### CLAIM OF BENEFICIAL USE MAP

The Claim of Beneficial Use Map must be submitted with this claim. Claims submitted without the Claim of Beneficial Use map will be returned. The map shall be submitted on poly film at a scale of 1" = 1320 feet, 1" = 400 feet, or the original full-size scale of the county assessor map for the location.

The changes that were authorized under the transfer final order must be mapped based on the developed locations; new or additional points of appropriation and place of use.

In cases where the order involved additional points of appropriation, the additional points should be mapped based on their developed locations. The original points of appropriation should be mapped based on the original right of record at the time the transfer final order was issued.

In cases where the order involved changing the place of use for a portion of a water right, the portion of the place of use being changed should be mapped based on the developed location. If the transfer also included portions of the place of use that were not being modified, but were receiving a new or additional point of appropriation, the place of use for those lands should be mapped based on the original right of record at the time the transfer final order was issued.

Provide a general description of the survey method used to prepare the map. Examples of possible methods include, but are not limited to, a traverse survey, GPS, or the use of aerial photos. If the basis of the survey is an aerial photo, provide the source, date, series and the aerial photo identification number.

On-site direct measurement and NAIP imagery.

**Authority**

Oregon Revised Statutes (ORS) 537.705 and 540.505 to 540.580 establish the process in which a water right holder may submit a request to transfer the point of appropriation, place of use, or character of use authorized under an existing water right. Oregon Administrative Rules (OAR) Chapter 690, Division 380 implement the statutes and provides the Department's procedures and criteria for evaluating transfer applications.

**Applicant**

TRAVIS AND KELLY SINGHOSE

**Findings of Fact**

1. On January 4, 2018, TRAVIS AND KELLY SINGHOSE filed an application for additional points of appropriation and to change the place of use under Certificates 55574 and 82391. The Department assigned the application number T-12819.

SUBJECT: Water Right Transfer Application T-12819

Please find enclosed the Preliminary Determination indicating that, based on the information available, the Department intends to approve application T-12819. This document is an intermediate step in the approval process; water may not be used legally as proposed in the transfer application until a Final Order has been issued by the Department. Please read this entire letter carefully to determine your responsibility for additional action.

A public notice is being published in the Department's weekly publication and in the Burns Times Herald newspaper, simultaneously with issuance of the Preliminary Determination. The notice initiates a period in which any person may file either a protest opposing the decision proposed by the Department in the Preliminary Determination or a standing statement supporting the Department's decision. The protest period will end 30 days after the last date of newspaper publication.

If no protest is filed, the Department will issue a Final Order consistent with the Preliminary Determination. You should receive a copy of the Final Order about 30 days after the close of the protest period.

If a protest is filed, the application may be referred to a contested case proceeding. A contested case provides an opportunity for the proponents and opponents of the decision proposed in the Preliminary Determination to present information and arguments supporting their position in a quasi-judicial proceeding.

Please do not hesitate to contact me at 503-986-0886 or [Patrick.K.Starnes@oregon.gov](mailto:Patrick.K.Starnes@oregon.gov) if I may be of assistance.

Sincerely,

Kelly Starnes

Applicant Name: Travis Singhose

Proposed Changes: ☒ POU ☐ POD ☒ POA ☐ USE ☐ OTHER

Reviewer(s): Johnson JR

Date of Review: Feb. 22, 2018

1. Do you have evidence that the right has not been used in the last 5 years and that the presumption of forfeiture would not likely be rebuttable? ☐ Yes ☒ No If "yes", attach evidence (e.g. dated aerial photo showing pavement or building on the land for >5 yrs.)
2. Is there a history of regulation on the source that serves this (or these) right(s) that has involved the transferred right(s) and downstream water rights? ☐ Yes ☒ No  
Generally characterize the frequency of any regulation or explain why regulation has not occurred: \_\_\_\_\_
3. Have headgate notices been issued for the source that serves the transferred right(s)?  
☐ Yes ☒ No ☐ Records not available.
4. In your estimation, after the proposed change would distribution of water for the right(s) result in regulation of other water rights that would not have occurred if use under the original right(s) was/were maximized?  
☐ Yes ☐ No If "Yes", explain: I don't know.
5. In your estimation, if the proposed change is approved, are there upstream water rights that would be affected? ☐ Yes ☐ No If "Yes", describe how the rights would be affected and list the rights most affected: I don't know if other water rights will be affected.
6. Check here ☐ if it appears that downstream water rights benefit from return flows resulting from the current use of the transferred right(s)? If you check the box, generally characterize the locations where the return flows likely occur and list the water rights that benefit most: \_\_\_\_\_ ☒ N/A
7. For POD changes and instream transfers, check here ☐ if there are channel losses between the old and new PODs or within the proposed instream reach? If you check the box, describe and, if possible, estimate the losses: \_\_\_\_\_ ☒ N/A
8. For instream transfers that propose protection of a reach beyond the mouth of the source stream: ☒ N/A Would the quantity be measureable into the receiving stream consistent with OAR 690-077-0015(8)? ☐ Yes ☐ No
9. For POU changes: ☐ N/A Is it likely the original place of use would continue to receive water from the same source? ☐ Yes ☒ No If "Yes", explain: **Received by OWRD**

