Explain in your own words what you propose to accomplish with this transfer application, and why:
We are adding a Point of Diversion and revising the Place of Beneficial Use. This would allow us to irrigate a 6 Acre portion of an Open Field lying South of Elk River. This would involve the use of a Portable Pump System, (resembling the ones currently in use) to be located on the southerly bank of the river. It will be taken or withdrawing (3 Acres) from the 22.2 Acre Irrigated Section located in the NW ¼ of the SE ¼ of Section 27, T. 32 S. – R.15 W.,WM. Thus reducing that area to 19.2 Acres. And, taking or withdrawing (3 Acres) from the 13.4 Acre Irrigated Section located in the NE ¼ of the SE ¼ of Section 27, T. 32 S. – R. 15 W.,W.M. Thus reducing that area to 10.4 Acres.

If you need additional space, continue on a separate piece of paper and attach to the application as "Attachment 1".

CERTIFICATE # 26303

Description of Water Delivery System

System capacity: 1.26 cubic feet per second (cfs) **OR**
567 gallons per minute (gpm)

Describe the current water delivery system or the system that was in place at some time within the last five years. Include information on the pumps, canals, pipelines, and sprinklers used to divert, convey, and apply the water at the authorized place of use.

The existing system consists of Portable Irrigation Sprinkler Lines that are moved across the fields. Currently the fields are leased to separate parties. The Pumps are mounted on small wheeled trailers and are located on the Bank of the River directly adjacent and or above the Points of Diversion. The Pump Units run daily during the irrigation season for 2 to 3 hour periods .Most of the distribution lines are 3" to 4" Aluminum Pipe. The Intakes consist of 4" Flexpipe or Hoses. Each Intake is screened and removed from the River after the Sprinkler Period. The Pumps are 15 Horsepower and appear to be standard Briggs and Stratton Motors. The pumps are inline suction units with no manufacturer information available. At this time the Distribution Systems are broken down and transported to another field depending upon needs.

For Place of Use or Character of Use Changes

Are there other water right certificates, water use permits or ground water registrations associated with the “from” or the “to” lands? Yes No

If YES, list the certificate, water use permit, or ground water registration numbers:_____.

Pursuant to ORS 540.510, any “layered” water use such as an irrigation right that is supplemental to a primary right proposed for transfer must be included in the transfer or be cancelled. Any change to a ground water registration must be filed separately in a ground water registration modification application.

For Substitution (ground water supplemental irrigation will be substituted for surface water primary irrigation)

Ground water supplemental Permit or Certificate # _____;
Surface water primary Certificate # _____.

For a change from Supplemental Irrigation Use to Primary Irrigation Use

Identify the primary certificate to be cancelled. Certificate # _____

For a change in point(s) of appropriation (well(s)) or additional point(s) of appropriation:

Well log(s) are attached for each authorized and proposed well(s) that are clearly labeled and associated with the corresponding well(s) in Table 1 above and on the accompanying application map.

Tip: You may search for well logs on the Department’s web page at:

http://apps.wrd.state.or.us/apps/gw/well_log/Default.aspx

AND/OR

Describe the construction of the authorized and proposed well(s) in Table 3 for any wells that do not have a well log. For *proposed wells not yet constructed or built*, provide “a best estimate” for each requested information element in the table. The Department recommends you consult a licensed well driller, geologist, or certified water right examiner to assist with assembling the information necessary to complete Table 3.

Table 3. Construction of Point(s) of Appropriation

Any well(s) in this listing must be clearly tied to corresponding well(s) described in Table 1 and shown on the accompanying application map. Failure to provide the information will delay the processing of your transfer application until it is received. The information is necessary for the department to assess whether the proposed well(s) will access the same source aquifer as the authorized point(s) of appropriation (POA). The Department is prohibited by law from approving POA changes that do not access the same source aquifer.
