OF THE STATE OF OREGON

In the Matter of Transfer Application T-12185, Wasco County

- FINAL ORDER
- APPROVING CHANGES IN PLACE OF

215

- USE, A CHANGE IN CHARACTER OF USE
- AND PARTIAL CANCELLATION OF A
- WATER RIGHT

Authority

Oregon Revised Statutes (ORS) 540.505 to 540.580 establish the process in which a water right holder may submit a request to transfer the point of diversion, place of use, or character of use authorized under an existing water right. Oregon Administrative Rules (OAR) Chapter 690, Division 380 implement the statutes and provides the Department's procedures and criteria for evaluating transfer applications.

ORS 540.621 establishes the process for the owner of land to which a water right is appurtenant to certify under oath that the water right, or a portion thereof, has been abandoned and to voluntarily request that it be cancelled.

Findings of Fact

T-12185.kdd

- 1. On October 13, 2015, John McElheran filed an application to change the place of use and character of use under portions of Certificates 77326, 77733 and 76971. The Department assigned the application number T-12185.
- Notice of the application for transfer was published on October 20, 2015, pursuant to OAR 690-380-4000. No comments were filed in response to the notice.
- 3. On April 27, 2017, and June 1, 2017, the agent for the applicant submitted a revised application to clarify the places of use. On June 22, 2017, the agent for the applicant submitted another revised application to describe the place of use.

This final order is subject to judicial review by the Court of Appeals under ORS 183.482. Any petition for judicial review must be filed within the 60-day time period specified by ORS 183.482(1). Pursuant to ORS 536.075 and OAR 137-003-0675, you may petition for judicial review or petition the Director for reconsideration of this order. A petition for reconsideration may be granted or denied by the Director, and if no action is taken within 60 days following the date the petition was filed, the petition shall be deemed denied.

- 4. On June 30, 2017, the Department sent a copy of the draft Preliminary Determination proposing to approve Transfer Application T-12185 to the applicant. The draft Preliminary Determination cover letter set forth a deadline of July 31, 2017, for the applicant to respond. The applicant requested that the Department proceed with issuance of a Preliminary Determination and provided the necessary information to demonstrate that the applicant is authorized to pursue the transfer.
- 5. On August 16, 2017, the Department issued a Preliminary Determination proposing to approve Transfer Application T-12185 and sent a copy to the applicant. Additionally, notice of the Preliminary Determination for the transfer application was published in the Department's weekly notice on August 22, 2017, and in the The Dalles Chronicle newspaper on August 20 and 27, 2017, pursuant to ORS 540.520 and OAR 690-380-4020. No protests were filed in response to the notices.
- 6. The portion of the first right and its layered supplemental right to be transferred are as follows:

		IR	RIGATIO	N (IR)	
Twp	Rng	Mer	Sec	Q-Q	Acres
4 S	13 E	WM	14	SE SE	1.4

14. Certificate 77326 contains a scrivener's error in its quarter-quarter description for the Point of Diversion (POD) for the Clear Creek diversion described above in Findings Nos. 4 and 6. The certificate incorrectly lists the quarter-quarter as the NW¼ SE¼, Section 10. Based on the Juniper Flat District Improvement Company's HB3111 maps and the applicant's Certified Water Rights Examiner's current (Toll/2015) map based on a recent field visit and subsequent survey, the Department is led to conclude that Certificate 77326 should be corrected to reflect the correct quarter-quarter description within the NE¼ SE¼, Section 10.

Transfer Review Criteria [OAR 690-380-4010(2)]

- 15. Water has been used within the five-year period prior to submittal of the transfer application according to the terms and conditions of the rights. There is no information in the record that would demonstrate that these rights are subject to forfeiture under ORS 540.610.
- Diversion structures, a well, ditches and district delivery system sufficient to use the full amount
 of water allowed under the existing rights were present within the five-year period prior to
 submittal of Transfer Application T-12185.
- 17. The proposed changes would not result in enlargement of the rights. The change in place of use of supplemental water right Certificate 76971 separately from its associated District primary water right to another place of use under the same District primary passes the "similar reliability" test and complies with OAR 690-380-2240(5).
- 18. The proposed changes would not result in injury to other water rights.

Partial Cancellation of a Water Right

19. On June 12, 2017, the Department received voluntary cancellation affidavits from John McElheran and Roseann McElheran, requesting to cancel a portion of Certificate 76971 appurtenant to Tax Lot 3000, within Sections 14 and 23, Township 4 South, Range 13 East, W.M.. The intent of the affidavits was to cancel the 45.4 acres without cancelling any quantity of water. Because Certificate 76971 authorizes a rate that is less than the full rate (i.e., 1/80 cfs per acre multiplied by the number of acres allowed under the certificate) and because the total allowed quantity of water (0.89 cfs) divided by the number of remaining acres (83.6) does not exceed 1/80 cfs per acre, the cancellation of 45.4 acres without reducing the total quantity of water may be authorized.

The portion of the right to be cancelled is described as follows:

under Permit G-7958)

Determination and Proposed Action

The changes in place of use and change in character of use proposed in Transfer Application T-12185 appear to be consistent with the requirements of ORS 540.505 to 540.580 and OAR 690-380-5000. If protests are not filed pursuant to OAR 690-380-4030, the transfer application will be approved and the abandoned water right portion will be cancelled.

Now, therefore, it is ORDERED:

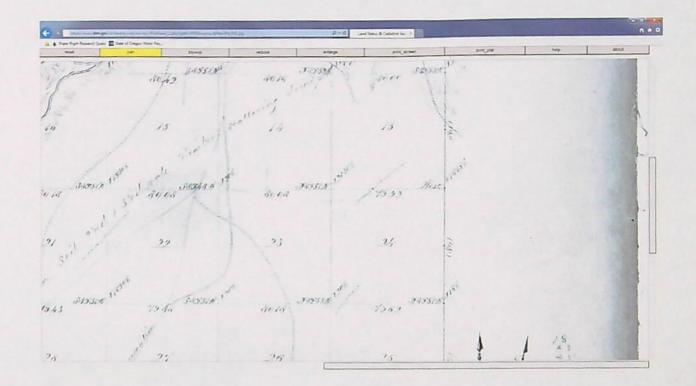

- The changes in place of use and change in character of us proposed in Transfer Application T-12185 are approved. The portion of the water right that has been abandoned is cancelled.
- The right to the use of the water is restricted to beneficial use at the place of use described, and is subject to all other conditions and limitations contained in Certificates 77326, 77733 and 76971, and any related decree.
- 3. Water right Certificate 76791 is cancelled. A certificate will be issued for that portion of this certificate NOT affected by this transfer.
- 4. Water right Certificates 77326 and 77733 are modified. The Department will issue superseding certificates describing the rights when it is determined that it is necessary for record keeping. The Department shall also make the needed revision to correct the POD description for the Clear Creek diversion in Certificate 77326 as described above in Finding No. 8 at that time.
- The Director requires all existing meters to be maintained by the district, consistent with all permitted and certificated water uses.
- 6. The former places of use of the transferred rights shall no longer receive water under the rights.
- 7. The approved changes shall be completed and full beneficial use of the water shall be made on or before October 1, 2018. A Claim of Beneficial Use prepared by a Certified Water Right Examiner shall be submitted by the applicant to the Department within one year after the deadline for completion of the changes and full beneficial use of the water.
- After satisfactory proof of beneficial use is received, a new confirming right certificate shall be issued for Certificate 76971.

REFERENCE: Transfer Application T-12185

Enclosed is a copy of the final order approving your water right transfer application.

