent below:

Is the requested instream flow intended to exceed the estimated average natural flow or natural lake level occurring from the drainage system?

- No; **OR**
- Yes (Provide supporting documentation that demonstrates why additional flows are significant for the public use requested.); **OR**
- Yes, and it is presumed that flows that exceed the estimated average natural flow or natural lake levels are significant because:
  - The requested flow does not exceed the maximum amount of any instream water right applied for under ORS 537.338 (state agency instream water right application process); the requested public use is for the same public use; and the requested reach covers a portion or same reach as the state agency instream water right; **and**

- The stream is in an ODFW flow restoration priority watershed during the requested instream period; **or**
- The stream is listed as water quality limited by DEQ.

Received by OWRD

**FUNDING**

N/A Federal or state public funds that are not subject to repayment are to be used for the project. Refer to OAR 690-018-0040(18)(a)-(d) for further information in completing this section.

Source of Funding:  Federal: 25% National Fish and Wildlife Foundation  State: 75% Oregon Watershed Enhancement Board (TSID Cloverdale Lateral, 220-8200-18650)

Total cost for project engineering \$NRCS  
Total cost for construction \$150,030 for non-NRCS portion of project

The present value of any incremental changes in the cost of operations and maintenance that are directly attributable to the project that would not be incurred or realized in the absence of the project is \$\*.

(\*Pressurized delivery as a result of this project will eliminate the need for on farm pumping. In addition, TSID has installed a small hydro facility near the end of this project which will generate income.)

The amount of funding and the value of any in-kind contributions for project engineering and construction and for any incremental changes in the costs of operations and maintenance to be provided from federal or state public funds that are not subject to repayment is \$ In-kind in fill dirt from TSID for this portion of the project – estimated at \$9,600.

The amount of funding and the value of any in-kind contributions for project engineering and construction and for any incremental change since costs of operations and maintenance to be provided from other funds is \$0.

N/A Enter the percentage from Table 3, Column B (Applicant’s Portion of Conserved Water) \_\_\_\_%. If this is more than 25%, what portion of project funds (expressed as a percentage) come from federal or state public sources? \_\_\_\_%

N/A The Oregon Watershed Enhancement Board (OWEB) has a contractual interest in this project. The OWEB project number is 220-8200-18650.

**FEE CALCULATION**

Fee Schedule – ORS 536.050 <a href="https://www.oregon.gov/OWRD/Forms/Pages/default.aspx">https://www.oregon.gov/OWRD/Forms/Pages/default.aspx</a>	
\$1,360.00 - Base (1 <sup>st</sup> Water Right)	Add \$480.00 for each additional right
$\$1,360 + (0 \times \$480) = \text{Total Fee } \$ 1,360$	

Fee Waiver Worksheet	
To qualify for a waiver of up to 50%, you must provide evidence to establish your application meets the following criteria:	
X	(a) Will be converted to an instream right pursuant to ORS 537.348; <b>or</b>
X	(b) Is necessary to complete a project funded under ORS 541.375 (OWEB); <b>or</b>
	(c) Is approved by the Oregon Department of Fish and Wildlife as a project that will result in a net benefit to fish and wildlife habitat. See OAR 690-018-0040(25).
If the project meets one of the above standards, use the following formula to calculate the fees:	
	(d) Enter Percentage from Table 3, Column A = <u>100 %</u>
	(e) Deduct 25% from percentage in (d) above = <u>75 %</u>
	(f) Enter the lesser of (e) above or 50% <u>50 %</u>
	(g) Total Fee x % waived (f) = Fee Waiver <u>\$680</u>

Received by OWRD

MAY 26 2023

Salem, OR

	<i>Example: (d) = 100% - 25% (e) = 75% (max 50% waived) = Fee x 50% = Fee Waiver</i>
	<b>Total Fee <u>\$1,360</u> – Fee Waiver (g) <u>\$680</u> = Amount Due <u>\$680</u></b>

STATE OF OREGON

COUNTIES OF DESCHUTES AND JEFFERSON

CERTIFICATE OF WATER RIGHT

Received by OWRD

MAY 26 2023

Salem, OR

THIS CERTIFICATE ISSUED TO

THREE SISTERS IRRIGATION DISTRICT  
PO BOX 2230  
SISTERS, OREGON 97759

confirms the right to use the waters of WHYCHUS CREEK, a tributary of THE DESCHUTES RIVER, for  
7276.56 ACRES FOR IRRIGATION (IR),  
5.00 ACRES-EQUIVALENT (AC-EQ) FOR INDUSTRIAL USE (IM),  
78.34 ACRES-EQUIVALENT FOR POND MAINTENANCE (PM), AND  
LIVESTOCK (LV).

This right was confirmed by decree of the Circuit Court of the State of Oregon for CROOK County. The decree is of record at Salem, in the Order Record of the WATER RESOURCES DIRECTOR, in Volume 1, at Pages 121, 122, 123, 124, 435, 438, 445, 472, and 473. The dates of priority are 1869, 1885, 1887, 1889, 1893, 1895, 1899, 1901, 1903, and 1904.

The amount of water to which this right is entitled is limited to an amount actually beneficially used and shall not exceed 118.95 CUBIC FEET PER SECOND (CFS), or its equivalent in case of rotation, measured at the point of diversion from the source.

**NOTICE OF RIGHT TO PETITION FOR RECONSIDERATION OR JUDICIAL REVIEW**

This is an order in other than a contested case. This order is subject to judicial review under ORS 183.484. Any petition for judicial review must be filed within the 60-day time period specified by ORS 183.484(2). Pursuant to ORS 536.075 and OAR 137-004-0080, you may petition for judicial review or petition the Director for reconsideration of this order. A petition for reconsideration may be granted or denied by the Director, and if no action is taken within 60 days following the date the petition was filed, the petition shall be deemed denied.

The maximum diversion rate by priority date is as follows:

Priority	Acres or Ac-Eq	Maximum Rate (CFS)
1869	48.00	0.96
1885	27.05	0.54
1887	150.00	3.00
1889	201.50	3.94
1893	39.50	0.79
1895	5715.55	88.21
1899	108.80	2.03
1901	22.30	0.45
1903	344.00	6.37
1904	703.20	12.66
<b>Total</b>	<b>7359.90</b>	<b>118.95</b>

Received by OWRD

MAY 26 2023

Salem, OR

The point of diversion is located as follows:

POD #	TWP	RNG	MER	SEC	Q-Q	MEASURED DISTANCES
1	15 S	10 E	WM	21	SW¼ SW¼	998 FEET NORTH AND 1211 FEET EAST FROM THE SW CORNER OF SECTION 21

The amount of water used for irrigation, together with the amount secured under any other right existing for the same lands, is limited to ONE- FIFTIETH of one cubic foot per second per acre, or its equivalent for each acre irrigated during the irrigation season of each year.

