Part 2 of 5 – Temporary Transfer Application Map Checklist

Your temporary transfer application will be returned if any of the map requirements listed below are not met.

Please be sure that the temporary transfer application map you submit includes all the required items and matches the existing water right map. Check all boxes that apply.

- N/A If more than three water rights are involved, separate maps are needed for each water right.
- Permanent quality printed with dark ink on good quality paper.
- The size of the map can be 8½ x 11 inches, 8½ x 14 inches, 11 x 17 inches, or up to 30 x 30 inches. For 30 x 30 inch maps, one extra copy is required.
- A north arrow, a legend, and scale.
- The scale of the map must be: 1 inch = 400 feet, 1 inch = 1,320 feet; the scale of the Final Proof/Claim of Beneficial Use Map (the map used when the permit was certificated); the scale of the county assessor map if the scale is not smaller than 1 inch = 1,320 feet; or a scale that has been pre-approved by the Department.
- Township, Range, Section, ¼ ¼, DLC, Government Lot, and other recognized public land survey lines.
- Tax lot boundaries (property lines) are required. Tax lot numbers are recommended.
- Major physical features including rivers and creeks showing direction of flow, lakes and reservoirs, roads, and railroads.
- Major water delivery system features from the point(s) of diversion/appropriation such as main pipelines, canals, and ditches.
- Existing place of use that includes separate hachuring for each water right, priority date, and use including number of acres in each quarter-quarter section, government lot, or in each quarter-quarter section as projected within government lots, donation land claims, or other recognized public land survey subdivisions. If less than the entirety of the water right is being changed, a separate hachuring is needed for lands left unchanged.
- N/A Proposed temporary place of use that includes separate hachuring for each water right, priority date, and use including number of acres in each quarter-quarter section, government lot, or in each quarter-quarter section as projected within government lots, donation land claims, or other recognized public land survey subdivisions.
- Existing point(s) of diversion or well(s) with distance and bearing or coordinates from a recognized survey corner. This information can be found in your water right certificate or permit.
- N/A If you are proposing a change in point(s) of diversion or well(s) to convey water to the new temporary place of use, show the proposed location and label it clearly with distance and bearing or coordinates. If GPS coordinates are used, latitude-longitude coordinates may be expressed as either degrees-minutes-seconds with at least one digit after the decimal (example – 42°32'15.5") or degrees-decimal with five or more digits after the decimal (example – 42.53764°).

FEE WORKSHEET for TEMPORARY DROUGHT TRANSFERS			
1	Base Fee (includes drought application and recording fee for up to 1 cfs)	1	\$200.00

3	Add entries on lines 1 through 2 above » » » » » » » » » » » » Transfer Fee:	3	200.00

*Example for Line 2a calculation to transfer 45.0 acres of Primary Certificate 12345 (total 1.25 cfs for 100 acres) and 45.0 acres of Supplemental Certificate 87654 (1/80 cfs per acre) on the same land:

1. Divide total authorized cfs by total acres in the water right (for C12345, $1.25 \text{ cfs} \div 100 \text{ ac}$); then multiply by the number of acres to be transferred to get the transfer cfs ($\times 45 \text{ ac} = 0.56 \text{ cfs}$).
2. If the water right certificate does not list total cfs, but identifies the allowable use as 1/40 or 1/80 of a cfs per acre; multiply number of acres proposed for change by either 0.025 (1/40) or 0.0125 (1/80). (For C87654, $45.0 \text{ ac} \times 0.0125 \text{ cfs/ac} = 0.56 \text{ cfs}$)
3. Add cfs for the portions of water rights on all the land included in the transfer; however **do not count cfs for supplemental rights on acreage for which you have already calculated the cfs fee for the primary right on the same land.** The fee should be assessed only once for each "on the ground" acre included in the transfer. (In this example, blank 2a would be only 0.56 cfs, since both rights serve the same 45.0 acres. Blank 2b would be 0 and Line 2 would then also become 0.)