The time allowed to complete the transfer is specified in the final order. YOU SHOULD GIVE PARTICULAR ATTENTION TO THE TIME LIMIT. The water right for any portion of the authorized change in character of use or change in place of use NOT carried out within the time allowed will be lost.

An extension of the time limit can be allowed <u>only</u> upon a showing that diligent effort has been made to complete the actual change(s) within the time allowed.

You are required to hire a Certified Water Rights Examiner (CWRE) to complete a Claim of Beneficial Use report and map which must be submitted to this Department within one year of the date you complete the change(s) or within one year of the completion date authorized in the transfer final order, whichever occurs first.

If you have any questions related to the approval of this transfer, you may contact your caseworker, Kelly Starnes, by telephone at (503) 986-0886 or by e-mail at Patrick.K.Starnes@oregon.gov.

Authority

Oregon Revised Statutes (ORS) 540.505 to 540.580 establish the process in which a water right holder may submit a request to transfer the point of diversion, place of use, or character of use authorized under an existing water right. Oregon Administrative Rules (OAR) Chapter 690, Division 380 implement the statutes and provides the Department's procedures and criteria for evaluating transfer applications.

ORS 540.621 establishes the process for the owner of land to which a water right is appurtenant to certify under oath that the water right, or a portion thereof, has been abandoned and to voluntarily request that it be cancelled.

Findings of Fact

- On October 13, 2015, John McElheran filed an application to change the place of use and character of use under portions of Certificates 77326, 77733 and 76971. The Department assigned the application number T-12185.
- Notice of the application for transfer was published on October 20, 2015, pursuant to OAR 690-380-4000. No comments were filed in response to the notice.
- On April 27, 2017, and June 1, 2017, the agent for the applicant submitted a revised application
 to clarify the places of use. On June 22, 2017, the agent for the applicant submitted another
 revised application to describe the place of use.

This final order is subject to judicial review by the Court of Appeals under ORS 183.482. Any petition for judicial review must be filed within the 60-day time period specified by ORS 183.482(1). Pursuant to ORS 536.075 and OAR 137-003-0675, you may petition for judicial review or petition the Director for reconsideration of this order. A petition for reconsideration may be granted or denied by the Director, and if no action is taken within 60 days following the date the petition was filed, the petition shall be deemed denied.

- 4. On June 30, 2017, the Department sent a copy of the draft Preliminary Determination proposing to approve Transfer Application T-12185 to the applicant. The draft Preliminary Determination cover letter set forth a deadline of July 31, 2017, for the applicant to respond. The applicant requested that the Department proceed with issuance of a Preliminary Determination and provided the necessary information to demonstrate that the applicant is authorized to pursue the transfer.
- 5. On August 16, 2017, the Department issued a Preliminary Determination proposing to approve Transfer Application T-12185 and sent a copy to the applicant. Additionally, notice of the Preliminary Determination for the transfer application was published in the Department's weekly notice on August 22, 2017, and in the The Dalles Chronicle newspaper on August 20 and 27, 2017, pursuant to ORS 540.520 and OAR 690-380-4020. No protests were filed in response to the notices.

14. Certificate 77326 contains a scrivener's error in its quarter-quarter description for the Point of Diversion (POD) for the Clear Creek diversion described above in Findings Nos. 4 and 6. The certificate incorrectly lists the quarter-quarter as the NW¼ SE¼, Section 10. Based on the Juniper Flat District Improvement Company's HB3111 maps and the applicant's Certified Water Rights Examiner's current (Toll/2015) map based on a recent field visit and subsequent survey, the Department is led to conclude that Certificate 77326 should be corrected to reflect the correct quarter-quarter description within the NE¼ SE¼, Section 10.

Transfer Review Criteria [OAR 690-380-4010(2)]

- 15. Water has been used within the five-year period prior to submittal of the transfer application according to the terms and conditions of the rights. There is no information in the record that would demonstrate that these rights are subject to forfeiture under ORS 540.610.
- Diversion structures, a well, ditches and district delivery system sufficient to use the full amount
 of water allowed under the existing rights were present within the five-year period prior to
 submittal of Transfer Application T-12185.
- 17. The proposed changes would not result in enlargement of the rights. The change in place of use of supplemental water right Certificate 76971 separately from its associated District primary water right to another place of use under the same District primary passes the "similar reliability" test and complies with OAR 690-380-2240(5).
- 18. The proposed changes would not result in injury to other water rights.

Partial Cancellation of a Water Right

19. On June 12, 2017, the Department received voluntary cancellation affidavits from John McElheran and Roseann McElheran, requesting to cancel a portion of Certificate 76971 appurtenant to Tax Lot 3000, within Sections 14 and 23, Township 4 South, Range 13 East, W.M.. The intent of the affidavits was to cancel the 45.4 acres without cancelling any quantity of water. Because Certificate 76971 authorizes a rate that is less than the full rate (i.e., 1/80 cfs per acre multiplied by the number of acres allowed under the certificate) and because the total allowed quantity of water (0.89 cfs) divided by the number of remaining acres (83.6) does not exceed 1/80 cfs per acre, the cancellation of 45.4 acres without reducing the total quantity of water may be authorized.

The portion of the right to be cancelled is described as follows:

Certificate: 76971 in the name of DORCAS AND MARSHALL McELHERAN (perfected

under Permit G-7958)

Use: IRRIGATION OF 6.9 ACRES AND SUPPLEMENTAL IRRIGATION OF

38.5 ACRES

Priority Date: FEBRUARY 14, 1978

Limit/Duty: The amount of water used for irrigation together with the amount secured under

any other right existing for the same lands, shall be limited to ONE-

EIGHTIETH of one cubic foot per second per acre or its equivalent for each acre irrigated and shall be further limited to a diversion of not to exceed 3.0 acre-feet for each acre irrigated during the irrigation season of each year.

Determination and Proposed Action

The changes in place of use and change in character of use proposed in Transfer Application T-12185 appear to be consistent with the requirements of ORS 540.505 to 540.580 and OAR 690-380-5000. If protests are not filed pursuant to OAR 690-380-4030, the transfer application will be approved and the abandoned water right portion will be cancelled.

Now, therefore, it is ORDERED:

- The changes in place of use and change in character of us proposed in Transfer Application T-12185 are approved. The portion of the water right that has been abandoned is cancelled.
- The right to the use of the water is restricted to beneficial use at the place of use described, and is subject to all other conditions and limitations contained in Certificates 77326, 77733 and 76971, and any related decree.
- Water right Certificate 76791 is cancelled. A certificate will be issued for that portion of this
 certificate NOT affected by this transfer.
- 4. Water right Certificates 77326 and 77733 are modified. The Department will issue superseding certificates describing the rights when it is determined that it is necessary for record keeping. The Department shall also make the needed revision to correct the POD description for the Clear Creek diversion in Certificate 77326 as described above in Finding No. 8 at that time.
- 5. The Director requires all existing meters to be maintained by the district, consistent with all permitted and certificated water uses.
- 6. The former places of use of the transferred rights shall no longer receive water under the rights.
- 7. The approved changes shall be completed and full beneficial use of the water shall be made on or before October 1, 2018. A Claim of Beneficial Use prepared by a Certified Water Right Examiner shall be submitted by the applicant to the Department within one year after the deadline for completion of the changes and full beneficial use of the water.
- After satisfactory proof of beneficial use is received, a new confirming right certificate shall be issued for Certificate 76971.

THIS CERTIFICATE ISSUED TO

DORCAS AND MARSHALL McELHERAN 56626 JUNIPER FLAT ROAD MAUPIN OR 97037

confirms the right to use the waters of A WELL within the WHITE RIVER BASIN for SUPPLEMENTAL IRRIGATION OF 83.6 ACRES.

