Part 2 of 5 – Permit Amendment Map Checklist

Your permit amendment application will be returned if any of the map requirements listed below are not met.

Please be sure that the map you submit includes all the items listed below and meets the requirements of OAR 690-380-3100, however, the map does not have to be prepared by a Certified Water Right Examiner. Check all boxes that apply.

- ☐ ☒ N/A If **more than three** permits are involved, separate maps for each permit.
- ☒ Permanent quality printed with dark ink on good quality paper.
- ☒ The size of the map can be 8½ x 11 inches, 8½ x 14 inches, 11 x 17 inches, or up to 30 x 30 inches. For 30 x 30 inch maps, one extra copy is required.
- ☒ A north arrow, a legend, and scale.
- ☒ The scale of the map must be: 1 inch = 400 feet, 1 inch = 1,320 feet, the scale of the county assessor map if the scale is not smaller than 1 inch = 1,320 feet, or a scale that has been pre-approved by the Department.
- ☒ Township, Range, Section, ¼ ¼, DLC, Government Lot, and other recognized public land survey lines.
- ☒ Tax lot boundaries (property lines) are required. Tax lot numbers are recommended.
- ☒ Major physical features including rivers and creeks showing direction of flow, lakes and reservoirs, roads, and railroads.
- ☒ Major water delivery system features from the point(s) of diversion/appropriation such as main pipelines, canals, and ditches.
- ☒ Existing place of use that includes separate hachuring for each water use permit, priority date, and use including number of acres in each quarter-quarter section, government lot, or in each quarter-quarter section as projected within government lots, donation land claims, or other recognized public land survey subdivisions. If less than the entirety of the permit is being changed, a separate hachuring is needed for the portion of the permit left unchanged.
- ☒ ☐ N/A If you are proposing a change in place of use, show the proposed place of use with hachuring that includes separate hachuring for each permit, priority date, and use including number of acres in each quarter-quarter section, government lot, or in each quarter-quarter section as projected within government lots, donation land claims, or other recognized public land survey subdivisions.
- ☒ Existing point(s) of diversion or well(s) with distance and bearing or coordinates from a recognized survey corner. This information can be found in your water use permit.
- ☒ ☐ N/A If you are proposing a change in point(s) of diversion or well(s), show the proposed location and label it clearly with distance and bearing or coordinates. If GPS coordinates are used, latitude-longitude coordinates may be expressed as either degrees-minutes-seconds with at least one digit after the decimal (example – 42°32'15.5") or degrees-decimal with five or more digits after the decimal (example – 42.53764°).

*Example for Line 5a calculation to transfer 45.0 acres of Primary Permit S-12345 (total 1.25 cfs for 100 acres) and 45.0 acres of Supplemental Permit S-87654 (1/80 cfs per acre) on the same land:

1. For irrigation calculate cfs for each permit involved as follows:
 - a. Divide total authorized cfs by total acres in the permit (*for S-12345, 1.25 cfs ÷ 100 ac*); then multiply by the number of acres to be changed to get the application cfs (*x 45 ac = 0.56 cfs*).
 - b. If the water right permit does not list total cfs, but identifies the allowable use as 1/40 or 1/80 of a cfs per acre; multiply number of acres proposed for change by either 0.025 (1/40) or 0.0125 (1/80). (*For S-87654, 45.0 ac x 0.0125 cfs/ac = 0.56 cfs*)
2. Add cfs for the portions of permits on all the land included in the application; however **do not count cfs for supplemental permits on acreage for which you have already calculated the cfs fee for the primary permit on the same land**. The fee should be assessed only once for each "on the ground" acre included in the application. (*In this example, blank 5a would be only 0.56 cfs, since both permits serve the same 45.0 acres. Blank 5b would be 0 and Line 5 would then also become 0*).