FEB 22 2018

10. For POU or USE changes: ☐ N/A In your best judgment, would use of the existing right at "full face value," result in the diversion of more water than can be used beneficially and without waste? ☐ Yes ☒ No If "Yes", explain: \_\_\_\_\_
11. Are there other issues not identified through the above questions that should be considered in determining whether the change "can be effected without injury to other rights"? ☐ Yes ☒ No If "Yes", explain: \_\_\_\_\_
12. What alternatives may be available for addressing any issues identified above: \_\_\_\_\_
13. Do conditions need to be included in the transfer order to avoid enlargement of the right or injury to other rights? ☐ No ☒ Yes, as checked below:
- ☐ A Headgate should be required prior to diverting water.
- ☒ Measurement Devices for POD or POA: (if this condition is selected, also fill in the top sections of page 3)
- a. *Before water use may begin under this order, the water user shall install a **totalizing flow meter**\*, or, with prior approval of the Director, another suitable measuring device, ☒ at each point of diversion/appropriation (new and existing) or ☐ at each new point of diversion/appropriation.*
- b. *The water user shall maintain the meters or measuring devices in good working order.*
- c. *The water user shall allow the Watermaster access to the meters or measuring devices; provided however, where the meters or measuring devices are located within a private structure, the Watermaster shall request access upon reasonable notice.*
- ☐ Reservoir water use measurement: (if this condition is selected, also fill in the top sections of page 3)
- a. *Before water use may begin under this order, the water user shall install **staff gages**\*, or, with prior approval of the Director, other suitable measuring devices, that measure the entire range and stage between empty and full in each reservoir. ## Summary of Enlargement (Same Source) Review:

☐ The proposed transfer fails to keep the original place of use from receiving water from the same source.

## Summary of Injury Review:

☐ The proposed transfer will result in another, existing water right not receiving previously available water to which it is legally entitled.

## Summary of Well Construction Assessment:

☐ The proposed POA does not have a well log.

☐ The proposed POA does not appear to meet current well construction standards. Route through Well Construction and Compliance Section.

Date of Review: 05/23/2018

Date Reviewed by GW Mgr. and Returned to WRSD: \_\_\_\_\_

The information provided in the application is insufficient to evaluate whether the proposed transfer may be approved because:

- ☐ The water well reports provided with the application do not correspond to the water rights affected by the transfer.
- ☐ The application does not include water well reports or a description of the well construction details sufficient to establish the ground water body developed or proposed to be developed.
- ☐ Other \_\_\_\_\_

1. Basic description of the changes proposed in this transfer: \_\_\_\_\_

Transfer application T-12819 is related to certificates 55574 and 82391. The transfer proposes to add all authorized wells involved to both certificates, and to rearrange the POU's for center pivot irrigation.

**Certificate 55574** authorizes groundwater pumping from one well (POD 1 = HARN 1128) for primary irrigation of 120.0 acres in the Malheur Lake Basin. This transfer seeks the following changes to certificate 55574:

1. Add three APOAs (HARN 1117; HARN 1118; HARN 1116).
2. Rearrange the POU for center pivot irrigation.

**Certificate 82391** authorizes groundwater pumping from three wells (POD 1 = HARN 1117; POD 2 = HARN 1118; POD 3 = HARN 1116) for primary irrigation of 343.0 acres in the Malheur Lake Basin. This transfer seeks the following changes to certificate 82391:

1. Add one APOA (HARN 1128).
2. Rearrange the POU for center pivot irrigation.

2. Will the proposed POA develop the same aquifer (source) as the existing authorized POA?  
☒ Yes ☐ No Comments: Available data indicates a predominantly volcanic/volcaniclastic unit occurs beneath a predominantly basin fill sediment unit. Reports for the Malheur Lake Basin indicate groundwater occurs in both the basin fill and underlying volcanic rocks. The groundwater is likely hydraulically connected, making a single groundwater system occurring in different geologic units. Leonard (1970) found that near the edges of the valley there is likely good interconnection between individual water-bearing beds in the valley fill and those in the adjacent and underlying tertiary rocks.
3. a) Is there more than one source developed under the right (e.g., basalt and alluvium)?  
☐ Yes ☒ No See comment in 2 above.
- b) If yes, estimate the portion of the right supplied by each of the sources and describe any limitations that will need to be placed on the proposed change (rate, duty, etc.): \_\_\_\_\_
4. a) Will this proposed change, at its maximum allowed rate of use, likely result in an increase in interference with **another ground water right**?  
☒ Yes ☐ No Comments: \_\_\_\_\_

