### Part 2 of 4 – Instream Lease Application Map Checklist

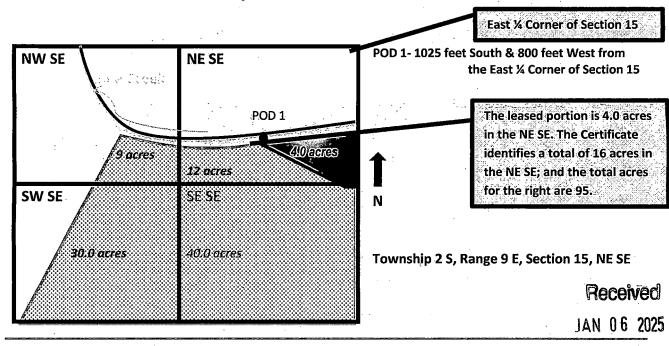

A Map is generally required for each water right not leased in its entirety.

The application map (if required) should include all the items listed below and match the existing water right(s) of record. Check all boxes that apply.

This should be a <u>simple</u> map. (See example below). A copy of a final proof survey map with the portion to be leased shaded or hachured in will also suffice.

 $\bowtie$  N/A A map is required for each water right not leased in its entirety. More than one QQ and property may be included on each map. A map is not required, if leasing the entire right or if the right to be leased is for municipal or quasi-municipal water use. The map should be of sufficient quality to be reproducible. Please do not use highlighters to mark items on the map as highlighters do not always copy. A North arrow and map scale (no smaller than 1'' = 1320'). Township, Range, Section, quarter quarter (QQ), and a clearly labeled survey corner. For irrigation or other similar use, the number of acres to be leased in each quarter-quarter clearly labeled and hatchured to differentiate between the acres being leased and any remaining. If the place of use is broken down by more than one priority date, or source stream, and/or point of diversion you must identify each with separate hachuring and clearly label. If available, identify the existing point(s) of diversion.

### **EXAMPLE MAP** (the darker shaded portion representing the portion leased instream)

### Part 3 of 4 – Water Right and Instream Use Information

## Use a separate Part 3 for each water right to be leased instream

### **Water Right Information**

Water right # 26107

#### Table 1

Water Right Information: Provide a description of the originating water right to be leased. Also include
your tax lot number(s). Fill in all applicable information. For example, if your water right has multiple
points of diversion (POD) but they're not numbered, you do not need to include a number. If not
enough room below, you may add additional rows (see instructions) or attach spreadsheet (matching
Table 1). Please clearly label any attachments.
If only leasing a portion of the right - Entirety - If the entire water right is to be leased, skip to

## Part 4 of 4 – Lease Provisions and Party Signatures

	· ,					
Term of the Lease (may be from 1 year up to 5 years):						
The lease is requested to begin in: month April year 202	25 and end: month <u>September</u> year 2029					
Note: The begin month is generally the first month of the irrigation season and the end month is the last						
	month in the irrigation season. If not an irrigation right, this would be the first and last month of your					
authorized period of allowed use.						
Public use: Check the public use(s) this lease will serve (as	Termination provision (for multiyear leases):					
defined by ORS 537.332):	The parties to the lease request (choose one):					
Conservation, maintenance and enhancement of	igwedge a. The option of terminating the lease prior to					
aquatic, fish and wildlife, fish and wildlife habitat and any	expiration of the full term with written notice to					
other ecological values.	the Department by the Lessor(s) and/or Lessee.					
Recreation	b. The option of terminating the lease prior to					
Pollution abatement	expiration of the full term, with consent by all					
Navigation	parties to the lease.  c. The parties would not like to include a Termination					
	Provision.					
,	(See instructions for limitations to this provision)					
Additive/Replacing Relationship to other instream water right	·=···= · · · · · · · · · · · · · · · ·					
existing instream water rights created as a result of instream I						
Since instream leases are also generally senior to other instrea						
conversion of minimum flows, they generally replace a portion						
If you would like this lease to relate to other instream water rights differently, please check this box.						
And attach an explanation of your intent.						
Validity of the Right(s) to be leased (check the appropriate b						
$\square$ The water right(s) to be leased have been used under the	terms and conditions of the right(s) during the last five					
years or have been leased instream; or						
The water right(s) have not been used for the last five years according to the terms and conditions of the right(s).						
However, the water right(s) is not subject to forfeiture under ORS 540.610(2). Documentation describing why the						
water right(s) is not subject to forfeiture is provided.						
recedent: If a right which has been leased is later pro	onosed to be leased again or later transferred or					
	d water project, a new injury review shall be					
· ·						
required. An instream lease shall not set	a precedent on a future transaction.					
he undersigned declare:						
1. The Lessor(s) agree during the term of this lease,	to suspend use of water allowed under the subject					
water right(s) and under any appurtenant primary or supplemental water right(s) not involved in the						
lease application; and						
2. The Lessor(s) certify that I/we are the water right holder(s) of the right(s) described in this instream						
lease application. If not the deeded landowner, I/we have provided documentation with the lease						
application that I/we have authorization to pursue the lease application and/or have obtained consent						
from the deeded landowner; and						
3. All parties affirm that information provided in this lease application is true and accurate.
