Pine Eagle School District 61
150 W Bell St
Halfway, OR 97834

Dear Superintendent DeCastro:

Baker County Records show the Pine Eagle School District 61 is the owner of a small parcel of land, approximately $\frac{3}{4}$ acre, approximately 2 miles southeast of Richland, Oregon. The attached Figure 1 shows the location of the parcel.

The parcel is surrounded by property owned by Idaho Power Company known as the Daly Creek Ranch. The ranch is managed as mitigation required by the Company's licenses.

The Company is in the process of updating the water right records of the property to match the current and proposed water use on the property. In reviewing the water right records three water rights were found to cover a portion of the land parcel owned by the School District. The attached Figure 2 shows the portion of the School District property currently irrigated and covered by water right certificates 28855, 72398 and 81986 on file with the Oregon Department of Water Resources.

The water right represented by certificate 28855 provides a full supply of irrigation water to the irrigated land within the School District parcel. The certificate provides a primary irrigation water supply from Daly Creek and a supplemental irrigation water supply from Eagle Creek. The portion of certificate 28855 on the School District property is not proposed to be changed by the water right transfer or water right lease but other portions of the water right on Company lands will be relocated.

The portion of the water right on the District parcel represented by certificate 81986 is duplicative of the water right represented by certificate 28855 and is proposed to be leased to the State of Oregon for instream use. It is unclear how two supplemental water rights have come to be of record on the same parcel since OWRD normally allows a single primary irrigation water right and a single supplemental irrigation water right.

The water right represented by certificate 72398 originated from seepage water on the north side of the Powder River and can no longer be captured with the current irrigation system. State of Oregon records indicate this water right has been cancelled but for some reason the water right continues to appear in the water right records of the State. The Company will request this water right be cancelled and have it removed from the State's records.

In order for the Company to proceed with the changes to the water rights it is seeking, the Company must seek approval from the owners of any non-Company owned lands to which any portion of the water rights are appurtenant. By this letter, the Company is requesting the approval of the District to proceed with the changes to the water rights represented by certificates 28855, 72398 and 81986.

In summary:

1. The portion of Certificate 28855 on School District land will remain on School District land, but other portions of Certificate 28855 on Company lands will be relocated.
2. The portion of Certificate 81986 on School District land is duplicative of Certificate 28855 and is proposed to be leased to the State of Oregon for instream use.
3. Certificate 72398 can no longer be delivered and is proposed to be cancelled. This water right has not been used on any property since the flume over the Powder River was removed many years ago.

The attached Affidavit is offered as an approval, if acceptable to the District, that would permit the Company to proceed with the desired changes to water rights represented by certificates 28855, 72398 and 81986.

If you or any other members of the District have questions about this request, please feel free to contact Shaun Parkinson at (208) 388-2495 or you may wish to contact our water right consultant, David Shaw at 208-365-7684.

Yours truly,

Shaun Parkinson

RE: Amended Application for Permanent Transfer in the Name of Idaho Power Co.

Dear Mr. Starnes:

Enclosed is an amended application for Permanent Transfer of 7 water rights in the Powder River basin. This application is an amendment to application for transfer T-8828 currently on file with OWRD. Also enclosed for your information is a copy of an Instream Lease application for 17 water rights in the Powder River basin. The Instream Lease application includes portions of 3 water rights, certificate nos. 4611, 72199 and 81986, that are also included in the amended application for transfer. Other water rights included in the Instream Lease application may be associated with lands identified in the amended application for transfer.

Application for Transfer T-8828 was filed with an application fee of \$1,100 on June 4, 2001 as evidenced by receipt no. 45598. Please let me know if an additional fee is required prior to the processing of the enclosed amended application.

Thank you for your consideration. If you have questions or need any additional information, please feel free to contact me.

Yours truly,

David Shaw
Project Manager

Part 2 of 5 – Transfer Application Map Checklist

Your transfer application will be returned if any of the map requirements listed below are not met.

Please be sure that the transfer application map you submit includes all the required items and matches the existing water right map. Check all boxes that apply.