Under certificate 55574 the proposed APOAs are up to 5560 feet to the northeast of the currently authorized well. This will result in an incremental increase in interference with existing groundwater rights to the northeast.

Under certificate 82391 the proposed APOA is up to 5560 feet to the southwest of the currently authorized wells. This will result in an incremental increase in interference with existing groundwater rights to the southwest.

b) If yes, would this proposed change, at its maximum allowed rate of use, likely result in another groundwater right not receiving the water to which it is legally entitled?

☐ Yes ☒ No If yes, explain: \_\_\_\_\_

Under certificate 55574 the nearest authorized POA to the proposed APOAs is POD 2 under permit G-16664 (HARN 51707), which is located 1112 feet northeast of the nearest proposed APOA (HARN 1117). The potential increase in drawdown was calculated using the Theis equation (see attachments). The values used for the calculation are conservative and appropriate until better values become available. The calculation used an intermediate storage coefficient (0.001). The transmissivity used in the calculation (8,813 ft<sup>2</sup>/day) is the average derived from specific capacity data from pump tests in nearby sections. At the pro-rated pumping rate of the full duty over the full irrigation season (2.86 cfs), the results show an increase in drawdown of ~8 feet; which should be within the capacity of nearby wells.

Under certificate 82391 the nearest authorized POA to the proposed APOA is POD 1 under certificate 65246, which is located 1440 feet south of the proposed APOA. The potential increase in drawdown was calculated using the Theis equation (see attachments). The values used for the calculation are conservative and appropriate until better values become available. The calculation used an intermediate storage coefficient (0.001). The transmissivity used in the calculation (8,813 ft<sup>2</sup>/day) is the average derived from specific capacity data from pump tests in nearby sections. At the pro-rated pumping rate of the full duty over the full irrigation season (2.86 cfs), the results show an increase in drawdown of ~5 feet; which should be within the capacity of nearby wells.

5. a) Will this proposed change, at its maximum allowed rate of use, likely result in an increase in interference with **another surface water source**?

☐ Yes ☒ No Comments: The nearest perennial reach of any surface water source is nearly 3 miles to the northeast. At this distance and increase in interference will be minimal.

b) If yes, at its maximum allowed rate of use, what is the expected change in degree of interference with any **surface water sources** resulting from the proposed change?

6. What conditions or other changes in the application are necessary to address any potential issues identified above: none.
7. Any additional comments: none.

Hi Marcy,

RE: T-12819 Travis and Kelly Singhose DPD

Looks good, consent to proceed on DPD.

Thanks!

I think T-12807 is good to go. I have everything I need and will send to Salem for final processing.

T-12812 - I am only missing the consent form for Darren Lundy.

T-12819 - I will make the changes on the QQ for well #11 on the DPD and on the application, I changed the incorrect section for Robey wells to 15. The table in #4 and #7 only lists the proposed additional points of appropriation. Well #5 is already authorized under the certificate so it will not be included in the proposed additional POA's table. That would be the same for #7. Well #1,3,4 are already authorized for that Certificate. When the certificates are issued they will include all 19 wells. I have attached a revised DPD with the changes I mentioned above.

Hi Marcy,

Here are the remaining List Packs that I have ordered. They were sent together as a single PDF so I apologize for that.

This should cover:

T-12807 Wright Farms

T-12812 Matthew Stashin

T-12810 Travis and Kelly Singhose

I believe that the last thing I'm working on for now is getting a signed consent form from Darren Lundy for T-12812. Let me know if you think I need any other consent forms for T25S R33E TL 2000... as I have included the list pack for that lot with this email.

Please let me know if you need anything else for these transfers.