The description of the place of use to which this right is appurtenant is as follows:

**Water Use Measurement Conditions:**

- a. TSID shall maintain, monitor, and operate the existing measurement devices, or such other suitable measurement devices approved by the Director, on TSID's main canal in such a manner as to render reliable measurements of the diversion of Whychus Creek.
- b. TSID shall maintain the meters or measuring devices in good working order.
- c. TSID and the water users shall allow the Watermaster access to the meters or measuring devices; provided however, where the meters or measuring devices are located within a private structure, the Watermaster shall request access upon reasonable notice.

**Water Right Actions Confirmed by this Certificate**

The issuance of this certificate confirms satisfactory proof of completion of the changes approved in the orders listed in Table 1, below.

\*A Determination of Satisfactory Proof confirms the status of that portion of the water right for up to five years beyond the Order Date.

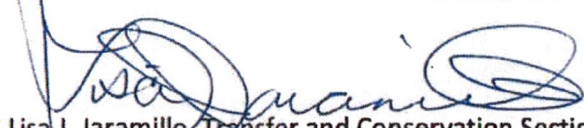

In addition, this Certificate includes the portion of the originating water right Certificate 74135, NOT modified by the provisions of orders listed in Tables 1, and 2, above. This certificate also corrects certain places of use to correspond to the standard public land survey grid as redescribed in T-11879.

This certificate together with Certificate 91545 (T-8473/CW-30) supersedes water right certificate 74135.

The issuance of this superseding certificate confirms only the status of the portion of the water right affected by water right actions listed as confirmed in Table 1, above. The issuance of this superseding certificate does not confirm any other portion of the water right in regard to the provisions of ORS 540.610 pertaining to forfeiture or abandonment.

The right to the use of the water for the above purposes is restricted to beneficial use on the lands or place of use described and is subject to all other conditions and limitations contained in said decree.

Signed at Salem, Oregon on APR 11 2022.

Lisa J. Jaramillo, Transfer and Conservation Section Manager, for

**Applicable Law**

Any person or group of persons holding a water use subject to transfer as defined in ORS 540.505 may submit an application for an Allocation of Conserved Water to the Water Resources Commission for a conservation project that has not yet been implemented or was implemented within five years prior to the submission of the application. ORS 537.465. Under the Allocation of Conserved Water Program, a portion of the water proposed to be conserved by an applicant may be used on additional lands, put to a different use, or be leased or sold to another user. OAR 690-018-0010.

After determining any quantity of water needed to mitigate the effects on other water rights, 25-percent of the conserved water shall be allocated to the state and 75-percent to the applicant unless the applicant proposes a higher allocation to the state or more than 25-percent of the funds used to finance the conservation measures comes from federal or state sources not subject to repayment. ORS 537.470(3).

An application for an allocation of conserved water shall include: (a) A description of the proposed measures; (b) A description of the existing diversion facilities and an estimate of the amount of water that can be diverted at the facilities; (c) The amount of water that will be needed for the original, authorized use after implementation of the conservation measures; (d) The amount of conserved water expected from implementation of the conservation measures; (e) The proposed allocation and use of the conserved water if different from the allocation specified in ORS 537.470; (f) The intended use of any water allocated to the applicant; (g) The applicant's choice of priority date for the conserved water; and (h) Any other information the commission considers necessary to evaluate the effectiveness of the proposal. ORS 537.465.

**NOTICE OF RIGHT TO PETITION FOR RECONSIDERATION OR JUDICIAL REVIEW**

This is final order is subject to judicial review by the Court of Appeals under ORS 183.482. Any petition for judicial review must be filed within the 60-day time period specified by ORS 183.482(1). Pursuant to ORS 536.075 and OAR 137-003-0675, you may petition for judicial review or petition the Director for reconsideration of this order. A petition for reconsideration may be granted or denied by the Director, and if no action is taken within 60 days following the date the petition was filed, the petition shall be deemed denied.

If a person proposes conservation measures within the boundaries of an irrigation district organized under ORS chapter 545 or a water control district organized under ORS chapter 553, at the time the person submits the application, the person also must submit evidence that the district has approved the conservation application. ORS 537.465.

If an application for the allocation of conserved water is approved, the Department shall issue orders describing the changes in the original water rights and once the conservation project is finalized, new certificates preserving the previously established priority of rights shall be issued describing the unaffected portion of the water rights and separate new certificates documenting the rights created by the allocation of conserved water. ORS 537.470(6).

ORS 537.455 to 537.500 authorize and establish the process in which a water right holder may submit a request for an allocation of conserved water. OAR Chapter 690, Division 18, implements the statutes and provides the Department's procedures and criteria for evaluating allocation of conserved water applications. OAR Chapter 690, Division 077 provides additional criteria for evaluating proposed instream water rights. The statutes and rules outlined above require the Department to review the application and any comments received to make its findings and determinations.

**Findings of Fact**

1. On May 8, 2018, Three Sisters Irrigation District filed an Allocation of Conserved Water Application. The Department designated the application number CW-103.
2. The conservation project involved replacing approximately 4,000 feet of open ditch on its main canal with buried high density polyethylene (HDPE) pipe. Replacement of the existing open and leaky portions of the delivery system will eliminate seepage and evaporation losses conserving approximately 636.7 acre feet of water per year.
3. Canal or lateral piping with HDPE pipe is a proven water conservation technique.
4. An Order Approving Allocation of Conserved Water CW-103 (Approval Order) was signed on August 30, 2018, and mailed on August 31, 2018. The order is recorded at Special Order Volume 109, Pages 284-296.
5. The Approval Order established the quantities of water conserved and allocated as follows:

CONSERVED WATER DESCRIPTION						
Priority	State's Portion		Applicant's Portion		Conserved Water	
	Maximum Rate (CFS)	Percentage	Maximum Rate (CFS)	Percentage	Maximum Rate (CFS)	Maximum Duty (Volume) AF
1895	1.50	100 %	0	0%	1.50	636.7

Received by OWRD

MAY 26 2023

Salem, OR

6. The Approval Order established the reduced rates for the existing uses under Certificate 74135 as follows:

Priority Date	Maximum Rate (cfs)	Acres (Equivalent)
1869	0.96	48.00
1885	0.54	27.05
1887	3.00	150.00
1889	3.94	201.50
1893	0.79	39.50
1895	88.21	5716.75
1899	2.03	108.80
1900	0.00	0.00
1901	0.45	22.30
1903	6.37	344.00
1904	12.66	703.20
Totals	118.95	7361.10

Received by OWRD

MAY 26 2023

Salem, OR

Any previously approved or pending transfers, cancellations, allocations of conserved water, or other modifications to Certificate 74135, which are not listed in the Approval Order, will cause a corresponding change to the rate, duty and total number of acres served by Certificate 74135.

