Part 2 of 5 - Transfer Application Map

Your transfer application will be returned if any of the map requirements listed below are for the map requirements.

Please be sure that the transfer application map you submit includes all the required items and

mat	ches tl	he existing water right map. Check all boxes that apply.
$\boxtimes \Box$] N/A	Certified Water Right Examiner (CWRE) Stamp and Original Signature. For a list of CWREs, see http://apps.wrd.state.or.us/apps/wr/cwre_license_view/ . CWRE stamp and signature are not required for substitutions.
\boxtimes] N/A	If more than three water rights are involved, separate maps are needed for each water right.
\boxtimes		Permanent quality printed with dark ink on good quality paper.
\boxtimes		The size of the map can be $8\% \times 11$ inches, $8\% \times 14$ inches, 11×17 inches, or up to 30×30 inches. For 30×30 inch maps, one extra copy is required.
\boxtimes		A north arrow, a legend, and scale.
		The scale of the map must be: 1 inch = 400 feet, 1 inch = $1,320$ feet, the scale of the Final Proof/Claim of Beneficial Use Map (the map used when the permit was certificated), the scale of the county assessor map if the scale is not smaller than 1 inch = $1,320$ feet, or a scale that has been pre-approved by the Department.
\boxtimes		Township, Range, Section, $\frac{1}{4}$, DLC, Government Lot, and other recognized public land survey lines.
\boxtimes		Tax lot boundaries (property lines) are required. Tax lot numbers are recommended.
\boxtimes		Major physical features including rivers and creeks showing direction of flow, lakes and reservoirs, roads, and railroads.
\boxtimes		Major water delivery system features from the point(s) of diversion/appropriation such as main pipelines, canals, and ditches.
		Existing place of use that includes separate hachuring for each water right, priority date, and use including number of acres in each quarter-quarter section, government lot, or in each quarter-quarter section as projected within government lots, donation land claims, or other recognized public land survey subdivisions. If less than the entirety of the water right is being changed, a separate hachuring is needed for lands left unchanged.
	□ N/A	Proposed place of use that includes separate hachuring for each water right, priority date, and use including number of acres in each quarter-quarter section, government lot, or in each quarter-quarter section as projected within government lots, donation land claims, or other recognized public land survey subdivisions.
		Existing point(s) of diversion or well(s) with distance and bearing or coordinates from a recognized survey corner. This information can be found in your water right certificate or permit.
	∏ N/A	If you are proposing a change in point(s) of diversion or well(s), show the proposed location and label it clearly with distance and bearing or coordinates. If GPS coordinates are used, latitude-longitude coordinates may be expressed as either degrees-minutes-seconds with at least one digit after the decimal (example $-42^{\circ}32'15.5''$) or degrees-decimal with five or more digits after the decimal (example -42.53764°).

8	Subtract line 7 from line 6 » » » » » » » » » » » » » » » » » Transfer Fee:	8	5040									
*-	Commonly for the Common for the Comm											

*Example for Line 5a calculation to transfer 45.0 acres of Primary Certificate 12345 (total 1.25 cfs for 100 acres) and 45.0 acres of Supplemental Certificate 87654 (1/80 cfs per acre) on the same land:

- 1. For irrigation calculate cfs for each water right involved as follows:
 - a. Divide total authorized cfs by total acres in the water right (for C12345, 1.25 cfs \div 100 ac); then multiply by the number of acres to be transferred to get the transfer cfs (x 45 ac= 0.56 cfs).
 - b. If the water right certificate does not list total cfs, but identifies the allowable use as 1/40 or 1/80 of a cfs per acre; multiply number of acres proposed for change by either 0.025 (1/40) or 0.0125 (1/80). (For C87654, 45.0 ac x 0.0125 cfs/ac = 0.56 cfs)
- 2. Add cfs for the portions of water rights on all the land included in the transfer; however **do not count cfs for supplemental rights on acreage for which you have already calculated the cfs fee for the primary right on the same land**. The fee should be assessed only once for each "on the ground" acre included in the transfer. (In this example, blank 5a would be only 0.56 cfs, since both rights serve the same 45.0 acres. Blank 5b would be 0 and Line 5 would then also become 0).