Hi Marcy,

RE: T-12819 Travis and Kelly Singhose

**Item 1:** DPD- Consent to Proceed with suggested edits listed below.

Findings of Fact 4 APOA Table

- *Well 11* Quarter Quarter should be "**SESW**" NOT "SWSE"
- The table does show the authorized POA's (Wells 1, 3 & 4), which is not consistent with the APOA table in Findings of Fact 7 Table for the other Certificate

Findings of Fact 7 APOA Table

- *Robey Well 1* and *Robey Well 2* should have measured distances to **Section 15** NOT Section 9
- *Well 11* Quarter Quarter should be "**SESW**" NOT "SWSE"
- The table doesn't show the authorized POA's (Wells 1, 3 & 4), which is not consistent with the APOA table in Findings of Fact 4 Table for the other Certificate

**Item 2:** List Packs ordered from Amerititle, I will send them ASAP

**Item 3:** Confirming Burns Times Herald for publication source

**Item 4:** Please extend the completion date 5 years

Thanks!

Good morning;

I have completed the first phase of processing of your transfer. There are a few items I need in order to proceed, which are listed below and are outlined in the cover letter of the attached packet:

- 1) Please review the Draft Final order and get back to me on any changes that need to be made and/or if it meets your intent and you want to proceed with the processing of the transfer. Written consent is needed to move forward with the next phase of processing, email is ok.
- 2) Please contact a title company to provide you with an ownership report. Most title companies in this region call them "listing packets". They are usually free and can be generated quickly. They can e-mail the report directly to me.
- 3) Please confirm the Burns Times Herald as the newspaper you wish to use for the publication notice.
- 4) I also want to mention that you can extend the completion date free of charge now. This is the time to do it, otherwise there is another process to go through if things don't work out as planned. We can move it out up to 5 years if you would like. If you finish sooner, that's great. Let me know. You can respond via e-mail if you prefer.
- 5) Lastly, the Watermaster, JR Johnson, has required measuring devices on the new and existing points of appropriation. I have included her contact information so that you may discuss with her the type of measuring devices that needs to be installed.

I sent a hard copy of the attached information in the mail to the applicants.

Feel free to contact me if I can be of further assistance.

Thanks...

**For Place of Use or Character of Use Changes**

Are there other water right certificates, water use permits or ground water registrations associated with the "from" or the "to" lands? ☐ Yes ☒ No

If YES, list the certificate, water use permit, or ground water registration numbers: N/A.

Pursuant to ORS 540.510, any "layered" water use such as an irrigation right that is supplemental to a primary right proposed for transfer must be included in the transfer or be cancelled. Any change to a ground water registration must be filed separately in a ground water registration modification application.

**For Substitution** (ground water supplemental irrigation will be substituted for surface water primary irrigation)

Ground water supplemental Permit or Certificate # N/A;  
Surface water primary Certificate # N/A.

**For a change in point(s) of appropriation (well(s)) or additional point(s) of appropriation:**

- ☒ Well log(s) are attached for each authorized and proposed well(s) that are clearly labeled and associated with the corresponding well(s) in Table 1 above and on the accompanying application map.

**Tip:** You may search for well logs on the Department's web page at:  
[http://apps.wrd.state.or.us/apps/gw/well\\_log/Default.aspx](http://apps.wrd.state.or.us/apps/gw/well_log/Default.aspx)

**AND/OR**

- ☐ Describe the construction of the authorized and proposed well(s) in Table 3 for any wells that do not have a well log. For *proposed wells not yet constructed or built*, provide "a best estimate" for each requested information element in the table. The Department recommends you consult a licensed well driller, geologist, or certified water right examiner to assist with assembling the information necessary to complete Table 3.

**Table 3. Construction of Point(s) of Appropriation**

Any well(s) in this listing must be clearly tied to corresponding well(s) described in Table 1 and shown on the accompanying application map. Failure to provide the information will delay the processing of your transfer application until it is received. The information is necessary for the department to assess whether the proposed well(s) will access the same source aquifer as the authorized point(s) of appropriation (POA). The Department is prohibited by law from approving POA changes that do not access the same source aquifer.

**For Place of Use or Character of Use Changes**

Are there other water right certificates, water use permits or ground water registrations associated with the "from" or the "to" lands? ☐ Yes ☒ No

If YES, list the certificate, water use permit, or ground water registration numbers: N/A.

 Pursuant to ORS 540.510, any "layered" water use such as an irrigation right that is supplemental to a primary right proposed for transfer must be included in the transfer or be cancelled. Any change to a ground water registration must be filed separately in a ground water registration modification application.

**For Substitution** (ground water supplemental irrigation will be substituted for surface water primary irrigation)

Ground water supplemental Permit or Certificate # N/A;

Surface water primary Certificate # N/A.

**For a change from Supplemental Irrigation Use to Primary Irrigation Use**

Identify the primary certificate to be cancelled. Certificate # N/A

**For a change in point(s) of appropriation (well(s)) or additional point(s) of appropriation:**

- ☒ Well log(s) are attached for each authorized and proposed well(s) that are clearly labeled and associated with the corresponding well(s) in Table 1 above and on the accompanying application map.