This right was perfected under Permit G-7958. The date of priority is FEBRUARY 14, 1978. The amount of water to which this right is entitled is limited to an amount actually used beneficially, and shall not exceed 0.81 CUBIC FOOT PER SECOND, or its equivalent in case of rotation, measured at the point of diversion from the source.

The point of diversion is located as follows:

Twp	Rng	Mer	Sec	Q-Q	Measured Distances
4 S	13 E	WM	23	NE NE	1360 FEET NORTH AND 80 FEET WEST FROM THE E¼ CORNER OF SECTION 23

The amount of water used for irrigation together with the amount secured under any other right existing for the same lands, is limited to ONE-EIGHTIETH of one cubic foot per second per acre or its equivalent for each acre irrigated and shall be further limited to a diversion of not to exceed 3.0 acre-feet for each acre irrigated during the irrigation season of each year.

The use shall conform to such reasonable rotation system as may be ordered by the proper state officer.

A description of the place of use to which this right is appurtenant is as follows:

SUBJECT: Water Right Transfer Application T-12185

Please find enclosed the Preliminary Determination indicating that, based on the information available, the Department intends to approve application T-12185. This document is an intermediate step in the approval process; water may not be used legally as proposed in the transfer application until a Final Order has been issued by the Department. Please read this entire letter carefully to determine your responsibility for additional action.

A public notice is being published in the Department's weekly publication and in The Dalles Chronicle newspaper, simultaneously with issuance of the Preliminary Determination. The notice initiates a period in which any person may file either a protest opposing the decision proposed by the Department in the Preliminary Determination or a standing statement supporting the Department's decision. The protest period will end 30 days after the last date of newspaper publication.

If no protest is filed, the Department will issue a Final Order consistent with the Preliminary Determination. You should receive a copy of the Final Order about 30 days after the close of the protest period.

If a protest is filed, the application may be referred to a contested case proceeding. A contested case provides an opportunity for the proponents and opponents of the decision proposed in the Preliminary Determination to present information and arguments supporting their position in a quasi-judicial proceeding.

Please do not hesitate to contact me at 503-986-0886 or Patrick.K.Starnes@oregon.gov if I may be of assistance.

Authority

Oregon Revised Statutes (ORS) 540.505 to 540.580 establish the process in which a water right holder may submit a request to transfer the point of diversion, place of use, or character of use authorized under an existing water right. Oregon Administrative Rules (OAR) Chapter 690, Division 380 implement the statutes and provides the Department's procedures and criteria for evaluating transfer applications.

ORS 540.621 establishes the process for the owner of land to which a water right is appurtenant to certify under oath that the water right, or a portion thereof, has been abandoned and to voluntarily request that it be cancelled.

Findings of Fact

- On October 13, 2015, John McElheran filed an application to change the place of use and character of use under portions of Certificates 77326, 77733 and 76971. The Department assigned the application number T-12185.
- Notice of the application for transfer was published on October 20, 2015, pursuant to OAR 690-380-4000. No comments were filed in response to the notice.
- On April 27, 2017, and June 1, 2017, the agent for the applicant submitted a revised application
 to clarify the places of use. On June 22, 2017, the agent for the applicant submitted another
 revised application to describe the place of use.
- 4. On June 30, 2017, the Department sent a copy of the draft Preliminary Determination proposing to approve Transfer Application T-12185 to the applicant. The draft Preliminary Determination cover letter set forth a deadline of July 31, 2017, for the applicant to respond. The applicant requested that the Department proceed with issuance of a Preliminary Determination and provided the necessary information to demonstrate that the applicant is authorized to pursue the transfer.

13. Certificate 77326 contains a scrivener's error in its quarter-quarter description for the Point of Diversion (POD) for the Clear Creek diversion described above in Findings Nos. 4 and 6. The certificate incorrectly lists the quarter-quarter as the NW¹/₄ SE¹/₄, Section 10. Based on the Juniper Flat District Improvement Company's HB3111 maps and the applicant's Certified Water Rights Examiner's current (Toll/2015) map based on a recent field visit and subsequent survey, the Department is led to conclude that Certificate 77326 should be corrected to reflect the correct quarter-quarter description within the NE¹/₄ SE¹/₄, Section 10.

Transfer Review Criteria [OAR 690-380-4010(2)]

- 14. Water has been used within the five-year period prior to submittal of the transfer application according to the terms and conditions of the rights. There is no information in the record that would demonstrate that these rights are subject to forfeiture under ORS 540.610.
- 15. Diversion structures, a well, ditches and district delivery system sufficient to use the full amount of water allowed under the existing rights were present within the five-year period prior to submittal of Transfer Application T-12185.
- 16. The proposed changes would not result in enlargement of the rights. The change in place of use of supplemental water right Certificate 76971 separately from its associated District primary water right to another place of use under the same District primary passes the "similar reliability" test and complies with OAR 690-380-2240(5).
- 17. The proposed changes would not result in injury to other water rights.

Partial Cancellation of a Water Right

18. On June 12, 2017, the Department received voluntary cancellation affidavits from John McElheran and Roseann McElheran, requesting to cancel a portion of Certificate 76971 appurtenant to Tax Lot 3000, within Sections 14 and 23, Township 4 South, Range 13 East, W.M.. The intent of the affidavits was to cancel the 45.4 acres without cancelling any quantity of water. Because Certificate 76971 authorizes a rate that is less than the full rate (i.e., 1/80 cfs per acre multiplied by the number of acres allowed under the certificate) and because the total allowed quantity of water (0.89 cfs) divided by the number of remaining acres (83.6) does not exceed 1/80 cfs per acre, the cancellation of 45.4 acres without reducing the total quantity of water may be authorized.

The portion of the right to be cancelled is described as follows:

Certificate: 76971 in the name of DORCAS AND MARSHALL McELHERAN (perfected

under Permit G-7958)

Use: IRRIGATION OF 6.9 ACRES AND SUPPLEMENTAL IRRIGATION OF

38.5 ACRES

Priority Date: FEBRUARY 14, 1978

Limit/Duty: The amount of water used for irrigation together with the amount secured under

any other right existing for the same lands, shall be limited to ONE-

EIGHTIETH of one cubic foot per second per acre or its equivalent for each acre irrigated and shall be further limited to a diversion of not to exceed 3.0 acre-feet for each acre irrigated during the irrigation season of each year.

Determination and Proposed Action

The changes in place of use and change in character of use proposed in Transfer Application T-12185 appear to be consistent with the requirements of ORS 540.505 to 540.580 and OAR 690-380-5000. If protests are not filed pursuant to OAR 690-380-4030, the transfer application will be approved and the abandoned water right portion will be cancelled.

If Transfer Application T-12185 is approved, the final order will include the following:

- The changes in place of use and change in character of us proposed in Transfer Application T-12185 are approved. The portion of the water right that has been abandoned is cancelled.
- 2. The right to the use of the water is restricted to beneficial use at the place of use described, and is subject to all other conditions and limitations contained in Certificates 77326, 77733 and 76971, and any related decree.
- 3. Water right Certificate 76791 is cancelled. A certificate will be issued for that portion of this certificate NOT affected by this transfer.
- 4. Water right Certificates 77326 and 77733 are modified. The Department will issue superseding certificates describing the rights when it is determined that it is necessary for record keeping. The Department shall also make the needed revision to correct the POD description for the Clear Creek diversion in Certificate 77326 as described above in Finding No. 11 at that time.
- 5. The Director requires all existing meters to be maintained by the district, consistent with all permitted and certificated water uses.
- 6. The former places of use of the transferred rights shall no longer receive water under the rights.
- 7. The approved changes shall be completed and full beneficial use of the water shall be made on or before October 1, 2018. A Claim of Beneficial Use prepared by a Certified Water Right Examiner shall be submitted by the applicant to the Department within one year after the deadline for completion of the changes and full beneficial use of the water.

