On November 29, 2010, we received your water right Transfer application. The application was accompanied by $4100.00. Our receipt number 101739 is enclosed.

By copy of this letter, we are asking the Watermaster for a report regarding the potential for injury to existing water rights which may be caused by the requested change.

Your application will be examined to determine whether additional information is needed. We will notify you if further information or corrections to the application or map are required.

Except as provided under ORS 540.510(3) for municipalities, you may not use water for the new use, in the new place of use or from the new point of [diversion *or* appropriation] until a final order approving the transfer application has been issued by the Department. In order to avoid any possible forfeiture of the water right, you should continue to use the water as described by your existing water right. If the land is sold before the transfer is approved, the buyer's consent to the transfer will be required unless a recorded deed or other legal document clearly established that the water right was not conveyed in the sale.

If you have any questions, please contact the Transfer Section at (503)986-0883.

The holder of a water right may apply to permanently change an existing water use subject to transfer. A transfer application may involve any of the following changes: Point of diversion or appropriation (POD; POA); Additional point of diversion or appropriation (APOD; APOA); Historic POD (HIST); Place of use (POU); Character of use (USE); Instream (ISWR); Substitution (SUB); or Exchange (EXCH).

The holder of a water right subject to transfer may request to temporarily change the place of use of the water for up to 5 years and, if necessary to convey the water, to temporarily change the point of diversion or appropriation.

The holder of a water right permit may apply to change a point of diversion (POD) or appropriation (POA) or to change the place of use (POU).

Any person who provides comments within the comment period will receive a copy of the Department's preliminary determination of whether the application should be approved or rejected after the Department has completed a review of the application and will be provided an opportunity to protest the application and preliminary determination at that time. Comments should be sent to the Transfers Section at the Department's Salem office.

Enclosed is a copy of the final order approving your water right transfer application.

The time allowed to complete the transfer is specified in the final order. YOU SHOULD GIVE PARTICULAR ATTENTION TO THE TIME LIMIT. The water right for any portion of the authorized change in character of use or change in place of use NOT carried out within the time allowed will be lost.

An extension of the time limit can be allowed only upon a showing that diligent effort has been made to complete the actual change(s) within the time allowed.

You are required to hire a Certified Water Rights Examiner (CWRE) to complete a Claim of Beneficial Use report and map which must be submitted to this Department within one year of the date you complete the change(s) or within one year of the completion date authorized in the transfer final order, whichever occurs first.

If you have any questions related to the approval of this transfer, you may contact your caseworker, Dorothy Pedersen, by telephone at (503) 986-0890 or by e-mail at Dorothy.I.Pedersen@wrd.state.or.us.

In the Matter of Transfer Application T-11159, Morrow County	)	FINAL ORDER APPROVING CHANGES IN PLACE OF USE AND PARTIAL CANCELLATION OF THREE WATER RIGHTS

Authority

ORS 540.505 to 540.580 establishes the process in which a water right holder may submit a request to transfer the point of diversion, place of use, or character of use authorized under an existing water right. OAR Chapter 690, Division 380 implements the statutes and provides the Department's procedures and criteria for evaluating transfer applications.

ORS 540.621 establishes the process for the owner of land to which a water right is appurtenant to certify under oath that the water right, or a portion thereof, has been abandoned and to voluntarily request that it be cancelled.

Findings of Fact

Background

1. On November 29, 2010, Willow Farms, LLC., filed an application to change the places of use under portions of Certificates 53377, 53379, 75806, 76583, 83341, 83342, 83339 and 83340. The Department assigned the application number T-11159.

2. On May 2, 2012, the applicant submitted a new amended application and maps to correctly describe the places of use.

3. On October 23, 2012, the applicant submitted affidavits of partial cancellation of the domestic use under Certificates 53377, 53379 and 75806.

This final order is subject to judicial review by the Court of Appeals under ORS 183.482. Any petition for judicial review must be filed within the 60-day time period specified by ORS 183.482(1). Pursuant to ORS 536.075 and OAR 137-003-0675, you may petition for judicial review or petition the Director for reconsideration of this order. A petition for reconsideration may be granted or denied by the Director, and if no action is taken within 60 days following the date the petition was filed, the petition shall be deemed denied.

4. On January 28, 2013, the applicant submitted evidence of stock use under Certificates 53377, 53379 and 75806.

5. The portion of the first right and its layered supplemental water rights to be transferred are as follows:

19. Notice of the application for transfer was published on December 7, 2010, pursuant to OAR 690-380-4000. No comments were filed in response to the notice.

20. On July 20, 2012, the Department mailed a copy of the draft Preliminary Determination proposing to approve Transfer Application T-11359 to the applicant. The draft Preliminary Determination set forth a deadline of August 18, 2012, for the applicant to respond. On September 6, 2012, Bill Porfily, agent for the applicant submitted correspondence via e-mail requesting the Department to proceed with issuance of a Preliminary Determination and provided the necessary information to demonstrate that the applicant is authorized to pursue the transfer. In addition, the applicant has requested additional time in which to complete the transfer in order to comply with ODFW's fish screening requirements. The applicant has requested a completion date of October 1, 2016, which the Department considers reasonable. The completion date has been adjusted to October 1, 2016.

21. On February 7, 2013, the Department issued a Preliminary Determination proposing to approve Transfer Application T-11159 and sent a copy to the applicant. Additionally, notice of the Preliminary Determination for the transfer application was published on the Department's weekly notice on February 12, 2013, pursuant to ORS 540.520 and OAR 690-380-4020. No protests were filed in response to the notice.

Transfer Review Criteria [OAR 690-380-4010(2)]

22. Water has been used within the five-year period prior to submittal of the transfer application according to the terms and conditions of the rights. There is no information in the record that would demonstrate that the rights are subject to forfeiture under ORS 540.610.

23. Diversion structures, ditches, wells, pumps, pipelines and sprinkler systems sufficient to use the full amount of water allowed under the existing rights were present within the five-year period prior to submittal of Transfer Application T-11159.

24. The proposed changes would not result in enlargement of the rights.

25. The proposed changes would not result in injury to other water rights.

Partial Cancellation of Water Rights

26. On October 23, 2012, affidavits certifying that domestic use under the transferred portions of the following water rights has been abandoned, but stock use and irrigation uses are being retained. Mark Zoller requested cancellation of just the domestic use (with no rate or volume of water to be cancelled). The portions of the rights for which the domestic use will be cancelled are as follows:

Conclusions of Law

The changes in place of use proposed in Transfer Application T-11159 are consistent with the requirements of ORS 540.505 to 540.580 and OAR 690-380-5000 and the abandoned domestic uses under these portions of the rights should be cancelled.

Now, therefore, it is ORDERED:

1. The changes in place of use proposed in application T-11159 are approved and the abandoned domestic portions of the rights are cancelled.

2. The right to the use of the water is restricted to beneficial use at the place of use described, and is subject to all other conditions and limitations contained in Certificates 53377, 53379, 75806, 76583, 83339, 83340, 83341 and 83342 and any related decree.

3. Water right certificates 53377, 53379, 75806, 76583, 83339, 83340, 83341 and 83342, are cancelled. New certificates will be issued describing those portions of the rights not affected by this transfer.

4. Before water use may begin under this order, the water user shall install a totalizing flow meter, or, with prior approval of the Director, another suitable measuring device, at each point of diversion or appropriation. The water user shall maintain the meters or measuring devices in good working order. The water user shall allow the Watermaster access to the meters or measuring devices; provided however, where the meters or measuring devices are located within a private structure, the Watermaster shall request access upon reasonable notice.

5. The former place of use of the transferred rights shall no longer receive water under the rights.

6. Full beneficial use of the water shall be made, consistent with the terms of this order, on or before **October 1, 2016**. A Claim of Beneficial Use prepared by a Certified Water Right Examiner shall be submitted by the applicant to the Department within one year after the deadline for completion of the changes and full beneficial use of the water.

7. After satisfactory proof of beneficial use is received, new certificates confirming the rights transferred will be issued.

Dated at Salem, Oregon this 21ST day of March, 2013.

CERTIFICATE OF WATER RIGHT

THIS CERTIFICATE ISSUED TO

WILLOW FARMS, LLC.
c/o MARK ZOLLER
415 E. MILL PLAIN BLVD.
VANCOUVER, WA 98660

confirms the right to use the waters of TWO WELLS within the WILLOW CREEK BASIN for SUPPLEMENTAL IRRIGATION of 201.2 ACRES.

This right was perfected under Permit G-4050. The date of priority is MARCH 27, 1968. The amount of water to which this right is entitled is limited to an amount actually used beneficially, and shall not exceed 2.52 CUBIC FOOT PER SECOND (CFS); being 0.88 from Cheney Well #2 and 2.52 cfs from New Well in any combination, if available at the original point of appropriation (Cheney Well#2), or its equivalent in case of rotation, measured at the points of appropriation from the source.

The wells are located as follows:

Twp	Rng	Mer	Sec	Q - Q	Measured Distances
2 N	23 E	WM	17	SE NE	CHENEY WELL#2 (ORIGINAL WELL)- 170 FEET NORTH AND 2370 FEET EAST FROM THE CENTER ¼ CORNER OF SECTION 17
2 N	23 E	WM	20	SE NE	NEW WELL - 1330 FEET NORTH AND 1470 FEET EAST THE CENTER ¼ CORNER OF SECTION 20

The amount of water used for irrigation, together with the amount secured under any other right existing for the same lands, is limited to a diversion of ONE-EIGHTIETH of one cubic foot per second, or its equivalent for each acre irrigated, and shall be further limited to a diversion of not to exceed 3.0 acre-feet per acre for each acre irrigated during the irrigation season of each year. The use shall conform to such reasonable rotation system as may be ordered by the proper state officer.

A description of the place of use to which this right is appurtenant is as follows:

SUPPLEMENTAL IRRIGATION

The water user shall have a diversion monitoring program that shall include recording the rate and duty of water appropriated. The flow data and water use report (rate & duty) shall be recorded daily and shall be available to the Watermaster promptly upon request. Monitoring data shall be provided to the Watermaster in a reasonable summary format, approved by Watermaster. After three irrigation seasons, the Watermaster may modify the need from recording flow data daily to a lesser schedule.

The quantity of water diverted at the new point of appropriation, together with that diverted at the original point of appropriation (CHENEY WELL#2), shall not exceed the quantity of water lawfully available at the original point of appropriation.

The water user shall install and maintain an in-line flow meter for measuring and recording the quantity of water diverted at all points of appropriation. The type and plans of the measuring devices must be approved by the Department prior to beginning construction and shall be installed under the general supervision of the Department.

The wells shall be maintained in accordance with the General Standards for the Construction and Maintenance of Water Wells in Oregon.

This certificate describes that portion of the water right confirmed by Certificate 83341, State Record of Water Right Certificates, NOT modified by the provisions of an order of the Water Resources Director entered MAR 21 2013, approving Transfer Application T-11159.

The issuance of this superseding certificate does not confirm the status of the water right in regard to the provisions of ORS 540.610 pertaining to forfeiture or abandonment.

The right to the use of the water for the above purpose is restricted to beneficial use on the lands or place of use described.

The water user shall have a diversion monitoring program that shall include recording the rate and duty of water appropriated. The flow data and water use report (rate & duty) shall be recorded daily and shall be available to the Watermaster promptly upon request. Monitoring data shall be provided to the Watermaster in a reasonable summary format, approved by Watermaster. After three irrigation seasons, the Watermaster may modify the need from recording flow data daily to a lesser schedule.

The wells shall be maintained in accordance with the General Standards for the Construction and Maintenance of Water Wells in Oregon.

The quantity of water diverted at the new point of appropriation, together with that diverted at the original points of appropriation (CHENEY WELL#1 and CHENEY WELL#2), shall not exceed the quantity of water lawfully available at the original point of appropriation.

The water user shall install and maintain an in-line flow meter for measuring and recording the quantity of water diverted at all points of appropriation. The type and plans of the measuring devices must be approved by the Department prior to beginning construction and shall be installed under the general supervision of the Department.

This certificate describes that portion of the water right confirmed by Certificate 83342, State Record of Water Right Certificates, NOT modified by the provisions of an order of the Water Resources Director entered MAR 21 2013, approving Transfer Application T-11159.

The issuance of this superseding certificate does not confirm the status of the water right in regard to the provisions of ORS 540.610 pertaining to forfeiture or abandonment.

The right to the use of the water for the above purpose is restricted to beneficial use on the lands or place of use described.

SUBJECT: Water Right Transfer Application T-11159

Please find enclosed the Preliminary Determination indicating that, based on the information available, the Department intends to approve application T-11159. This document is an intermediate step in the approval process; water may not be used legally as proposed in the transfer application until a Final Order has been issued by the Department. Please read this entire letter carefully to determine your responsibility for additional action.