INSTRUCTIONS for editing the Application Form

To add lines to tables within the forms or to copy and paste additional Part 5 pages, please **save the application form to your computer**. Unlock the document by using one of the following instructions for your Microsoft Word software version:

Microsoft Word 2003

Unlock the document by one of the following:

- Using the **Tools** menu => click **Unprotect Document**;

OR

- Using the **Forms** toolbar => click on the **Protect/Unprotect** icon.

To relock the document to enable the checkboxes to work, you will need to:

- Using the **Tools** menu => click **Protect Document**;

OR

- Using the **Forms** toolbar => click on the **Protect/Unprotect** icon.

Microsoft Word 2007

- Unlock the document by clicking the **Review** tab, then click **Protect Document**, then click **Stop Protect**
- To relock the document, click **Editing Restrictions**, then click **Allow Only This Type of Editing**, select **Filling In Forms** from the drop-down menu, then check **Yes, Start Enforcing Protection**.

Microsoft Word 2010

- Unlock the document by clicking the **Review** tab; toggle the **Restrict Editing** icon at the upper right, then click **Stop Protect** at the bottom right. Then uncheck the "**Allow only this type of editing in the document: Filling in forms**" in the "Editing restrictions" section on the right-hand list of options.
- To relock the document, check the **Editing Restrictions/Allow Only This Type of Editing/Filling In Forms** box from the drop-down menu, then check **Yes, Start Enforcing Protection**. You do not need to assign a password for the editing restrictions.

Other Alternatives:

- Photocopy pages or tables in Part 5, ~~mark through~~ any non-applicable information, insert/attach photocopied pages to document in the appropriate location, and manually amend page numbers as necessary (e.g. Page 5 6 of 9 10).
- You may refer to additional attachments that you may include, such as separately produced tables or spreadsheets to convey large numbers of rows of place of use listings, owner/property parcels, etc. You may contact the Department at 503-986-0900 and ask for Transfer Staff if you have questions.

Once the application has been unlocked, you may:

- add rows to tables using the Table tools, and
- select and copy the pages of Part 5 and paste as many additional sets of Part 5 pages as needed at the end of the application.

After editing, re-lock the document to enable checkboxes to work.

Description of Water Delivery System

System capacity: 0.20 cubic feet per second (cfs) OR _____ gallons per minute (gpm)

OWRD

Describe the current water delivery system or the system that was in place at some time within the last five years. Include information on the pumps, canals, pipelines, and sprinklers used to divert, convey, and apply the water at the authorized place of use. _____

Table 1. Location of Authorized and Proposed Point(s) of Diversion (POD) or Appropriation (POA) (Note: If the POD/POA name is not specified on the certificate, assign it a name or number here.)

Table with 9 columns: POD/POA Name or Number, Is this POD/POA Authorized on the Certificate or is it Proposed?, If POA, OWRD Well Log ID# (or Well ID Tag # L-___), Twp, Rng, Sec, 1/4 1/4, Tax Lot, DLC or Gov't Lot, Measured Distances (from a recognized survey corner). Rows include POD1 and POD2 with specific coordinates and distances.

Check all type(s) of temporary change(s) proposed below (change "CODES" are provided in parentheses):

- Place of Use (POU), Point of Diversion (POD), Additional Point of Diversion (APOD), Appropriation/Well (POA), Additional Point of Appropriation (APOA)

Check all type(s) of temporary change(s) due to drought proposed below (change "CODES" are provided in parentheses):

- Place of Use (POU), Character of Use (USE), Point of Diversion (POD), Point of Appropriation/Well (POA), Additional Point of Appropriation (APOA), Additional Point of Diversion (APOD)

Will all of the proposed changes affect the entire water right?

- Yes: Complete only the Proposed ("to" lands) section of Table 2 on the next page. Use the "CODES" listed above to describe the proposed changes.
No: Complete all of Table 2 to describe the portion of the water right to be changed.