8. After satisfactory proof of beneficial use is received, a new confirming right certificate shall be issued for Certificate 76971.

SUBJECT: Water Right Transfer Application T-12185

Your water right transfer is ready for issuance of the Preliminary Determination, once the Department receives payment for publication of the newspaper notice.

Items needed before the next phase of processing...

At this time you need to:

- submit a check for \$90.00 (to cover cost of publication of the notice), made out to the Oregon Water Resources Department.
- 2. write "for T-12185 NOTICE" on the front of your check, and
- 3. submit it with the tracking stub at the bottom of this letter.

Mail the check to 725 Summer St. NE, Suite A, Salem, OR 97301-1266, no later than August 27, 2017.

What happens next...

Shortly after receiving payment, the Department will issue the Preliminary Determination, initiate publication in The Dalles Chronicle newspaper, and also publish the notice on the Department's weekly notice. Publication of the notice will initiate a protest period during which any person may file either a protest opposing the decision proposed by the Department in the Preliminary Determination or a standing statement supporting the Department's decision.

If we do not receive payment for newspaper notice by August 27, 2017, a Preliminary Determination may be issued denying the application as incomplete.

Please do not hesitate to contact me at 541-278-5456 or Ken.D.Dowden@oregon.gov if I may be of assistance.

Sincerely,

Ken Dowden Transfer Specialist Field Services Division

confirms the right to use the waters of A WELL, a tributary of WHITE RIVER, for IRRIGATION OF 14.0 ACRES AND SUPPLEMENTAL IRRIGATION OF 123.5 ACRES. (TUTAL 1 137.5 ac)

This right was perfected under Permit G-7958. The date of priority is FEBRUARY 14, 1978. The amount of water to which this right is entitled is limited to an amount actually beneficially used and shall not exceed 0.89 CUBIC FOOT PER SECOND or its equivalent in case of rotation measured at the point of diversion from the source.

The point of diversion is located as follows:

NE¼ NE¼, SECTION 23, T. 4 S., R. 13 E., W.M.; 1360 FEET NORTH AND 80 FEET WEST FROM E1/4 CORNER SECTION 23.

The amount of water used for irrigation together with the amount secured under any other right existing for the same lands, is limited to ONE-EIGHTIETH of one cubic foot per second per acre or its equivalent for each acre irrigated and shall be further limited to a diversion of not to exceed 3.0 acre-feet for each acre irrigated during the irrigation season of each year.

The use shall conform to such reasonable rotation system ordered by the proper state officer.

CERTIFICATE OF WATER RIGHT

THIS CERTIFICATE ISSUED TO

JUNIPER FLAT DISTRICT IMPROVEMENT COMPANY 53333 RESERVATION ROAD MAUPIN, OR 97037

confirms the right to use the waters of DIRECT FLOW FROM CLEAR CREEK AND FROG CREEK AND STORAGE OF 1400 ACRE FEET IN CLEAR LAKE RESERVOIR, a tributary of WHITE RIVER, for IRRIGATION OF 2101.64 ACRES, STOCK, AND MAINTENANCE OF STOCK PONDS (5.85 ACRE EQUIVALENTS).

This right was confirmed by decree of the Circuit Court of the State of Oregon for WASCO COUNTY. The decree is of record at Salem, in the Order Record of the WATER RESOURCES DIRECTOR, in Volume 14 & 18, at Page 398 & 252. The date of priority is JULY 1, 1903 FOR DIRECT FLOW FROM CLEAR CREEK AND FROG CREEK, AND AUGUST 19, 1904, FOR STORAGE IN CLEAR LAKE RESERVOIR.

The amount of water to which this right is entitled is limited to an amount actually beneficially used and shall not exceed ONE ACRE FOOT PER ACRE OR ACRE EQUIVALENT DURING ANY 30-DAY PERIOD UP TO JULY 1ST OF EACH YEAR AND NOT TO EXCEED 3 ACRE FEET PER ACRE OR ACRE EQUIVALENT DURING ANY IRRIGATION SEASON; PROVIDED, THAT THE RATE OF FLOW SHALL NOT EXCEED 1/40 OF A SECOND FOOT PER ACRE OR ACRE EQUIVALENT UP TO JULY 1ST OF EACH YEAR AND THEREAFTER NOT TO EXCEED 1/80 OF A SECOND FOOT PER ACRE OR ACRE EQUIVALENT, EXCEPT IN CASE OF ROTATION.

The point of diversion is located as follows:

NE¼ NE¾, SECTION 34, T. 4 S., R. 9 E., W. M. FROM FROG CREEK; NW¼ SE¼, SECTION 10, T. 5 S., R. 9 E., W.M. FROM CLEAR CREEK; CLEAR LAKE RESERVOIR DAM IS IN THE SE¼ SE¼, SECTION 32, T. 4 S., R. 9 E., W.M.

The use shall conform to any reasonable rotation system ordered by the proper state officer.

CERTIFICATE OF WATER RIGHT

THIS CERTIFICATE ISSUED TO

JUNIPER FLAT DISTRICT IMPROVEMENT COMPANY 53333 RESERVATION ROAD MAUPIN, OR 97037

confirms the right to use the waters of CLEAR LAKE RESERVOIR, CONSTRUCTED UNDER PERMIT R-2106, a tributary of WHITE RIVER, for SUPPLEMENTAL IRRIGATION OF 2,101.64 ACRES AND MAINTENANCE OF STOCK PONDS (5.85 ACRE EQUIVALENTS).

This right was perfected under Permit 25275. The date of priority is NOVEMBER 11, 1915. The amount of water to which this right is entitled is limited to an amount actually beneficially used and shall not exceed 11,660 ACRE-FEET STORED WATER ONLY or its equivalent in case of rotation, measured at the point of diversion from the source.

The point of diversion is located as follows:

SE¼ SE¼, SECTION 32, T. 4 S., R. 9 E., W.M.; 1,390 FEET SOUTH AND 480 FEET WEST FROM E¼ CORNER, SECTION 32.

The amount of water used for irrigation together with the amount secured under any other right existing for the same lands, is limited to A DIVERSION OF 4.2 ACRE-FEET FOR EACH ACRE IRRIGATED OR ACRE EQUIVALENT DURING THE IRRIGATION SEASON OF EACH YEAR.

The use shall conform to such reasonable rotation system ordered by the proper state officer.

A description of the place of use to which this right is appurtenant is as follows:

Your transfer application will be returned if any of the map requirements listed below are not met.

