	)	FINAL ORDER AND ISSUING A
	)	SUPERSEDING FINAL ORDER APPROVING
	)	EMERGENCY TEMPORARY CHANGES IN

**Authority**

Oregon Revised Statute (ORS) 536.750 establishes the process in which a water right holder may submit a request to temporarily transfer the use, place of use or point of diversion of water in the event of a declaration of drought, without complying with the notice and waiting requirements under ORS 540.520. Oregon Administrative Rule (OAR) Chapter 690, Division 019 implements the statutes and provides the Department's procedures and criteria for evaluating drought transfer applications.

**Applicant**

ROBERT L UNRUH  
30083 PICKETT RD  
MALIN, OR 97632

**Findings of Fact**

1. On April 21, 2022, ROBERT L UNRUH filed an application to temporarily change the places of use and change the points of appropriation under Certificate 27103, 74458, and Permit G-12450 for the remainder of the 2022 irrigation season or the term of the Governor's declared drought, whichever is shorter. The Department assigned the application number T-13987.
2. Notice of the application for transfer was published on May 3, 2022, pursuant to OAR 690-380-4000. No comments were filed in response to the notice.
3. On June 9, 2022, the Department approved Drought Temporary Transfer Application T-13987, as evidenced in Special Order Volume 125, Pages 238-243.

This is a final order in other than a contested case. This order is subject to judicial review under ORS 183.484. Any petition for judicial review must be filed within the 60-day time period specified by ORS 183.484(2). Pursuant to ORS 536.075 and OAR 137-004-0080, you may petition for judicial review or petition the Director for reconsideration of this order. A petition for reconsideration may be granted or denied by the Director, and if no action is taken within 60 days following the date the petition was filed, the petition shall be deemed denied.

4. On July 15, 2022, the Department sent a Reconsideration Letter because the Final Order was issued prior to the Department's Groundwater review being completed.
5. On July 22, 2022, the Department completed the Groundwater Review and found the change in point of appropriation was from the same source and that there was no finding of injury. The Department is withdrawing approval of Special Order Volume 125, Pages 238-243, and issuing this superseding final order.

*Temporary Drought Transfer Review Criteria*

15. Water has been used within the last five years according to the terms and conditions of the rights. There is no evidence available that would demonstrate that the rights are subject to forfeiture under ORS 540.610.
16. A pump, pipeline, and sprinkler system sufficient to use the full amount of water allowed under the existing rights are present.
17. The Governor issued an executive order on March 4, 2022, declaring a state of drought emergency in Klamath County due to drought and extreme weather conditions, which is still in effect and the water right proposed for transfer is on lands included in the area covered by the drought order.
18. The proposed changes would not result in enlargement of the rights.

19. The proposed changes would not result in injury to other water rights. This finding is made through an abbreviated review recognizing that the transfer may be revoked under OAR 690-019-055(3) if injury to existing water rights is shown and cannot be mitigated to the satisfaction of the Director and injured parties.

#### Conclusions of Law

The temporary change in places of use and points of appropriation proposed in Temporary Drought Transfer Application T-13987 are consistent with the requirements of ORS 536.750 and OAR 690-019-0055.

Now, therefore, it is ORDERED:

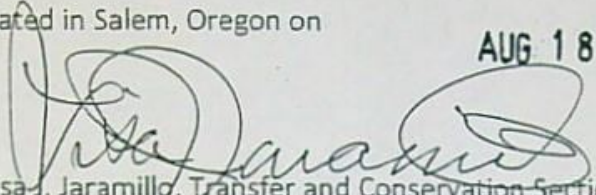

1. The order recorded at Special Order Volume 125, Pages 238-243 is withdrawn, is of no further force or effect, and is superseded by this order.
2. The temporary change in in places of use and points of appropriation proposed in Temporary Drought Transfer Application T-13987 are approved.
3. The former places of use shall not be irrigated as part of these water rights during the remainder of the 2022 irrigation season or until the end of the Governor's declared drought, whichever occurs first.
4. The approval of this temporary drought transfer may be revoked or modified if the Department finds the changes cause injury to any existing water right.
5. The quantity of water diverted at the proposed temporary points of appropriation shall not exceed the quantity of water lawfully available at the original points of appropriation.
6. The use of water at the temporary places of use authorized by this transfer shall be in accordance with the terms and conditions of Certificate 27103, 74458, and Permit G-12450. The use shall revert to the authorized place of use at the end of the 2022 irrigation season.
7. The proposed change in places of use and points of appropriation shall revert to the authorized places of use and points of appropriation at the end of the 2022 irrigation season or the end of the Governor's declared drought, whichever occurs first.

8. The use of the remaining water rights described by Certificate 27103, 74458, and Permit G-12450 shall continue to be in accordance with the terms and conditions of Certificate 27103, 74458, and Permit G-12450.

**Temporary Drought Transfer Review Criteria**

15. Water has been used within the last five years according to the terms and conditions of the rights. There is no evidence available that would demonstrate that the rights are subject to forfeiture under ORS 540.610.
16. A pump, pipeline, and sprinkler system sufficient to use the full amount of water allowed under the existing rights are present.