- N/A Certified Water Right Examiner (CWRE) Stamp and Original Signature. For a list of CWREs, see http://apps.wrd.state.or.us/apps/wr/cwre_license_view/. CWRE stamp and signature are not required for substitutions.
- N/A If **more than three** water rights are involved, separate maps are needed for each water right.
- Permanent quality printed with dark ink on good quality paper.
- The size of the map can be 8½ x 11 inches, 8½ x 14 inches, 11 x 17 inches, or up to 30 x 30 inches. For 30 x 30 inch maps, one extra copy is required.
- A north arrow, a legend, and scale.
- The scale of the map must be: 1 inch = 400 feet, 1 inch = 1,320 feet, the scale of the Final Proof/Claim of Beneficial Use Map (the map used when the permit was certificated), the scale of the county assessor map if the scale is not smaller than 1 inch = 1,320 feet, or a scale that has been pre-approved by the Department.
- Township, Range, Section, ¼ ¼, DLC, Government Lot, and other recognized public land survey lines.
- Tax lot boundaries (property lines) are required. Tax lot numbers are recommended.
- Major physical features including rivers and creeks showing direction of flow, lakes and reservoirs, roads, and railroads.
- Major water delivery system features from the point(s) of diversion/appropriation such as main pipelines, canals, and ditches.
- Existing place of use that includes separate hachuring for each water right, priority date, and use including number of acres in each quarter-quarter section, government lot, or in each quarter-quarter section as projected within government lots, donation land claims, or other recognized public land survey subdivisions. If less than the entirety of the water right is being changed, a separate hachuring is needed for lands left unchanged.
- N/A Proposed place of use that includes separate hachuring for each water right, priority date, and use including number of acres in each quarter-quarter section, government lot, or in each quarter-quarter section as projected within government lots, donation land claims, or other recognized public land survey subdivisions.
- Existing point(s) of diversion or well(s) with distance and bearing or coordinates from a recognized survey corner. This information can be found in your water right certificate or permit.
- N/A If you are proposing a change in point(s) of diversion or well(s), show the proposed location and label it clearly with distance and bearing or coordinates. If GPS coordinates are used, latitude-longitude coordinates may be expressed as either degrees-minutes-seconds with at least one digit after the decimal (example – 42°32' 15.5") or degrees-decimal with five or more digits after the decimal (example – 42.53764°).

For Place of Use or Character of Use Changes

Are there other water right certificates, water use permits or ground water registrations associated with the “from” or the “to” lands? Yes No

If YES, list the certificate, water use permit, or ground water registration numbers: 81986, 15177, 72199, 72398.

Pursuant to ORS 540.510, any “layered” water use such as an irrigation right that is supplemental to a primary right proposed for transfer must be included in the transfer or be cancelled. Any change to a ground water registration must be filed separately in a ground water registration modification application.

Describe the construction of the authorized and proposed well(s) in Table 3 for any wells that do not have a well log. For *proposed wells not yet constructed or built*, provide “a best estimate” for each requested information element in the table. The Department recommends you consult a licensed well driller, geologist, or certified water right examiner to assist with assembling the information necessary to complete Table 3.

Table 3. Construction of Point(s) of Appropriation

Any well(s) in this listing must be clearly tied to corresponding well(s) described in Table 1 and shown on the accompanying application map. Failure to provide the information will delay the processing of your transfer application until it is received. The information is necessary for the department to assess whether the proposed well(s) will access the same source aquifer as the authorized point(s) of appropriation (POA). The Department is prohibited by law from approving POA changes that do not access the same source aquifer.

For a change in point(s) of appropriation (well(s)) or additional point(s) of appropriation:

Well log(s) are attached for each authorized and proposed well(s) that are clearly labeled and associated with the corresponding well(s) in Table 1 above and on the accompanying application map.

Tip: You may search for well logs on the Department’s web page at:
http://apps.wrd.state.or.us/apps/gw/well_log/Default.aspx

AND/OR

Describe the construction of the authorized and proposed well(s) in Table 3 for any wells that do not have a well log. For *proposed wells not yet constructed or built*, provide “a best estimate” for each requested information element in the table. The Department recommends you consult a licensed well driller, geologist, or certified water right examiner to assist with assembling the information necessary to complete Table 3.