Please be sure that the transfer application map you submit includes all the required items and matches the existing water right map. Check all boxes that apply. N/A Certified Water Right Examiner (CWRE) Stamp and Original Signature. For a list of CWREs, see http://apps.wrd.state.or.us/apps/wr/cwre_license_view/. CWRE stamp and signature are not required for substitutions. N/A If more than three water rights are involved, separate maps are needed for each water right. X Permanent quality printed with dark ink on good quality paper. X The size of the map can be 8½ x 11 inches, 8½ x 14 inches, 11 x 17 inches, or up to 30 x 30 inches. For 30 x 30 inch maps, one extra copy is required. X A north arrow, a legend, and scale. X The scale of the map must be: 1 inch = 400 feet, 1 inch = 1,320 feet, the scale of the Final Proof/Claim of Beneficial Use Map (the map used when the permit was certificated), the scale of the county assessor map if the scale is not smaller than 1 inch = 1,320 feet, or a scale that has been pre-approved by the Department. X Township, Range, Section, 1/4 1/4, DLC, Government Lot, and other recognized public land survey lines. X Tax lot boundaries (property lines) are required. Tax lot numbers are recommended. Major physical features including rivers and creeks showing direction of flow, lakes and \times reservoirs, roads, and railroads. \times Major water delivery system features from the point(s) of diversion/appropriation such as main pipelines, canals, and ditches. X Existing place of use that includes separate hachuring for each water right, priority date, and use including number of acres in each quarter-quarter section, government lot, or in each quarter-quarter section as projected within government lots, donation land claims, or other recognized public land survey subdivisions. If less than the entirety of the water right is being changed, a separate hachuring is needed for lands left unchanged. X N/A Proposed place of use that includes separate hachuring for each water right, priority date, and use including number of acres in each quarter-quarter section, government lot, or in each quarter-quarter section as projected within government lots, donation land claims, or other recognized public land survey subdivisions. X Existing point(s) of diversion or well(s) with distance and bearing or coordinates from a recognized survey corner. This information can be found in your water right certificate or permit. ECEIVERSY OWAD If you are proposing a change in point(s) of diversion or well(s), show the proposed location and label it clearly with distance and bearing or coordinates. *Example for Line 5a calculation to transfer 45.0 acres of Primary Certificate 12345 (total 1.25 cfs for 100 acres) and 45.0 acres of Supplemental Certificate 87654 (1/80 cfs per acre) on the same land:

1. For irrigation calculate cfs for each water right involved as follows:

a. Divide total authorized cfs by total acres in the water right (for C12345, 1.25 cfs ± 100 ac); then multiply by the number of acres to be transferred to get the transfer cfs (x 45 ac= 0.56 cfs).

b. If the water right certificate does not list total cfs, but identifies the allowable use as 1/40 or 1/80 of a cfs per acre; multiply number of acres proposed for change by either 0.025 (1/40) or 0.0125 (1/80). (For C87654, 45.0 ac x 0.0125 cfs/ac = 0.56 cfs)

2. Add cfs for the portions of water rights on all the land included in the transfer; however do not count cfs for supplemental rights on acreage for which you have already calculated the cfs fee for the primary right on the same land. The fee should be assessed only once for each "on the ground" acre included in the transfer. (In this example, blank 5a would be only 0.56 cfs, since both rights serve the same 45.0 acres. Blank 5b would be 0 and Line 5 would then also become 0).

Explain in your own words what you propose to accomplish with this transfer application, and why: I want to move some of my Juniper Flat DIC water right from one of my parcel to another. And at the same time clean up and move aroung some water right on a well. And will end up with cancelling some of the well water rights. Al of these action are to organize water right so in the future I can sell off one of the parcels of land.

If you need additional space, continue on a separate piece of paper and attach to the application as "Attachment 1".

Additional remarks: I do not believe that the map for Juniper Flat DIC is totally accurate in describing the place of use on my property. I have 90 acres of JFDIC irrigation water rights. I wish to move 5 acres off and leave the remaining 85 acres in the center pivot. In the above table all of the water rights on Tax Lot 3000 are listed on the left as described in the certificate. On the right it shows I am moving 5 acres and what I believe is the correct location of the remaining 85 acres within the center pivot.

the number listed is the number of acres being converted from irrigation to pond maintenance. Juniper Flats tracks these uses as "acre equivalents" to know how much to assess the landowner for and how much water to deliver.

Are there other water right certificates, water use permits or ground water registrations associated with the "from" or the "to" lands? ⊠ Yes □ No
If YES, list the certificate, water use permit, or ground water registration numbers: 77326 & 76971.
Pursuant to ORS 540.510, any "layered" water use such as an irrigation right that is supplemental to a primary right proposed for transfer must be included in the transfer or be cancelled. Any change to a ground water registration must be filed separately in a ground water registration modification application.
For Substitution (ground water supplemental irrigation will be substituted for surface water primary irrigation)
Ground water supplemental Permit or Certificate #; Surface water primary Certificate #
For a change from Supplemental Irrigation Use to Primary Irrigation Use
Identify the primary certificate to be cancelled. Certificate #
For a change in point(s) of appropriation (well(s)) or additional point(s) of appropriation:
Well log(s) are attached for each authorized and proposed well(s) that are clearly labeled and associated with the corresponding well(s) in Table 1 above and on the accompanying application map.
Tip: You may search for well logs on the Department's web page at: http://apps.wrd.state.or.us/apps/gw/well_log/Default.aspx

Describe the construction of the authorized and proposed well(s) in Table 3 for any wells that do not have a well log. For proposed wells not yet constructed or built, provide "a best estimate" for each requested information element in the table. The Department recommends you consult a licensed well driller, geologist, or certified water right examiner to assist with assembling the information necessary to complete Table 3.
able 3 Construction of Point(s) of Appropriation

Any well(s) in this listing must be clearly tied to corresponding well(s) described in Table 1 and shown on the accompanying application map. Failure to provide the information will delay the processing of your transfer application until it is received. The information is necessary for the department to assess whether the proposed well(s) will access the same source aquifer as the authorized point(s) of appropriation (POA). The Department is prohibited by law from approving POA changes that do not access the same

source aquifer.

Additional remarks: I do not believe that the map for Juniper Flat DIC is totally accurate in describing the place of use on my property. I have 90 acres of JFDIC irrigation water rights. I wish to move 5 acres off and leave the remaining 85 acres in the center pivot. In the above table all of the water rights on Tax Lot 3000 are listed on the left as described in the certificate. On the right it shows I am moving 5 acres and what I believe is the correct location of the remaining 85 acres within the center pivot.

the number listed is the number of acres being converted from irrigation to pond maintenance.

Juniper Flats tracks these uses as "acre equivalents" to know how much to assess the landowner for and how much water to deliver.

Additional remarks: Any acreage that is not in the proposed location column is proposed to be canceled. The total to be canceled is 6.9 acres of irrigation and 38.5 acres of supplemental irrigation. This will have 7.1 acres of supplemental irrigation in the location described about. Since Certificate 76971 was not issued for the maximum allowable rate of water, I wish to cancel no water and move the entire 0.89 cfs to the location described above. The right will have less that the kimum allowable rate.

Notice of Preliminary Determination for Water Right Transfer T-12185

T-12185 filed by John McElheran, 56531 Juniper Flat Rd, Maupin, OR, 97037, proposes changes in place of use and character of use under Certificates 77326, 77733 and 76971. Certificate 77326 allows the use of ONE ACRE FOOT PER ACRE OR ACRE EQUIVALENT during any 30-DAY PERIOD UP TO JULY 1st of each year AND NOT TO EXCEED 3.0 ACRE FEET PER ACRE OR ACRE EQUIVALENT during any irrigation season; PROVIDED, THAT THE RATE OF FLOW SHALL NOT EXCEED 1/40th OF A SECOND FOOT PER ACRE OR ACRE EQUIVALENT UP TO JULY 1st OF EACH YEAR AND THEREAFTER NOT TO EXCEED 1/80th OF A SECOND FOOT PER ACRE OR ACRE EQUIVALENT, EXCEPT IN CASE OF ROTATION from diversions on Clear Creek, Frog Creek and Clear Lake Reservoir for irrigation within Secs. 14 and 23, T4S, R13E, WM. Certificate 77733 allows the use of a diversion of 4.2 ACRE-FEET for each acre irrigated from Clear Lake Reservoir for supplemental irrigation within Secs. 14 and 23, T4S, R13E, WM. Certificate 769713 allows the use of 1/80th of one cfs from a Well within the White River basin, for irrigation and supplemental irrigation within Secs. 14 and 23, T4S, R13E, WM. The applicant proposes to change the place of use and character of use of a portion of the irrigation rights to Pond Maintenance within the boundaries of the Juniper Flat District Improvement Co., located within Secs. 14 and 23, T4S, R13E, WM.. The Water Resources Department has concluded that the proposed transfer appears to be consistent with the requirements of ORS Chapter 540, OAR 690-380-2110 and 690-380-5000.