Please use and attach additional pages of Table 2 as needed.
See page 6 for instructions.

Do you have questions about how to fill-out the tables?
Contact the Department at 503-986-0900 and ask for Transfer Staff.

For Place of Use Changes

Are there other water right certificates, water use permits or ground water registrations associated with the "from" or the "to" lands? Yes No

If YES, list the certificate, water use permit, or ground water registration numbers: _____

Pursuant to ORS 540.525, any "layered" water use such as an irrigation right that is supplemental to a primary right proposed for temporary transfer can be included in the transfer or remain unused on the authorized place of use. If the primary water right does not revert soon enough to allow use of the supplemental right within five years, the supplemental right shall become subject to cancellation for nonuse under ORS 540.610.

If a change in point(s) of appropriation (well(s)) or additional point(s) of appropriation is necessary to convey the water to the new temporary place of use you must provide:

- Well log(s) for each authorized and proposed well(s) that are clearly labeled and associated with the corresponding well(s) in Table 1 above and on the accompanying application map. (Tip: You may search for well logs on the Department's web page at: http://apps.wrd.state.or.us/apps/gw/well_log/Default.aspx)

AND/OR

- Describe the construction of the authorized and proposed well(s) in Table 3 below for any well that does not have a well log. For a *proposed well(s) not yet constructed or built*, provide "a best estimate" for each requested information element in the table. The Department recommends you consult a licensed well driller, geologist, or certified water right examiner to assist with assembling the information necessary to complete Table 3.

Table 3. Construction of Point(s) of Appropriation

Any well(s) in this listing must be clearly tied to corresponding well(s) described in Table 1 and shown on the accompanying application map. Failure to provide the information will delay the processing of your transfer application until it is received. The information is necessary for the Department to assess whether the proposed well(s) will access the same source aquifer as the authorized point(s) of appropriation (POA). The Department is prohibited by law from approving POA changes that do not access the same source aquifer.

NOTE TO APPLICANTS

In order for your application to be processed by the Water Resources Department (WRD), this Land Use Information Form must be completed by a local government planning official in the jurisdiction(s) where your water right will be used and developed. The planning official may choose to complete the form while you wait, or return the receipt stub to you. Applications received by WRD without the Land Use Form or the receipt stub will be returned to you. Please be aware that your application will not be approved without land use approval.

This form is NOT required if:

- 1) Water is to be diverted, conveyed, and/or used only on federal lands; **OR**
- 2) The application is for a water right transfer, allocation of conserved water, exchange, permit amendment, or ground water registration modification, and all of the following apply:
 - a) The existing and proposed water use is located entirely within lands zoned for exclusive farm-use or within an irrigation district;
 - b) The application involves a change in place of use only;
 - c) The change does not involve the placement or modification of structures, including but not limited to water diversion, impoundment, distribution facilities, water wells and well houses; and
 - d) The application involves irrigation water uses only.

NOTE TO LOCAL GOVERNMENTS

The person presenting the attached Land Use Information Form is applying for or modifying a water right. The Water Resources Department (WRD) requires its applicants to obtain land-use information to be sure the water rights do not result in land uses that are incompatible with your comprehensive plan. Please complete the form or detach the receipt stub and return it to the applicant for inclusion in their water right application. You will receive notice once the applicant formally submits his or her request to the WRD. The notice will give more information about WRD's water rights process and provide additional comment opportunities. You will have 30 days from the date of the notice to complete the land-use form and return it to the WRD. If no land-use information is received from you within that 30-day period, the WRD may presume the land use associated with the proposed water right is compatible with your comprehensive plan. Your attention to this request for information is greatly appreciated by the Water Resources Department. If you have any questions concerning this form, please contact the WRD's Customer Service Group at 503-986-0801.