A public notice is being published in the Department's weekly publication, simultaneously with issuance of the Preliminary Determination. The notice initiates a period in which any person may file either a protest opposing the decision proposed by the Department in the Preliminary Determination or a standing statement supporting the Department's decision. The protest period will end 30 days after the Department's notice.

If no protest is filed, the Department will issue a Final Order consistent with the Preliminary Determination. You should receive a copy of the Final Order about 30 days after the close of the protest period.

If a protest is filed, the application may be referred to a contested case proceeding. A contested case provides an opportunity for the proponents and opponents of the decision proposed in the Preliminary Determination to present information and arguments supporting their position in a quasi-judicial proceeding.

Please do not hesitate to contact me at (503) 986-0890 or Dorothy.I.Pedersen@wrd.state.or.us if I may be of assistance.

Sincerely,

Dorothy I. Pedersen
Transfer Program Advisor

19. Notice of the application for transfer was published on December 7, 2010, pursuant to OAR 690-380-4000. No comments were filed in response to the notice.

20. On July 20, 2012, the Department mailed a copy of the draft Preliminary Determination proposing to approve Transfer Application T-11359 to the applicant. The draft Preliminary Determination set forth a deadline of August 18, 2012, for the applicant to respond. On September 6, 2012, Bill Porfily, agent for the applicant submitted correspondence via e-mail requesting the Department to proceed with issuance of a Preliminary Determination and provided the necessary information to demonstrate that the applicant is authorized to pursue the transfer. In addition, the applicant has requested additional time in which to complete the transfer in order to comply with ODFW's fish screening requirements. The applicant has requested a completion date of October 1, 2016, which the Department considers reasonable. The completion date has been adjusted to October 1, 2016.

Transfer Review Criteria [OAR 690-380-4010(2)]

21. Water has been used within the five-year period prior to submittal of the transfer application according to the terms and conditions of the rights. There is no information in the record that would demonstrate that the rights are subject to forfeiture under ORS 540.610.

22. Diversion structures, ditches, wells, pumps, pipelines and sprinkler systems sufficient to use the full amount of water allowed under the existing rights were present within the five-year period prior to submittal of Transfer Application T-11159.

23. The proposed changes would not result in enlargement of the rights.

24. The proposed changes would not result in injury to other water rights.

Partial Cancellation of Water Rights

25. On October 23, 2012, affidavits certifying that domestic use under the transferred portions of the following water rights has been abandoned, but stock use and irrigation uses are being retained. Mark Zoller requested cancellation of just the domestic use (with no rate or volume of water to be cancelled). The portions of the rights for which the domestic use will be cancelled are as follows:

The portion of Certificate 53377:

DOMESTIC USE				
Twp	**Rng**	**Mer**	**Sec**	**Q - Q**
2 N	23 E	WM	8	SE SW

The portion of Certificate 53379:

DOMESTIC USE				
Twp	**Rng**	**Mer**	**Sec**	**Q - Q**
2 N	23 E	WM	17	SE NE
2 N	23 E	WM	17	NW NW

The portion of Certificate 75806:

DOMESTIC USE

2 N	23 E	WM	17	NE NE
2 N	23 E	WM	17	NW NE
2 N	23 E	WM	17	SW NE
2 N	23 E	WM	17	SE NE
2 N	23 E	WM	17	NE NW

Determination and Proposed Action

The changes in place of use proposed in Transfer Application T-11159 appear to be consistent with the requirements of ORS 540.505 to 540.580 and OAR 690-380-5000 and the abandoned domestic uses under these portions of the rights should be cancelled. If protests are not filed pursuant to OAR 690-380-4030, the transfer application will be approved and the abandoned portions of the rights will be cancelled.

If Transfer Application T-11159 is approved, the final order will include the following:

1. *The changes in place of use proposed in application T-11159 are approved and the abandoned domestic portions of the rights are cancelled.*

2. *The right to the use of the water is restricted to beneficial use at the place of use described, and is subject to all other conditions and limitations contained in Certificates 53377, 53379, 75806, 76583, 83339, 83340, 83341 and 83342 and any related decree.*

3. *Water right certificates 53377, 53379, 75806, 76583, 83339, 83340, 83341 and 83342, are cancelled. New certificates will be issued describing those portions of the rights not affected by this transfer.*

4. *Before water use may begin under this order, the water user shall install a totalizing flow meter, or, with prior approval of the Director, another suitable measuring device, at each point of diversion or appropriation. The water user shall maintain the meters or measuring devices in good working order. The water user shall allow the Watermaster access to the meters or measuring devices; provided however, where the meters or measuring devices are located within a private structure, the Watermaster shall request access upon reasonable notice.*

5. *The former place of use of the transferred rights shall no longer receive water under the rights.*

6. *Full beneficial use of the water shall be made, consistent with the terms of this order, on or before* ***October 1, 2016****. A Claim of Beneficial Use prepared by a Certified Water Right Examiner shall be submitted by the applicant to the Department within one year after the deadline for completion of the changes and full beneficial use of the water.*

7. *After satisfactory proof of beneficial use is received, new certificates confirming the rights transferred will be issued.*

Dated at Salem, Oregon this 7 day of February, 2013.

Notice of Preliminary Determination for
Water Right Transfer T-11159

T-11144 filed by Mark Zoller of Willow Farms, LLC, PO Box 288, Washougal, WA 98671, proposes to change the places of use for portions of eight water rights. Certificates 53377, 53379, 75806 and 76583 allow use of 0.89 cfs from diversions on Willow Creek in Sec. 7 and 20, T2N, R23E, W.M. Certificates 83339, 83340 and 83341 allow use of 0.25 cfs from wells in Sec. 17 and 20. Certificate 83342 allows use of 299 gallons per minute from wells in Sec. 8, 17 and 20. The applicant proposes to change the places of use for primary and supplemental irrigation for all the above described rights from Sec. 8, 16, 17, 18, 20 and 21 to other locations within Sec. 7, 17, 18 and 19. The Water Resources Department proposes to approve the transfer, based on the requirements of ORS Chapter 540 and OAR 690-380-5000.

Any person may file, jointly or severally, with the Department a protest or standing statement within 30 days after the date of final publication of notice in the Department's weekly notice or of this newspaper notice, whichever is later. A protest form and additional information on filing protests may be obtained by calling (503) 986-0883. The last date of newspaper publication is ***[DATE OF LAST PUBLICATION]***. If no protests are filed, the Department will issue a final order consistent with the preliminary determination.

Mr. Zoller,

I received your affidavits of partial cancellation for the domestic use portions of Certificates 53377, 75806 and 53379, but still have the T-11159 transfer on hold, waiting to receive confirmation of how you want to proceed in relation to the stock use for those rights. Based on the below September 20th e-mail from Ken Dowden, I have been expecting to receive the following:

1. a simple statement (could even be an e-mail response to this e-mail) outlining whether it is your intention to include the Stockwater in this transfer; and, if you do want to include stockwater,
2. a new (appending) "Evidence of Use" statement affidavit attesting to the use of STOCKWATER under Certificates 53379, 75806 and 53377. Please mail the original to me (referencing T-11159) in Salem at 725 Summer Street NE, Suite A. Salem, OR 97301-1266.

Thank you,
Dorothy Pedersen

Bill, on the Willow Farms transfer and the issues regarding the continued Stock and Domestic portions, we don't have to re-do anything, just send in:

1) the three affidavits I forwarded you for **JUST** THE DOMESTIC portions, deleting the Stockwater use wording from the affidavits

2) submit a new (appending) "Evidence of Use" statement affidavit attesting to the use of STOCKWATER under Certificates 53379, 75806 and 53377.

3) a simple cover letter to Dorothy outlining this intention to keep the Stockwater moving through the process with the modifications to be made in this transfer.

And, please send to Dorothy Pedersen (referencing T-11159) in Salem at 725 Summer Street NE, Suite A. Salem, OR 97301-1266.

Thanks Bill.

Ken

I have reviewed the proposed and I believe it is ok. I have one concern however: Other cliens of mine on Willow Creek have a very hard time getting ODF&W to work with them to come up with a workable fish screen and some case can even get them to visit the site for their recommendation. Thus I would like to suggest that the Date for completion be extended to October 2016. The Willow Farm renter will need to move some circles and may not have all that done next fall. But the big reason is getting ODF&W on the fish screen issue.

Bill, I am going to pick this file up this morning and finish it off. (review of the ownership reports)

Then send off to Salem.

The only thing I think is lacking is the "go-ahead" letter from you or the applicant that you've read the draft of the PD and agree with all that is authorized and conditioned as such.

Let me know when you get a chance.

Thanks Bill.

SUBJECT: Water Right Transfer Application T-11159

Your water right transfer is in one of three phases of processing. Enclosed is a draft of our Preliminary Determination regarding Transfer Application T-11159. The document reflects the Department's conclusion that, based on the information currently available, the transfer will be approved.

Items needed before the next phase of processing…

1. Please review the draft carefully to see if it accurately reflects the changes you intend to make, and to become familiar with all proposed conditions. **You will need to respond in writing** by the deadline provided below, whether you agree with the proposed action and conditions. Also, we would appreciate having you let us know if there are any typographical errors that need to be corrected.
2. A report of landownership for the lands to which the water rights are appurtenant (the FROM lands) is required. **The report must be prepared by a title company and meet the criteria below.** *(Reports may be called by various names, such as Customer Service Report, Property Analysis Report (PAR), List Pack, Lot Book Report, etc.)*
   a) The title company's report must either be:
      i) prepared within 3 months of the draft Preliminary Determination showing current ownership, or
      ii) prepared within 3 months of recording of a water right conveyance agreement, or
      iii) prepared at any time, but showing ownership at the time a water right conveyance agreement was recorded.
   b) The ownership report shall include:
      i) Date reflected by the ownership information
      ii) List of owners at that time
      iii) Legal description of the property where the water right to be transferred is currently located.
   c) You will need to submit a notarized statement of consent from any landowner listed in the ownership report who is not already included in the transfer application, or other information such as a water right conveyance agreement, if applicable.

Conditions to your water right…

The Watermaster has required water measurement devices at the diversion points prior to diversion of water. Enclosed is a contact information sheet to assist you in pursuing additional information or approval of the required (or alternate) device(s).+

This transfer will require installation of a fish screen at the new diversion point **prior to diversion of water. You may not divert water prior to installation and approval of the fish screen.** You may wish to contact the ODFW staff person listed on the enclosed contact sheet for more information about the screen and to determine a reasonable timeline.

Please note the proposed date by which all conditions must be met: October 1, 2013. If the required completion date is insufficient to comply with any of the conditions, you may extend the date at no cost to you during this stage of processing. Please let me know by the comment deadline so we can make the proper arrangements to get you the time you need.

What happens next…

Once the Preliminary Determination is issued a publication period is required. The Department will publish a notice in their weekly publication, which opens a 30-day period in which the transfer can be protested.

Issuance of the Preliminary Determination will occur shortly after we receive:

1. your written response to the conditions and proposed action in the draft Preliminary Determination (e-mail is acceptable); and
2. report of ownership, and affidavits of consent from any landowners shown in the ownership report who have not signed the transfer application.

If we do not receive the items listed above by August 18, 2012, a Preliminary Determination may be issued denying the application as incomplete.

Please do not hesitate to contact me at 541-278-5456 or Ken.D.Dowden@wrd.state.or.us if I may be of assistance.

Sincerely,

Ken Dowden

17. Notice of the application for transfer was published on December 7, 2010, pursuant to OAR 690-380-4000. No comments were filed in response to the notice.

Transfer Review Criteria [OAR 690-380-4010(2)]

18. Water has been used within the five-year period prior to submittal of the transfer application according to the terms and conditions of the rights. There is no information in the record that would demonstrate that the rights are subject to forfeiture under ORS 540.610.

19. Diversion structures, ditches, wells, pumps, pipelines and sprinkler systems sufficient to use the full amount of water allowed under the existing rights were present within the five-year period prior to submittal of Transfer Application T-11159.

20. The proposed changes would not result in enlargement of the rights.

21. The proposed changes would not result in injury to other water rights.

Determination and Proposed Action

The changes in place of use proposed in Transfer Application T-11159 appear to be consistent with the requirements of ORS 540.505 to 540.580 and OAR 690-380-5000. If protests are not filed pursuant to OAR 690-380-4030, the transfer application will be approved.