Any person may file, jointly or severally, a protest or standing statement within 30 days after the last date of newspaper publication of this notice MM/DD/YEAR. Call (503) 986-0807 to obtain additional information or a protest form. If no protests are filed, the Department will issue a final order consistent with the preliminary determination.

STATE OF OREGON COUNTY OF WASCO CERTIFICATE OF WATER RIGHT

THIS CERTIFICATE ISSUED TO

DORCAS AND MARSHALL McELHERAN 56626 JUNIPER FLAT ROAD MAUPIN, OR 97037

confirms the right to use the waters of A WELL within the WHITE RIVER BASIN for SUPPLEMENTAL IRRIGATION of 83.6 ACRES.

This right was perfected under Permit G-7958. The date of priority is FEBRUARY 14, 1978. The amount of water to which this right is entitled is limited to an amount actually used beneficially, and shall not exceed 0.81 CUBIC FOOT PER SECOND, or its equivalent in case of rotation, measured at the point of diversion from the source.

The well is located as follows:

Twp	Rng	Mer	Sec	Q - Q	Measured Distances
4 S	13 E	WM	23	NE NE	1360 FEET NORTH AND 80 FEET WEST FROM THE E¼ CORNER OF SECTION 23

The amount of water used for irrigation, together with the amount secured under any other right existing for the same lands, is limited to a diversion of ONE-EIGHTIETH of one cubic foot per second, or its equivalent for each acre irrigated, and shall be further limited to a diversion of not to exceed 3.0 acrefeet per acre for each acre irrigated during the irrigation season of each year. The use shall conform to such reasonable rotation system as may be ordered by the proper state officer.

A description of the place of use to which this right is appurtenant is as follows:

Twp	Rng	Mer	Sec	Q-Q	Acres
4 S	13 E	WM	14	SW SE	21.4
4 S	13 E	WM	14	SE SE	33.5
4 S	13 E	WM	23	NE NE	17.9
4 S	13 E	WM	23	NW NE	10.8
				TOTAL:	83.6

This certificate describes that portion of the water right confirmed by Certificate 76971, State Record of Water Right Certificates, NOT modified by the provisions of an order of the Water Resources Director entered ______, approving Transfer Application T-12185.

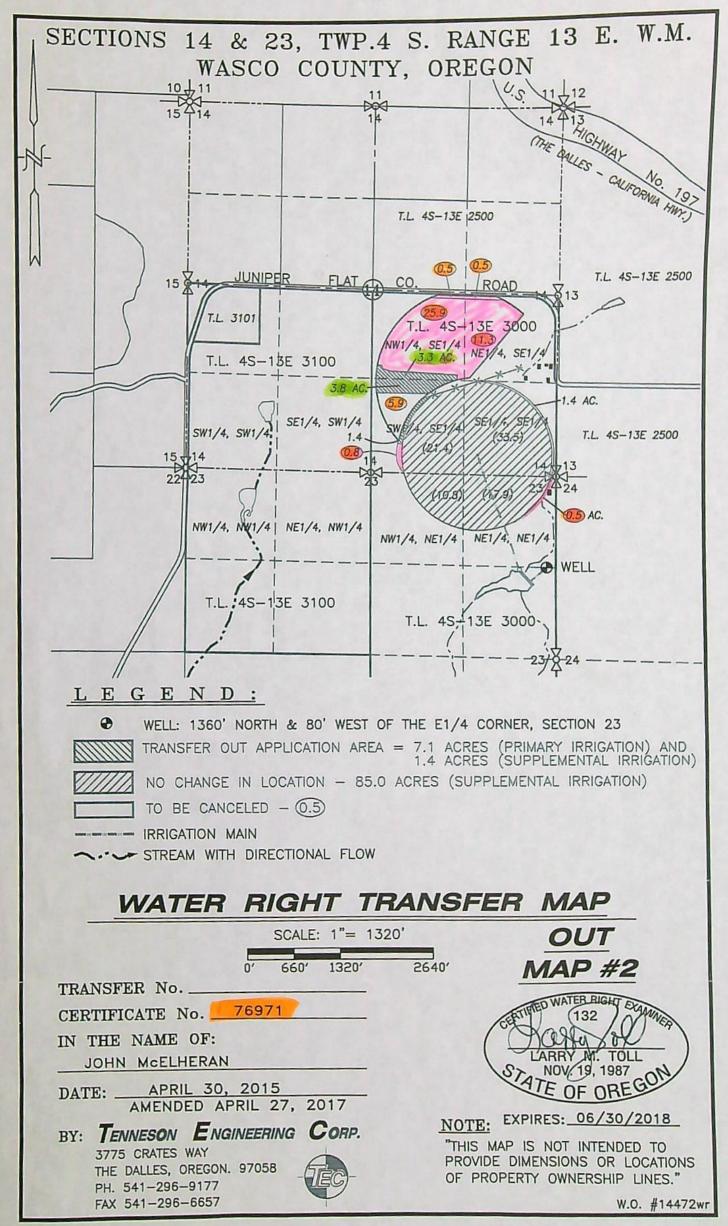

The issuance of this superseding certificate does not confirm the status of the water right in regard to the provisions of ORS 540.610 pertaining to forfeiture or abandonment.

The right to the use of the water for the above purpose is restricted to beneficial use on the lands or place

Your water right transfer is in one of three phases of processing. Enclosed is a draft of our Preliminary Determination regarding Transfer Application T-12185. The document reflects the Department's conclusion that, based on the information currently available, the transfer will be approved.

Items needed before the next phase of processing...

- Please review the draft carefully to see if it accurately reflects the changes you intend to
 make, and to become familiar with all proposed conditions. You will need to respond in
 writing by the deadline provided below, whether you agree with the proposed action and
 conditions. Also we would appreciate having you let us know if there are typographical
 errors that need to be corrected.
- A report of landownership for the lands to which the water rights are appurtenant (the "FROM" lands) is required. The report must be prepared by a title company and meet the criteria below. (Reports may be called by various names, such as List Kit, List Pack, Property Analysis Report (PAR), Customer Service Report, Lot Book Report, etc.)
 - a) The title company's report must either be:
 - i) prepared within 3 months of the draft Preliminary Determination showing current ownership, or
 - ii) prepared within 3 months of recording of a water right conveyance agreement, or
 - iii) prepared at any time, but showing ownership at the time a water right conveyance agreement was recorded.
 - b) The ownership report shall include:
 - i) Date reflected by the ownership information
 - ii) List of owners at that time
 - Legal description of the property where the w located.
 - You will need to submit a notarized statement of the ownership report who is not already include information such as a water right conveyance as

Conditions to your water right...

The Department requires that all current and existing measurement devices required within and by the Juniper Flat District Improvement Company be maintained.

Please note the proposed date by which all conditions must be met: October 1, 2018. If the required completion date is insufficient to comply with any of the conditions, you may extend the date at no cost to you during this stage of processing. Please let me know by the comment deadline so we can make the proper arrangements to get you the time you need.

What happens next...

Once the Preliminary Determination is issued a publication period is required. Because of a change in character of use, the Department will publish notice of the transfer in a local newspaper having a general circulation in the area of the water right at least once per week for two consecutive weeks. You are responsible for sending a check to cover the cost of publication prior to the issuance of the Preliminary Determination and publication of notice.