Explain in your own words what you propose to accomplish with this permit amendment; and why:
This application is being submitted in conjunction with the Stipulated Agreement to Withdraw Protest, OAH Ref. No. 2023-OWRD-00127, Agency Case No. G-17753 (copy attached). Pursuant that Stipulated Agreement, the applicant has agreed to reduce the amount of acreage under Permit G-17486 from 309.8 acres to 130.2 acres and to reduce the authorized rate from 3.87 cfs to 1.63 cfs. Additionally, the applicant seeks to conform the described points of appropriation in the permit to reflect the location of the wells supplying the authorized use. The permit amendment fee is waived per Stipulation No. 2.

If you need additional space, continue on a separate piece of paper and attach to the application as "Attachment 1".

☐ Check this box if this project is fully or partially funded by the American Recovery and Reinvestment Act. (Federal stimulus dollars)

Is the applicant the permit holder of record? ☒ Yes ☐ No

If NO, include either:

- ☐ A completed assignment form (with required statutory assignment fee), assigning all or a portion of the permit to the applicant(s), OR
- ☐ An affidavit of consent from the permit holder(s) of record that gives permission for the applicant to amend the permit.

Has the Completion ("C") Date of the permit(s) in this application expired? ☒ Yes ☐ No

If YES, this application will not be accepted by the Department.

If NO, what are the completion dates of the permit(s)? See explanation above and the Stipulated Agreement.

- If the permit completion date expires while the Permit Amendment Application is pending, the Department will not approve the Permit Amendment Application until an Extension of Time Application is approved for the permit.
- You may consider using the Reimbursement Authority process to expedite the processing of this Permit Amendment Application if the completion date of the permit expires within 6 months of the date of filing this application.

By my signature below, I confirm that I understand:

- Prior to Department approval of the permit amendment, I may be required to submit payment to the Department for publication of a notice in a newspaper with general circulation in the area where the permit is located, once per week for two consecutive weeks. If more than one qualifying newspaper is available, I suggest publishing the notice in the following newspaper: Burns Times Herald

I (we) affirm that the information contained in this application is true and accurate.

Will all of the proposed changes affect the entire water use permit?

- ☒ Yes Complete only the proposed ("to" lands) section of Table 2 on the next page. Use the "CODES" listed above to describe the proposed changes.
- ☐ No Complete all of Table 2 to describe the portion of the permit to be changed.

For a change in place of use:

Does the permit holder of record own or control the land TO which the place of use is being moved?

☒ Yes ☐ No

If NO, the landowner of the land TO which the place of use is being moved must be assigned to the permit as a permit holder of record by submitting a completed Request for Assignment form and the required statutory fee for an assignment.

Is the proposed place of use contiguous to the authorized place of use? ☒ Yes ☐ No

The permitted place of use can be moved only to lands that are contiguous to the authorized place of use **unless** the change to non-contiguous lands is in furtherance of mitigation or conservation efforts undertaken for the purposes of benefiting a species listed as sensitive, threatened, or endangered under ORS 496.171 to 496.192 or the federal Endangered Species Act of 1973 (16 U.S.C. 1531 to 1544), as determined by the listing agency. Contiguous land being either adjacent land or land separated from the land to which a permit is authorized by roads, utility corridors, irrigation ditches or publicly owned rights of way.

Are there other water rights certificates, water use permits or ground water registrations associated with the "from" or "to" lands? ☐ Yes ☒ No

If YES, list the other certificate, permit, or ground water registration numbers: _____

 If the permit(s) are for irrigation or supplemental irrigation use, other water rights existing on the same land for irrigation that are subject to transfer must either change concurrently or be cancelled. Any change to a water right certificate or ground water registration must be filed separately in a water right transfer application or ground water registration modification application, respectively.