	FEE WORKSHEET for SUBSTITUTION								
1	Base Fee (includes change to one well)	1	\$990.00						
	Number of wells included in substitution(2a)								
	Subtract 1 from the number in 2a above: (2b) If only one well this will be 0

Explain in your own words what you propose to accomplish with this transfer application, and why: We have 2 wells on different water rights. We are filing for additional Point of Appropriation so both wells are on both well water rights. Also we are moving some of the well water rights around to different locations.

If you need additional space, continue on a separate piece of paper and attach to the application as "Attachment 1".

Check One Box

\boxtimes	By signing this application, I understand that, upon receipt of the draft preliminary determination and prior to
	Department approval of the transfer, I will be required to provide landownership information and evidence that I am
	authorized to pursue the transfer as identified in OAR 690-380-4010(5); OR
	I affirm the applicant is a municipality as defined in ORS 540.510(3)(b) and that the right is in the name of the
	municipality or a predecessor; OR
	I affirm the applicant is an entity with the authority to condemn property and is acquiring by condemnation the
	property to which the water right proposed for transfer is appurtenant and have supporting documentation.

Received APR 19 2024

By my signature below, I confirm that I understand:

- Prior to Department approval of the transfer application, I may be required to submit payment to the Department for publication of a notice in a newspaper with general circulation in the area where the water right is located, once per week for two consecutive weeks. If more than one qualifying newspaper is available, I suggest publishing the notice in the following newspaper: _____.
- Amendments to the application may only be made in response to the Department's Draft Preliminary Determination (DPD). The applicant will have a period of at least 30 days to amend the application to address any

INSTRUCTIONS for editing the Application Form

To add additional lines to tables within the forms or to copy and paste additional Part 5 pages, please save the application form to your computer. Unlock the document by using one of the following instructions for your Microsoft Word software version:

Microsoft Word 2003

Unlock the document by one of the following:

- Using the Tools menu => click Unprotect Document;
 OR
- Using the Forms toolbar => click on the Protect/Unprotect icon.

To relock the document to enable the checkboxes to work, you will need to:

- Using the Tools menu => click Protect Document;
 OR
- Using the **Forms** toolbar => click on the **Protect/Unprotect** icon.

Once the application has been unlocked, you may:

- add additional rows to tables using the Table tools, and
- select and copy the pages of Part 5 and paste as many additional sets of Part 5 pages as needed at the end of the application.

After editing, re-lock the document to enable checkboxes to work.

Microsoft Word 2007

- Unlock the document by clicking the Review tab, then click Protect Document, then click
 Stop Protect
- To relock the document, click **Editing Restrictions**, then click **Allow Only This Type of Editing**, select **Filling In Forms** from the drop-down menu, then check **Yes, Start Enforcing Protection**.

Microsoft Word 2010

- Unlock the document by clicking the Review tab; toggle the Restrict Editing icon at the upper right, then click Stop Protect at the bottom right. Then uncheck the "Allow only this type of editing in the document: Filling in forms" in the "Editing restrictions" section on the right-hand list of options.
- To relock the document, check the Editing Restrictions/Allow Only This Type of Editing/Filling In Forms box from the drop-down menu, then check Yes, Start Enforcing Protection. You do not need to assign a password for the editing restrictions.

Other Alternatives:

- Photocopy pages or tables in Part 5, -mark through any non-applicable information, insert/attach
 photocopied pages to document in the appropriate location, and manually amend page numbers as
 necessary (e.g. Page 5 6 of 9 10).
- You may refer to additional attachments that you may include, such as separately produced tables or spreadsheets to convey large numbers of rows of place of use listings, owner/property parcels, etc.
 You may contact the Department at 503-986-0900 and ask for Transfer Staff if you have questions.

Part 5 of 5 – Water Right Information

Please use a separate Part 5 for each water right being changed. See instructions on page 6, to copy and paste additional Part 5s, or to add additional rows to tables within the form.