7. The Approval order established the priority date for any conserved water to be the same as the originating right.
8. The Approval Order established a deadline of August 31, 2018, for the Notice of Completion to be filed. The Approval Order established a deadline of October 1, 2018, for the Request for Finalization form to be submitted.
9. On October 4, 2018, the Applicants submitted a Notice of Completion Form and a Request for Finalization.

#### Conclusions of Law

The Findings of Fact and Conclusions of Law set forth in the Final Order Approving Allocation of Conserved Water CW-103, recorded at Special Order Volume 109, Pages 284-296, are incorporated as if set forth fully herein. The project described in Allocation of Conserved Water Application CW-103, is consistent with the criteria in ORS 537.455 to 537.500, and OAR Chapter 690, Divisions 018 and 077.

#### Now, therefore, it is ORDERED:

1. The project is complete and no additional time is needed for finalization.
2. The right to the use of the water is restricted to beneficial use at the places of use described, and is subject to all other conditions and limitations contained in Certificate 74135 and any related decree.

3. Water Right Certificate 74135 is modified. The reduced rates for the existing uses under Certificate 74135 are as follows:

**Use:** IRRIGATION, POND MAINTENANCE, INDUSTRIAL USE, AND STOCK WATER  
**Limit/Duty:** 1/50 Cubic Foot per Second per Acre, as modified by prior conserved water applications  
**Source:** WHYCHUS [SQUAW] CREEK, tributary to the DESCHUTES RIVER  
**Priority, Rate, Acreage:**

Priority Date	Maximum Rate (cfs)	Acres (Equivalent)
1869	0.96	48.00
1885	0.54	27.05
1887	3.00	150.00
1889	3.94	201.50
1893	0.79	39.50
1895	88.21	5716.75
1899	2.03	108.80
1900	0.00	0.00
1901	0.45	22.30
1903	6.37	344.00
1904	12.66	703.20
Totals	118.95	7361.10

Received by OWRD

MAY 26 2023

Salem, OR

4. Water Use Measurement Conditions:
- TSID shall maintain, monitor, and operate the existing measurement devices, or such other suitable measurement devices approved by the Director, on TSID's main canal in such a manner to render reliable measurements.
  - TSID shall maintain the meters or measuring devices in good working order.
  - TSID and the water users shall allow the Watermaster access to the meters or measuring devices; provided however, where the meters or measuring devices are located within a private structure, the Watermaster shall request access upon reasonable notice.
5. An instream water right certificate shall be issued for Whychus Creek to provide for the conservation, maintenance and enhancement of aquatic and fish life, wildlife, fish and wildlife habitat, other ecological values, and recreation from the authorized point of diversion at approximately River Mile 24.5:

Twp	Rng	Mer	Sec	Q-Q	Measured Distances
15 S	10 E	WM	21	SW SW	998 FEET NORTH AND 1211 FEET EAST FROM THE SW CORNER OF SECTION 21

To the mouth of Whychus Creek at the confluence with the Deschutes River at RM 0.0, then into the Deschutes River to Lake Billy Chinook as follows:

**Whychus Creek, tributary to the Deschutes River**

Priority Date	Period of Use	Location	Rate (CFS)
1895	April 1 through October 31	Reach 1: At the Authorized POD at approximately RM 24.5 to the confluence of Whychus Creek with the Deschutes River (RM 0.0)	1.50

**Deschutes River, tributary to the Columbia River**

Priority Date	Period of Use	Location	Rate (CFS)
1895	April 1 through October 31	Reach 2: From the confluence of Whychus Creek with the Deschutes River (RM 0.0) to Lake Billy Chinook at RM 120	1.50

Within the described instream reach, stream channel losses and gains calculated based on available data and the use of senior appropriators will determine the amount of water to which this right is entitled downstream from the original point of diversion and within the specified stream reach from the point of diversion to the mouth of Whychus Creek and whether the described instream flows below the point of diversion may be adjusted. If adjusted, instream flows from immediately below the point of diversion to the mouth of Whychus Creek and into the Deschutes River to Lake Billy Chinook may not exceed the quantities specified at the point of diversion.

The instream right created shall be additive to any instream water rights established pursuant to ORS 537.341, 537.346, 537.348 or 537.470 during the months of April through October for the portion of the reach extending from approximately T15S, R10E, Section 21 (approximately RM 24.5) to the confluence with Indian Ford Creek (just upstream from RM 20)] and during the period July 10 through October 15 for the portion of the reach extending from T14S, R10E, Section 26 (approximately RM 16) to the mouth of Whychus Creek. In other portions of the identified reach, the quantities protected instream may be additive to other existing water rights established under ORS 537.348 and 537.470 and may replace a portion of existing water rights established under ORS 537.341 or 537.346 with an earlier priority date, unless otherwise specified in an order approving a new instream water right under these statutes.

Dated at Salem, Oregon this 19<sup>th</sup> day of October, 2018.

RE: PROPOSED INSTREAM WATER TRANSFER(S) IN YOUR JURISDICTION

---

We are notifying you of our intent to transfer a portion of a water right to instream use. Three Sisters Irrigation District will submit an application to the Oregon Water Resources Department changing the place of use and type of use of a portion of its Whychus Creek water right from an out-of-stream use to permanent instream use. This will create an instream water right from the Three Sisters Irrigation District's diversion structure upstream of Sisters to Lake Billy Chinook.

Three Sisters Irrigation District started piping approximately 24,900 feet of the Cloverdale Lateral off its main canal in the Fall of 2021 and will continue into Spring 2024. The project will generate 140.1 acre-feet of conserved water that will be allocated permanently instream, restoring stream flows by 0.33 cfs. If you have any questions regarding the proposed application(s), or are interested in receiving additional information, please contact me at the number or email listed below.

