- ☒ The size of the map can be 8½ x 11 inches, 8½ x 14 inches, 11 x 17 inches, or up to 30 x 30 inches. For 30 x 30 inch maps, one extra copy is required.
- ☒ A north arrow, a legend, and scale.
- ☒ The scale of the map must be: 1 inch = 400 feet, 1 inch = 1,320 feet, the scale of the Final Proof/Claim of Beneficial Use Map (the map used when the permit was certificated), the scale of the county assessor map if the scale is not smaller than 1 inch = 1,320 feet, or a scale that has been pre-approved by the Department.

*Example for Line 5a calculation to transfer 45.0 acres of Primary Certificate 12345 (total 1.25 cfs for 100 acres) and 45.0 acres of Supplemental Certificate 87654 (1/80 cfs per acre) on the same land:

1. For irrigation calculate cfs for each water right involved as follows:
 - a. Divide total authorized cfs by total acres in the water right (*for C12345, $1.25 \text{ cfs} \div 100 \text{ ac}$*); then multiply by the number of acres to be transferred to get the transfer cfs (*$\times 45 \text{ ac} = 0.56 \text{ cfs}$*).
 - b. If the water right certificate does not list total cfs, but identifies the allowable use as 1/40 or 1/80 of a cfs per acre; multiply number of acres proposed for change by either 0.025 (1/40) or 0.0125 (1/80). (*For C87654, $45.0 \text{ ac} \times 0.0125 \text{ cfs/ac} = 0.56 \text{ cfs}$*)
2. Add cfs for the portions of water rights on all the land included in the transfer; however **do not count cfs for supplemental rights on acreage for which you have already calculated the cfs fee for the primary right on the same land**. The fee should be assessed only once for each "on the ground" acre included in the transfer. (*In this example, blank 5a would be only 0.56 cfs, since both rights serve the same 45.0 acres. Blank 5b would be 0 and Line 5 would then also become 0*).

Are there other water right certificates, water use permits or ground water registrations associated with the "from" or the "to" lands? ☐ Yes ☒ No

If YES, list the certificate, water use permit, or ground water registration numbers: _____.

Pursuant to ORS 540.510, any "layered" water use such as an irrigation right that is supplemental to a primary right proposed for transfer must be included in the transfer or be cancelled. Any change to a ground water registration must be filed separately in a ground water registration modification application.

- ☒ Well log(s) are attached for each authorized and proposed well(s) that are clearly labeled and associated with the corresponding well(s) in Table 1 above and on the accompanying application map.

- ☒ Describe the construction of the authorized and proposed well(s) in Table 3 for any wells that do not have a well log. For *proposed wells not yet constructed or built*, provide "a best estimate" for each requested information element in the table. The Department recommends you consult a licensed well driller, geologist, or certified water right examiner to assist with assembling the information necessary to complete Table 3.

Table 3. Construction of Point(s) of Appropriation

Any well(s) in this listing must be clearly tied to corresponding well(s) described in Table 1 and shown on the accompanying application map. Failure to provide the information will delay the processing of your transfer application until it is received. The information is necessary for the department to assess whether the proposed well(s) will access the same source aquifer as the authorized point(s) of appropriation (POA). Permanent Transfer Application Intake Checklist

Last Revised: August 19, 2022

By: Lisa Jaramillo

Decision Tree: Can Multiple Water Rights be included in a Single Transfer Application?

OAR 690-380-3220 – General Criteria / OAR 690-380-2250 – Suppl Water Right or Permit / OAR 690-380-8020 – Temp Transfer Suppl WR

FOR DIV. 380 TRANSFERS: The following series of questions outlined in the flow chart below can be used to determine if separate transfer applications are required for each water right proposed for transfer. To qualify for including multiple water rights in a single application, a proposed transfer application must meet at least one of the exceptions outlined in OAR 690-380-3220(1)-(4).

- **NOTE:** Only water rights that meet the criteria of a "water use subject to transfer" under ORS 540.505 may be transferred in a Div. 380 Transfer, except as otherwise noted in OAR 540.510, OAR 690-380-2240, & OAR 690-380-2250. Permit Amendments & GR Modifications are administered under ORS 537.211(4) & OAR 690-382, respectively.
- "More than one landowner" does **NOT** mean two individuals who are married & are both a deeded owner of the parcel(s), nor a single Trust citing more than one name.
- **Other considerations:** The claim of beneficial use for all the water rights involved in a transfer will be evaluated at one time. The Department does not allow sequential or partial perfection of the rights changed through a water right transfer. As a result, the ability of a water right holder to obtain a certificate and/or apply for a subsequent transfer, including a temporary transfer, will be limited if the first transfer includes rights held by other parties who have not completed the authorized changes.