CERTIFICATE # 57271

Description of Water Delivery System

Revised 7/7/2022

System capacity: 0.66 cubic feet per second (cfs) OR

296 gallons per minute (gpm)

Describe the current water delivery system or the system that was in place at some time within the last five years. Include information on the pumps, canals, pipelines, and sprinklers used to divert, convey, and apply the water at the authorized place of use. The water is pumped with a 4752600-7 Grundfos submersible pump on 450' of 5" galvanized pipe. The pump is powered by a 60 hp motor controlled by a matching Yaskawa VFD. The system is designed to deliver 300 gpm at 540 Head-feet. The system runs at 50 psi at the well head. Irrigated elevations vary from the well head elevation from -30' to 140'. Pressure regulators are used where necessary to limit the PSI at the sprinkler head to 50 PSI or less. Well head pressure is boosted to higher elevations by a 7.5 HP Cornell pump with a matching Yaskawa VFD. Water is delivered through 6900 feet of steel and plastic main line ranging in size from 4" to 8". The mainline feeds 6 pivots, 2 roll lines and 2 stationary irrigation guns.

The Point Well and Big well mainlines are connected and controlled with an 8" valve.

Description of Water Delivery System

System capacity: 3.12 cubic feet per second (cfs) OR

1400 gallons per minute (gpm)

Describe the current water delivery system or the system that was in place at some time within the last five years. Include information on the pumps, canals, pipelines, and sprinklers used to divert, convey, and apply the water at the authorized place of use. The water is pumped with a Layne Bowler 10FHH 19 stage turbine pump on 400' of column. The turbines are driven by a 300 HP GE motor controlled by a matching Yaskawa VFD. The system is designed to produce 1400 GPM at 627 Head Feet and is operated at a well head pressure of 50 PSI. Water is delivered through 12,800 feet of underground mainline. The mainline ranges from 12" to 6" of steel and plastic and feeds 9 pivots, 1 traveling gun, one roll line and a small number of handlines. Irrigated elevations measured from the wellhead elevation range from zero to 400'. A 75 HP Cornell booster pump controlled by a Yaskawa VFD is used to deliver water to elevations beyond the 300 HP head range and delivers a maximum of 50 PSI at maximum elevation.

The Big Well and Point Well mainlines are connected and controlled with an 8" valve.

Additional remarks: For the entire right covered by Certificate 91937 we propose to add a second source of water, what we call "Point Well" (well 1), this includes the changes below.

We propose to change the place of use of 39.1 acres from the south end of the property to fill in 4 fields that had no water rights.

We proposed to change the place of use of 2.9 acres and change this from primary to supplemental irrigation. This is to cover some land near our home that has primary from Rock Creek but no supplemental rights from the wells.

*And finally, we request OWRD to correct Certificate 91937. There is 2.2 acres in the NW of the NE of Section 4 (east of Rock Creek) that was confirmed as a primary water right. This covers the same land as Certificate 29965, which is the primary water right from Rock Creek. We wish the correction to show this 2.2 acres is actually a supplemental water right.

For Place of Use or Character of Use Changes Are there other water right certificates, water use permits or ground water registrations associated with the "from" or the "to" lands? ✓ Yes ✓ No If YES, list the certificate, water use permit, or ground water registration numbers: Certificates 29965, 47505, and 57271. Pursuant to ORS 540.510, any "layered" water use such as an irrigation right that is supplemental to a primary right proposed for transfer must be included in the transfer or be cancelled. Any change to a ground water registration must be filed separately in a ground water registration modification application. For Substitution (ground water supplemental irrigation will be substituted for surface water primary irrigation) Ground water supplemental Permit or Certificate # _____; RECEIVED Surface water primary Certificate # _____. FEB 16 2024 For a change from Supplemental Irrigation Use to Primary Irrigation Use Identify the primary certificate to be cancelled. Certificate #___ OWRD For a change in point(s) of appropriation (well(s)) or additional point(s) of appropriation: Well log(s) are attached for each authorized and proposed well(s) that are clearly labeled and associated with the corresponding well(s) in Table 1 above and on the accompanying application map.