Sincerely,

Gen Hubert, Senior Program Manager  
(541) 382 – 4077, x116 (office)

I, MARK THALACKER, in my capacity as TSID MANAGER,  
 mailing address P.O. BOX 2230, SISTERS, OR 97759  
 telephone number (541)549-8815, being first duly sworn depose and say:

Received by OWRD

MAY 26 2023

Salem, OR

1. My knowledge of the exercise or status of the water right is based on (check one):

- Personal observation                       Professional expertise

2. I attest that:

Water was used during the previous five years on the **entire** place of use for Certificate # 95971 (SUPERSEDES 74135); **OR**

My knowledge is specific to the use of water at the following locations within the last five years:

Certificate #	Township	Range	Mer	Sec	¼ ¼	Gov't Lot or DLC	Acres (if applicable)

OR

- Confirming Certificate # \_\_\_\_\_ has been issued within the past five years; **OR**
- Part or all of the water right was leased instream at some time within the last five years. The instream lease number is: MULTIPLE LEASES ANNUALLY (Note: If the entire right proposed for transfer was not leased, additional evidence of use is needed for the portion not leased instream.); **OR**
- The water right is not subject to forfeiture and documentation that a presumption of forfeiture for non-use would be rebutted under ORS 540.610(2) is attached.
- Water has been used at the actual current point of diversion or appropriation for more than 10 years for Certificate # \_\_\_\_\_ (For Historic POD/POA Transfers)

(continues on reverse side)

3. The water right was used for: (e.g., crops, pasture, etc.): IRRIGATION - INCLUDING CROPS AND PASTURES, INDUSTRIAL, STOCK WATER, POND MAINTENANCE, AND INSTREAM LEASE OF SOME IRRIGATION AND POND ACRES.

4. I understand that if I do not attach one or more of the documents shown in the table below to support the above statements, my application will be considered incomplete.

## Conserved Water Policy

Adopted July 5<sup>th</sup>, 2005

Reviewed & Adopted July 6, 2010

Reviewed & Adopted September 1, 2015

Received by OWRD

MAY 26 2023

Salem, OR

**A. Authority & Purpose.** The Board of Directors (the “**Board**”) of the Three Sisters Irrigation District (the “**District**”) is required to adopt this Conserved Water Policy (this “**Policy**”) pursuant to Oregon Administrative Rule (“**OAR**”) 690-018-0025 if the district wants to allocate conserved water. The rule requires that if the District seeks allocations of conserved water pursuant to ORS 537.455 to 537.500, then it must adopt a policy that, at a minimum:

- Describes how water saved by conservation measures will be allocated by the District
- Describes how the District will address the allocation of conserved water percentages under ORS 537.470
- Provides District patrons the opportunity to fund a share of the conservation project that is proportionate to the patron’s share of the water rights involved in the allocation of conserved water and to receive a corresponding share of the conserved water
- Provides District patrons an opportunity to petition for a vote by all District patrons on this Policy
- Provides District patrons an opportunity to appeal a proposed District conservation project to the Board for failure to follow this Policy

The purpose of this Policy is to provide District patrons with the information required by OAR 690-018-0025 and to set the procedures by which this Policy will be implemented.

**B. Definitions.** The following definitions shall apply in this Policy.

1. “**Commission**” means the Water Resources Commission.
2. “**Conservation**” means the reduction of the amount of water diverted to satisfy an existing beneficial use achieved either by improving the technology or method for diverting, transporting, applying or recovering the water or by implementing other approved conservation measures.
3. “**Conserved Water**” means that amount of water that results from conservation measures, measured as the difference between:

- a. The smaller of the amount stated on the water right or the maximum amount of water that can be diverted using the existing facilities; and
  - b. The amount of water needed after implementation of conservation measures to meet the beneficial use under the water right certificate.
4. **“District Allocation”** means the amount of Conserved Water allocated to the District by the Commission.
  5. **“Funding Patron”** means a patron or patrons of the District that funds all or a portion of a water conservation project as provided in paragraph C of this Policy.
  6. **“Funding Partner”** means a granting agency including Federal, State or local agencies as well as non-profits that fund a portion of the water conservation project. Examples include but not limited to DRC- Deschutes River Conservancy, OWEB- Oregon Watershed Enhancement Board, NFWF- National Fish and Wildlife Foundation, BOR- Bureau of Reclamation, NRCS- National Resources Conservation Service, USFS – United States Forest Service, Soil & Water Conservation Districts, Watershed Councils, PGE, Tribes of Warm Springs, Bonneville Environmental Foundation, Northwest Power Conservation Council, Oregon Water Trust, etc.
- C. Applicability.** This Policy applies only to applications for allocations of conserved water filed with the Oregon Water Resources Department by the District after November 5, 2004. This Policy does not apply to applications for allocations of conserved water filed by individuals, including District patrons.
- D. Conservation Projects with Funding Partners.** For funding partners, conserved water will be divided into 2 portions. Saved water portion and conserved water application portion. The saved water will be used to firm up supply of the deliveries to existing water rights in the district. The conserved water application portion will be used to secure grant funding from funding partners to pay for the materials needed for the conservation project.

**For a Funding Partner:**

Total project cost	\$600,000.00	
Total conserved water	1,000 acre feet	Received by OWRD
Funding partners contribution	\$300,000.00	
Conserved water portion	500 acre feet	MAY 26 2023
(covers 25% in stream required by statute)		
District in-kind Contribution	\$300,000.00	Salem, OR
Saved water portion	500 acre feet	
(shared by all patrons)		
For funding partners cost per acre ft	\$600.00	

- E. Patrons May Fund Part of Water Conservation Project.** Patrons may fund a water conservation project in an amount that is proportionate to the patron's share of the water rights involved in the allocation of Conserved Water. Patrons that provide funding to the District for a water conservation project in advance, or within one year of, the District first making expenditures for the conservation project shall be a Funding Patron and receive the portion of the District Allocation to which Funding Patron is entitled under this Policy. Proportionate costs will include all costs associated not only with the completion of the project, but those costs associated with the planning and design of the project, all accompanying and necessary application and processing fees, including but not limited to legal and consulting fees to secure the Final Order from the Oregon Water Resources Department, and/or to respond to any legal challenges subsequent to receipt of the Final Order until conclusively resolved as determined by the Board of Directors.

**For a Patron Funding 100% of Project:**

Total project costs	\$600,000.00
Total conserved water	1,000 acre feet
Minimum in-stream contribution (required by statute)	250 acre feet – 25%
Net available acre feet to funding patron	750 acre feet
For funding patrons cost per acre ft	\$800.00

- F. Allocation of Conserved Water.** Except for a Funding Patron, no patron shall be entitled to any of the District Allocation other than the amount necessary to maintain the patron's full delivery rate at its regular turn out(s). A Funding Patron shall be entitled to a portion of the District Allocation equal to the percentage of the funding for the water conservation project paid to the District by the Funding Patron.
- G. Petitions to Vote on Policy.** District patrons may petition the Board to hold a vote of all District patrons on the approval of this Policy. The petition must be signed by fifty or more qualified electors within the District pursuant to ORS 545.199(1)(b) to be valid and to cause the District to hold a vote. Upon receiving a valid petition, the District shall hold a vote of all District patrons. The vote shall be whether to approve or reject this Policy. The vote shall be conducted according to the laws and procedures that govern District elections.