For a change in point(s) of appropriation (well(s)) or additional point(s) of appropriation:

- ☒ Well log(s) are attached for each authorized and proposed well(s) that are clearly labeled and associated with the corresponding well(s) in Table 1 above and on the accompanying application map. (Tip: You may search for well logs on the Department's web page at: http://apps.wrd.state.or.us/apps/gw/well_log/Default.aspx)

- ☐ Describe the construction of the authorized and proposed well(s) in Table 3 for any wells that do not have a well log. For *proposed wells not yet constructed or built*, provide "a best estimate" for each requested information element in the table. The Department recommends you consult a licensed well driller, geologist, or certified water right examiner to assist with assembling the information necessary to complete Table 3.

Table 3. Construction of Point(s) of Appropriation

Any well(s) in this listing must be clearly tied to corresponding well(s) described in Table 1 and shown on the accompanying application map. Failure to provide the information will delay the processing of your transfer application until it is received. The information is necessary for the department to assess whether the proposed well(s) will access the same source aquifer as the authorized point(s) of appropriation (POA). The Department is prohibited by law from approving POA changes that do not access the same source aquifer.

RECITALS

WHEREAS Permit G-17486 was issued on August 28, 2015, authorizing the use of 3.87 cfs from Well 2 in the Sage Hen Creek Basin for irrigation of 309.8 acres.

WHEREAS, on January 23, 2019, Travis L. and Kelly R. Singhose ("Applicant") applied for a permit amendment (Application T-13110), to amend the place of use and point of appropriation, and add additional points of appropriation, under Permit G-17486.

WHEREAS, on October 14, 2020, the Oregon Water Resources Department ("Department") issued a final order approving T-13110 with specified terms and conditions, canceling Permit G-17486, and issuing superseding Permit G-18470 to replace Permit G-17486.

WHEREAS, on December 2, 2020 the Department issued a Reconsideration Order rescinding the Final Order approving Application T-13110, denying the requested permit amendments, canceling the superseding permit, and reinstating Permit G-17486. The Department determined that the permit completion date for G-17486 had expired and that an approved extension of the completion date was required before Permit G-17486 could be amended.

WHEREAS, on February 11, 2021, the Applicant filed an Application for Extension of Time (G-17753 Extension Application), requesting the time to apply water to full beneficial use under the terms and conditions of Permit G-17486 be extended from August 28, 2020, to October 1, 2023.

WHEREAS, on June 15, 2021, the Department issued a Proposed Final Order approving the G-17753 Extension Application, but limiting use of water under Permit G-17486 to the amount already developed (1.63 cubic feet per second for irrigation of 130.2 acres).

WHEREAS, on July 30, 2021, the Applicant timely filed a protest of the Proposed Final Order.

WHEREAS, the Applicant and the Department (collectively, the "Parties") have agreed to a settle this matter pursuant to the stipulations identified below.

NOW THEREFORE, the Applicant and the Department stipulate and agree to the following:

STIPULATIONS

1. The Applicant and the Department agree to jointly request the Administrative Law Judge to hold the contested case in this matter in abeyance until June 3, 2025.
2. The Applicant agrees to apply to the Department for a permit amendment materially similar to T-13110, but limited to the amount approved in the Proposed Final Order on the G-17753 Extension Application (1.63 cubic feet per second for irrigation of 130.2 acres). The Department will waive all application fees associated with the permit amendment application.
3. Upon receipt of the permit amendment application, the Department will process the application on a priority basis. While the Department cannot predetermine the outcome of the application, the Department acknowledges that the full, intended execution of this Stipulated Agreement is contingent on the Department approving a permit amendment materially consistent with the approval issued on October 14, 2020, but limited to the amount approved in the Proposed Final Order on the G-17753 Extension Application (1.63 cubic feet per second for irrigation of 130.2 acres).
4. If the Department intends to issue a final order approving a permit amendment materially consistent with the approval issued on October 14, 2020, but limited to the amount approved in the Proposed Final Order on the G-17753 Extension Application (1.63 cubic feet per second for irrigation of 130.2 acres), the Department will notify the Applicant 14 days before issuance of the final order.
5. The Applicant will notify the Department within 7 days before issuance of the final order if it agrees that the final order approving the permit amendment is materially consistent with the approval issued on October 14, 2020, but limited to the amount approved in the Proposed Final Order on T-17753 (1.63 cubic feet per second for irrigation of 130.2 acres).
6. On the intended date of issuance of the final order described in Paragraph 4, the Applicant agrees to withdraw its protest in this matter, and the Department agrees to issue the final order described in Paragraph 4, and a final order on the G-17753 Extension Application that is materially consistent with the attached draft Final Order Incorporating Stipulated Agreement (Exhibit A).
7. The Department will withdraw this matter from the Office of Administrative Hearings within 7 days of the completion of each of the events described in Paragraph 6.
8. The Applicant and the Department stipulate that timely completion of each of the events described in Paragraphs 1 through 6 is a necessary condition of withdrawal of this matter from the Office of Administrative Hearings. If any such event is not completed in the manner and time required, the parties will meet and confer in an attempt to resolve the departure from the anticipated outcome. If the parties cannot resolve the issue, this Stipulated Agreement shall terminate, and the Applicant and the Department will request

