4. PROPOSED CHANGES TO THE WATER RIGHT

Change in Use:

Proposed use: Maintenance water for existing ponds to make up for evaporation and seepage losses

Change in Point of Diversion or Point of Appropriation:

Change

Old point of diversion or point of appropriation will not be used for this portion of the water right.

Additional

Both old and new points of diversion or points of appropriation will be used for this portion of the water right.

Location of Proposed Point of Diversion or Point of Appropriation

Coordinates (from recognized survey corner)	1/4 1/4 Section	Section	Township	Range

Change in Place of Use:

Location of Proposed Place of Use

Township	Range	Section	Government Lot or DIC	1/4 1/4 Section	Tax Lot Number	Acres (if appropriate)
16S	10E	2		NW SE	106	(3 ponds)

Remarks: This requested transfer will provide water for ^{storage & maintenance of} maintaining three existing multi-purpose ponds. There are no secondary uses of water from ponds. The ponds are used for recreation, esthetics, and fish and wildlife purposes. During the irrigation season, the ponds also assist with management of the irrigation system (a "bulge in the system") for use of water under the irrigation water right. Ponds are maintained at near full capacities year-round. There are no appreciable seepage losses, but evaporation rates are between 2 and 3 acre-feet annually. The 2.2 acres of pond total surface area evaporation is thus covered by the conversion of 2.2 acres of irrigation rights to pond maintenance. This has been discussed with Kyle Gorman, who agrees with the approach.