**Tip:** You may search for well logs on the Department's web page at:

[http://apps.wrd.state.or.us/apps/gw/well\\_log/Default.aspx](http://apps.wrd.state.or.us/apps/gw/well_log/Default.aspx)

**AND/OR**

- ☐ Describe the construction of the authorized and proposed well(s) in Table 3 for any wells that do not have a well log. For *proposed wells not yet constructed or built*, provide "a best estimate" for each requested information element in the table. The Department recommends you consult a licensed well driller, geologist, or certified water right examiner to assist with assembling the information necessary to complete Table 3.

**Table 3. Construction of Point(s) of Appropriation**

Any well(s) in this listing must be clearly tied to corresponding well(s) described in Table 1 and shown on the accompanying application map. Failure to provide the information will delay the processing of your transfer application until it is received. The information is necessary for the department to assess whether the proposed well(s) will access the same source aquifer as the authorized point(s) of appropriation (POA). The Department is prohibited by law from approving POA changes that do not access the same source aquifer.

1. For irrigation calculate cfs for each water right involved as follows:
  - a. Divide total authorized cfs by total acres in the water right (*for C12345, 1.25 cfs ÷ 100 ac*); then multiply by the number of acres to be transferred to get the transfer cfs (*x 45 ac = 0.56 cfs*).
  - b. If the water right certificate does not list total cfs, but identifies the allowable use as 1/40 or 1/80 of a cfs per acre; multiply number of acres proposed for change by either 0.025 (1/40) or 0.0125 (1/80). (*For C87654, 45.0 ac x 0.0125 cfs/ac = 0.56 cfs*)
2. Add cfs for the portions of water rights on all the land included in the transfer; however **do not count cfs for supplemental rights on acreage for which you have already calculated the cfs fee for the primary right on the same land**. The fee should be assessed only once for each “on the ground” acre included in the transfer. (*In this example, blank 5a would be only 0.56 cfs, since both rights serve the same 45.0 acres. Blank 5b would be 0 and Line 5 would then also become 0*).

If YES, list the certificate, water use permit, or ground water registration numbers: N/A.

Pursuant to ORS 540.510, any "layered" water use such as an irrigation right that is supplemental to a primary right proposed for transfer must be included in the transfer or be cancelled. Any change to a ground water registration must be filed separately in a ground water registration modification application.

(503) 986-0900  
www.wrd.state.or.us

## NOTE TO APPLICANTS

In order for your application to be processed by the Water Resources Department (WRD), this Land Use Information Form must be completed by a local government planning official in the jurisdiction(s) where your water right will be used and developed. The planning official may choose to complete the form while you wait, or return the receipt stub to you. Applications received by WRD without the Land Use Form or the receipt stub will be returned to you. Please be aware that your application will not be approved without land use approval.

**This form is NOT required if:**

- 1) Water is to be diverted, conveyed, and/or used only on federal lands; **OR**
- 2) The application is for a water right transfer, allocation of conserved water, exchange, permit amendment, or ground water registration modification, and all of the following apply:
  - a) The existing and proposed water use is located entirely within lands zoned for exclusive farm-use or within an irrigation district;
  - b) The application involves a change in place of use only;
  - c) The change does not involve the placement or modification of structures, including but not limited to water diversion, impoundment, distribution facilities, water wells and well houses; and
  - d) The application involves irrigation water uses only.

## NOTE TO LOCAL GOVERNMENTS

The person presenting the attached Land Use Information Form is applying for or modifying a water right. The Water Resources Department (WRD) requires its applicants to obtain land-use information to be sure the water rights do not result in land uses that are incompatible with your comprehensive plan. Please complete the form or detach the receipt stub and return it to the applicant for inclusion in their water right application. You will receive notice once the applicant formally submits his or her request to the WRD. The notice will give more information about WRD's water rights process and provide additional comment opportunities. You will have 30 days from the date of the notice to complete the land-use form and return it to the WRD. If no land-use information is received from you within that 30-day period, the WRD may presume the land use associated with the proposed water right is compatible with your comprehensive plan. Your attention to this request for information is greatly appreciated by the Water Resources Department. If you have any questions concerning this form, please contact the WRD's Customer Service Group at 503-986-0801.

Good morning, John ☺

It has just been discovered, that, buried within the Transfer application T-12819, was an RA estimate application.

Does Travis still want to go with the RA?

If so, the Department would need to get a check for \$125. (I haven't found verification of receipt of such funds.)

Please advise.

Have an awesome day!
