19. The district temporary transfer application satisfies the criteria of ORS 540.570 and OAR 690-385-3000, contains the information required under OAR 690-385-3200, and includes a map meeting the requirements of OAR 690-385-3300.
20. Water has been used within the last five years according to the terms and conditions of the rights. There is no evidence available that would demonstrate that the rights are subject to forfeiture under ORS 540.610.
21. The water rights are subject to transfer as defined in OAR 690-385-0100(17).
22. Diversion structures, district canals, pumps, pump stations, ditches, pipeline, and sprinkler systems sufficient to use the full amount of water allowed under the existing rights are present.
23. The Oregon Department of Fish and Wildlife has determined that a fish screen is necessary at the new point of diversion to prevent fish from entering the diversion and that the diversion is currently equipped with an appropriate fish screen.
24. The proposed change in places of use, as conditioned, will not result in enlargement of the rights as defined in OAR 690-385-0100(6).
25. The proposed change in places of use would not result in injury to other water rights as defined in OAR 690-385-0100(4).
26. All other applicable requirements for district temporary water right transfers are met.

Conclusions of Law

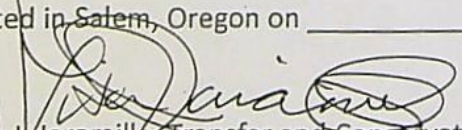

The temporary change in places of use proposed in Temporary Transfer Application T-13847 is consistent with the requirements of ORS 540.570 and OAR 690-385-3500.

Now, therefore, it is ORDERED:

1. The water user shall operate and maintain an approved fish screen at the new point of diversion. If the Oregon Department of Fish and Wildlife (ODFW) determines the screen is not functioning properly, and is unsuccessful in working with the water user to meet ODFW standards, ODFW may request that OWRD regulate the use of water until OWRD receives notification from ODFW that the fish screen is functioning properly.
2. The temporary changes in places of use proposed in Transfer Application T-13847, as conditioned above, are approved.

3. The former places of use shall not be irrigated as part of these water rights during the 2021 irrigation season.
4. The use shall revert to the authorized places of use after the 2021 irrigation season.
5. Any application for permanent transfer of Certificates 30021, 82489, 94969, and 94967, shall be subject to a full and complete review to determine consistency with the requirements of OAR Chapter 690, Divisions 380 or 385. Approval of this temporary transfer does not establish a precedent for approval of a subsequent application filed for a permanent transfer.
6. The time during which water is used under this approved temporary transfer does not apply toward a finding of forfeiture of Certificates 30021, 82489, 94969, and 94967, under ORS 540.610.
7. The use of water on lands from which the right is transferred and in the new temporary location during the same irrigation season or calendar year is prohibited and may subject the district and the landowner to civil penalties.
8. Water use measurement conditions:
 - a. Before water use may begin under this order, the water user shall install a totalizing flow meter, or, with prior approval of the Director, another suitable measuring device, at each point of diversion.
 - b. The water user shall maintain the meters or measuring devices in good working order.
 - c. The water user shall allow the Watermaster access to the meters or measuring devices; provided however, where the meters or measuring devices are located within a private structure, the Watermaster shall request access upon reasonable notice.
9. The use of water under this temporary transfer may be conditioned or revoked at any time to the extent necessary to avoid injury if the Department finds the transfer causes injury to any existing water right.
10. The use of water at the temporary places of use authorized by this transfer shall be in accordance with the terms and conditions of Certificates 30021, 82489, 94969, and 94967, and Permits G-15586 and S-54980.
11. The use of the remaining water rights described by Certificates 30021, 82489, 94969, and 94967, and Permits G-15586 and S-54980, not involved in this transfer shall continue to be in accordance with the terms and conditions of Certificates 30021, 82489, 94969, and 94967, and Permits G-15586 and S-54980.