If Transfer Application T-11159 is approved, the final order will include the following:

1. *The changes in place of use proposed in application T-11159 are approved.*

2. *The right to the use of the water is restricted to beneficial use at the place of use described, and is subject to all other conditions and limitations contained in Certificates 53377, 53379, 75806, 76583, 83339, 83340, 83341 and 83342 and any related decree.*

3. *Water right certificates 53377, 53379, 75806, 76583, 83339, 83340, 83341 and 83342, are cancelled. New certificates will be issued describing those portions of the rights not affected by this transfer.*

4. *Before water use may begin under this order, the water user shall install a totalizing flow meter, or, with prior approval of the Director, another suitable measuring device, at each point of diversion/appropriation. The water user shall maintain the meters or measuring devices in good working order. The water user shall allow the Watermaster access to the meters or measuring devices; provided however, where the meters or measuring devices are located within a private structure, the Watermaster shall request access upon reasonable notice.*

5. *The former place of use of the transferred rights shall no longer receive water under the rights.*

6. *Full beneficial use of the water shall be made, consistent with the terms of this order, on or before* ***October 1, 2013****. A Claim of Beneficial Use prepared by a Certified Water Right Examiner shall be submitted by the applicant to the Department within one year after the deadline for completion of the changes and full beneficial use of the water.*

7. *After satisfactory proof of beneficial use is received, new certificates confirming the rights transferred will be issued.*

RE: Transfer Application T-11159

Dear Mr. Zoller,

I am continuing my review of your t e of use under existing water right Certificates 53379, 75806, 76583, 83340, 83339, 83341, 83342, and 53377. This letter will serve to outline several issues that need to be addressed.

The Department has identified the following as issues that need to be resolved before we can proceed:

APPLICATION

- the most outstanding error found is the assignment of the incorrect Township designation throughout the entire application. Starting with the tabulation of the place of use tables on Page 6 of 29, please note that the Township is 2 NORTH, and not South. This holds true for not only the "FROM" lands but the proposed "TO" lands tabulations as well.

- since a complete modification to the application may be necessary, please correct the common name "Cheney" which has been consistently been spelled incorrectly as Chaney with an "*a*." The name also appears often in each of the "*current water delivery system*" descriptions for each of the water rights. The name also appears in the listings of the POA Well numbers in the changes tables.

- on page 9 of 29, fourth line down in the table: the 0.5 acre tabulation entry for Certificate #75806 should be located within the SE¼ NE¼, instead of the SW¼ NE¼.

- on page 9 of 29, fifth line down in the table: the 0.8 acre tabulation entry for Certificate #75806 should be described as having a priority date of 1892. There are no 1906 acres within that ¼ ¼.

- on page 13 of 29, the top of the page [*erroneously*] lists Certificate 76075. (?)

- on page 20 of 29, the Cheney Well#1 is not an authorized source listed in Certificate 83341. And, to follow-up, on the next page in the table, these three wells are listed again, when, in fact, it may be possible that these were inadvertently switched with the next Certificate's listing (Cert# 83342) of its Authorized Points of Appropriation table on Pages 23, 24, and 25, which contain the POA's for Certificate 83341. Please correct these pages to appropriately describe the authorized points of appropriation.

MAPS

- on Map 2 of 8, as noted above, please change the hachuring for the 1892 designation of the 0.8 acres in the NE¼ NW¼, of Section 17. This would then require you to correct the total acreage amounts in your Key /Legend to the right.

- on Maps 4 and 5, both describe the POA NEW WELL coordinates incorrectly. Please correct the measured distances to match the Certificates and associated Final Proof maps for these groundwater rights.

In addition, each of these "New Well" locations on the maps are incorrect. Please match the location as shown on the Final Proof maps in which Certificates 83340 and 83339 were based. The correct location of the New Well is a couple of hundred feet downstream from your current location, just to the east of the creek it appears.

- on Map 5 of 8, the title at top of map should reflect Certificate number 83339, not 53339.

- on Map 6 of 8, the listing of POA Cheney Well #1 is incorrect. It is not an authorized source listed in Certificate 83341. As noted above, I believe these were inadvertently switched with the next Certificate's listing (Cert# 83342) of its Authorized Points of Appropriation on both the maps as well. So, please also correct Map 7 of 8 to add Cheney Well #1. These Maps 6 and 7 should then also include the correct listing of each source(s) in your Key /Legends to the right.

The above described items need to be completed in order for me to proceed any further on your transfer request. If we do not receive the above described items by April 27, 2012, or a Preliminary Determination may be issued denying the application as incomplete. Should you need additional time or have any additional questions, I can be reached at (541) 278-5456 or ken.d.dowden@wrd.state.or.us .

Bill, just another note:

On Page 6 of 29 (re: Cert 53379), in addition to the 2 **NORTH** designation on the left side of table, the 7.6 acres and the 4.0 acres are within Section **17**, instead of Sec. 8 you have listed.

I think I forgot to mention that....

Thanks Bill.

Bill, this is hopefully my last one, and, if you already have finished up, we can initial and do over the phone or something.

At the bottom of Page 21 of 29 (re: Cert 83341), in addition to the 2 **NORTH** designation on the left and right sides of table, the very bottom of the "TO" lands 2.8 acres is actually going into the **SW¼** SE¼, instead of the ***NW¼*** SE¼ of Section 18.

I think I forgot to mention that as well.... That should do it!

Thanks Bill.

NOT SENT

Hello Ivan.

I am working on a transfer application T-11159 for Willow Farms, (Morrow Co.) in which I have four groundwater rights, all containing a condition on the certificate which states:

> The water user shall have a diversion monitoring program that include recording the rate and duty of water appropriated. The data and water use report (rate and duty) shall be recorded dail shall be available to the Watermaster promptly upon req Monitoring data shall be provided to the Watermaster in a reaso summary format, approved by the Watermaster. After three irrig seasons, the Watermaster may modify the need for recording flow daily to a lesser schedule.

KEEP

KEN J. MAY

Certificates 83339, 83340, 83341 and 83342 were issued in April of 2007. Some of the reports were requested early on by then Watermaster Joel Clark, and some data has been found in the Condon Watermaster's office for one years worth complying with this required monitoring.

WANT TO ADJUST AT SOME FUTURE DATE ?

I had asked Mike Ladd a question reqarding this condition:

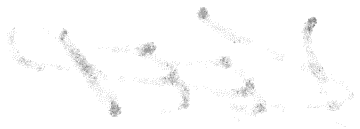

> *that I am only authorizing a change in place of use on a portion of these groundwater rights, when I go to issue the remaining rights, should I keep this condition on these certificates, since the three years has expired, or is* ***now*** *the time for the Watermaster to make a call to the need for lesser scheduled of daily readings, or drop all-together?*

Since it appears that the landowner has flow-meters on every well and every diversion structure on his SW rights from Willow Creek, what do you think the next step would be? Since it is not apparent as to how this condition was implemented, can you or someone determine by looking into the GW evaluation for these permits at the time why or how they were implemented/incorporated.

Thanks Ivan.

Let me know if there is any other information you need.

Watermaster Review Form: Water Right Transfer

Transfer Application: T-11159 Review Due Date: _____

Applicant Name: Willow Farms, LLC % Mark Zoller

Proposed Changes: ☒ POU ☐ POD ☐ POA ☐ USE ☐ OTHER

Reviewer(s): Tony Justus, June Miller Date of Review: Jun. 13, 2011

1. Do you have information suggesting that the water rights may be subject to forfeiture? ☐ Yes ☒ No If "Yes", describe the information and indicate if you intend to file a cancellation affidavit or if you need additional time to determine if a cancellation affidavit should be filed: _____

2. Is there a history of regulation on the source that serves the right proposed for transfer that has involved the right and downstream water rights? ☒ Yes ☐ No Generally characterize the frequency of any regulation or explain why regulation has not occurred: Upstream Willow Creek water rights have been regulated for these w/rs in the past. Use downstream has been minimal, so regulation for downstream uses has been minor or not occurring. Downstream use appears to be increasing.

3. Check here if it appears that downstream water rights benefit from return flows resulting from the current use of the right? ☒ If you check the box, generally characterize the locations where the return flows likely occur and list the water rights that benefit most: return flows occurr along the creek as use is adjacent to the creek. Creek typically increases in flow just upstream of the POD in Section 7. I suspect the return flows occur at or above this POD also.

4. Are there upstream water rights that would be affected by the proposed change? ☐ Yes ☒ No If "Yes", describe how the rights would be affected and list the rights most affected: _____

5. For POD changes and instream transfers, check here if there are channel losses between the old and new PODs or within the proposed instream reach? ☐ If you check the box, describe and, if possible, estimate the losses: _____

6. Would distribution of water for the right after the proposed change result in regulation of other water rights that would not have occurred if use of the existing right was maximized? ☐ Yes ☒ No If "Yes", explain: _____

7. For POU changes, would the original place of use continue to receive water from the same source? ☐ Yes ☒ No ☐ N/A If "Yes", explain: _____

8. For POU or USE changes, would use of the existing right at "full face value," result in the diversion of more water than can be used beneficially and without waste? ☐ Yes ☒ No If "Yes", explain: _____

9. Are there other issues not identified through the above questions? ☒ Yes ☐ No If "Yes", explain: application for Cert. 75806 lists .8 acres of 1906 as being moved from the NENW. According to the certificate there is no 1906 pd in that 1/4,1/4. All pods and poas in use should be required to have measurement devices. Clarify if applicant wants to remove authorized pods that are not being used from future certificates. Otherwise I request mmt devices on all poas and pods if they are or will be be used.
10. What alternatives may be available for addressing any issues identified above: correct application, should be 1892 priority date.
11. Have headgate notices been issued for the source that serves the right? ☐ Yes ☒ No
12. The checked water control and measurement conditions should be included in the transfer:

Headgates: ☐ **NA**	☒ Present and should be maintained.	☐ Should be required prior to diverting water.	☐ May be required in the future.

Measurement Devices:

☒ *The water user shall maintain and operate the existing measurement device and shall make such improvements as may be required by the Department.*

Surface Water Diversion or Groundwater Point of Appropriation:

☐ *The Director may require the water user to install a totalizing flow meter or other suitable measuring devices at each point of diversion/appropriation. If the Director notifies the water user to install totalizing flow meters or other measuring devices, the water user shall install such devices specified by the Director within the period allowed in the notice. Once installed, the water user shall maintain the meters or measuring devices in good working order and shall allow the Watermaster access to the meters or measuring devices.*

☒ *Water use measurement conditions:* (if this condition is selected, also fill in the top sections of page 3)
- a. ***Before water use may begin*** *under this order, the water user shall install a* ***totalizing flow meter****, or, with prior approval of the Director, another suitable measuring device, at each point of diversion/appropriation.*
- b. *The water user shall maintain the meters or measuring devices in good working order.*
- c. *The water user shall allow the Watermaster access to the meters or measuring devices; provided however, where the meters or measuring devices are located within a private structure, the Watermaster shall request access upon reasonable notice.*

Reservoirs:

☐ *The Director may require the water user to install staff gages or other suitable measuring devices that measure the entire range and stage between empty and full in each reservoir. Staff gages shall be United States Geological Survey style. Additionally, if the reservoir is located in-channel, weirs or other suitable measuring devices may be required upstream and downstream of the reservoir, and an adjustable outlet valve may be required. If the Director notifies the water user to install adjustable outlet valves, staff gages, weirs, or other suitable measuring devices, the water user shall install such devices specified by the Director within the period allowed in the notice. Once installed, the water user shall maintain the devices in good working order and shall allow the Watermaster access to the devices.*

On November 29, 2010, we received your water right Transfer application. The application was accompanied by $4100.00. Our receipt number 101739 is enclosed.

By copy of this letter, we are asking the Watermaster for a report regarding the potential for injury to existing water rights which may be caused by the requested change.

Your application will be examined to determine whether additional information is needed. We will notify you if further information or corrections to the application or map are required.

Except as provided under ORS 540.510(3) for municipalities, you may not use water for the new use, in the new place of use or from the new point of [diversion *or* appropriation] until a final order approving the transfer application has been issued by the Department. In order to avoid any possible forfeiture of the water right, you should continue to use the water as described by your existing water right. If the land is sold before the transfer is approved, the buyer's consent to the transfer will be required unless a recorded deed or other legal document clearly established that the water right was not conveyed in the sale.

If you have any questions, please contact the Transfer Section at (503)986-0883.

The holder of a water right may apply to permanently change an existing water use subject to transfer. A transfer application may involve any of the following changes: Point of diversion or appropriation (POD; POA); Additional point of diversion or appropriation (APOD; APOA); Historic POD (HIST); Place of use (POU); Character of use (USE); Instream (ISWR); Substitution (SUB); or Exchange (EXCH).

The holder of a water right subject to transfer may request to temporarily change the place of use of the water for up to 5 years and, if necessary to convey the water, to temporarily change the point of diversion or appropriation.

The holder of a water right permit may apply to change a point of diversion (POD) or appropriation (POA) or to change the place of use (POU).