EXECUTIVE ORDER NO. 23-20

**DETERMINATION OF A STATE OF DROUGHT EMERGENCY IN
GILLIAM AND DOUGLAS COUNTIES.**

At the request of Gilliam County (by Commission Resolution and Order R2023-10, dated July 5, 2023) and Douglas County (by Commission Resolution and Order 2023-0925, dated August 2, 2023) and based on the recommendations of the Drought Readiness Council and input from the Water Supply Availability Committee dated August 3, 2023 and August 21, 2023, and pursuant to ORS 536.740, I find that low streamflow, low precipitation, and low soil moisture have caused or will cause natural and economic disaster conditions in Gilliam and Douglas Counties.

Forecasted water supply conditions and precipitation levels are not expected to improve. Drought is likely to have a significant economic impact on the farm, ranch, vineyard, recreation, tourism and natural resources sectors, as well as an impact on drinking water, fish and wildlife, and important minimum flows for public instream uses and other natural resources dependent on adequate precipitation, stored water, and streamflow in these areas. Extreme conditions are expected to affect local growers and livestock, increase the potential for fire, shorten the growing season, and decrease water supplies.

Conditions continue to be monitored by the State's natural resource and public safety agencies, including the Oregon Water Resources Department, the Oregon Office of Emergency Management, the Oregon Office of the State Fire Marshal, and the Oregon Department of Forestry's Fire Protection Division.

Preparation and resiliency to drought are vital to the health and safety of persons, property, and the economic security of the citizens and businesses of these counties. I, therefore, declare that a severe, continuing drought emergency exists and is likely to continue to exist in Gilliam and Douglas Counties.

NOW, THEREFORE, IT IS HEREBY DIRECTED AND ORDERED:

- I. The Oregon Department of Agriculture is directed to coordinate and provide assistance in seeking federal resources to mitigate drought conditions and assist in agricultural recovery in Gilliam and Douglas Counties.

- II. The Oregon Water Resources Department and the Water Resources Commission are directed to coordinate and provide assistance to water users in Gilliam and Douglas Counties as the Department and Commission determine necessary and appropriate in accordance with ORS 536.700 to 536.780.
- III. The Oregon Water Resources Department is directed to seek information from the Oregon Department of Fish and Wildlife to help understand the impacts of water availability on Oregon's fish and wildlife, as necessary and appropriate in accordance with ORS 536.700 to 536.780.
- IV. The Office of Emergency Management is directed to coordinate and assist as needed with assessment and mitigation activities to address current and projected conditions in Gilliam and Douglas Counties.
- V. All other state agencies are directed to coordinate with the above agencies and provide appropriate state resources as needed to assist affected political subdivisions and water users in Gilliam and Douglas Counties.
- VI. This Executive Order expires on December 31, 2023.

RE: Douglas County Drought

Date: ~~SEP 21 2023~~

Mr. Andrews and Ms. Naile:

Douglas County, by and through its County Elected Officials, requests that the Governor of Oregon issue an executive order for all of Douglas County under the provisions of ORS 536 as a direct result of severe and projected drought conditions.

There is the potential for the Douglas County agricultural and livestock, natural resources, recreational, tourism, and related economies to experience widespread and severe damage resulting from extreme weather conditions within the county. The annual water supplies available for irrigators and ranchers within Douglas County depends upon adequate stream flows, which are significantly lower than normal in the Umpqua basin. Current predictions by NOAA are that drought within our region will persist or intensify and could dramatically increase wildland fire danger due to higher than normal temperatures and below average precipitation.

Additionally, a large share of the county's economy is dependent upon the agriculture sector which is adversely affected by low rainfall. Our initial assessment of impacts indicates imminent and significant damages and losses to the agricultural economy of Douglas County.

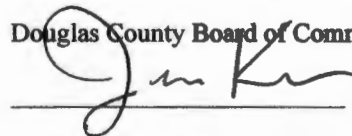

Douglas County has already formally declared a drought and has attached a copy of the adopted resolution for your files.

The Douglas County Board of Commissioners has determined that additional action by and support from the state is needed. This may include assistance from the Oregon Water Resources Department and other Oregon executive branch agencies, operating within their statutory authorities.