the Office of Administrative Hearings to resume the contested case proceeding in this matter.

9. The Applicant and the Department each certify that they have read, understand, and agree with the entire Stipulated Agreement including the draft Final Order Incorporating Stipulated Agreement, have had a reasonable opportunity to request changes to the Stipulated Agreement, and have signed the Stipulated Agreement of their own free will and accord.
10. The Applicant and the Department understand and agree that this Stipulated Agreement and all documents incorporated by reference set forth the entire agreement entered into among the Applicant and the Department.
11. The Applicant and the Department understand and agree that this Stipulated Agreement, including timely completion of each of the events described in Paragraphs 1 through 6, and the Final Order Incorporating Stipulated Agreement issued pursuant to this Stipulated Agreement, constitute the complete and final resolution of the protest.
12. The Applicant and the Department agree that, upon the Department's timely issuance of the final orders as described in Paragraph 6, the Applicant waives any and all right to petition for judicial review of this Stipulated Agreement, and waives any and all right to request reconsideration, petition for judicial review, or appeal the Final Order Incorporating Stipulated Agreement. This provision does not prevent Applicant from participating in any proceeding initiated through a third-party challenge to the Final Order Incorporating Stipulated Agreement.
13. The Applicant and the Department represent, warrant, and agree that the person who executes this Stipulated Agreement on its behalf has the full right and authority to do so.
14. This Stipulated Agreement may be signed in counterparts.

IT IS SO AGREED.

Permit Information

Application:	G-17753
Permit:	G-17486
Basin:	12 – Malheur Lake / Watermaster District 10
Date of Priority:	January 13, 2014
Source of Water:	Well 2 in Sage Hen Creek Basin
Purpose or Use:	irrigation of 309.8 acres
Maximum Rate:	3.87 cubic feet per second (cfs)

This Extension of Time request is being processed in accordance with Oregon Revised Statute 537.630 and 539.010(5), and Oregon Administrative Rule Chapter 690, Division 315.

Appeal Rights

This final order is subject to judicial review by the Court of Appeals under ORS 183.482. Any petition for judicial review must be filed within the 60-day time period specified by ORS 183.482(1). Pursuant to ORS 536.075 and OAR 137-003-0675, you may petition for judicial review or petition the Director for reconsideration of this order. A petition for reconsideration may be granted or denied by the Director, and if no action is taken within 60 days following the date the petition was filed, the petition shall be deemed denied.