Any person who provides comments within the comment period will receive a copy of the Department's preliminary determination of whether the application should be approved or rejected after the Department has completed a review of the application and will be provided an opportunity to protest the application and preliminary determination at that time. Comments should be sent to the Transfers Section at the Department's Salem office.

Part 2 of 4 – Transfer Application Map Checklist

Your transfer application will be returned if any of the map requirements listed below are not met.

Please be sure that the transfer application map you submit includes all the required items and matches the existing water right map. Check all boxes that apply.

☒ ☐ N/A Certified Water Right Examiner (CWRE) Stamp and Original Signature. For list of CWREs see http://www1.wrd.state.or.us/pdfs/cwre_listing.pdf. CWRE stamp and signature are not required for temporary changes, historic point of diversion changes, and substitutions.

☒ ☐ N/A If **more than three** water rights are involved, separate maps are needed for each water right.

☒ Permanent quality printed with dark ink on white or clear paper or film.

☒ The size of the map can be 8½ x 11 inches, 8½ x 14 inches, or up to 30 x 30 inches. For 30 x 30 inch maps, three (3) paper copies and an electronic copy in a .pdf, .tiff or .jpg format are required.

☒ A north arrow, a legend, and scale.

☒ The scale of the map must be: 1 inch = 400 feet, 1 inch = 1,320 feet, the scale of the Final Proof/Claim of Beneficial Use Map (the map used when the permit was certificated), the scale of the county assessor map if the scale is not smaller than 1 inch = 1,320 feet, or a scale that has been pre-approved by the Department.

☒ Township, Range, Section, ¼ ¼, DLC, Government Lot, and other recognized public land survey lines.

☒ Tax lot boundaries (property lines) are required. Tax lot numbers are recommended.

☒ Major physical features including rivers and creeks showing direction of flow, lakes and reservoirs, roads, and railroads.

☒ Major water delivery system features from the point(s) of diversion/appropriation such as main pipelines, canals, and ditches.

☒ Existing place of use that includes separate hachuring for each water right, priority date, and use including number of acres in each quarter-quarter section, government lot, or in each quarter-quarter section as projected within government lots, donation land claims, or other recognized public land survey subdivisions. If less than the entirety of the water right is being changed, a separate hachuring is needed for lands left unchanged.

☒ ☐ N/A Proposed place of use that includes separate hachuring for each water right, priority date, and use including number of acres in each quarter-quarter section, government lot, or in each quarter-quarter section as projected within government lots, donation land claims, or other recognized public land survey subdivisions.

☒ Existing point(s) of diversion or well(s) with distance and bearing or coordinates from a recognized survey corner. This information can be found in your water right certificate or permit.

☐ ☒ N/A If you are proposing a change in point(s) of diversion or well(s), show the proposed location and label it clearly with distance and bearing or coordinates. If GPS coordinates are used, latitude-longitude coordinates may be expressed as either degrees-minutes-seconds with at least one digit after the decimal (example – 42°32'15.5") or degrees-decimal with five or more digits after the decimal (example – 42.53764°).

4500 gallons per minute (gpm)

Describe the current water delivery system or the system that was in place at some time within the last five years. Include information on the pumps, canals, pipelines and sprinklers used to divert, convey and apply the water at the authorized place of use. **Willow Farms has two diversion on Willow creek and 3 wells for the irrigation of 12 Center pivots and 6 wheel lines. The North Diversoin from Willow Creek has a 10 hp lift pump that delivers water to a screening box. 3-50 hp pump from the screen box to the delivery system shown on the application map to the circles and wheel lines. Much like the North POD, the South POD has a 10 hp lift pump to pump water to a screen box where two 50 hp pumps into the same system shown on the application map. The three wells pump water into the same system as the Willow Creek Pumps. The Cheney Well #1 is equipped with a 30 hp deep well turbine, Cheney Well #2 is equipped with a 100 hp deep well turbine and a 50 hp booster pump and the New Well has a 300 hp deep well turbine pump.**

For Place of Use or Character of Use Changes

Are there other water right certificates, water use permits or ground water registrations associated with the "from" or the "to" lands? ☒ Yes ☐ No

If YES, list the certificate, water use permit, or ground water registration numbers: **83342, 53379, 75806, & 53377**

Pursuant to ORS 540.510, any "layered" water use such as an irrigation right that is supplemental to a primary right proposed for transfer must be included in the transfer or be cancelled. Any change to a ground water registration must be filed separately in a ground water registration modification application.

☐ Well log(s) are attached for each authorized and proposed well(s) that are clearly labeled and associated with the corresponding well(s) in Table 1 above and on the accompanying application map. (**Tip**: You may search for well logs on the Department's web page at: http://apps2.wrd.state.or.us/apps/gw/well_log/Default.aspx)

OR

☐ Describe the construction of the authorized and proposed well(s) in Table 3 for any wells that do not have a well log.

Any well(s) in this listing must be clearly tied to corresponding well(s) described in Table 1 and shown on the accompanying application map. Failure to provide adequate information is likely to delay the processing of your transfer application. For proposed wells, we recommend that you consult a licensed well driller, geologist, or certified water right examiner for the proper information needed to complete the table.

The water user shall have a diversion monitoring program that shall include recording the rate and duty of water appropriated. The flow data and water use report (rate and duty) shall be recorded daily and shall be available to the Watermaster promptly upon request. Monitoring data shall be provided to the Watermaster in a reasonable summary format, approved by the Watermaster. After three irrigation seasons, the Watermaster may modify the need for recording flow data daily to a lesser schedule.

The wells shall be maintained in accordance with the General Standards for the Construction and Maintenance of Water Wells in Oregon.

The quantity of water diverted at the new point of appropriation, together with the quantity diverted from the original points of appropriation (CHENEY WELL #1 and CHENEY WELL #2) shall not exceed the quantity of water available from the original point of appropriation.

The water user shall install and maintain an in-line flow meter for measuring and recording the quantity of water diverted at all points of appropriation. The type and plans of the measuring devices must be approved by the Department prior to beginning construction and shall be installed under the general supervision of the Department.

This certificate is issued to confirm a change in POINTS OF APPROPRIATION approved by an order of the Water Resources Director entered NOVEMBER 27, 2002, approving Transfer Application 8476, and supersedes Certificate 74191, State Record of Water Right Certificates.

Your transfer application <u>will be returned</u> if any of the map requirements listed below are not met.

Please be sure that the transfer application map you submit includes all the required items and matches the existing water right map. Check all boxes that apply.

☒ ☐ N/A Certified Water Right Examiner (CWRE) Stamp and Original Signature. For list of CWREs see http://www1.wrd.state.or.us/pdfs/cwre_listing.pdf. CWRE stamp and signature are not required for temporary changes, historic point of diversion changes, and substitutions.

☒ ☐ N/A If **more than three** water rights are involved, separate maps are needed for each water right.

☒ Permanent quality printed with dark ink on white or clear paper or film.

☒ The size of the map can be 8½ x 11 inches, 8½ x 14 inches, or up to 30 x 30 inches. For 30 x 30 inch maps, three (3) paper copies and an electronic copy in a .pdf, .tiff or .jpg format are required.

☒ A north arrow, a legend, and scale.

☒ The scale of the map must be: 1 inch = 400 feet, 1 inch = 1,320 feet, the scale of the Final Proof/Claim of Beneficial Use Map (the map used when the permit was certificated), the scale of the county assessor map if the scale is not smaller than 1 inch = 1,320 feet, or a scale that has been pre-approved by the Department.

☒ Township, Range, Section, ¼ ¼, DLC, Government Lot, and other recognized public land survey lines.

☒ Tax lot boundaries (property lines) are required. Tax lot numbers are recommended.

☒ Major physical features including rivers and creeks showing direction of flow, lakes and reservoirs, roads, and railroads.

☒ Major water delivery system features from the point(s) of diversion/appropriation such as main pipelines, canals, and ditches.

☒ Existing place of use that includes separate hachuring for each water right, priority date, and use including number of acres in each quarter-quarter section, government lot, or in each quarter-quarter section as projected within government lots, donation land claims, or other recognized public land survey subdivisions. If less than the entirety of the water right is being changed, a separate hachuring is needed for lands left unchanged.

☒ ☐ N/A Proposed place of use that includes separate hachuring for each water right, priority date, and use including number of acres in each quarter-quarter section, government lot, or in each quarter-quarter section as projected within government lots, donation land claims, or other recognized public land survey subdivisions.

☒ Existing point(s) of diversion or well(s) with distance and bearing or coordinates from a recognized survey corner. This information can be found in your water right certificate or permit.

☐ ☒ N/A If you are proposing a change in point(s) of diversion or well(s), show the proposed location and label it clearly with distance and bearing or coordinates. If GPS coordinates are used, latitude-longitude coordinates may be expressed as either degrees-minutes-seconds with at least one digit after the decimal (example – 42°32'15.5") or degrees-decimal with five or more digits after the decimal (example – 42.53764°).

Check the following boxes that apply:

☒ The applicant is responsible for completion of change(s). Notices and correspondence should continue to be sent to the applicant.

☐ The receiving landowner will be responsible for completing the proposed change(s) after the final order is issued. Copies of notices and correspondence should be sent to this landowner.

☐ The receiving landowner and applicant will be responsible for completion of change(s). Copies of notices and correspondence should be sent to this landowner and the applicant.

At this time, are the lands in this transfer application in the process of being sold? ☐ Yes ☒ No

If YES, and you know who the new landowner will be, please complete the receiving landowner information table below. If you do not know who the new landowner will be, then a request for assignment will have to be filed for at a later date.

If a property sells, the certificated water right(s) located on the land belong to the new owner, unless a sale agreement or other document states otherwise. (To learn about sale agreements please visit our web site at: http://www1.wrd.state.or.us/pdfs/Transfer-PropertyTransactions.pdf)

Description of Water Delivery System

System capacity: _____ cubic feet per second (cfs) **OR**

4500 gallons per minute (gpm)

Describe the current water delivery system or the system that was in place at some time within the last five years. Include information on the pumps, canals, pipelines and sprinklers used to divert, convey and apply the water at the authorized place of use. **Willow Farms has two diversion on Willow creek and 3 wells for the irrigation of 12 Center pivots and 6 wheel lines. The North Diversoin from Willow Creek has a 10 hp lift pump that delivers water to a screening box. 3-50 hp pump from the screen box to the delivery system shown on the application map to the circles and wheel lines. Much like the North POD, the South POD has a 10 hp lift pump to pump water to a screen box where two 50 hp pumps into the same system shown on the application map. The three wells pump water into the same system as the Willow Creek Pumps. The Chaney Well #1 is equipped with a 30 hp deep well turbine, Chaney Well #2 is equipped with a 100 hp deep well turbine and a 50 hp booster pump and the New Well has a 300 hp deep well turbine pump.**

For Place of Use or Character of Use Changes

Are there other water right certificates, water use permits or ground water registrations associated with the "from" or the "to" lands? ☒ Yes ☐ No

If YES, list the certificate, water use permit, or ground water registration numbers: **76583 & 83339**

Pursuant to ORS 540.510, any "layered" water use such as an irrigation right that is supplemental to a primary right proposed for transfer must be included in the transfer or be cancelled. Any change to a ground water registration must be filed separately in a ground water registration modification application.

For Place of Use or Character of Use Changes

Are there other water right certificates, water use permits or ground water registrations associated with the "from" or the "to" lands? ☒ Yes ☐ No

If YES, list the certificate, water use permit, or ground water registration numbers: **83341, 53379, 75806, & 53377**

Pursuant to ORS 540.510, any "layered" water use such as an irrigation right that is supplemental to a primary right proposed for transfer must be included in the transfer or be cancelled. Any change to a ground water registration must be filed separately in a ground water registration modification application.

For Substitution (ground water supplemental irrigation will be substituted for surface water primary irrigation) N/A

Ground water supplemental Permit or Certificate # _____;
Surface water primary Certificate # _____.

For a change from Supplemental Irrigation Use to Primary Irrigation Use N/A

Identify the primary certificate to be cancelled. Certificate # _____

For a change in point(s) of appropriation (well(s)) or additional point(s) of appropriation: N/A

☐ Well log(s) are attached for each authorized and proposed well(s) that are clearly labeled and associated with the corresponding well(s) in Table 1 above and on the accompanying application map. (**Tip**: You may search for well logs on the Department's web page at: http://apps2.wrd.state.or.us/apps/gw/well_log/Default.aspx)

OR

☐ Describe the construction of the authorized and proposed well(s) in Table 3 for any wells that do not have a well log.

Table 3. Construction of Point(s) of Appropriation N/A

Any well(s) in this listing must be clearly tied to corresponding well(s) described in Table 1 and shown on the accompanying application map. Failure to provide adequate information is likely to delay the processing of your transfer application. For proposed wells, we recommend that you consult a licensed well driller, geologist, or certified water right examiner for the proper information needed to complete the table.