Proposed Changes: ☒ POU ☐ POD ☐ POA ☐ USE ☐ OTHER

Reviewer(s): Ken Thiemann

Date of Review: 01/24/2022

1. Do you have evidence that the right has not been used in the last 5 years and that the presumption of forfeiture would not likely be rebuttable? ☒ Yes ☐ No If "Yes", attach evidence (e.g. dated aerial photo showing pavement or building on the land for >5 yrs.)
2. Is there a history of regulation on the source that serves this (or these) right(s) that has involved the transferred right(s) and downstream water rights? ☒ Yes ☐ No Generally characterize the frequency of any regulation or explain why regulation has not occurred:
Willow Creek is regulated every year by the downstream senior.
3. Have headgate notices been issued for the source that serves the transferred right(s)?
☐ Yes ☒ No ☐ Records not available.
4. In your estimation, after the proposed change, would distribution of water for the right(s) result in regulation of other water rights that would not have occurred if use under the original right(s) was/were maximized? ☐ Yes ☒ No If "Yes", explain:
5. In your estimation, if the proposed change is approved, are there upstream water rights that would be affected? ☐ Yes ☒ No If "Yes", describe how the rights would be affected and list the rights most affected:

6. Check here ☐ if it appears that downstream water rights benefit from return flows resulting from the current use of the transferred right(s)? If you check the box, generally characterize the locations where the return flows likely occur and list the water rights that benefit most:

☒ N/A

7. For POD changes and instream transfers, check here if there are channel losses between the old and new PODs or within the proposed instream reach? If you check the box, describe and, if possible, estimate the losses:

☒ N/A

8. For instream transfers that propose protection of a reach beyond the mouth of the source stream:

☒ N/A Would the quantity be measureable into the receiving stream consistent with OAR 690-077-0015(8)? ☐ Yes ☐ No

9. For POU changes: ☐ N/A Is it likely the original place of use would continue to receive water from the same source? ☐ Yes ☒ No If "Yes", explain:

I have contacted the operator and explained the pivot that needs to be reduced in size to prevent any enlargement.

10. For POU or USE changes: ☐ N/A In your best judgment, would use of the existing right at "full face value," result in the diversion of more water than can be used beneficially and without waste?

☐ Yes ☒ No If "Yes", explain:

11. For POU changes that involve micro-irrigation: ☒ N/A

- a. Has the applicant made changes (absent a transfer) to convert to micro-irrigation within the current place of use boundary of the water right proposed for transfer, and previously demonstrated to the Department through monitoring and site inspections by the Watermaster that the proposed transfer will not result in injury or enlargement?

☐ Yes ☐ No If "Yes", explain:

- b. Has a temporary transfer of this nature been previously filed and approved on the same lands (or portions thereof) as those lands involved in this transfer?

☒ Yes ☐ No If "Yes", answer the following:

- i. Were there any problems with more acres being irrigated (or wetted) than were authorized under the temporary transfer? ☒ Yes ☐ No If "Yes", explain:

A circle that has ~ 109 Acres used ~130 Acres last season.

- ii. Did the designated areas that were to remain dry (or not wetted) under the temporary transfer actually remain dry? ☐ Yes ☒ No If "No", explain:

Same as note above.

- iii. Did the applicant comply with and meet all of the conditions of the temporary transfer? ☐ Yes ☒ No If "No", explain:

They irrigated ~ 21 Acres in the circle that I discussed above.

- iv. Do you have any other observations regarding the temporary transfer?

☐ Yes ☒ No If "Yes", describe:

Same notes as above.

- c. To the best of your knowledge, if this transfer is approved, does it appear that:

- i. "Injury" will occur to other water rights that share the same source?

☐ Yes ☒ No If "Yes", explain:

- ii. "Enlargement" of the water right being transferred will occur?

☐ Yes ☒ No If "Yes", explain:

12. Are there other issues not identified through the above questions that should be considered in determining whether the change "can be effected without injury to other rights"?

☒ Yes ☐ No If "Yes", explain:

I have notified the operator that the circle is larger than the approved acreage, and I will monitor closely this season.

13. What alternatives may be available for addressing any issues identified above:

Reducing the pivot size to irrigate the authorized acres only.