Issuance of the Preliminary Determination will occur shortly after we receive:

- your written response to the conditions and proposed action in the draft Preliminary Determination (e-mail is acceptable); and
- report of ownership, and affidavits of consent from any landowners shown in the ownership report who have not signed the transfer application.

If we do not receive the items listed above by July 31, 2017, a Preliminary Determination may be issued denying the application as incomplete.

Please do not hesitate to contact me at 541-278-5456 or <u>Ken.D.Dowden@oregon.gov</u> if I may be of assistance.

Sincerely, Colle

Authority

Oregon Revised Statutes (ORS) 540.505 to 540.580 establish the process in which a water right holder may submit a request to transfer the point of diversion, place of use, or character of use authorized under an existing water right. Oregon Administrative Rules (OAR) Chapter 690, Division 380 implement the statutes and provides the Department's procedures and criteria for evaluating transfer applications.

ORS 540.621 establishes the process for the owner of land to which a water right is appurtenant to certify under oath that the water right, or a portion thereof, has been abandoned and to voluntarily request that it be cancelled.

Findings of Fact

- On October 13, 2017, John McElheran filed an application to change the place of use and character of use under portions of Certificates 77326, 77733 and 76971. The Department assigned the application number T-12185.
- Notice of the application for transfer was published on October 20, 2015, pursuant to OAR 690-380-4000. No comments were filed in response to the notice.
- On April 27, 2017, and June 1, 2017, the agent for the applicant submitted a revised application
 to clarify the places of use. On June 22, 2017, the agent for the applicant submitted another
 revised application to describe the place of use.

12. Certificate 77326 contains a scrivener's error in its quarter-quarter description for the Point of Diversion (POD) for the Clear Creek diversion described above in Findings #4 and #6. The certificate incorrectly lists the quarter-quarter as the NW¼ SE¼. Based on the Juniper Flat District Improvement Company's HB3111 maps and the applicant's Certified Water Rights Examiner's current (Toll/2015) map based on a recent field visit and subsequent survey, the Department is led to conclude that Certificate 77326 should be corrected to reflect the correct quarter-quarter description within the NE¼ SE¼, Section 10.

Transfer Review Criteria [OAR 690-380-4010(2)]

- 13. Water has been used within the five-year period prior to submittal of the transfer application according to the terms and conditions of the rights. There is no information in the record that would demonstrate that these rights are subject to forfeiture under ORS 540.610.
- 14. Diversion structures, a well, ditches and district delivery system sufficient to use the full amount of water allowed under the existing rights were present within the five-year period prior to submittal of Transfer Application T-12185.
- 15. The proposed changes would not result in enlargement of the rights. As shown in Finding #11 above, the movement of the supplemental water right Certificate 76971 separately from its associated District primary water right to another place of use under the same District primary passes the "similar reliability" test and complies with OAR 690-380-2240(5).
- 16. The proposed changes would not result in injury to other water rights.

Partial Cancellation of a Water Right

17. On June 12, 2017, the Department received voluntary cancellation affidavits from John McElheran and Roseann McElheran, requesting to cancel a portion of Certificate 76971 appurtenant to Tax Lot 3000, within Sections 14 and 23, Township 4 South, Range 13 East, W.M.. The intent of the affidavits was to cancel the 45.4 acres without cancelling any quantity of water. Because Certificate 76971 authorizes a rate that is less than the full rate (i.e., 1/80 cfs per acre multiplied by the number of acres allowed under the certificate) and because the total allowed quantity of water (0.89 cfs) divided by the number of remaining acres (83.6) does not exceed 1/80 cfs per acre, the cancellation of 45.4 acres without reducing the total quantity of water may be authorized.

The portion of the right proposed to be cancelled is described as follows:

Certificate: 76971 in the name of DORCAS AND MARSHALL McELHERAN (perfected

under Permit G-7958)

Use: IRRIGATION of 6.9 ACRES and Supplemental Irrigation of 38.5 ACRES

Priority Date: February 14, 1978

Limit/Duty: The amount of water used for irrigation, together with the amount secured under

any other right existing for the same lands, shall be limited to 1/80th of one cfs per acre, or its equivalent for each acre irrigated, and shall be further limited to a diversion of not to exceed 3.0 acre-feet per acre for each acre irrigated during the

irrigation season of each year.

Determination and Proposed Action

The changes in place of use and character of use proposed in Transfer Application T-12185 appear to be consistent with the requirements of ORS 540.505 to 540.580 and OAR 690-380-5000. If protests are not filed pursuant to OAR 690-380-4030, the transfer application will be approved and the abandoned water right portion will be cancelled.

If application T-12185 is approved, the final order will include the following:

- 1. The changes in place of use and character of us proposed in application T-12185 are approved. The portion of the right that has been abandoned is cancelled.
- 2. The right to the use of the water is restricted to beneficial use at the place of use described, and is subject to all other conditions and limitations contained in Certificates 77326, 77733 and 76971 and any related decree.
- 3. Water right Certificate 76791 is cancelled. A certificate will be issued for that portion of Certificate 76971 NOT affected by this transfer.
- 4. Water right Certificates 77326 and 77733 are modified. The Department will issue superseding certificates describing the rights when it is determined that it is necessary for record keeping. The Department shall also make the needed revision to correct the POD description for the Clear Creek diversion in Certificate 77326 as described above in Finding #11 at that time.
- 5. The Director requires all existing meters to be maintained by the district, consistent with all permitted and certificated water uses.
- 6. The former places of use of the transferred rights shall no longer receive water under the rights.
- 7. The approved changes shall be completed and full beneficial use of the water shall be made on or before October 1, 2018. A Claim of Beneficial Use prepared by a Certified Water Right Examiner shall be submitted by the applicant to the Department within one year after the deadline for completion of the changes and full beneficial use of the water.

Reference: Water Right Transfer Application T-12185

Your water right transfer is in one of three phases of processing. Enclosed is a draft of our Preliminary Determination regarding Transfer Application T-12185. The document reflects the Department's conclusion that, based on the information currently available, the transfer will be approved.

Items needed before the next phase of processing...

- Please review the draft carefully to see if it accurately reflects the changes you intend to
 make, and to become familiar with all proposed conditions. You will need to respond in
 writing by the deadline provided below, whether you agree with the proposed action and
 conditions. Also we would appreciate having you let us know if there are typographical
 errors that need to be corrected.
- 2. A report of landownership for the lands to which the water rights are appurtenant (the "FROM" lands) is required. The report must be prepared by a title company and meet the criteria below. (Reports may be called by various names, such as List Kit, List Pack, Property Analysis Report (PAR), Customer Service Report, Lot Book Report, etc.)
 - a) The title company's report must either be:
 - i) prepared within 3 months of the draft Preliminary Determination showing current ownership, or
 - ii) prepared within 3 months of recording of a water right conveyance agreement, or
 - iii) prepared at any time, but showing ownership at the time a water right conveyance agreement was recorded.
 - b) The ownership report shall include:
 - i) Date reflected by the ownership information
 - ii) List of owners at that time
 - iii) Legal description of the property where the water right to be transferred is currently located.
 - c) You will need to submit a notarized statement of consent from any landowner listed in the ownership report who is not already included in the transfer application, or other information such as a water right conveyance agreement, if applicable.
- 3. Notice of this transfer will need to be published in a newspaper with general circulation in the area where the water rights are currently located. We will endeavor to request a quote from The Dalles Chronicle so we can get an accurate estimate of the cost. You will be responsible for the charges.

Conditions to your water right...

The Department requires that all current and existing measurement devices required within and by the Juniper Flat District Improvement Company be maintained.

