

INSTRUCTIONS:

This checklist is intended to facilitate the Department of Water Resources' ("Department") processing of water rights transfer applications within the Deschutes Basin for the 2025 calendar year. The Confederated Tribes of the Warm Springs Reservation of Oregon ("Tribe") has reviewed this checklist. The Tribe does not object to the Department's processing of any water rights transfer applications that meets a "Yes" of all applicable checklist items, and therefore satisfies the "Meets Requirements" category at the top of this checklist. When the checklist is so satisfied, the Department may process the application in accordance with applicable law, and the Department's customary practice.

Water rights transfer applications that meet all of the checklist criteria appear to present a low risk of injury to the Tribal Reserved Water Right as defined in the Confederated Tribes of the Warm Springs Reservation Water Rights Settlement Agreement, dated November 17, 1997, as amended. The Tribe does not waive its right to dispute or challenge any transfer application, whether or not they satisfy this checklist, on the basis that the transfer injures the Tribal Reserved Water Right or other federally-reserved water right held by the Tribe. The Tribe expressly reserves, and does not waive, all rights, claims, and defenses that it may possess in connection with the application, including, but not limited to, whether the application violates the Treaty of June 25, 1855, with the Tribes of Middle Oregon, 12 Stat. 963, or the Confederated Tribes of the Warm Springs Reservation Water Rights Settlement Agreement, dated November 17, 1997, as amended.

The Tribe further reserves the right to conduct additional analysis on any transfer that is submitted to the Department with a completed checklist. The Tribe reserves the right to consider, among other things, the risk of localized impacts, cumulative impacts, water quality, return flows, groundwater recharge, Habitat Conservation Plan flow augmentation agreements, water bank transactions, and additional analyses received from the Tribe's staff, Department, applicant, or third party.

A "temporary instream lease" is any instream lease lasting five (5) years or less.

This checklist applies to surface water transfers only. This checklist does not apply to groundwater transfers.

Part 2 of 4 – District and other party Signature

Term of the Lease: The lease is requested to begin in: month <u>April</u> year <u>2025</u> and end: month <u>October</u> year <u>2025</u> .	
Public use: Check the public use(s) this lease will serve (as defined by ORS 537.332): ☒ Conservation, maintenance and enhancement of aquatic, fish and wildlife, fish and wildlife habitat and any other ecological values. ☒ Recreation ☒ Pollution abatement ☐ Navigation	Termination provision (for multiyear leases): The parties to the lease request (choose one): ☐ a. The option of terminating the lease prior to expiration of the full term with written notice to the Department by the Lessor(s) and/or Lessee. ☐ b. The option of terminating the lease prior to expiration of the full term, with consent by all parties to the lease. ☐ c. The parties would not like to include a Termination Provision. (See instructions for limitations to this provision)
Additive/Replacing Relationship to other instream water rights: Instream leases are generally additive to other existing instream water rights created as a result of instream leases and transfers and/or allocations of conserved water. Since instream leases are also generally senior to other instream rights created through a state agency process or conversion of minimum flows, they generally replace a portion of these junior instream rights. If you would like this lease to relate to other instream water rights differently than described above, please check this box. ☐ And attach an explanation of your intent.	
Precedent: If a right which has been leased is later proposed to be leased again or later transferred or become part of an allocation of conserved water project, a new injury review shall be required. An instream lease shall not set a precedent on a future transaction.	
Validity of the rights to be leased: ☒ The water right(s) to be leased have been used under the terms and conditions of the right(s) during the last five years or have been leased instream; or ☐ The water right(s) have not been used for the last five years according to the terms and conditions of the rights. However, the water right(s) is not subject to forfeiture under ORS 540.610(2). Documentation describing why the water right is not subject to forfeiture has been provided.