Received by OWRD

MAY 26 2023

Salem, OR

- H. **Approval of Project by Board.** Proposed water conservation projects shall be discussed and approved by the Board at any one of its regularly scheduled Board meetings. The Board shall limit its consideration to whether the proposed water conservation project complies with this Policy. Patrons may comment on the compliance of the proposed water conservation project with the conservation policy during the Board meeting at which it is discussed.
  
- I. **Appeal of Water Conservation Projects.** If the Board approves the proposed water conservation project, any patron in good standing may appeal the Board's decision in writing within two weeks from the date of the Board's decision. The appeal shall include the name, address, and telephone number of the patron appealing the Board's decision, a concise statement of the reasons the patron believes the proposed water conservation project does not comply with this Policy, and a concise statement of how the water conservation project should be modified to comply with this Policy. The Board shall consider a properly filed appeal at its next regularly scheduled meeting. The patron appealing the Board's decision shall have an opportunity to address the Board concerning the patron's appeal. The Board may take any of the following actions: (1) grant the appeal and reject the proposed water conservation project, (2) modify the proposed water conservation project as proposed by the appealing patron to comply with this Policy, (3) direct the District Manager to modify the proposed water conservation project so as to comply with this Policy, or (4) reject the appeal and approve the proposed water conservation project as proposed.
  
- J. **Policy Review and Updates.** The Board shall review and update this Policy at the first regularly scheduled Board meeting following every fifth anniversary of the Board either adopting or reviewing and updating this Policy. The Board may, in its sole discretion, review and update this Policy at any other Board meeting. The Board shall follow the process and provisions of this Policy, as required by OAR 690-018-0025(2), whenever reviewing and updating this Policy.

**THREE SISTERS IRRIGATION DISTRICT  
BOARD OF DIRECTORS MEETING**

**MINUTES  
July 6, 2010**

**E. Review Conserved Water Policy**

The District has a Conserved Water Policy and every 5 years the Board is to review the policy. Marc is not looking to make any changes to the policy, we did spend about 6 months writing this policy and feels no changes are needed at this time. Marc will make copies for the audience and we will come back to this at the end of the meeting when everyone has had a chance to review it.

Received by OWRD

MAY 26 2023

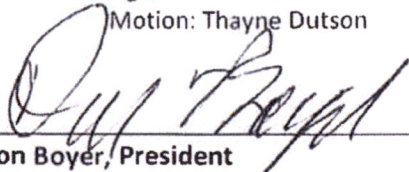

Salem, OR

Marc answered questions the audience members had. Don Boyer moved to accept the policy as written with review again in 5 years or sooner. Thayne Dutson seconded the motion. Motion carried unanimously.

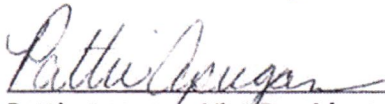

**THREE SISTERS IRRIGATION DISTRICT  
BOARD OF DIRECTORS MEETING  
MINUTES  
SEPTEMBER 1, 2015**

- C Conserved Water Policy Update:** The Conserved Water Policy must be updated every five years. The last update was July 2010. After reviewing the policy the board asked for public comment. There were no changes sited and a motion was made to accept the policy as written.

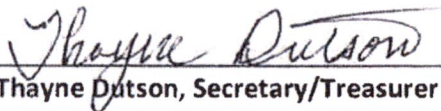

Motion: Thayne Dutson      Second: Pattie Apregan      Vote: Unanimous

## 2020 CONSERVED WATER PURCHASE AGREEMENT

### Three Sisters Irrigation District – Cloverdale Lateral

This Water Rights Purchase Agreement ( the "Agreement") is entered into as of 3/9/2020 (the "Effective Date"), by the **Three Sisters Irrigation District**, an Oregon irrigation district organized pursuant to ORS Chapter 545 with offices at 68000 Highway 20, Sisters, Oregon 97759 (the "District" or "TSID"), the **Deschutes River Conservancy**, an Oregon not-for-profit corporation, with offices at 700 NW Hill Street, Bend, Oregon 97703 (the "DRC)" (collectively, the "Parties," each singularly, a "Party").

### RECITALS

- A. The DRC is an Oregon not-for-profit corporation dedicated to improving water quantity and quality in the Deschutes Basin through the use of market-based mechanisms. The DRC is recognized by the Internal Revenue Service as a 501(c)(3) corporation. The DRC seeks to acquire water rights from willing sellers for the purpose of instream flow restoration.
- B. The District will replace approximately 24,900 feet of open ditch on its Cloverdale lateral with buried high density polyethylene (HDPE) pipe (the "Project"), eliminating water seepage and evaporation losses, and resulting in the conservation of .33 cubic feet per second (cfs) of water (the "Conserved Water"). A map of the Project location is attached hereto as **Exhibit A**.
- C. The District wishes to allocate the Conserved Water to instream use through Oregon's Allocation of Conserved Water statutes (ORS 537.455-537.500) and permanently reduce the rate for the 1895 priority date on The District's Water Right Certificate number 74135 by .33 cfs. Certificate 74135 is attached hereto as **Exhibit B**.
- D. The DRC will prepare an application to the Oregon Water Resources Department (the "OWRD"), as the District's agent, for the allocation of the Conserved Water to instream use (the "Application").

### AGREEMENT

NOW, THEREFORE, in consideration of the covenants, recitals, and agreements set forth herein and exhibits attached hereto, the Parties hereby agree as follows:

#### 1. OWRD APPLICATION

- 1.1 Submission of Application. The Parties intend to submit the Application to OWRD during 2020 for the allocation of .33cfs of the Conserved Water to instream use. The Parties shall work in good faith with each other and with the OWRD to ensure that OWRD takes the actions requested in the Application. No Party shall withdraw the Application or attempt to

modify the Application in any manner whatsoever without the express written agreement of all Parties.

- 1.2 Request for Final Order. Upon completion of construction of the Project, the Parties shall promptly request that OWRD issue a final order and instream water right as particularly requested in the Application.
- 1.3 Limitation on Use of Water. Upon OWRD's issuance of the final order for the Application identified in Section 1.1, and receipt of payment from the DRC, as identified in Section 2, the District shall not divert any of the Conserved Water allocated to instream use.