Douglas County Board of Commissioners therefore requests an executive order from the Governor, declaring drought in Douglas County.

We extend in advance our appreciation for your consideration on this matter

WHEREAS, the Douglas County Board of Commissioners finds that the Douglas County agricultural, livestock and forest products industries, and related businesses are experiencing economic hardship and potential serious injury and losses resulting from extreme weather conditions within the county; and

WHEREAS, the July 20, 2023, Oregon Water Resources Department Water Conditions Report states that Douglas County stream flows were 61% of average for the month of June 2023. The report also states that soil moisture levels are very low. The most recent three-month outlook prepared by NOAA Climate Prediction Center indicates "conditions are likely to continue or worsen, as probabilities favor above average temperatures and near average precipitation". The South Umpqua River and multiple smaller tributaries in the Umpqua Basin have already been regulated by the state watermaster in favor of senior rights, and it is anticipated that further reductions will take place in the weeks ahead. Due to dry soils and low stream flows, basin water managers expect to regulate surface water right users much earlier and to older priority dates than normal. This lack of surface water resources will negatively impact consumptive water users including irrigators, industrial and domestic users resulting in economic losses and hardship. Groundwater resources will also be affected by a lack of sufficient recharge resulting in reduced spring and well water supplies for household uses. As of July 11, 2023, the U.S. Drought Monitor for Oregon illustrates the majority of Douglas County is already in Moderate Drought.

WHEREAS, the extended weather forecast for Douglas County projects higher than normal temperatures, and below average precipitation; and

WHEREAS, the above conditions will result in the loss of economic stability, decreased feed and pasture production, shortened growing season and decreased water supplies for Douglas County agricultural, livestock and vineyard producers. In addition this multi-year cumulative drought has resulted in decreased fuel moisture and early onset fire danger; and

WHEREAS, the Douglas County Board of Commissioners determines that extraordinary measures must be taken to alleviate the suffering of citizens and livestock and to protect or mitigate economic loss, and to be responsive to the threat of wildfires.

THE BOARD OF COUNTY COMMISSIONERS OF DOUGLAS COUNTY FINDS AND ORDERS AS FOLLOWS:

1. The Board finds that an emergency exists in Douglas County, Oregon due to the severe and continuing drought conditions, and that such emergency threatens the availability of essential services and jeopardizes the peace, health and welfare of the people of Douglas County, Oregon.
2. The Board finds that additional action by and support from the State is necessary to address this emergency, which may include assistance from the Oregon Water Resources Commission and other Oregon executive branch agencies.
3. The Board requests the Honorable Tina Kotek, Governor of Oregon, find that there is a need for statewide coordination of water resource conservation measures by municipal and other political subdivisions of this state in order to minimize problems caused by a severe shortage of water, and issue a declaration pursuant to ORS 536.740 that a severe, continuing drought exists in Douglas County, Oregon.
4. The Board requests the Governor address this emergency through the provisions of ORS Chapter 536, including providing the assistance of the Water Resources Commission.

Dear Policy Advisors,

The Oregon Drought Readiness Council is a standing body comprised of natural resource, public health, and emergency response agencies. During a drought, the Council reviews local requests for assistance and makes recommendations to the Governor. The Council meets regularly to discuss current water supply conditions and likely upcoming conditions for the growing season.

The Drought Readiness Council has received letters from the Douglas and Lincoln County Boards of Commissioners requesting Governor's drought declarations. The attached orders describe the water supply conditions the counties have observed during the past several months, along with current conditions, and projected economic impacts for the summer growing season.

The Drought Readiness Council has received input from Oregon's Water Supply Availability Committee on regional water supply conditions and Council members have conferred on this matter. The Council recommends that pursuant to Oregon Revised Statutes (ORS) 536.740 the Governor declare drought in Douglas and Lincoln Counties for the 2023 calendar year, expiring December 31, 2023.
