Part 2 of 4 – Instream Lease Application Map Checklist

A Map is generally required for each water right not leased in its entirety

The application map (if required) should include all the items listed below and match the existing water right(s) of record. Check all boxes that apply.

This should be a simple map. (See example below). A copy of a final proof survey map with the portion to be leased shaded or hachured in will also suffice.

- N/A A map is required for each water right not leased in its entirety. More than one QQ and property may be included on each map. A map is not required, if leasing the entire right or if the right to be leased is for municipal or quasi-municipal water use.
- The map should be of sufficient quality to be reproducible. Please do not use highlighters to mark items on the map as highlighters do not always copy.
- A North arrow and map scale (no smaller than 1" = 1320').
- Township, Range, Section, quarter quarter (QQ), and a clearly labeled survey corner.
- For irrigation or other similar use, the number of acres to be leased in each quarter-quarter clearly labeled and hachured to differentiate between the acres being leased and any remaining. If the place of use is broken down by more than one priority date, or source stream, and/or point of diversion you must identify each with separate hachuring and clearly label.
- If available, identify the existing point(s) of diversion.

<p>Term of the Lease (may be from 1 year up to 5 years): The lease is requested to begin in: month <u>March</u> year 2024 and end: month <u>December</u> year 2028 Note: The begin month is generally the first month of the irrigation season and the end month is the last month in the irrigation season. If not an irrigation right, this would be the first and last month of your authorized period of allowed use.</p>	
<p>Public use: Check the public use(s) this lease will serve (as defined by ORS 537.332):</p> <p><input checked="" type="checkbox"/> Conservation, maintenance and enhancement of aquatic, fish and wildlife, fish and wildlife habitat and any other ecological values.</p> <p><input type="checkbox"/> Recreation</p> <p><input type="checkbox"/> Pollution abatement</p> <p><input type="checkbox"/> Navigation</p>	<p>Termination provision (for multiyear leases): The parties to the lease request (choose one):</p> <p><input checked="" type="checkbox"/> a. <p>Additive/Replacing Relationship to other instream water rights: Instream leases are generally additive to other existing instream water rights created as a result of instream leases, transfers and/or allocations of conserved water. Since instream leases are also generally senior to other instream rights created through a state agency process or conversion of minimum flows, they generally replace a portion of these junior instream rights.</p> <p>If you would like this lease to relate to other instream water rights differently, please check this box. <input type="checkbox"/> And attach an explanation of your intent.</p>	
<p>Validity of the Right(s) to be leased (check the appropriate box):</p> <p><input checked="" type="checkbox"/> The water right(s) to be leased have been used under the terms and conditions of the right(s) during the last five years or have been leased instream; or</p> <p><input type="checkbox"/> The water right(s) have not been used for the last five years according to the terms and conditions of the right(s). Precedent: If a right which has been leased is later proposed to be leased again or later transferred or become part of an allocation of conserved water project, a new injury review shall be required. An instream lease shall not set a precedent on a future transaction.

The undersigned declare:

1. The Lessor(s) agree during the term of this lease, to suspend use of water allowed under the subject water right(s) and under any appurtenant primary or supplemental water right(s) not involved in the lease application; and
2. The Lessor(s) certify that I/we are the water right holder(s) of the right(s) described in this instream lease application. If not the deeded landowner, I/we have provided documentation with the lease application that I/we have authorization to pursue the lease application and/or have obtained consent from the deeded landowner; and
3. All parties affirm that information provided in this lease application is true and accurate.

RE: Klamath Area Instream Lease Application File Claim KA-160
Jeld-Wen, Klamath Falls Facility

Dear Sarah:

The attached instream lease application for the industrial use portion of Jeld-Wen's Claim KA-160 is being submitted on behalf of Jeld-Wen. The claim is an eligible water right as a determined claim in the Upper Kamath Basin, pursuant to an order of determination certified by the Water Resources Director under ORS 539.130. The instream lease is intended to preserve the industrial portion of the claim by temporarily placing the water instream for beneficial use. The instream lease may also be applied in the future as bucket-for-bucket mitigation for the allowed use of groundwater from an adjacent water well (Application G-17983). The proposed period to protect water instream is from January 1 to December 31 (year-round) for the full rate (0.15 cfs) during this period.

Jeld-Wen's Claim KA-160 is also included in the Klamath County Circuit Court's September 22, 2022 Order Affirming Claims Not Subject to Exceptions, which affirms that Claim KA-160 as determined (along with other similarly situated determined claims) are to "be fully affirmed in the final judgment without further hearing." As such, the court has set the stage for the issuance of a final water right certificate for Claim KA-160 at the conclusion of the judicial phase of the adjudication process.

Please do not hesitate to call if you have any questions or need additional information.

Sincerely,
GSI Water Solutions, Inc.