## 2. PAYMENT

- 2.1 Payment Contingency. Any and all payments from the DRC to the District are contingent upon the DRC's receipt of funding from the Oregon Watershed Enhancement Board (OWEB) and the National Fish and Wildlife Foundation (NFWF) to fund those payments. If the DRC does not receive funding from OWEB and NFWF to fund those payments, this Agreement shall terminate and DRC shall not be liable for, and shall not pay, any amount to the District. The DRC shall notify the District of receipt of OWEB and NFWF funding prior to the submittal of the Application identified in Section 1.1 and will only submit the Application upon receipt of funding from OWEB and NFWF.
- 2.2 Maximum Monetary Consideration. The DRC shall provide funding to the District for Project expenses, as described in the Project Budget, attached as **Exhibit C**, up to the maximum amount of \$150,000 (the "Maximum Monetary Consideration").
- 2.3 Payment Requests to DRC. The District's repayment requests to the DRC for Project expenses must reflect actual District expenses already incurred by the District, authorized under the Project Budget, and allowable pursuant to the requirements of the DRC's grant agreements with OWEB and NFWF, as applicable. The DRC will accept a request for repayment by the District only after the specific work identified in the request has been completed. The payment requests shall be accompanied with full documentation of expenses and a brief narrative explaining overall progress towards project completion. The Parties anticipate that repayment requests will be made by the District and accepted by the DRC before completion of the Project.
- 2.4 Payments to the District. The DRC's payments to the District, pursuant to this Agreement, shall be made only to reimburse the District for the District's actual out-of-pocket expenses incurred and authorized under the Project Budget, as described in Exhibit C. In no event will any reimbursement be due to the District until after the DRC has received adequate grant funds from OWEB and NFWF. The total aggregate payments from DRC to TSID for the Project are limited to the Maximum Monetary Contribution as defined in Section 2.2.

Received by OWRD

- 2.5 Payment Refund. If OWRD issues a final order approving an allocation of the Conserved Water for less than .33 cfs, the DRC shall reduce the Maximum Monetary Consideration identified in Section 2.2 as follows:

Refund Amount = (DRC Maximum Monetary Consideration to the District for the allocation  
of conserved water) \*  
(the rate of the new instream certificate/.33 cfs)

The District hereby unconditionally guarantees the repayment to the DRC of the Refund Amount, with no accrued interest, within 30 days of the DRC's written notice of the Refund Amount becoming due.

### 3. GRANT FUNDING

- 3.1 Acknowledgement. The District acknowledges that it is aware of the DRC's application to OWEB and NFWF for grants to fund this water right purchase and that information relating to the purchase, including effectiveness monitoring data, is a public record.
- 3.2 Certification of Authority. The District certifies that it has sufficient authority and control over the lands upon which the Project construction will be carried out.
- 3.3 Repairs and Maintenance. The District shall be solely responsible for maintaining and repairing the Project.
- 3.4 Oregon Prevailing Wage Rate Law. If necessary, the District expressly covenants to comply with Oregon's prevailing wage rate law, ORS 279C.800-279C.870. If requested, the District shall provide the DRC with proof of compliance with the prevailing wage rate law.

### 4. GENERAL PROVISIONS

- 4.1 Access. The District grants to the DRC and its agents, employees, contractors, and grant providers permission to access all the District's easements and lands associated with the purchase of the Conserved Water for the purpose of conducting evaluations, monitoring, and other related activities. Access shall be limited in time from 7:00 a.m. to 6:00 p.m., Monday through Friday, excluding holidays, or to other times as mutually agreed to as between the DRC and the District and confirmed by letter or email correspondence. Section 4.2 below shall not apply to the actions of the DRC and its agents, employees, and contracts under this section.
- 4.2 Indemnification. The District shall defend, hold harmless, and indemnify the DRC from and against any and all claims, causes of action, damages, losses, liability and related expenses (including, without limitation, reasonable attorneys' fees) of whatever kind (collectively "Loss or Losses"), arising out of any claim by any non-Party against any Party to this Agreement based on a claim arising from this Agreement not covered by the Insurance Policy; provided, however, that such agreement to indemnify shall not apply to any such

Loss to the extent that a court of competent jurisdiction in a final judgment (not subject to further appeal) finds such Loss to have been caused by the fraud, gross negligence, or willful misconduct of the DRC.

- 4.3 Full Disclosure. The District represents that it has disclosed in writing to the DRC, and the DRC hereby acknowledges receipt of the written disclosures, all potential liabilities, if any, known as of the Effective Date of this Agreement that may arise as a result of the Conserved Water the parties anticipate to be purchased with this Agreement. The disclosure includes notification of dissent from affected landowners, pending or threatened lawsuits or actions relating to the conserved water, and any other conflict or dispute that may hinder DRC's purchase of the District's conserved water.
- 4.4 Notice. Notices sent under this Agreement shall be in writing and sent by personal delivery with signed receipt, or certified mail with return receipt requested, postage prepaid, at the addresses set forth above, or to such other address specified and delivered to all Parties in accordance with this section. Notices are effective either (1) upon the day of personal delivery, or (2) three (3) days after placement in the U.S. Mail.
- 4.5 Assignment; Successors. The Parties may not assign their rights and obligations under this Agreement without the prior written consent of the other Parties, which consent shall not be unreasonably withheld. Notice of the District's intent to assign rights and obligations under this Agreement shall be sent to the DRC no later than 30 days prior to the proposed date of such assignment. The provisions of this Agreement shall be binding upon and inure to the benefit of the Parties and their respective successors and assigns.
- 4.6 REMEDY AND LIMITATION ON DAMAGES. THE PARTIES AGREE THAT THE DRC SHALL NOT BE RESPONSIBLE FOR ANY INDIRECT, INCIDENTAL, SPECIAL, OR CONSEQUENTIAL DAMAGES TO ANY PARTY OR NON-PARTY THAT ARE ASSOCIATED WITH THE CONSERVED WATER THE PARTIES ANTICIPATE TO BE CREATED PURSUANT TO THIS AGREEMENT OR THE DRC'S PERFORMANCE OR NON-PERFORMANCE UNDER THIS AGREEMENT.
- 4.7 Governing Law, Jurisdiction, and Venue. This Agreement shall be governed by, and construed in accordance with, the laws of the State of Oregon applicable to contracts executed and performed in Oregon. The Parties consent to the jurisdiction and venue of the state courts located in Deschutes County, Oregon, in connection with a matter arising out of the arbitration in Section 6.10, including any petition to confirm an arbitration award.
- 4.8 Arbitration. Any controversy or claim arising out of, relating to, or in connection with this Agreement shall be adjudicated by arbitration in Madras, Oregon, in accordance with the then existing rules of the Arbitration Service of Portland (<http://www.arbserve.com/>), and judgment confirming any arbitration award may be entered in any court having jurisdiction thereof. Any decision made by an arbitrator under this provision shall be enforceable and

binding on the Parties to the fullest extent of the law. Unless any Party believes in good faith that the applicable statute of limitations may expire absent the commencement of an arbitration, the Parties shall attempt to settle any dispute arising out of, relating to, or in connection with this Agreement for a period of not less than sixty (60) days after all Parties receive notification of the dispute by the aggrieved Party(ies).