Description of Water Delivery System

System capacity: _____ cubic feet per second (cfs) **OR**

4500 gallons per minute (gpm)

Describe the current water delivery system or the system that was in place at some time within the last five years. Include information on the pumps, canals, pipelines and sprinklers used to divert, convey and apply the water at the authorized place of use. **Willow Farms has two diversion on Willow creek and 3 wells for the irrigation of 12 Center pivots and 6 wheel lines. The North Diversoin from Willow Creek has a 10 hp lift pump that delivers water to a screening box. 3-50 hp pump from the screen box to the delivery system shown on the application map to the circles and wheel lines. Much like the North POD, the South POD has a 10 hp lift pump to pump water to a screen box where two 50 hp pumps into the same system shown on the application map. The three wells pump water into the same system as the Willow Creek Pumps. The Chaney Well #1 is equipped with a 30 hp deep well turbine, Chaney Well #2 is equipped with a 100 hp deep well turbine and a 50 hp booster pump and the New Well has a 300 hp deep well turbine pump.**

PEER REVIEW 3

BEFORE THE WATER RESOURCES DEPARTMENT
OF THE
STATE OF OREGON

In the Matter of Transfer Application T-11159, Morrow County	)	PRELIMINARY DETERMINATION PROPOSING APPROVAL OF CHANGES IN PLACE OF USE AND PARTIAL CANCELLATION OF THREE WATER RIGHTS

Authority

ORS 540.505 to 540.580 establishes the process in which a water right holder may submit a request to transfer the point of diversion, place of use, or character of use authorized under an existing water right. OAR Chapter 690, Division 380 implements the statutes and provides the Department's procedures and criteria for evaluating transfer applications.

ORS 540.621 establishes the process for the owner of land to which a water right is appurtenant to certify under oath that the water right, or a portion thereof, has been abandoned and to voluntarily request that it be cancelled.

Applicant
WILLOW FARMS, LLC

STANFIELD, OR 97875

Findings of Fact

Background

1. On November 29, 2010, Willow Farms, LLC., filed an application to change the places of use under portions of Certificates 53377, 53379, 75806, 76583, 83341, 83342, 83339 and 83340. The Department assigned the application number T-11159.

2. On May 2, 2012, the applicant submitted a new amended application and maps to correctly describe the places of use.

3. On October 23, 2012, the applicant submitted affidavits of partial cancellation of the domestic use under Certificates 53377, 53379 and 75806.

4. On January 28, 2013, the applicant submitted evidence of stock use under Certificates 53377, 53379 and 75806.

Pursuant to OAR 690-380-4030, any person may file a protest or standing statement within 30 days after the last date of publication of notice of this preliminary determination.

5. The portion of the first right and its layered supplemental water rights to be transferred are as follows:

Certificate: 53379, issued in the name of Dave Cheney (decree of the Circuit Court of the State of Oregon for Morrow County)
Use: IRRIGATION of 11.6 acres and STOCK USE
Priority Date: 1892 for Irrigation, 1875 for Stock use

19. Notice of the application for transfer was published on December 7, 2010, pursuant to OAR 690-380-4000. No comments were filed in response to the notice.

20. On July 20, 2012, the Department mailed a copy of the draft Preliminary Determination proposing to approve Transfer Application T-11359 to the applicant. The draft Preliminary Determination set forth a deadline of August 18, 2012, for the applicant to respond. On September 6, 2012, Bill Porfily, agent for the applicant submitted correspondence via e-mail requesting the Department to proceed with issuance of a Preliminary Determination and provided the necessary information to demonstrate that the applicant is authorized to pursue the transfer. In addition, the applicant has requested additional time in which to complete the transfer in order to comply with ODFW's fish screening requirements. The applicant has requested a completion date of October 1, 2016, which the Department considers reasonable. The completion date has been adjusted to October 1, 2016.

Transfer Review Criteria [OAR 690-380-4010(2)]

21. Water has been used within the five-year period prior to submittal of the transfer application according to the terms and conditions of the rights. There is no information in the record that would demonstrate that the rights are subject to forfeiture under ORS 540.610.

22. Diversion structures, ditches, wells, pumps, pipelines and sprinkler systems sufficient to use the full amount of water allowed under the existing rights were present within the five-year period prior to submittal of Transfer Application T-11159.

23. The proposed changes would not result in enlargement of the rights.

24. The proposed changes would not result in injury to other water rights.

Partial Cancellation of Water Rights

25. On October 23, 2012, affidavits certifying that domestic use under the transferred portions of the following water rights has been abandoned, but stock use and irrigation uses are being retained. Mark Zoller requested cancellation of just the domestic use (with no rate or volume of water to be cancelled). The portions of the rights for which the domestic use will be cancelled are as follows:

The portion of Certificate 53377:

DOMESTIC USE				
Twp	**Rng**	**Mer**	**Sec**	**Q - Q**

Determination and Proposed Action

The changes in place of use proposed in Transfer Application T-11159 appear to be consistent with the requirements of ORS 540.505 to 540.580 and OAR 690-380-5000 and the abandoned domestic uses under these portions of the rights should be cancelled. If protests are not filed pursuant to OAR 690-380-4030, the transfer application will be approved and the abandoned portions of the rights will be cancelled.

If Transfer Application T-11159 is approved, the final order will include the following:

1. *The changes in place of use proposed in application T-11159 are approved and the abandoned domestic portions of the rights are cancelled.*

2. *The right to the use of the water is restricted to beneficial use at the place of use described, and is subject to all other conditions and limitations contained in Certificates 53377, 53379, 75806, 76583, 83339, 83340, 83341 and 83342 and any related decree.*

3. *Water right certificates 53377, 53379, 75806, 76583, 83339, 83340, 83341 and 83342, are cancelled. New certificates will be issued describing those portions of the rights not affected by this transfer.*

4. *Before water use may begin under this order, the water user shall install a totalizing flow meter, or, with prior approval of the Director, another suitable measuring device, at each point of diversion or appropriation. The water user shall maintain the meters or measuring devices in good working order. The water user shall allow the Watermaster access to the meters or measuring devices; provided however, where the meters or measuring devices are located within a private structure, the Watermaster shall request access upon reasonable notice.*

5. *The former place of use of the transferred rights shall no longer receive water under the rights.*

6. *Full beneficial use of the water shall be made, consistent with the terms of this order, on or before* ***October 1, 2016****. A Claim of Beneficial Use prepared by a Certified Water Right Examiner shall be submitted by the applicant to the Department within one year after the deadline for completion of the changes and full beneficial use of the water.*

7. *After satisfactory proof of beneficial use is received, new certificates confirming the rights transferred will be issued.*

PEER REVIEW 1

BEFORE THE WATER RESOURCES DEPARTMENT
OF THE
STATE OF OREGON

In the Matter of Transfer Application T-11159, Morrow County	)))	PRELIMINARY DETERMINATION PROPOSING APPROVAL OF CHANGES IN PLACE OF USE

Authority

ORS 540.505 to 540.580 establishes the process in which a water right holder may submit a request to transfer the point of diversion, place of use, or character of use authorized under an existing water right. OAR Chapter 690, Division 380 implements the statutes and provides the Department's procedures and criteria for evaluating transfer applications.

17. Notice of the application for transfer was published on December 7, 2010, pursuant to OAR 690-380-4000. No comments were filed in response to the notice.

18. On July 20, 2012, the Department mailed a copy of the draft Preliminary Determination proposing to approve Transfer Application T-11359 to the applicant. The draft Preliminary Determination set forth a deadline of August 18, 2012, for the applicant to respond. On September 6, 2012, Bill Porfily, agent for the applicant submitted correspondence via e-mail requesting the Department to proceed with issuance of a Preliminary Determination and provided the necessary information to demonstrate that the applicant is authorized to pursue the transfer. In addition, the applicant has requested additional time in which to complete the transfer in order to comply with ODFW's fish screening requirements. The applicant has requested a completion date of October 1, 2016, which the Department considers reasonable. The completion date has been adjusted to October 1, 2016.

Transfer Review Criteria [OAR 690-380-4010(2)]

19. Water has been used within the five-year period prior to submittal of the transfer application according to the terms and conditions of the rights. There is no information in the record that would demonstrate that the rights are subject to forfeiture under ORS 540.610.

20. Diversion structures, ditches, wells, pumps, pipelines and sprinkler systems sufficient to use the full amount of water allowed under the existing rights were present within the five-year period prior to submittal of Transfer Application T-11159.

21. The proposed changes would not result in enlargement of the rights.

22. The proposed changes would not result in injury to other water rights.

Add Partial Cancellation

Determination and Proposed Action

The changes in place of use proposed in Transfer Application T-11159 appear to be consistent with the requirements of ORS 540.505 to 540.580 and OAR 690-380-5000. If protests are not filed pursuant to OAR 690-380-4030, the transfer application will be approved.

and the abandoned portion should be cancelled

and also ... cancelled

If Transfer Application T-11159 is approved, the final order will include the following:

1. *The changes in place of use proposed in application T-11159 are approved.* + abandoned portions cancelled

2. *The right to the use of the water is restricted to beneficial use at the place of use described, and is subject to all other conditions and limitations contained in Certificates 53377, 53379, 75806, 76583, 83339, 83340, 83341 and 83342 and any related decree.*

3. *Water right certificates 53377, 53379, 75806, 76583, 83339, 83340, 83341 and 83342 are cancelled. New certificates will be issued describing those portions of the rights not affected by this transfer.*

4. *Before water use may begin under this order, the water user shall install a totalizing flow meter, or, with prior approval of the Director, another suitable measuring device, at each point of diversion/appropriation. The water user shall maintain the meters or measuring devices in good working order. The water user shall allow the Watermaster access to the meters or measuring devices; provided however, where the meters or measuring devices are located within a private structure, the Watermaster shall request access upon reasonable notice.*

5. *The former place of use of the transferred rights shall no longer receive water under the rights.*

6. *Full beneficial use of the water shall be made, consistent with the terms of this order, on or before* ***October 1, 2016****. A Claim of Beneficial Use prepared by a Certified Water Right*

Examiner shall be submitted by the applicant to the Department within one year after the deadline for completion of the changes and full beneficial use of the water.

7. *After satisfactory proof of beneficial use is received, new certificates confirming the rights transferred will be issued.*

PEER REVIEW 2

BEFORE THE WATER RESOURCES DEPARTMENT
OF THE
STATE OF OREGON

In the Matter of Transfer Application T-11159, Morrow County	)	PRELIMINARY DETERMINATION PROPOSING APPROVAL OF CHANGES IN PLACE OF USE AND PARTIAL CANCELLATION OF THREE WATER RIGHTS

Authority

ORS 540.505 to 540.580 establishes the process in which a water right holder may submit a request to transfer the point of diversion, place of use, or character of use authorized under an existing water right. OAR Chapter 690, Division 380 implements the statutes and provides the Department's procedures and criteria for evaluating transfer applications.

ORS 540.621 establishes the process for the owner of land to which a water right is appurtenant to certify under oath that the water right, or a portion thereof, has been abandoned and to voluntarily request that it be cancelled.

19. Notice of the application for transfer was published on December 7, 2010, pursuant to OAR 690-380-4000. No comments were filed in response to the notice.

20. On July 20, 2012, the Department mailed a copy of the draft Preliminary Determination proposing to approve Transfer Application T-11359 to the applicant. The draft Preliminary Determination set forth a deadline of August 18, 2012, for the applicant to respond. On September 6, 2012, Bill Porfily, agent for the applicant submitted correspondence via e-mail requesting the Department to proceed with issuance of a Preliminary Determination and provided the necessary information to demonstrate that the applicant is authorized to pursue the transfer. In addition, the applicant has requested additional time in which to complete the transfer in order to comply with ODFW's fish screening requirements. The applicant has requested a completion date of October 1, 2016, which the Department considers reasonable. The completion date has been adjusted to October 1, 2016.

Transfer Review Criteria [OAR 690-380-4010(2)]

21. Water has been used within the five-year period prior to submittal of the transfer application according to the terms and conditions of the rights. There is no information in the record that would demonstrate that the rights are subject to forfeiture under ORS 540.610.

22. Diversion structures, ditches, wells, pumps, pipelines and sprinkler systems sufficient to use the full amount of water allowed under the existing rights were present within the five-year period prior to submittal of Transfer Application T-11159.