14. Do conditions need to be included in the transfer order to avoid enlargement of the right or injury to other rights? ☐ No ☒ Yes, as checked and provided below:

☐ For POU changes that involve micro-irrigation, provide the monitoring and reporting conditions necessary to prevent injury/enlargement:

☐ A Headgate should be required prior to diverting water.

b. The water user shall maintain the meters or measuring devices in good working order.

c. The water user shall allow the Watermaster access to the meters or measuring devices; provided however, where the meters or measuring devices are located within a private structure, the Watermaster shall request access upon reasonable notice.

☐ Reservoir water use measurement: (if this condition is selected, also fill in the top sections of Page 4)

a. Staff gages shall be United States Geological Survey style.*

b. Before water use may begin under this order, if the reservoir is located in channel, weirs or other suitable measuring devices must be installed upstream and downstream of the reservoir, and, an adjustable outlet valve must be installed. Water Right and Diversion Transfer Comment Form

(ODFW provides to WRD so that WRD can make findings according to statutory requirements.)

Reference Transfer #: T-13847 Willow Creek DIC

Date of review: 10/29/2021

A. Please check box if you believe there is a potential for injury to an instream water right.

☐ The Oregon Department of Fish and Wildlife (ODFW) believes this proposed transfer may injure an instream water right(s) on stream, tributary to _____, because _____.

(Please attach any available supporting information.)

Note: This will prompt WRD to make a determination whether the transfer will injure an instream water right. (OWRD makes the determination of injury to a water right, while ODFW's role is to raise concerns, and to evaluate proposed mitigation and net benefit to the resource if OWRD consents to injury of an instream water right.)

B. Please check one of the following five boxes related to fish screen requirements pursuant to ORS 540.525 or 540.532:

☒ **1. Screen Maintain**

[Select this option if the new Point of Diversion (POD) requires a fish screen and is currently equipped with an appropriate fish screen that will still be in compliance if the transferred water is diverted from this POD.]

Note: This option will yield the following:

Finding of Fact: The Oregon Department of Fish and Wildlife has determined that a fish screen is necessary at the new point of diversion to prevent fish from entering the diversion and that the diversion is currently equipped with an appropriate fish screen.

Condition: The water user shall operate and maintain an approved fish screen at the new point of diversion. If Oregon Department of Fish and Wildlife (ODFW) determines the screen is not functioning properly, and is unsuccessful in working with the water user to meet ODFW standards, ODFW may request that OWRD regulate the use of water until OWRD receives notification from ODFW that the fish screen is functioning properly.

☐ **2. Screen Now**

[Option 2 should generally be selected if listed fish species are present at the point of diversion and/or the originating water right diversion is not currently screened. If Option 2 is selected, provide contact information on the "Fish Screening and Passage Information" sheet. The new diversion may be eligible for cost-share.]

Note: This option will yield the following:

Finding of Fact: The Oregon Department of Fish and Wildlife (ODFW) has determined that a fish screen is necessary at the new point of diversion to prevent fish from entering the diversion and that the diversion is not currently equipped with an appropriate fish screen. This diversion may be eligible for screening cost-share funds.

Condition: Prior to diverting water, the water user shall install an approved fish screen at the new point of diversion and shall provide to the OWRD a written statement from Oregon Department of Fish and Wildlife (ODFW) that the installed screen meets the state's criteria, or that ODFW has determined a screen is not necessary.

The water user shall operate and maintain the fish screen at the new point of diversion consistent with ODFW's operational and maintenance standards. If ODFW determines the screen is not functioning properly, and is unsuccessful in working with the water user to meet ODFW standards, ODFW may request that OWRD regulate the use of water until OWRD receives notification from ODFW that the fish screen is functioning properly.

*Please return all 3 pages to: Transfers Section, Water Resources Department,
725 Summer St. NE, Suite A, Salem, OR 97301-1266*

☐ **3. Screen 2 Year**

[Option 3 may be checked if the change is from an unscreened diversion to a HISTORIC POD or an existing POD in use for another water right, and cost-share funds are not currently available. It should NOT be checked if listed fish species are present at the point of diversion, the originating water right diversion is screened, cost-share funds are currently available, or the diversion is not eligible for ODFW's cost-share program. Please provide contact information on the "Fish Screening and Passage Information" sheet.] If extraordinary circumstances are present, please explain: _____

Note: This option will yield the following:

Finding of Fact: The Oregon Department of Fish and Wildlife (ODFW) has determined that a fish screen is necessary at the new point of diversion to prevent fish from entering the diversion and that the diversion is not currently equipped with an appropriate fish screen. Listed fish species are not present at the point of diversion, the originating water right diversion is not screened, cost-share funds are not currently available, and the proposed diversion may be eligible for ODFW's cost-share program. A grace period of two years is appropriate until such time as cost-share funds become available to assist in the construction of a fish screen. If cost-share funds do not become available, the water user must screen within the indicated time period regardless of the availability of cost-share funding.