- 4.9 Equitable Relief. The Parties acknowledge that the remedies available at law for any breach of this Agreement may, by their nature, be inadequate. Accordingly, each Party may obtain injunctive relief or other equitable relief, including provisional relief pursuant to ORS 36.330, to restrain a breach or threatened breach of this Agreement or to specifically enforce this Agreement, without proving that any monetary damages have been sustained.
- 4.10 Construction. The language in all parts of this Agreement shall in all cases be construed according to its fair meaning and not strictly for or against any of the Parties hereto. Without limitation, there shall be no presumption against any Party on the ground that such Party was responsible for drafting this Agreement or any part of it.
- 4.11 Amendment; Waiver. This Agreement may not be amended or modified except by an instrument in writing duly executed by the Parties. Waiver of any term or condition of this Agreement shall only be effective if in writing, duly executed by the Party to be bound thereby, and shall not be construed as a waiver of any subsequent breach or waiver of the same term or condition, or a waiver of any other term or condition of this Agreement.
- 4.12 Termination. Section 3 of this Agreement shall terminate one year after the final resolution of any appeal of the final order issued by OWRD in response to the Application, or one year after the full Refund Amount, if any, is paid in full to the DRC, whichever is the later date. All other terms of this Agreement shall survive and not terminate, except when the District's compliance with a term of this Agreement would result in noncompliance with OWRD's final order for the Application. In such event, the OWRD's final order shall control, and the inconsistent term of this Agreement that would otherwise result in noncompliance shall terminate; provided however that "noncompliance" as used herein only includes circumstances in which the District's compliance with a term of this Agreement would actually conflict with the requirements in the OWRD final order for the Application, and does not include circumstances in which the District's compliance with a term of this Agreement would merely result in additional requirements for the District beyond those included in the OWRD final order.
- 4.13 Time of Essence. Time is of the essence with respect to all dates and time periods in this Agreement.
- 4.14 No Agency Relationship. This Agreement does not create an agency relationship between the Parties and does not establish a joint venture or partnership between the Parties. No

Party has the authority to bind another Party or represent to any person that the Party is an agent of another Party.

- 4.15 Further Assurances. The Parties will sign other documents and take other actions reasonably necessary to further effect and evidence this Agreement.
- 4.16 Headings. The headings in this Agreement are for convenience only and shall not affect the interpretation of this Agreement.
- 4.17 Severability. If any provision of this Agreement, or the application hereof to any person or circumstance, is held by a court of competent jurisdiction to be invalid, void, or unenforceable, the remainder of the provisions hereof and the application of such provision to such persons or circumstances other than those to which it is found to be invalid, shall not be affected thereby and shall remain in full force and effect.
- 4.18 Entire Agreement. This Agreement and the exhibits attached hereto constitute the entire agreement of the Parties hereto with respect to the subject matter hereof and supersedes all prior agreements and undertakings, both written and oral, among the Parties hereto with respect to the subject matter hereof.
- 4.19 No Third-Party Beneficiaries. This Agreement is for the sole benefit of the Parties hereto and their successors and permitted assigns, and nothing herein, express or implied, is intended to or shall confer upon any other person or entity any legal or equitable right, benefit, or remedy of any nature whatsoever under or by reason of this Agreement.
- 4.20 Counterparts. This Agreement may be executed in several counterparts and all documents so executed shall constitute one agreement, binding on the Parties hereto, notwithstanding that the Parties did not sign the same original or the same counterparts. Delivery of an executed signature page to this Agreement by facsimile or electronic mail shall be as effective as delivery of a manually signed counterpart of this Agreement.
- 4.21 Agreement Review. Parties acknowledge that they have had the sufficient opportunity to review this Agreement and receive independent legal advice with regard to matters arising out of this Agreement.
- 4.22 Authority. The signatories to this Agreement warrant that they have authority to execute this Agreement on behalf of the Parties to this Agreement and that any entity on whose behalf they are signing has executed this Agreement pursuant to its governing documents or a resolution of those having power to control its affairs of this nature.

Salem, OR

STATE OF OREGON  
COUNTY OF DESCHUTES  
CERTIFICATE OF WATER RIGHT

THIS CERTIFICATE ISSUED TO

SQUAW CREEK IRRIGATION DISTRICT  
PO BOX 2230  
SISTERS, OREGON 97759

confirms the right to use the waters of SQUAW CREEK, a tributary of THE DESCHUTES RIVER, for IRRIGATING 7,567.76 ACRES, POND MAINTENANCE, INDUSTRIAL USE, AND STOCK WATER.

This right was confirmed by decree of the Circuit Court of the State of Oregon for CROOK County. The decree is of record at Salem, in the Order Record of the WATER RESOURCES DIRECTOR, in Volume 1, at Pages 121, 122, 123, 124, 435, 438, 445, 472, and 473. The dates of priority are 1869, 1885, 1887, 1889, 1893, 1895, 1899, 1900, 1901, 1903, and 1904.

The amount of water to which this right is entitled is limited to an amount actually beneficially used and shall not exceed 153.02 CUBIC FEET PER SECOND, BEING 151.35 CFS FOR IRRIGATION, 1.57 CFS FOR POND MAINTENANCE AND 0.10 CFS FOR INDUSTRIAL USE, or its equivalent in case of rotation, measured at the point of diversion from the source. The maximum diversion rate by priority date is:

Priority	Acres (equivalent)	Maximum CFS
1869	48.00	0.96
1885	79.05	1.58
1887	150.00	3.00
1889	201.50	4.03
1893	39.50	0.79
1895	5716.75	114.34
1899	108.80	2.18
1900	54.00	1.08
1901	22.30	0.45
1903	360.60	7.21
1904	870.60	17.41

The point of diversion is located as follows:

SW $\frac{1}{4}$ SW $\frac{1}{4}$ , SECTION 21, T. 15 S., R. 10 E., W.M.; 998 FEET NORTH AND 1211 FEET EAST FROM THE SW CORNER OF SECTION 21.

The amount of water used for irrigation, together with the amount secured under any other right existing for the same lands, is limited to ONE- FIFTIETH of one cubic foot per second per acre, or its equivalent for each acre irrigated during the irrigation season of each year.