23. The proposed changes would not result in enlargement of the rights.

24. The proposed changes would not result in injury to other water rights.

Partial Cancellation of Water Rights

25. On October 23, 2012, affidavits certifying that domestic use under the transferred portions of the following water rights has been abandoned, and requesting cancellation of just the domestic use (with no rate or volume of water to be cancelled) was received from Mark

Zoller. The portions of the rights for which the domestic use will be cancelled are as follows:

The portion of Certificate 53377:

DOMESTIC USE				
Twp	**Rng**	**Mer**	**Sec**	**Q - Q**

Determination and Proposed Action

The changes in place of use proposed in Transfer Application T-11159 appear to be consistent with the requirements of ORS 540.505 to 540.580 and OAR 690-380-5000 and the abandoned domestic portions of the rights should be cancelled. If protests are not filed pursuant to OAR 690-380-4030, the transfer application will be approved and the abandoned portions of the rights will be cancelled.

If Transfer Application T-11159 is approved, the final order will include the following:

1. *The changes in place of use proposed in application T-11159 are approved and the abandoned domestic portions of the rights are cancelled.*

2. *The right to the use of the water is restricted to beneficial use at the place of use described, and is subject to all other conditions and limitations contained in Certificates 53377, 53379, 75806, 76583, 83339, 83340, 83341 and 83342 and any related decree.*

3. *Water right certificates 53377, 53379, 75806, 76583, 83339, 83340, 83341 and 83342, are cancelled. New certificates will be issued describing those portions of the rights not affected by this transfer.*

4. *Before water use may begin under this order, the water user shall install a totalizing flow meter, or, with prior approval of the Director, another suitable measuring device, at each point of diversion/appropriation. The water user shall maintain the meters or measuring devices in good working order. The water user shall allow the Watermaster access to the meters or measuring devices; provided however, where the meters or measuring devices are located within a private structure, the Watermaster shall request access upon reasonable notice.*

5. *The former place of use of the transferred rights shall no longer receive water under the rights.*

6. *Full beneficial use of the water shall be made, consistent with the terms of this order, on or before* ***October 1, 2016****. A Claim of Beneficial Use prepared by a Certified Water Right Examiner shall be submitted by the applicant to the Department within one year after the deadline for completion of the changes and full beneficial use of the water.*

7. *After satisfactory proof of beneficial use is received, new certificates confirming the rights transferred will be issued.*

Notice of Preliminary Determination for
Water Right Transfer T-11159

T-11144 filed by Mark Zoller of Willow Farms, LLC, PO Box 288, Washougal, Wa 98671, proposes to change the places of use for portions of eight existing water rights. Certificate 53377, the use of 0.05 cfs from a diversion on Willow Creek, located within the NE¼ NE¼ of Sec. 24, T6N, R35E, W.M., Certificate 53379, the use of 0.05 cfs from a diversion on Willow Creek, Certificate 75806, the use of 0.05 cfs from a diversion on Willow Creek, Certificate 76583, the use of 0.05 cfs from a diversion on Willow Creek, Certificate 83341, the use of 0.05 cfs from a diversion on Willow Creek, Certificate 83342, the use of 0.05 cfs from a diversion on Willow Creek, Certificate 83340, the use of 0.05 cfs from a diversion on Willow Creek, located within the NE¼ NE¼ of Sec. 24, T6N, R35E, W.M.. The applicant proposes to change the place of use for all the above described rights to within the ownership of Willow Farms, more specifically to Sections 7, Sec. 24, T2N, R23E, W.M.. The Water Resources Department has concluded that the proposed transfer appears to be consistent with the requirements of ORS Chapter 540 and OAR 690-380-5000.

Any person may file, jointly or severally, with the Department a protest or standing statement within 30 days after the date of final publication of notice in the Department's weekly notice or of this newspaper notice, whichever is later. A protest form and additional information on filing protests may be obtained by calling (503) 986-0883. The last date of newspaper publication is ***[DATE OF LAST PUBLICATION]***. If no protests are filed, the Department will issue a final order consistent with the preliminary determination.

The water user shall have a diversion monitoring program that shall include recording the rate and duty of water appropriated. The flow data and water use report (rate and duty) shall be recorded daily and shall be available to the Watermaster promptly upon request. Monitoring data shall be provided to the Watermaster in a reasonable summary format, approved by the Watermaster. After three irrigation seasons, the Watermaster may modify the need for recording flow data daily to a lesser schedule.

The quantity of water diverted at the new point of appropriation, together with the quantity diverted from the original point of appropriation (CHENEY WELL #2) shall not exceed the quantity of water available from the original point of appropriation.

The water user shall install and maintain an in-line flow meter for measuring and recording the quantity of water diverted at all points of appropriation. The type and plans of the measuring devices must be approved by the Department prior to beginning construction and shall be installed under the general supervision of the Department.

The wells shall be maintained in accordance with the General Standards for the Construction and Maintenance of Water Wells in Oregon.

This certificate is issued to confirm a change in POINTS OF APPROPRIATION approved by an order of the Water Resources Director entered NOVEMBER 27, 2002, approving Transfer Application 8476, and supersedes Certificate 44992, State Record of Water Right Certificates.

The right to use water for the above purpose is restricted to beneficial use on the lands or place of use described.

Issued April 23, 2007.

Part 2 of 4 – Transfer Application Map Checklist

Your transfer application will be returned if any of the map requirements listed below are not met.

Please be sure that the transfer application map you submit includes all the required items and matches the existing water right map. Check all boxes that apply.

☒ ☐ N/A Certified Water Right Examiner (CWRE) Stamp and Original Signature. For list of CWREs see http://www1.wrd.state.or.us/pdfs/cwre_listing.pdf. CWRE stamp and signature are not required for temporary changes, historic point of diversion changes, and substitutions.

☒ ☐ N/A If **more than three** water rights are involved, separate maps are needed for each water right.

☒ Permanent quality printed with dark ink on white or clear paper or film.

☒ The size of the map can be 8½ x 11 inches, 8½ x 14 inches, or up to 30 x 30 inches. For 30 x 30 inch maps, three (3) paper copies and an electronic copy in a .pdf, .tiff or .jpg format are required.

NOV 29 2010

☒ A north arrow, a legend, and scale.

☒ The scale of the map must be: 1 inch = 400 feet, 1 inch = 1,320 feet, the scale of the Final Proof/Claim of Beneficial Use Map (the map used when the permit was certificated), the scale of the county assessor map if the scale is not smaller than 1 inch = 1,320 feet, or a scale that has been pre-approved by the Department.

☒ Township, Range, Section, ¼ ¼, DLC, Government Lot, and other recognized public land survey lines.

☒ Tax lot boundaries (property lines) are required. Tax lot numbers are recommended.

☒ Major physical features including rivers and creeks showing direction of flow, lakes and reservoirs, roads, and railroads.

☒ Major water delivery system features from the point(s) of diversion/appropriation such as main pipelines, canals, and ditches.

☒ Existing place of use that includes separate hachuring for each water right, priority date, and use including number of acres in each quarter-quarter section, government lot, or in each quarter-quarter section as projected within government lots, donation land claims, or other recognized public land survey subdivisions. If less than the entirety of the water right is being changed, a separate hachuring is needed for lands left unchanged.

☒ ☐ N/A Proposed place of use that includes separate hachuring for each water right, priority date, and use including number of acres in each quarter-quarter section, government lot, or in each quarter-quarter section as projected within government lots, donation land claims, or other recognized public land survey subdivisions.

☒ Existing point(s) of diversion or well(s) with distance and bearing or coordinates from a recognized survey corner. This information can be found in your water right certificate or permit.

☐ ☒ N/A If you are proposing a change in point(s) of diversion or well(s), show the proposed location and label it clearly with distance and bearing or coordinates. If GPS coordinates are used, latitude-longitude coordinates may be expressed as either degrees-minutes-seconds with at least one digit after the decimal (example – 42°32'15.5") or degrees-decimal with five or more digits after the decimal (example – 42.53764°).

Description of Water Delivery System

System capacity: _____ cubic feet per second (cfs) **OR**

4500 gallons per minute (gpm)

Describe the current water delivery system or the system that was in place at some time within the last five years. Include information on the pumps, canals, pipelines and sprinklers used to divert, convey and apply the water at the authorized place of use. **Willow Farms has two diversion on Willow creek and 3 wells for the irrigation of 12 Center pivots and 6 wheel lines. The North Diversoin from Willow Creek has a 10 hp lift pump that delivers water to a screening box. 3-50 hp pump from the screen box to the delivery system shown on the application map to the circles and wheel lines. Much like the North POD, the South POD has a 10 hp lift pump to pump water to a screen box where two 50 hp pumps into the same system shown on the application map. The three wells pump water into the same system as the Willow Creek Pumps. The Chaney Well #1 is equipped with a 30 hp deep well turbine, Chaney Well #2 is equipped with a 100 hp deep well turbine and a 50 hp booster pump and the New Well has a 300 hp deep well turbine pump.**

CERTIFICATE # 53377

Description of Water Delivery System

System capacity: _____ cubic feet per second (cfs) **OR**

4500 gallons per minute (gpm)

Describe the current water delivery system or the system that was in place at some time within the last five years. Include information on the pumps, canals, pipelines and sprinklers used to divert, convey and apply the water at the authorized place of use. **Willow Farms has two diversion on Willow creek and 3 wells for the irrigation of 12 Center pivots and 6 wheel lines. The North Diversoin from Willow Creek has a 10 hp lift pump that delivers water to a screening box. 3-50 hp pump from the screen box to the delivery system shown on the application map to the circles and wheel lines. Much like the North POD, the South POD has a 10 hp lift pump to pump water to a screen box where two 50 hp pumps into the same system shown on the application map. The three wells pump water into the same system as the Willow Creek Pumps. The Chaney Well #1 is equipped with a 30 hp deep well turbine, Chaney Well #2 is equipped with a 100 hp deep well turbine and a 50 hp booster pump and the New Well has a 300 hp deep well turbine pump.**

Part 2 of 4 – Transfer Application Map Checklist

Your transfer application will be returned if any of the map requirements listed below are not met.

Please be sure that the transfer application map you submit includes all the required items and matches the existing water right map. Check all boxes that apply.

☒ ☐ N/A Certified Water Right Examiner (CWRE) Stamp and Original Signature. For list of CWREs see http://www1.wrd.state.or.us/pdfs/cwre_listing.pdf. CWRE stamp and signature are not required for temporary changes, historic point of diversion changes, and substitutions.

☒ ☐ N/A If **more than three** water rights are involved, separate maps are needed for each water right.

☒ Permanent quality printed with dark ink on white or clear paper or film.

☒ The size of the map can be 8½ x 11 inches, 8½ x 14 inches, or up to 30 x 30 inches. For 30 x 30 inch maps, three (3) paper copies and an electronic copy in a .pdf, .tiff or .jpg format are required.

☒ A north arrow, a legend, and scale.

☒ The scale of the map must be: 1 inch = 400 feet, 1 inch = 1,320 feet, the scale of the Final Proof/Claim of Beneficial Use Map (the map used when the permit was certificated), the scale of the county assessor map if the scale is not smaller than 1 inch = 1,320 feet, or a scale that has been pre-approved by the Department.

☒ Township, Range, Section, ¼ ¼, DLC, Government Lot, and other recognized public land survey lines.

☒ Tax lot boundaries (property lines) are required. Tax lot numbers are recommended.

☒ Major physical features including rivers and creeks showing direction of flow, lakes and reservoirs, roads, and railroads.

☒ Major water delivery system features from the point(s) of diversion/appropriation such as main pipelines, canals, and ditches.

☒ Existing place of use that includes separate hachuring for each water right, priority date, and use including number of acres in each quarter-quarter section, government lot, or in each quarter-quarter section as projected within government lots, donation land claims, or other recognized public land survey subdivisions. If less than the entirety of the water right is being changed, a separate hachuring is needed for lands left unchanged.

☒ ☐ N/A Proposed place of use that includes separate hachuring for each water right, priority date, and use including number of acres in each quarter-quarter section, government lot, or in each quarter-quarter section as projected within government lots, donation land claims, or other recognized public land survey subdivisions.

☒ Existing point(s) of diversion or well(s) with distance and bearing or coordinates from a recognized survey corner. This information can be found in your water right certificate or permit.

☐ ☒ N/A If you are proposing a change in point(s) of diversion or well(s), show the proposed location and label it clearly with distance and bearing or coordinates. If GPS coordinates are used, latitude-longitude coordinates may be expressed as either degrees-minutes-seconds with at least one digit after the decimal (example – 42°32'15.5") or degrees-decimal with five or more digits after the decimal (example – 42.53764°).

☒ Place of Use (POU)
☐ Supplemental Use to Primary Use (S to P)
☐ Character of Use (USE)
☐ Point of Appropriation/Well (POA)

Will all of the proposed changes affect the entire water right?

☐ Yes Complete only the Proposed ("to" lands) section of Table 2 on the next page. Use the "CODES" listed above to describe the proposed changes.