Table 3. Construction of Point(s) of Appropriation

Any well(s) in this listing must be clearly tied to corresponding well(s) described in Table 1 and shown on the accompanying application map. Failure to provide the information will delay the processing of your transfer application until it is received. The information is necessary for the department to assess whether the proposed well(s) will access the same source aquifer as the authorized point(s) of appropriation (POA). The Department is prohibited by law from approving POA changes that do not access the same source aquifer.

For a change in point(s) of appropriation (well(s)) or additional point(s) of appropriation:

- Well log(s) are attached for each authorized and proposed well(s) that are clearly labeled and associated with the corresponding well(s) in Table 1 above and on the accompanying application map.

Tip: You may search for well logs on the Department’s web page at:

http://apps.wrd.state.or.us/apps/gw/well_log/Default.aspx

AND/OR

- Describe the construction of the authorized and proposed well(s) in Table 3 for any wells that do not have a well log. For *proposed wells not yet constructed or built*, provide “a best estimate” for each requested information element in the table. The Department recommends you consult a licensed well driller, geologist, or certified water right examiner to assist with assembling the information necessary to complete Table 3.

Table 3. Construction of Point(s) of Appropriation

Any well(s) in this listing must be clearly tied to corresponding well(s) described in Table 1 and shown on the accompanying application map. Failure to provide the information will delay the processing of your transfer application until it is received. The information is necessary for the department to assess whether the proposed well(s) will access the same source aquifer as the authorized point(s) of appropriation (POA). The Department is prohibited by law from approving POA changes that do not access the same source aquifer.

(Yes or No)	If an existing well: OWRD Well ID Tag No. L-	Total well depth	Casing Diameter	Casing Intervals (feet)	Seal depth(s) (intervals)	Perforated or screened intervals (in feet)	Static water level of completed well (in feet)	Source aquifer (sand, gravel, basalt, etc.)	Well -specific rate (cfs or gpm). If less than full rate water right

Please use a separate Part 5 for each water right being changed. See instructions on page 6, to copy and paste additional Part 5s, or to add additional rows to tables within the form.

Description of Water Delivery System

System capacity: _____ cubic feet per second (cfs) **OR**
900 gallons per minute (gpm)

Describe the current water delivery system or the system that was in place at some time within the last five years. Include information on the pumps, canals, pipelines, and sprinklers used to divert, convey, and apply the water at the authorized place of use. **Pump and Pipeline**

Check all type(s) of change(s) proposed below (change "CODES" are provided in parentheses):

- Place of Use (POU) Supplemental Use to Primary Use (S to P)
- Character of Use (USE) Point of Appropriation/Well (POA)
- Point of Diversion (POD) Additional Point of Appropriation (APOA)
- Additional Point of Diversion (APOD) Substitution (SUB)
- Surface Water POD to Ground Water POA (SW/GW) Government Action POD (GOV)

Will all of the proposed changes affect the entire water right?

- Yes Complete only the Proposed ("to" or "on" lands) section of Table 2 on the next page. Use the "CODES" listed above to describe the proposed changes.
- No Complete all of Table 2 to describe the portion of the water right to be changed.

Please use and attach additional pages of Table 2 as needed.
See page 6 for instructions.

Do you have questions about how to fill-out the tables?
Contact the Department at 503-986-0900 and ask for Transfer Staff.

For Place of Use or Character of Use Changes

Are there other water right certificates, water use permits or ground water registrations associated with the “from” or the “to” lands? Yes No

If YES, list the certificate, water use permit, or ground water registration numbers: 72610, 4611, 4103, 72199.

Pursuant to ORS 540.510, any “layered” water use such as an irrigation right that is supplemental to a primary right proposed for transfer must be included in the transfer or be cancelled. Any change to a ground water registration must be filed separately in a ground water registration modification application.

For Substitution (ground water supplemental irrigation will be substituted for surface water primary irrigation)

Ground water supplemental Permit or Certificate # _____;
Surface water primary Certificate # _____.
