Explain in your own words what you propose to accomplish with this modification; and why:

-The original well listed as a POA on GR-45 (Well-1) is a large-diameter, shallow, dug well at the center of the place of use (see modification map). This well is no longer functional. Well-1 collapsed and is no longer available for water withdrawal. Water use under GR-45 was moved to Well-2 (no well log #). Both the place of use and the type of use remain as described in GR-45 based on information provided by the Applicant and based on aerial photos (attached). The place of use has been continuously irrigated and harvested using water from Well-2, located a short distance to the east on the neighboring property, which the Applicants also own. This modification seeks to add Well-2 as an approved POA on GR-45 to match the conditions in place in the field. Well-2 is also a shallow well that produces groundwater from the same aquifer as the original Well-1 (see attached cross-section sketch).

☐ Check this box if this project is fully or partially funded by the American Recovery and Reinvestment Act. (Federal stimulus dollars)

☐ I (we) affirm that the applicant is an entity with the authority to condemn property and is acquiring the property to which the Groundwater registration proposed for modification is appurtenant by condemnation and have attached supporting documentation.

I understand that prior to Department approval of the groundwater registration modification, I may be required to submit payment to the Department for publication of a notice in a newspaper with general circulation in the area where the groundwater registration is located, once per week for two consecutive weeks. If more than one qualifying newspaper is available, I suggest publishing the notice in the following paper: Albany Democrat-Herald.

For a modification in place of use or character of use:

Are there other water right certificates, water use permits, or Groundwater registrations associated with the "from" or "to" lands? ☐ Yes ☒ No

If YES, list the other certificate, water use permit, or other Groundwater registration numbers: **N/A**

Pursuant to OAR 690-382-0200, any "layered" water use, such as an irrigation right that is supplemental to a primary irrigation right proposed for transfer, must be concurrently transferred with the registration or be cancelled. Any change to a water right must be filed separately in a transfer application. Any change to a water use permit must be filed separately with a permit amendment. Any modification to a Groundwater registration on the "to" lands must be filed separately with a Groundwater registration modification.

For modifications in point(s) of appropriation (well(s) or additional point(s) of appropriation:

- ☒ Well log(s) are attached for each well that are clearly labeled and associated with the corresponding well(s) in Table 1 above and on the accompanying application map.

AND/OR

- ☒ Describe the construction of the authorized and proposed well(s) in Table 3 for any wells that do not have a well log. For *proposed wells not yet constructed or built*, provide "a best estimate" for each requested information element in the table. The Department recommends you consult a licensed well driller, geologist, or certified water right examiner to assist with assembling the information necessary to complete Table 3.

Table 3. Construction of Point(s) of Appropriation

Any well(s) in this listing must be clearly tied to corresponding well(s) described in Table 1 and shown on the accompanying application map. Failure to provide adequate information is likely to delay the processing of your modification application until it is received. The information is necessary for the department to assess whether the proposed well(s) will access the same source aquifer as the authorized point(s) of appropriation (POA). The Department is prohibited by law from approving POA changes that do not access the same source aquifer.

Proposed or Authorized POA Name or Number	Is well already built? Well-2	Yes	N/A	31 ft	8"	0-31 ft	0-20 ft	None	6 ft		

*Well-2 is the approved POA on Certificate 46688. An original log exists (attached) but was never registered in the State well database. The log has been submitted separately to request a well log number be assigned. The well was confirmed to be constructed at the correct location and a measuring tape was used to confirm the depth and diameter of the well. The land surface elevation at Well-2 is about 10 ft higher than at Well-1. Both wells are completed within Quaternary sand and gravel alluvial deposits of the Santiam River valley.