☒ No Complete all of Table 2 to describe the portion of the water right to be changed.

For Place of Use or Character of Use Changes

Are there other water right certificates, water use permits or ground water registrations associated with the "from" or the "to" lands? ☒ Yes ☐ No

If YES, list the certificate, water use permit, or ground water registration numbers: **83342, 53379, 75806, & 53377**

Pursuant to ORS 540.510, any "layered" water use such as an irrigation right that is supplemental to a primary right proposed for transfer must be included in the transfer or be cancelled. Any change to a ground water registration must be filed separately in a ground water registration modification application.

Part 2 of 4 – Transfer Application Map Checklist

Your transfer application <u>will be returned</u> if any of the map requirements listed below are not met.

Please be sure that the transfer application map you submit includes all the required items and matches the existing water right map. Check all boxes that apply.

☒ ☐ N/A Certified Water Right Examiner (CWRE) Stamp and Original Signature. For list of CWREs see http://www1.wrd.state.or.us/pdfs/cwre_listing.pdf. CWRE stamp and signature are not required for temporary changes, historic point of diversion changes, and substitutions.

☒ ☐ N/A If **more than three** water rights are involved, separate maps are needed for each water right.

☒ Permanent quality printed with dark ink on white or clear paper or film.

☒ The size of the map can be 8½ x 11 inches, 8½ x 14 inches, or up to 30 x 30 inches. For 30 x 30 inch maps, three (3) paper copies and an electronic copy in a .pdf, .tiff or .jpg format are required.

☒ A north arrow, a legend, and scale.

☒ The scale of the map must be: 1 inch = 400 feet, 1 inch = 1,320 feet, the scale of the Final Proof/Claim of Beneficial Use Map (the map used when the permit was certificated), the scale of the county assessor map if the scale is not smaller than 1 inch = 1,320 feet, or a scale that has been pre-approved by the Department.

☒ Township, Range, Section, ¼ ¼, DLC, Government Lot, and other recognized public land survey lines.

☒ Tax lot boundaries (property lines) are required. Tax lot numbers are recommended.

☒ Major physical features including rivers and creeks showing direction of flow, lakes and reservoirs, roads, and railroads.

☒ Major water delivery system features from the point(s) of diversion/appropriation such as main pipelines, canals, and ditches.

☒ Existing place of use that includes separate hachuring for each water right, priority date, and use including number of acres in each quarter-quarter section, government lot, or in each quarter-quarter section as projected within government lots, donation land claims, or other recognized public land survey subdivisions. If less than the entirety of the water right is being changed, a separate hachuring is needed for lands left unchanged.

☒ ☐ N/A Proposed place of use that includes separate hachuring for each water right, priority date, and use including number of acres in each quarter-quarter section, government lot, or in each quarter-quarter section as projected within government lots, donation land claims, or other recognized public land survey subdivisions.

☒ Existing point(s) of diversion or well(s) with distance and bearing or coordinates from a recognized survey corner. This information can be found in your water right certificate or permit.

☐ ☒ N/A If you are proposing a change in point(s) of diversion or well(s), show the proposed location and label it clearly with distance and bearing or coordinates. If GPS coordinates are used, latitude-longitude coordinates may be expressed as either degrees-minutes-seconds with at least one digit after the decimal (example – 42°32'15.5") or degrees-decimal with five or more digits after the decimal (example – 42.53764°).

For Place of Use or Character of Use Changes

Are there other water right certificates, water use permits or ground water registrations associated with the "from" or the "to" lands? ☒ Yes ☐ No

If YES, list the certificate, water use permit, or ground water registration numbers: **83341 & 83342.**

Pursuant to ORS 540.510, any "layered" water use such as an irrigation right that is supplemental to a primary right proposed for transfer must be included in the transfer or be cancelled. Any change to a ground water registration must be filed separately in a ground water registration modification application.

Description of Water Delivery System

System capacity: _____ cubic feet per second (cfs) **OR**

4500 gallons per minute (gpm)

Describe the current water delivery system or the system that was in place at some time within the last five years. Include information on the pumps, canals, pipelines and sprinklers used to divert, convey and apply the water at the authorized place of use. **Willow Farms has two diversion on Willow creek and 3 wells for the irrigation of 12 Center pivots and 6 wheel lines. The North Diversoin from Willow Creek has a 10 hp lift pump that delivers water to a screening box. 3-50 hp pump from the screen box to the delivery system shown on the application map to the circles and wheel lines. Much like the North POD, the South POD has a 10 hp lift pump to pump water to a screen box where two 50 hp pumps into the same system shown on the application map. The three wells pump water into the same system as the Willow Creek Pumps. The Chaney Well #1 is equipped with a 30 hp deep well turbine, Chaney Well #2 is equipped with a 100 hp deep well turbine and a 50 hp booster pump and the New Well has a 300 hp deep well turbine pump.**

For Place of Use or Character of Use Changes

Are there other water right certificates, water use permits or ground water registrations associated with the "from" or the "to" lands? ☒ Yes ☐ No

If YES, list the certificate, water use permit, or ground water registration numbers: **83341, 53379, 75806, & 53377**

Pursuant to ORS 540.510, any "layered" water use such as an irrigation right that is supplemental to a primary right proposed for transfer must be included in the transfer or be cancelled. Any change to a ground water registration must be filed separately in a ground water registration modification application.

For Substitution (ground water supplemental irrigation will be substituted for surface water primary irrigation) N/A

Ground water supplemental Permit or Certificate # _____;
Surface water primary Certificate # _____.

For a change from Supplemental Irrigation Use to Primary Irrigation Use N/A

Identify the primary certificate to be cancelled. Certificate # _____

For a change in point(s) of appropriation (well(s)) or additional point(s) of appropriation: N/A

☐ Well log(s) are attached for each authorized and proposed well(s) that are clearly labeled and associated with the corresponding well(s) in Table 1 above and on the accompanying application map. (**Tip**: You may search for well logs on the Department's web page at: http://apps2.wrd.state.or.us/apps/gw/well_log/Default.aspx)

OR

☐ Describe the construction of the authorized and proposed well(s) in Table 3 for any wells that do not have a well log.

Table 3. Construction of Point(s) of Appropriation N/A

Any well(s) in this listing must be clearly tied to corresponding well(s) described in Table 1 and shown on the accompanying application map. Failure to provide adequate information is likely to delay the processing of your transfer application. For proposed wells, we recommend that you consult a licensed well driller, geologist, or certified water right examiner for the proper information needed to complete the table.

Description of Water Delivery System

System capacity: _____ cubic feet per second (cfs) **OR**

4500 gallons per minute (gpm)

Describe the current water delivery system or the system that was in place at some time within the last five years. Include information on the pumps, canals, pipelines and sprinklers used to divert, convey and apply the water at the authorized place of use. **Willow Farms has two diversion on Willow creek and 3 wells for the irrigation of 12 Center pivots and 6 wheel lines. The North Diversoin from Willow Creek has a 10 hp lift pump that delivers water to a screening box. 3-50 hp pump from the screen box to the delivery system shown on the application map to the circles and wheel lines. Much like the North POD, the South POD has a 10 hp lift pump to pump water to a screen box where two 50 hp pumps into the same system shown on the application map. The three wells pump water into the same system as the Willow Creek Pumps. The Chaney Well #1 is equipped with a 30 hp deep well turbine, Chaney Well #2 is equipped with a 100 hp deep well turbine and a 50 hp booster pump and the New Well has a 300 hp deep well turbine pump.**

BEFORE THE WATER RESOURCES DEPARTMENT
OF THE
STATE OF OREGON

In the Matter of the Instream Lease Application IL-961, Certificates 76582, 76583, 75806, 53377, 53379 and 76075 Marrow County	)))	DETERMINATION and FINAL ORDER ON PROPOSED INSTREAM LEASE

Authority
ORS 537.348 establishes the process in which a water right holder may submit a request to lease an existing water right for instream purposes. OAR Chapter 690, Division 077 implements the statutes and provides the Department's procedures and criteria for evaluating instream lease applications.

This is a final order in other than contested case. This order is subject to judicial review under ORS 183.484. Any petition for judicial review must be filed within the 60 day time period specified by ORS 183.484(2). Pursuant to ORS 536.075 and OAR 137-004-0080 you may either petition for judicial review or petition the Director for reconsideration of this order. A petition for reconsideration may be granted or denied by the Director, and if no action is taken within 60 days following the date the petition was filed, the petition shall be deemed denied.

9. Neither Certificates 76582, 75806, 53377, 53379 and 76075 nor the Willow Creek Decree specify the irrigation season for these rights. Therefore, for the purpose of this instream lease, the irrigation season shall be March 1 through October 31. OAR 690-250-0070.

10. The lease application includes the information required under OAR 690-077-0076(3). The Department provided notice of the lease application pursuant to OAR 690-077-0077(1). No comments were received in response to that notice.

11. The instream use has been modified from the lease application to prevent injury and enlargement and is as follows:

76075	1906	0.650	March 1 through October 31
	Total:	**0.908**	

12. Other conditions to prevent injury and enlargement are:

    Within the specified stream reach, the amount of water to which this right is entitled shall not exceed the quantity of water legally available at the original point of diversion. Stream channel losses and gains calculated based on available data and the use of water by senior appropriators will determine the amount of water to which this right is entitled downstream from the original points of diversion within the specified stream reach.

13. Supplemental Water Right Certificates 83339, 83340, 83341 and 83342 are appurtenant to all or a portion of the lands described in Findings of Fact # 3 through 8. The Lessor requested that these water rights not be included as part of this lease application. During the term of the lease, water use under these rights will be suspended.

14. If approved, this instream lease is not reasonably expected to significantly affect land use as prescribed by ORS 197.180, OAR Chapter 660, Divisions 30 and 31, and OAR Chapter 690, Division 5.

15. Based upon review of the application, comments received, information provided by the Department's Watermaster, and other available information, the Department finds that the lease will not result in injury or enlargement. This finding is made through an abbreviated review recognizing that the lease may be modified or revoked under OAR 690-077-0077 if the Department later finds that the lease is causing injury to any existing water right or enlargement of the original right.

16. If a right which has been leased is later proposed to be leased again or transferred to an instream use under ORS 537.348 and OAR 690-077-0070 or OAR 690-077-0075 a new injury review shall be required. Transfers will be subject to a full and complete review to determine consistency with the requirements of OAR Chapter 690, Division 380 and Division 077. Approval of this lease does not establish a precedent for approval of future leases or transfers.

17. The Lessor requested that the lease terminate on December 31, 2011.

18. The Lessor has requested the option of terminating the lease early with written notice to the Department.

CONCLUSIONS OF LAW

The Department concludes that the lease will not result in injury or enlargement, OAR 690-077-0077. The lease conforms to the applicable provisions of OAR 690-077-0015.

ORDER

Therefore, it is ORDERED:

1. That the Lease as described herein is APPROVED.

2. The former place of use will no longer receive water as part of these rights, any supplemental rights, or any other layered water rights for irrigation use, including ground water registrations during the term of the lease.

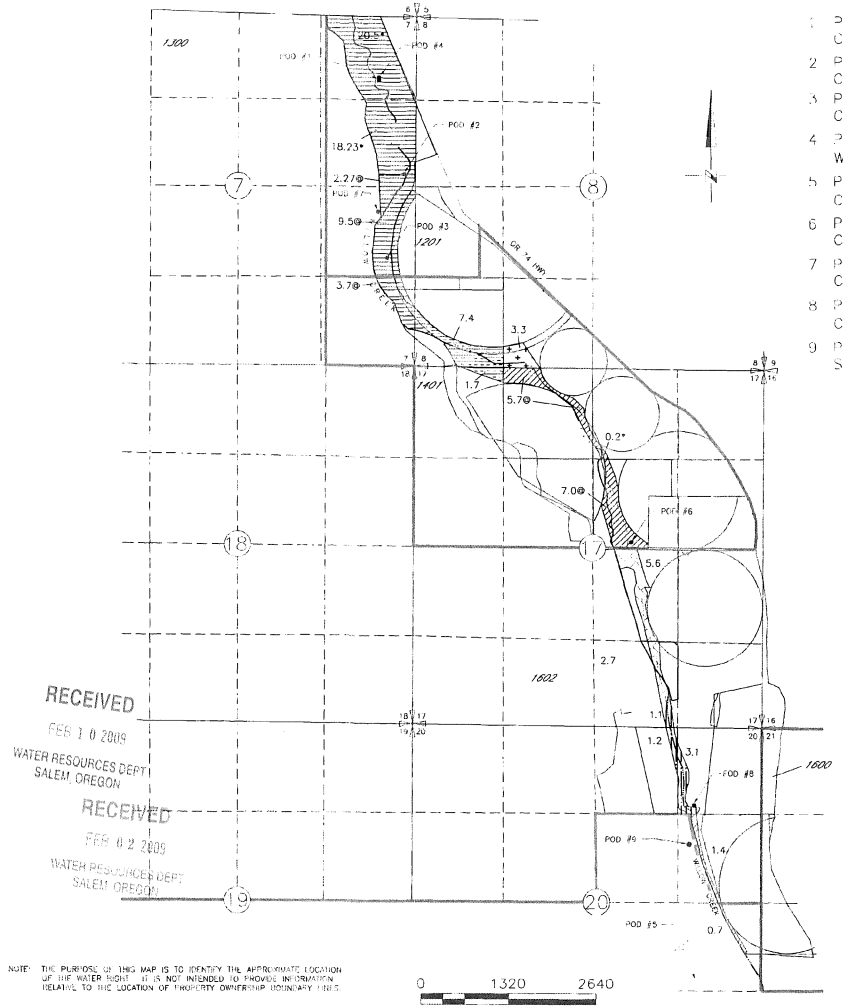

3. The lease will terminate on December 31, 2011. The lessor *shall* have the option of terminating the lease each year with written notice to the Department. The lease may be terminated at any time during the calendar year. However, if the termination request is received less than 30-days prior to the period of allowed instream use or after the period of allowed use has begun for the water right(s) being leased, water shall not be used under the right(s) leased until the following calendar year, unless the Director determines that enlargement would not occur.