17. The Governor issued an executive order on March 4, 2022, declaring a state of drought emergency in Klamath County due to drought and extreme weather conditions, which is still in effect and the water right proposed for transfer is on lands included in the area covered by the drought order.
18. The proposed changes would not result in enlargement of the rights.
19. The proposed changes would not result in injury to other water rights. This finding is made through an abbreviated review recognizing that the transfer may be revoked under OAR 690-019-055(3) if injury to existing water rights is shown and cannot be mitigated to the satisfaction of the Director and injured parties.

### Conclusions of Law

The temporary change in places of use and points of appropriation proposed in Temporary Drought Transfer Application T-13987 are consistent with the requirements of ORS 536.750 and OAR 690-019-0055.

3. The former places of use **shall not** be irrigated as part of these water rights during the remainder of the 2022 irrigation season or until the end of the Governor's declared drought, whichever occurs first.
4. The approval of this temporary drought transfer may be revoked or modified if the Department finds the changes cause injury to any existing water right.
5. The quantity of water diverted at the proposed temporary points of appropriation shall not exceed the quantity of water lawfully available at the original points of appropriation.
6. The use of water at the temporary places of use authorized by this transfer shall be in accordance with the terms and conditions of Certificate 27103, 74458, and Permit G-12450. The use shall revert to the authorized place of use at the end of the 2022 irrigation season.
7. The proposed change in places of use and points of appropriation shall revert to the authorized places of use and points of appropriation at the end of the 2022 irrigation season or the end of the Governor's declared drought, whichever occurs first.

The information provided in the application is insufficient to evaluate whether the proposed transfer may be approved because:

- The water well reports provided with the application do not correspond to the water rights affected by the transfer.
- The application does not include water well reports or a description of the well construction details sufficient to establish the ground water body developed or proposed to be developed.
- Other \_\_\_\_\_

1. Basic description of the changes proposed in this transfer: The application proposes to change the POA under Cert. 74458, Cert. 27103, and Permit G-12450 from the existing authorized POAs (KLAM 14754 and KLAM 53641) to 5 proposed POAs (KLAM 14838, KLAM 53641, KLAM 53792, KLAM 14819, KLAM 14820), some of which are authorized POAs on the other rights. The applicant also proposes to change the POU on all three rights
2. Will the proposed POA develop the same aquifer (source) as the existing authorized POA?  
 Yes     No    Comments: \_\_\_\_\_
3. a) Is there more than one source developed under the right (e.g., basalt and alluvium)?  
 Yes     No \_\_\_\_\_  
 b) If yes, estimate the portion of the right supplied by each of the sources and describe any limitations that will need to be placed on the proposed change (rate, duty, etc.): \_\_\_\_\_
4. a) Will this proposed change, at its maximum allowed rate of use, likely result in an increase in interference with **another ground water right**?  
 Yes     No    Comments: The proposed change would move the POA closer to other existing rights which would increase the level of hydraulic interference to those rights  
 b) If yes, would this proposed change, at its maximum allowed rate of use, likely result in another groundwater right not receiving the water to which it is legally entitled?

Yes  No If yes, explain: Wells that are reasonably efficient and fully penetrate the aquifer in the region, would not likely be injured by this transfer due to the thickness of the aquifer and generally-high transmissivity.

5. a) Will this proposed change, at its maximum allowed rate of use, likely result in an increase in interference with **another surface water source**?

Yes  No Comments: The proposed change would not substantially change the impacts to nearby surface water sources in the area.

b) If yes, at its maximum allowed rate of use, what is the expected change in degree of interference with any **surface water sources** resulting from the proposed change?

6. For SW-GW transfers, will the proposed change in point of diversion affect the surface water source similarly (as per OAR 690-380-2130) to the authorized point of diversion specified in the water use subject to transfer?

Hi ya Scott!

The plan for this one is to reconsider the FO, wait for M. Thoma to complete the GW review, then issue an FO reconsidering the previous FO.....

So...

To stop the reconsideration clock. We must send a letter (asap) to the applicant that we are reconsidering the FO. I believe Joan is working on a reconsideration for a temp transfer. She would have a reconsideration letter that you could use as an example.

Then....

We wait for Thoma's review

If you are questioning existence (or have other questions regarding the reconsideration) let me know!

11. For POU changes that involve micro-irrigation:  N/A

- a. Has the applicant made changes (absent a transfer) to convert to micro-irrigation within the current place of use boundary of the water right proposed for transfer, and previously demonstrated to the Department through monitoring and site inspections by the Watermaster that the proposed transfer will not result in injury or enlargement?

Yes  No If "Yes", explain:

b. Has a temporary transfer of this nature been previously filed and approved on the same lands (or portions thereof) as those lands involved in this transfer?