Application History

Permit G-17486 was issued by the Department on July 28, 2015. The permit specified complete application of water to beneficial use by August 28, 2020. On February 11, 2021, Travis L. and Kelly R. Singhose (Singhose) submitted an Application for Extension of Time for Permit G-17486. In accordance with OAR 690-315-0050(2), on June 15, 2021, the Department issued a Proposed Final Order proposing to extend the time to fully apply water to beneficial use to October 1, 2023. The protest period closed July 30, 2021, in accordance with OAR 690-315-0060(1). On July 30, 2021, Singhose submitted a timely protest to the proposed final order. On March 22, 2023, the Department referred the proposed order and protest to the Office of Administrative Hearings for a contested case hearing. The matter was assigned case number 2023-OWRD-00127.

FINDINGS OF FACT

1. On **[[DATE OF STIPULATED AGREEMENT]]**, the Department and Singhose entered into a Stipulated Agreement. The Stipulated Agreement is attached hereto and incorporated by reference.
2. In accordance with the Stipulated Agreement, on the date of this Final Order Incorporating Stipulated Agreement, Singhose withdrew its protest of the June 15, 2021 Proposed Final Order and the Department approved Singhose's **[[DATE OF PERMIT AMENDMENT APPLICATION]]** application to amend Permit G-17486 to, among other things, add wells HARN 52225/52882 (Robey Well 1), HARN 52853 (Well C), and HARN 52863 (Well D) as additional points of appropriation. Because the Department has approved Singhose's application to amend Permit G-17486, the "permit amendment condition" included in the June 15, 2011 Proposed Final Order is no longer necessary.
3. Except as expressly stated herein, the Department adopts and incorporates by reference the findings in the June 15, 2021 Proposed Final Order.
4. Findings of Fact 9 and 13 of the June 15, 2021 Proposed Final Order are modified to replace all references to "Robey Well 2" with "Robey Well 1." The February 11, 2021 Application for Extension of Time for Permit G-17486 shows that well HARN 52225/52882 is "Robey Well 1," and that "Robey Well 2" has not yet been drilled.
5. At the time of issuance of the June 15, 2021 Proposed Final Order, the Department found that it was reasonable to extend the deadline for applying water to full beneficial use within the terms and conditions of the Permit G-17486 to October 1, 2023, subject to certain limitations and conditions. To compensate for the time that has passed during the protest/contested case hearing process, the Department now finds that it is reasonable to extend the deadline for applying water to full beneficial use within the terms and conditions of the Permit G-17486 to October 1, 2026.

LIMITATIONS AND CONDITIONS

At time of issuance of the Proposed Final Order the Department concluded that, based on the factors demonstrated by the applicant, any comments received, and information within the file, the permit may be extended subject to the limitations and conditions in the Proposed Final Order. Because the Department has approved Singhose's **[[DATE]]** application to amend Permit G-17486, the "permit amendment condition" included in the Proposed Final Order is no longer necessary, and the "meter installation" condition should be modified to require installation of meters in all wells included in the permit amendment application

1. **Meter Installation**

The permit holder shall install the required meters within 6 months from the date of issuance of this Final Order approving this extension of time, on all wells identified for use in the Final Order approving permit amendment application [[APPLICATION NUMBER]], being [[INSERT LIST OF ALL WELLS AUTHORIZED BY PERMIT AMENDMENT]]. The permit holder shall submit evidence of installation that identifies the type of meter installed, the date the meter was installed, the well log identification, and the Well ID tag information for each well.

If the required evidence of installation is not submitted by <6 MONTHS FROM DATE OF FO>, the extension of time will be terminated.

3. **Static Water Level Measurements**

The permit holder shall make the required March static water level measurements for all wells utilized under this permit by no later than March 31, <YEAR>, and shall submit the measurements within 30 days from when the measurement is taken.

If the required March static water level measurements are not made by no later than March 31, [[YEAR]], and submitted within 30 days from when the measurement is taken, the extension of time will be terminated.

4. **Development Limitation**

The use of water under this permit shall be limited to no more than 1.63 cubic feet per second for irrigation of 130.2 acres. This represents the 130.2 acres developed at the authorized place of use under Permit G-17486 at one-eightieth of one cubic foot per second for each acre irrigated.