A description of the place of use to which this right is appurtenant is as follows:

## Section 30

Township 15 South, Range 11 East, W.M.

Received by OWRD

MAY 26 2023

Salem, OR

This certificate is issued to confirm changes in use and place of use approved by an order of the Water Resources Director entered DEC 29 1997, in Special Order Volume 51, Page 1408, approving the Squaw Creek Irrigation District petition for water rights mapping under ORS 541.325 to 541.333. This certificate also confirms the transfers and supersedes the certificates listed in the above order.

The right to the use of the water for the above purposes is restricted to beneficial use on the lands or place of use described and is subject to all other conditions and limitations contained in said decree.

WITNESS the signature of the Water Resources Director, affixed 12/29/97.

## **Cloverdale Lateral Allocation of Conserved Water Loss Determination 2021-end of 2023:**

**Length of project:** 24,300 feet

**Size of pipe:** 24" diminishing/sizing down to 12"

**Total cost:** Initial pre-inflation budget was \$1,155,971 (includes NRCS and extensive TSID in-kind). Total cost has greatly exceeded the original budget with significant inflationary increases since 2020.

**OWEB and NFWF contribution to total cost:** \$150,030

### **Description of loss determination:**

The loss analysis performed for CW-33 (first phase of Cloverdale conservation) was utilized to determine the losses for the current Cloverdale conservation project, which complete the piping of the Cloverdale lateral, improves on farm deliveries, results in on farm efficiency projects, and reduces electricity use and costs by delivering pressurized water to farms. The original analysis was performed by an independent engineer, Elwin Ross.

The Engineer performed the initial loss analysis over several years, taking into account various water supply scenarios from the water supply record. The loss analysis determined 41% to 57% loss over the entire ditch depending on amount of water in the ditch. It was assumed and later confirmed that less water in the ditch resulted in less water loss. Losses were determined over the irrigation season, as water availability diminished resulting in diminishing deliveries over the irrigation season.

The full Cloverdale lateral serves up to 760.7 acres. Up to 15.2 cfs could be delivered in the Cloverdale lateral at any point in time if that amount of water was available. The TSID water right includes a number of priority dates and only the most senior water (senior to 1895) is available 100% of the time. The engineering analysis looked at water availability ranging from 5.6 cfs up to 20 cfs over various supply scenarios to determine the weighted average losses on the ditch.

The NFWF and OWEB funds paid for about 10.75% of the piping project (based on the original - pre-inflation budget and 24" pipe) - which could be as much as 2615 feet of the current piping project. The cost of this project has increased substantially due to inflation, so based on percent of final cost, this is a generous amount of conserved water. The original losses from CW-33, which were identified by the engineer as fairly constant along the ditch, were then translated into losses per foot of piped lateral (0.000126 cfs loss per foot) and under the assumption the first several thousand feet of piping (24" pipe) would have similar losses - the loss was calculated at 0.000126 cfs per foot x 2614 feet to equal 0.33 cfs. 100% of this conserved water will be protected instream.

Re: Three Sisters Irrigation District Cloverdale Pipe and Conservation Project

Dear Genevieve:

The Oregon Department of Environmental Quality (DEQ) is writing in support of the conserved water application for the Three Sisters Irrigation District (TSID) Cloverdale Pipeline Project.

It is DEQ's understanding that the piping project will result in the completion of 24,300 feet (4.6 miles) of TSID's Cloverdale Lateral. Approximately 2,615 feet of the piping project are supported with Oregon Watershed Enhancement Board and National Fish and Wildlife Foundation funding and eliminate 0.33 cfs of seepage losses. The applicant and agent propose to transfer and permanently protect 0.33 cfs (100%) of the conserved water instream from the point of diversion (approximate RM 23.5) downstream to Lake Billy Chinook for the benefit of fish, wildlife, and other aquatic resources. Flows would be protected from April 1 through November 1 during the normal irrigation season and retain a single priority date of 1895. DEQ further understands that adequate monitoring will be in place to ensure the conserved 0.33 cfs remains instream. This instream transfer will compound on past projects and result in improved habitat and productivity for redband trout, bull trout, summer steelhead and spring Chinook in Whychus Creek.

Whychus Creek is on Oregon's 303(d) list of impaired water bodies for not meeting state water quality criteria for pH and temperature. Temperature modeling done by DEQ and Watershed Sciences, Inc indicates that reduced stream flows resulting from diversions are responsible for a large portion of the anthropogenic heating that occurs in the creek. Water quality monitoring and analysis done by the Upper Deschutes Watershed Council also supports this; the Watershed Council found a direct relationship between increased stream flow and decreased stream temperature.

DEQ understands that this project will be constructed and finalized in two phases, with the final phase reaching completion in the winter of 2023-2024.

Thank you for the opportunity to provide comments.

Sincerely,

*Smita Mehta*

Exhibit N

Letter of support from the Confederated Tribes of the Warm Springs Reservation.

A letter had not been returned at the time the application was mailed to OWRD. However, the Tribes have signed off on the SHPO review of the Cloverdale project area (performed by NRCS) and a Tribal member sits on the DRC board of directors.

If our letter is received following project submittal, we will forward on to OWRD staff.

Dear Mr. Courchane,

I am pleased to submit an application for the Allocation of Conserved water for the Three Sisters Irrigation District Cloverdale Piping Project.

Please find the following documents enclosed with this letter:

- Application for Allocation of Conserved Water
- Exhibit A Application Map
- Exhibit B C-95971 (supersedes C-74135)
- Exhibit C Special Order Volume 109, page 735 (CW-103)
- Exhibit D Notice of Intent: Confederated Tribes of Warm Springs
- Exhibit E Notice of Intent: Deschutes County Planning Department
- Exhibit F Notice of Intent: Jefferson County Planning Department
- Exhibit G Notice of Intent: City of Sisters Planning Department
- Exhibit H Evidence of Use Affidavit
- Exhibit I TSID Conserved Water Policy
- Exhibit J TSID Board Resolution – board signed agreement with DRC
- Exhibit K Method for Determining Amount of Conserved Water
- Exhibit L Letter of Support: Oregon Department of Environmental Quality
- Exhibit M Letter of Support: Oregon Department of Fish and Wildlife
- Exhibit N Letter of Support: Confederated Tribes of the Warm Springs Reservation

Please deduct the \$680 application fee from the Deschutes River Conservancy state fees account.

I look forward to working with you to process this application. Please contact me at the email or phone number listed below with any questions.

Sincerely,

Genevieve Hubert  
Senior Program Manager