Yes  No If "Yes", answer the following:

i. Were there any problems with more acres being irrigated (or wetted) than were authorized under the temporary transfer?  Yes  No If "Yes", explain:

ii. Did the designated areas that were to remain dry (or not wetted) under the temporary transfer actually remain dry?  Yes  No If "No", explain:

iii. Did the applicant comply with and meet all of the conditions of the temporary transfer?  Yes  No If "No", explain:

iv. Do you have any other observations regarding the temporary transfer?  Yes  No If "Yes", describe:

v. Did the applicant demonstrate to the Department through monitoring and site inspections by the Watermaster that neither injury nor enlargement occurred as a result of the temporary transfer?  Yes  No If "No", explain:

c. To the best of your knowledge, if this transfer is approved, does it appear that:

12. Are there other issues not identified through the above questions that should be considered in determining whether the change "can be effected without injury to other rights"?

Yes  No If "Yes", explain:

13. What alternatives may be available for addressing any issues identified above:

14. Do conditions need to be included in the transfer order to avoid enlargement of the right or injury to other rights?  No  Yes, as checked and provided below:

For POU changes that involve micro-irrigation, provide the monitoring and reporting conditions necessary to prevent injury/enlargement:

A Headgate should be required prior to diverting water.

Measurement Devices for POD or POA: (if this condition is selected, also fill in the top sections of Page 4)

*a. Before water use may begin under this order, the water user shall install a totalizing flow meter\*, or, with prior approval of the Director, another suitable measuring device,  at each point of diversion/appropriation (new and existing) OR at each new point of diversion/appropriation  with the exception that water rights issued to the Bureau of Reclamation or an irrigation district (or similar entity) are not subject to this condition.*

*b. The water user shall maintain the meters or measuring devices in good working order.*

*c. The water user shall allow the Watermaster access to the meters or measuring devices; provided however, where the meters or measuring devices are located within a private structure, the Watermaster shall request access upon reasonable notice.*

Reservoir water use measurement: (if this condition is selected, also fill in the top sections of Page 4)

*a. Before water use may begin under this order, the water user shall install staff gages\*, or, with prior approval of the Director, other suitable measuring devices, that measure the entire range and stage between empty and full in each reservoir. Staff gages shall be United States Geological Survey style.*

*b. Before water use may begin under this order, if the reservoir is located in channel, weirs or other suitable measuring devices must be installed upstream and downstream of the reservoir, and, an adjustable outlet valve must be installed. The water user shall maintain such devices in good working order. A written waiver may be obtained, if in the judgment of the Director, the installation of weirs or other suitable measuring devices, or the adjustable outlet valve, will provide no public benefit.*

\* The following alternative device(s) should be substituted for the bold, underlined device in the above selected condition:

**For Place of Use Changes**

Are there other water right certificates, water use permits or ground water registrations associated with the "from" or the "to" lands?  Yes  No

If YES, list the certificate, water use permit, or ground water registration numbers:

---

Pursuant to ORS 540.525, any "layered" water use such as an irrigation right that is supplemental to a primary right proposed for temporary transfer can be included in the transfer or remain unused on the authorized place of use. If the primary water right does not revert soon enough to allow use of the supplemental right within five years, the supplemental right shall become subject to cancellation for nonuse under ORS 540.610.

**If a change in point(s) of appropriation (well(s)) or additional point(s) of appropriation is necessary to convey the water to the new temporary place of use you must provide:**

- Well log(s) for each authorized and proposed well(s) that are clearly labeled and associated with the corresponding well(s) in Table 1 above and on the accompanying application map. (Tip: You may search for well logs on the Department's web page at: [http://apps.wrd.state.or.us/apps/gw/well\\_log/Default.aspx](http://apps.wrd.state.or.us/apps/gw/well_log/Default.aspx))

**AND/OR**

- Describe the construction of the authorized and proposed well(s) in Table 3 below for any well that does not have a well log. For a *proposed well(s) not yet constructed or built*, provide "a best estimate" for each requested information element in the table. The Department recommends you consult a licensed well driller, geologist, or certified water right examiner to assist with assembling the information necessary to complete Table 3.

**Table 3. Construction of Point(s) of Appropriation**

Any well(s) in this listing must be clearly tied to corresponding well(s) described in Table 1 and shown on the accompanying application map. Failure to provide the information will delay the processing of your transfer application until it is received. The information is necessary for the Department to assess whether the proposed well(s) will access the same source aquifer as the authorized point(s) of appropriation (POA). The Department is prohibited by law from approving POA changes that do not access the same source aquifer.

# Certificate of Water Right Ownership Update

Received by OW

APR 19 2021

Salem, OR

### NOTICE TO SELLERS & BUYERS:

By law, all water belongs to the public (ORS 537.110). In almost every instance, a permit or water right certificate from the Water Resources Department is needed before using, diverting or storing water (ORS 537.130). However, most domestic wells do not require water rights. A certificate of water right stays with the land. In order to keep track of water right ownership, the Department requests that this form be submitted to the Department. **If for multiple rights, a separate form for each right will be required.**

Water that has been used for a long time in one place or that involves a water structure (like a dam) that already exists is no guarantee that there is a water right which would allow the water use to continue.

If you have any questions about this form or water right requirements, please contact your local watermaster or call the Water Resources Department at 503-986-0900.

Note: Please type or print legibly when filling in the following information. Use additional paper if necessary.