CONCLUSION OF LAW

The applicant has demonstrated good cause for the permit extension pursuant to ORS 537.630, 539.010(5) and OAR 690-315-0040(2).

ORDER

The extension of time for Application G-17753, Permit G-17486, therefore, is approved subject to the conditions contained herein. The deadline for applying water to full beneficial use within the terms and conditions of the permit is extended from August 28, 2020, to October 1, 2026.

Comments/Remarks

This well appeared to be constructed properly without a well log. Surface seal was cement and in good condition, actually tried to pull casing but could not. Cleaned well out and installed 12 inch liner to the surface with a shale trap at 35 feet.

725 Summer Street NE, Suite A
Salem, Oregon 97301-1266
(503) 986-0900
www.oregon.gov/OWRD

NOTE TO APPLICANTS

In order for your application to be processed by the Oregon Water Resources Department (OWRD), this Land Use Information Form must be completed by a local government planning official in the jurisdiction(s) where your water right will be diverted, conveyed, used, and developed. The planning official may choose to complete the form while you wait or return the "Receipt Acknowledging Request for Land Use Information" to you. Applications received by OWRD without the Land Use Information Form, or the signed receipt, will be returned to you. **IMPORTANT:** Please note that while OWRD can accept a signed receipt as part of intake for an application for a new permit to use or store water, a completed Land Use Information Form is required for OWRD's acceptance of all other applications. Please be aware that your application cannot be approved without land use approval.

This form is **NOT** required if:

- 1) Water is to be diverted, conveyed, and used on federal lands only; **OR**
- 2) The application is for a water right transfer, allocation of conserved water, exchange, permit amendment, or ground water registration modification, and all of the following apply:
 - a. The existing and proposed water use is located entirely within lands zoned for exclusive farm-use or within an irrigation district;
 - b. The application involves a change in place of use only;
 - c. The change does not involve the placement or modification of structures, including but not limited to water diversion, impoundment, distribution facilities, water wells and well houses; and
 - d. The application involves irrigation water uses only.

NOTE TO LOCAL GOVERNMENTS

The person presenting the attached Land Use Information Form is applying for a new water right or modifying an existing water right. The Oregon Water Resources Department (OWRD) requires applicants to obtain land use information to ensure the water right does not result in land uses that are incompatible with your comprehensive plan. Please complete the form and return it to the applicant for inclusion in their application. **NOTE:** For new water right applications only, if you are unable to complete this form while the applicant waits, you may complete the "Receipt Acknowledging Request for Land Use Information" and return it to the applicant.

You will receive notice via OWRD's weekly Public Notice once the applicant formally submits their request to OWRD. The notice will give more information about OWRD's water right process and provide additional comment opportunities. If you previously only completed the receipt for an application for a new permit to use or store water, you will have 30 days from the Public Notice date to complete the Land Use Information Form and return it to OWRD. Your attention to this request for information is greatly appreciated. If you have questions concerning this form, please contact OWRD's Customer Service Group at 503-986-0900 or WRD_DL_customerservice@water.oregon.gov.

For Local Government Use Only

The following section must be completed by a planning official from each county and city listed unless the project will be located entirely within the city limits. In that case, only the city planning agency must complete this form. This deals only with the local land use plan. Do not include approval for activities such as building or grading permits.

Please check the appropriate box below and provide the requested information

- ☒ Land uses to be served by the proposed water use(s), including proposed construction, are allowed outright or are not regulated by your comprehensive plan. Cite applicable ordinance section(s): ETRV-2 / H120 §.020
- ☐ Land uses to be served by the proposed water use(s), including proposed construction, involve discretionary land-use approvals as listed in the table below. (Please attach documentation of applicable land-use approvals which have already been obtained. Record of Action/land-use decision and accompanying findings are sufficient.) If approvals have been obtained but all appeal periods have not ended, check "Being Pursued."