BEFORE THE WATER RESOURCES DIRECTOR OF OREGON

MORROW COUNTY

PROPOSED AND FINAL ORDER CLARIFYING A WATER RIGHT AND NOTICE OF HEARING OPPORTUNITY

On December 12, 1910, the Circuit Court of the State of Oregon for Morrow County, Oregon, completed the determination of the relative right to the use of the waters of Willow Creek, and its tributaries, tributary to the Columbia River, in Gilliam and Morrow Counties, Oregon, and issued the Willow Creek Decree. The decree is of record in the Order Record of the Water Resources Department in Volume 1, at Page 73.

As part of the Willow Creek Decree, the Circuit Court awarded a water right to Wm. B. Ewing. The right allows the use of the waters of Willow Creek for Domestic and Irrigation of 239.0 acres; being Domestic use with a priority date of 1884, 135.0 acres with a priority date of 1892; and 104.0 acres with a priority date of 1906; through the Ewing, Desert Land, Kirtzley Underground, Murphy, and High Line Ditches. The place of use is listed as:

SECTION 7

TOWNSHIP 2 NORTH, RANGE 23 EAST, W.M.

The water right has been modified by an order of the State Engineer, entered March 20, 1952, at Special Order Volume 7, Page 311, approving Transfer T-39 for changes in point of diversion ; and an order of the Water Resources Director, entered May 22, 1979, at Special Order Volume 32, Page 129, approving Transfer 4127 for an additional point of diversion. The right is evidenced by Certificates 48297 and 53378.

Diamond Properties Investment Company, LLC has filed transfer applications and temporary transfer applications requesting to change the points of diversion and places of use of portions of the water right.

Water Resources Department staff reviewed the Temporary Transfer Application 7924. Based on available information and staff recommendations, the Water Resources Director determined that Water Right Certificates 48297 and 53378 do not identify the lands to which the right is appurtenant with sufficient specificity for consideration of a temporary transfer or transfer for changes in place of use of the water right. The applicant, applicant's attorney, and department staff have cooperated to clarify the priorities and places of use of the land to which this right is appurtenant.

In accordance with OAR 690-15-400, the Director is issuing this order to clarify the priorities and place of use of the lands to which the water right is appurtenant.

The lands to which the water right is appurtenant, with the respective priority dates is as follows:

The records of the Water Resources Department shall be corrected to clarify the place of use and priorities as described above. Certificates 48297 and 53378 are canceled. New Certificates will be issued to describe the clarified water right.

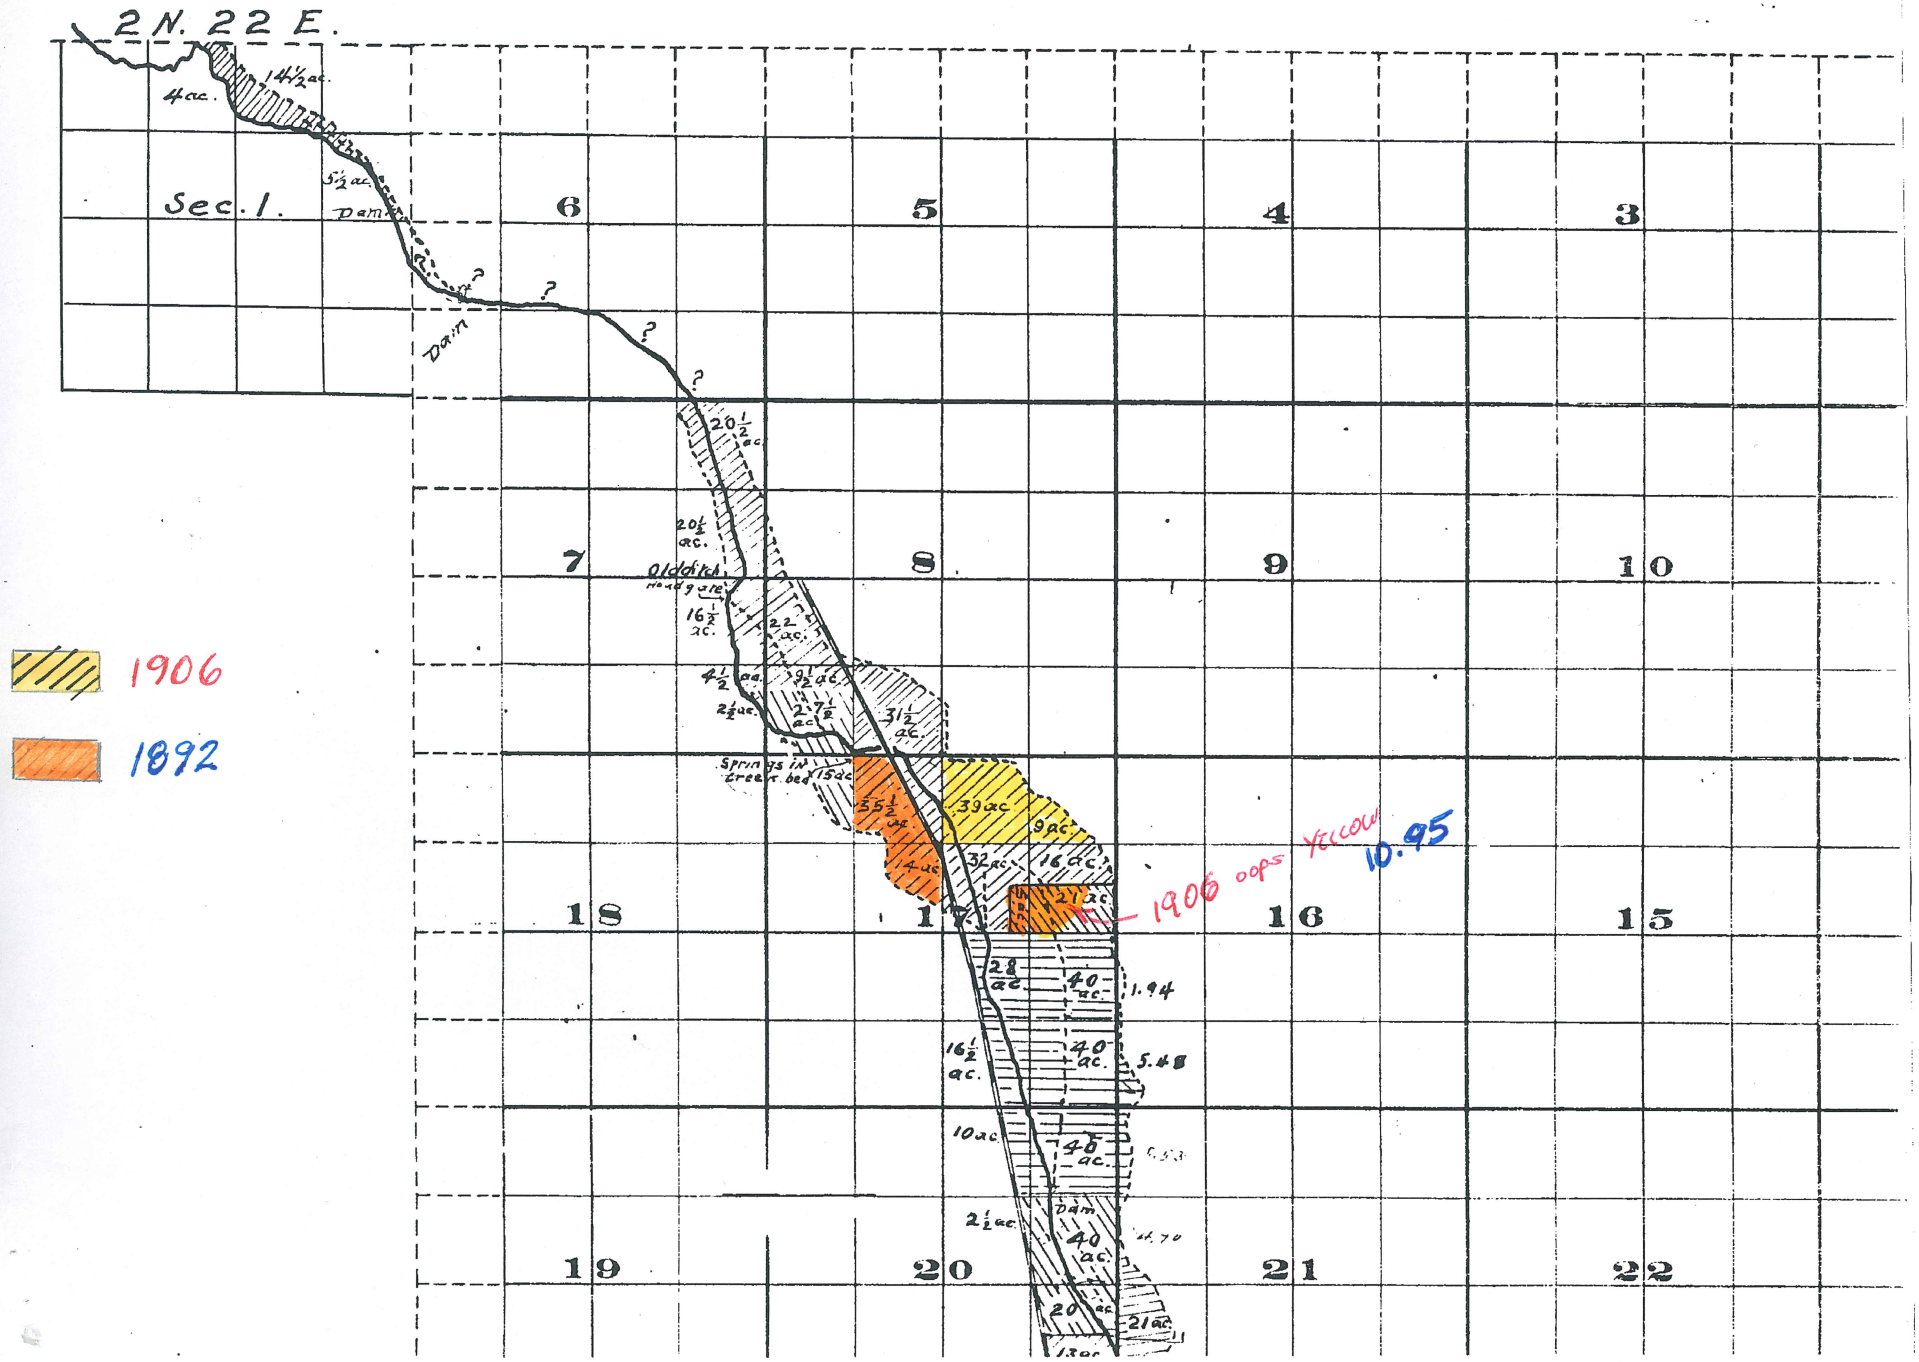

If you disagree with the finding of this Proposed and Final Order, you may request a contested case hearing. The request must be in writing, identify the findings with which you disagree, contain a clear and concise explanation of the basis for your disagreement, and be signed and dated. The request for hearing must be sent to the attention of the Transfer Section, Water Resources Department, 158 12th St NE, Salem, Oregon 97310; and must be received not more than 30 days from the date of mailing of this Proposed and Final Order.

In the event a hearing is not requested, or on written waiver of the hearing opportunity, or on failure of the requesting party or parties to appear at the hearing, the existing agency file will be designated as the record in this case, and the order shall become final.