Condition: By October 1, 20__ [Within two years after the date of this order] the water user shall install an approved fish screen at the new point of diversion. The water user may withdraw water at the new point of diversion without a screen until October 1, 20__. The water user shall provide to OWRD a written statement from Oregon Department of Fish and Wildlife (ODFW) that the installed screen meets the state's criteria, or that ODFW has determined a screen is not necessary.

The water user shall maintain and operate the fish screen at the new point of diversion consistent with ODFW's operational and maintenance standards. If ODFW determines the screen is not functioning properly, and is unsuccessful in working with the water user to meet ODFW standards, ODFW may request that OWRD regulate the use of water until OWRD receives notification from ODFW that the fish screen is functioning properly.

☐ **4. Screen Future**

[Use this option if fish are not currently present, but might possibly be at some future time.]

Note: This option will yield the following:

Finding of Fact: The Oregon Department of Fish and Wildlife has determined that the diversion is not currently equipped with an appropriate fish screen, but a fish screen may be required in the future at the new point of diversion to prevent fish from entering the diversion.

Condition: The Oregon Department of Fish and Wildlife (ODFW) may require the water user to install an approved fish screen at the new point of diversion within one year after receiving written notification that a fish screen is required. Once installed the water user shall maintain and operate the fish screen at the new point of diversion according to ODFW's operational and maintenance standards. If ODFW determines the screen is not functioning properly, and is unsuccessful in working with the water user to meet ODFW standards, ODFW may request that OWRD regulate the use of water until OWRD receives notification from ODFW that the fish screen is functioning properly.

☐ **5. No Screen Needed**

[Check this box if fish are not currently present, and are not expected in the future.]

Checklist for District Transfer Intake – Division 385

Permanent or Non-Use district transfers are for POU ONLY.

Temporary district transfers can include changes in POD/POA (to facilitate a change in POU) and are limited to a single year.

Please assure a "Supplemental Form A" is included for each water right involved, and that all required attachments are completed and included.

Note: Generally speaking, we prefer not to return district applications for deficiencies; if it is questionable, please check with the District Transfer Program advisor before returning the application.

- ☐ Identify the type of district transfer application. (Note: a "District Notice" is **not** an application, but at the after the end of the irrigation season, District Permanent Applications may include copies of prior District Notices.)

Sometimes districts inadvertently use parts of two different types of transfer forms when filing. If not sure if a district is submitting a Transfer Notice or a District Transfer, or if not sure if a district is submitting a District Temporary or District Permanent Transfer, or not sure if a district is submitting a regular transfer or a District Transfer, **please contact Ann or Joan.**

- ☒ Is the use proposed for transfer irrigation or supp'l irrigation? **If not please contact Ann or Joan.**

These items need to be included in the district transfer application:

- ☒ Transfer Application communicating rights affected and includes signature.
- ☒ POU listing – both "authorized/from" and "proposed/to". Multiple formats accepted. ✓
- ☒ POD/POA listing – if temporary – both "authorized/from" and proposed/to"
- ☒ Land Use Information Form – Not required if (a) for place of use change only (b) existing and proposed water use is located entirely w/in EFU or w/in an irrigation district (c) The change does not involve the placement or modification of structures, including but no limited to water diversions, impoundments, distribution facilities, water wells and well houses and (d) application involves irrigation water uses ONLY.
- ☒ Maps -- both "authorized/from" and "proposed/to" (From and to can be on same map.)
NOTE- districts are authorized to submit the maps in multiple digital formats and often submit maps via email. If maps are not submitted, please contact Ann or Joan.