Tip: You may search for well logs on the Department's web page at:

http://apps.wrd.state.or.us/apps/gw/well_log/Default.aspx

AND/OR

Describe the construction of the authorized and proposed well(s) in Table 3 for any wells that do not have a well log. For *proposed wells not yet constructed or built*, provide "a best estimate" for each requested information element in the table. The Department recommends you consult a licensed well driller, geologist, or certified water right examiner to assist with assembling the information necessary to complete Table 3.

Table 3. Construction of Point(s) of Appropriation

Any well(s) in this listing must be clearly tied to corresponding well(s) described in Table 1 and shown on the accompanying application map. Failure to provide the information will delay the processing of your transfer application until it is received. The information is necessary for the department to assess whether the proposed well(s) will access the same source aquifer as the authorized point(s) of appropriation (POA). The Department is prohibited by law from approving POA changes that do not access the same source aquifer.

Proposed or Authorized POA Name or Number	Is well already built? OWRD

In order for your application to be processed by the Water Resources Department (WRD), this Land Use Information Form must be completed by a local government planning official in the jurisdiction(s) where your water right will be used and developed. The planning official may choose to complete the form while you wait, or return the receipt stub to you. Applications received by WRD without the Land Use Form or the receipt stub will be returned to you. Please be aware that your application will not be approved without land use approval.

NOTE TO APPLICANTS

This form is NOT required if:

- 1) Water is to be diverted, conveyed, and/or used only on federal lands; OR
- 2) The application is for a water right transfer, allocation of conserved water, exchange, permit amendment, or ground water registration modification, and all of the following apply:
 - a) The existing and proposed water use is located entirely within lands zoned for exclusive farm-use or within an irrigation district;
 - b) The application involves a change in place of use only;
 - c) The change does not involve the placement or modification of structures, including but not limited to water diversion, impoundment, distribution facilities, water wells and well houses; and
 - d) The application involves irrigation water uses only.

NOTE TO LOCAL GOVERNMENTS

The person presenting the attached Land Use Information Form is applying for or modifying a water right. The Water Resources Department (WRD) requires its applicants to obtain land-use information to be sure the water rights do not result in land uses that are incompatible with your comprehensive plan. Please complete the form or detach the receipt stub and return it to the applicant for inclusion in their water right application. You will receive notice once the applicant formally submits his or her request to the WRD. The notice will give more information about WRD's water rights process and provide additional comment opportunities. You will have 30 days from the date of the notice to complete the land-use form and return it to the WRD. If no land-use information is received from you within that 30-day period, the WRD may presume the land use associated with the proposed water right is compatible with your comprehensive plan. Your attention to this request for information is greatly appreciated by the Water Resources Department. If you have any questions concerning this form, please contact the WRD's Customer Service Group at 503-986-0801.

STATE OF OREGON

COUNTY OF GILLIAM

CERTIFICATE OF WATER RIGHT

THIS IS TO CERTIFY, that

J EARL WEATHERFORD

of OLEX ROUTE ARLINGTON, OR 97812

has a right to the use of the waters of A WELL ROCK CREEK

basin for the purpose of

SUPPLEMENTAL IRRIGATION.

The right has been perfected under Permit G 6673. date of priority is SEPTEMBER 26, 1975. The right is limited to not 0.660 CUBIC FOOT PER SECOND or its equivalent in case of rotation, measured at the well. The well is located as follows:

SW 1/4 SW 1/4, Section 33, T 01 N, R 21 E, WM; 820 FEET NORTH & 160 FEET EAST FROM SW CORNER, SECTION 33

The amount of water used for irrigation, together with the amount secured under any other right existing for the same lands, shall be limited to ONE-EIGHTIETH of one cubic foot per second per acre, or its equivalent for each acre irrigated and shall be further limited to a diversion of not to exceed 3.0 acre-feet per acre for each acre irrigated during the irrigation season of each year. The right shall be limited to any deficiency in the available supply of any prior right for the same land and shall not exceed the limitation allowed herein.

