**Review Criteria for Groundwater Registration Modification Applications**

**[OAR 690-382-0100(10), 690-382-0700(2), 690-382-1000(1), 690-380-2110(2), and 690-380-2200]**

8. The proposed modifications would not result in a state Scenic Waterway not receiving previously available water during periods in which stream flows are less than the quantities determined by the Department to be necessary to meet the requirements of ORS 390.835.
9. The proposed points of appropriation develop groundwater from the same aquifer as the authorized point of appropriation, as required by OAR 690-380-2110(2).
10. The proposed modifications, as conditioned, would not result in enlargement of the registration.
11. The proposed modifications would not result in injury to other water rights.
12. All other application requirements are met.

**Determination and Proposed Action**

The additional points of appropriation and modification in place of use proposed in Groundwater Registration Modification T-13599 appear to be consistent with the requirements of ORS 537.610, 537.705, 540.505 to 540.580 and OAR 690-382-1000. If protests are not filed pursuant to OAR 690-382-0900, the modification will be approved.

If Groundwater Registration Modification T-13599 is approved, the final order will include the following:

1. The modifications to Registration Application GR-2579 (Certificate of Registration GR-2449) proposed in Groundwater Registration Modification Application T-13599 are recognized. Recognition of the modifications shall not be construed as a final determination of the right to appropriate groundwater under the certificate of registration or modification. Such a determination will occur in an adjudication proceeding under ORS 537.670 to 537.695.
2. The use of the water is restricted to beneficial use at the place of use described, and is subject to all other conditions and limitations contained in Registration Application GR-2579 (Certificate of Registration GR-2449) and any related decree.
3. Approval of this groundwater registration modification application does not constitute nor grant legal access onto or through another person's property for purposes of accessing the new points of appropriation and/or the new place of use.
4. Water shall be acquired from the same aquifer (water source) as the original point of appropriation.
5. The combined quantity of water diverted at the proposed additional points of appropriation (Wells 2 and 3), together with that diverted at the original point of appropriation (Pump Well #1), shall not exceed the quantity of water lawfully available at the original point of appropriation (Pump Well #1).
6. The former place of use of the modified groundwater registration shall no longer receive water as part of the groundwater certificate of registration.

SUBJECT: Groundwater Registration Modification T-13599

Please find enclosed the Preliminary Determination indicating that, based on the information available, the Department intends to approve application T-13599. This document is an intermediate step in the approval process; water may not be used legally as proposed in the groundwater registration modification application until a Final Order has been issued by the Department. Please read this entire letter carefully to determine your responsibility for additional action.

A public notice is being published in the Department's weekly publication and in the Woodburn Independent newspaper, simultaneously with issuance of the Preliminary Determination. The notice initiates a period in which any person may file either a protest opposing the decision proposed by the Department in the Preliminary Determination or a standing statement supporting the Department's decision. The protest period will end 30 days after the Department's notice or 30 days after the last date of newspaper publication, whichever is later.

If no protest is filed, the Department will issue a Final Order consistent with the Preliminary Determination. You should receive a copy of the Final Order about 30 days after the close of the protest period.

If a protest is filed, the application may be referred to a contested case proceeding. A contested case provides an opportunity for the proponents and opponents of the decision proposed in the Preliminary Determination to present information and arguments supporting their position in a quasi-judicial proceeding.

Please don't hesitate to contact me at 503-871-1889 or [Lisa.J.Jaramillo@water.oregon.gov](mailto:Lisa.J.Jaramillo@water.oregon.gov) if I may be of assistance.

Sincerely,