The right shall conform to such reasonable rotation system as may be ordered by the proper state officer.

A description of the place of use under the right, and to which such right is appurtenant, is as follows:

	ACRES	1/4	1/4		SECTION	TOWNS	SHIP	RANGE	, WM
supplemental	8.00	SE	NE		32	01	N	21	E
supplemental	26.40	NE	SE		32	01	N	21	E
supplemental	1.80	NW	SE		32	01	N	21	E
supplemental	15.40	SE	SE		32	01	N	21	E
supplemental	4.00	NE	SW		33	01	N	2 1.	E
supplemental	5.80	NW	SW		33	01	N	21	E
supplemental	31.20	SW	SW		33	01	N	21	E
supplemental	29.80	SE	SW		33	01	N	21	E
supplemental	12.40	SW	SE		33	01	N	21	E

Total: 134.80 supplemental acres.

The right to the use of the water for the above purpose is restricted to beneficial use on the lands or place of use described.

WITNESS the signature of the Water Resources Director, affixed this date, JULY 14, 1988.

CERTIFICATE OF WATER RIGHT

THIS CERTIFICATE ISSUED TO

J EARL WEATHERFORD OLEX STATION ARLINGTON OR 97812

confirms the right to the use of water perfected under the terms of Permit G-7962. The amount of water used to which this right is entitled is limited to the amount used beneficially, and shall not exceed the amount specified, or its equivalent in the case of rotation, measured at the point of diversion from the source. The specific limits and conditions of the use are listed below.

APPLICATION FILE NUMBER: G-8511

SOURCE OF WATER: A WELL IN JOHN DAY BASIN

PURPOSE or USE: PRIMARY IRRIGATION OF 216.6 ACRES AND SUPPLEMENTAL IRRIGATION OF 54.5 ACRES

MAXIMUM RATE: 3.12 CUBIC FEET PER SECOND

DATE OF PRIORITY: OCTOBER 31, 1977

The well is located as follows:

Twp	Rng	Mer	Sec	Q-Q	Measured Distances			
1 N	21 E	WM	33	SW SE	70 FEET NORTH AND 2300 FEET WEST FROM			
					SE CORNER, SECTION 33			

If for irrigation, this appropriation shall be limited to ONE-EIGHTIETH of one cubic foot per second or its equivalent for each acre irrigated and shall be further limited to a diversion of not to exceed 3.0 acre feet per acre for each acre irrigated during the irrigation season of each year; provided further that the right allowed herein shall be limited to any deficiency in the available supply of any prior right existing for the same land and shall not exceed the limitation allowed herein.

A description of the place of use is as follows:

NOTICE OF RIGHT TO PETITION FOR RECONSIDERATION OR JUDICIAL REVIEW

This is an order in other than a contested case. This order is subject to judicial review under ORS 183.484 and ORS 536.075. Any petition for judicial review must be filed within the 60-day time period specified by ORS 183.484(2). Pursuant to ORS 183.484, ORS 536.075 and OAR 137-004-0080, you may petition for judicial review and petition the Director for reconsideration of this order. A petition for reconsideration may be granted or denied by the Director, and if no action is taken within 60 days following the date the petition was filed, the petition shall be deemed denied. In addition, under ORS 537.260 any person with an application, permit or water right certificate subsequent in priority may jointly or severally contest the issuance of the certificate within three months after issuance of the certificate.

The well shall be maintained in accordance with the General Standards for the Construction and Maintenance of Water Wells in Oregon. The works shall be equipped with an air line and pressure gauge or an access port for a measuring line, adequate to determine water level elevation in the well at all times.

The water user shall install and maintain a weir, meter, or other suitable measuring device, and shall keep a complete record of the amount of ground water withdrawn.

The use of water shall be subject to existing rights including the existing minimum flow policies established by the Water Policy Review Board.

The right to the use of the water for the above purpose is restricted to beneficial use on the place of use described.