Please note the proposed date by which all conditions must be met: October 1, 2018. If the required completion date is insufficient to comply with any of the conditions, you may extend the date at no cost to you during this stage of processing. Please let me know by the comment deadline so we can make the proper arrangements to get you the time you need.

What happens next...

Once the Preliminary Determination is issued a publication period is required. Because of a change in character of use, the Department will publish notice of the transfer in a local newspaper having a general circulation in the area of the water right at least once per week for two consecutive weeks. You are responsible for sending a check to cover the cost of publication prior to the issuance of the Preliminary Determination and publication of notice.

Issuance of the Preliminary Determination will occur shortly after we receive:

- 1. your written response to the conditions and proposed action in the draft Preliminary Determination (e-mail is acceptable); and
- 2. report of ownership, and affidavits of consent from any landowners shown in the ownership report who have not signed the transfer application.

If we do not receive the items listed above by July 31, 2017, a Preliminary Determination may be issued denying the application as incomplete.

Please do not hesitate to contact me at 541-278-5456 or Ken.D.Dowden@oregon.gov if I may be of assistance.

Sincerely

Ken Dowden

Authority

Oregon Revised Statutes (ORS) 540.505 to 540.580 establish the process in which a water right holder may submit a request to transfer the point of diversion, place of use, or character of use authorized under an existing water right. Oregon Administrative Rules (OAR) Chapter 690, Division 380 implement the statutes and provides the Department's procedures and criteria for evaluating transfer applications.

ORS 540.621 establishes the process for the owner of land to which a water right is appurtenant to certify under oath that the water right, or a portion thereof, has been abandoned and to voluntarily request that it be cancelled.

Findings of Fact

- On October 13, 2017, John McElheran filed an application to change the place of use and character of use under portions of Certificates 77326, 77733 and 76971. The Department assigned the application number T-12185.
- Notice of the application for transfer was published on October 20, 2015, pursuant to OAR 690-380-4000. No comments were filed in response to the notice.
- On April 27, 2017, and June 1, 2017, the agent for the applicant submitted a revised application
 to clarify the places of use. On June 22, 2017, the agent for the applicant submitted another
 revised application to describe the place of use.

12. Certificate 77326 contains a scrivener's error in its quarter-quarter description for the Point of Diversion (POD) for the Clear Creek diversion described above in Findings #4 and #6. The certificate incorrectly lists the quarter-quarter as the NW¹/₄ SE¹/₄. Based on the Juniper Flat District Improvement Company's HB3111 maps and the applicant's Certified Water Rights Examiner's current (Toll/2015) map based on a recent field visit and subsequent survey, the Department is led to conclude that Certificate 77326 should be corrected to reflect the correct quarter-quarter description within the NE¹/₄ SE¹/₄, Section 10.

Transfer Review Criteria [OAR 690-380-4010(2)]

- 13. Water has been used within the five-year period prior to submittal of the transfer application according to the terms and conditions of the rights. There is no information in the record that would demonstrate that these rights are subject to forfeiture under ORS 540.610.
- 14. Diversion structures, a well, ditches and district delivery system sufficient to use the full amount of water allowed under the existing rights were present within the five-year period prior to submittal of Transfer Application T-12185.
- 15. The proposed changes would not result in enlargement of the rights. As shown in Finding #11 above, the movement of the supplemental water right Certificate 76971 separately from its associated District primary water right to another place of use under the same District primary passes the "similar reliability" test and complies with OAR 690-380-2240(5).
- 16. The proposed changes would not result in injury to other water rights.

Partial Cancellation of a Water Right

17. On June 12, 2017, the Department received voluntary cancellation affidavits from John McElheran and Roseann McElheran, requesting to cancel a portion of Certificate 76971 appurtenant to Tax Lot 3000, within Sections 14 and 23, Township 4 South, Range 13 East, W.M.. The intent of the affidavits was to cancel the 45.4 acres without cancelling any quantity of water. Because Certificate 76971 authorizes a rate that is less than the full rate (i.e., 1/80 cfs per acre multiplied by the number of acres allowed under the certificate) and because the total allowed quantity of water (0.89 cfs) divided by the number of remaining acres (83.6) does not exceed 1/80 cfs per acre, the cancellation of 45.4 acres without reducing the total quantity of water may be authorized.

The portion of the right proposed to be cancelled is described as follows:

Certificate: 76971 in the name of DORCAS AND MARSHALL McELHERAN (perfected

under Permit G-7958)

Use: IRRIGATION of 6.9 ACRES and Supplemental Irrigation of 38.5 ACRES

Priority Date: February 14, 1978

Limit/Duty: The amount of water used for irrigation, together with the amount secured under

any other right existing for the same lands, shall be limited to 1/80th of one cfs per acre, or its equivalent for each acre irrigated, and shall be further limited to a diversion of not to exceed 3.0 acre-feet per acre for each acre irrigated during the

irrigation season of each year.

Determination and Proposed Action

The changes in place of use and character of use proposed in Transfer Application T-12185 appear to be consistent with the requirements of ORS 540.505 to 540.580 and OAR 690-380-5000. If protests are not filed pursuant to OAR 690-380-4030, the transfer application will be approved and the abandoned water right portion will be cancelled.

If application T-12185 is approved, the final order will include the following:

- 1. The changes in place of use and character of us proposed in application T-12185 are approved. The portion of the right that has been abandoned is cancelled.
- 2. The right to the use of the water is restricted to beneficial use at the place of use described, and is subject to all other conditions and limitations contained in Certificates 77326, 77733 and 76971 and any related decree.
- 3. Water right Certificate 76791 is cancelled. A certificate will be issued for that portion of Certificate 76971 NOT affected by this transfer.
- 4. Water right Certificates 77326 and 77733 are modified. The Department will issue superseding certificates describing the rights when it is determined that it is necessary for record keeping. The Department shall also make the needed revision to correct the POD description for the Clear Creek diversion in Certificate 77326 as described above in Finding #11 at that time.
- 5. The Director requires all existing meters to be maintained by the district, consistent with all permitted and certificated water uses.
- 6. The former places of use of the transferred rights shall no longer receive water under the rights.
- 7. The approved changes shall be completed and full beneficial use of the water shall be made on or before October 1, 2018. A Claim of Beneficial Use prepared by a Certified Water Right Examiner shall be submitted by the applicant to the Department within one year after the deadline for completion of the changes and full beneficial use of the water.

 After satisfactory proof of be issued for Certificate 76971. 		, a new confirming right certificate shall be
Dated at Salem, Oregon this	day of	2017.

SUBJECT: Water Right Transfer Application T-12185

Your water right transfer is ready for issuance of the Preliminary Determination, once the Department receives payment for publication of the newspaper notice.

Items needed before the next phase of processing...

At this time you need to:

- submit a check for \$90.00 (to cover cost of publication of the notice), made out to the Oregon Water Resources Department.
- 2. write "for T-12185 NOTICE" on the front of your check, and
- 3. submit it with the tracking stub at the bottom of this letter.

Mail the check to 725 Summer St. NE, Suite A, Salem, OR 97301-1266, no later than August 27, 2017.

What happens next...

Shortly after receiving payment, the Department will issue the Preliminary Determination, initiate publication in The Dalles Chronicle newspaper, and also publish the notice on the Department's weekly notice. Publication of the notice will initiate a protest period during which any person may file either a protest opposing the decision proposed by the Department in the Preliminary Determination or a standing statement supporting the Department's decision.

If we do not receive payment for newspaper notice by August 27, 2017, a Preliminary Determination may be issued denying the application as incomplete.

Please do not hesitate to contact me at 541-278-5456 or Ken.D.Dowden@oregon.gov if I may be of assistance.

Sincerely,

Ken Dowden

Additional remarks: I do not believe that the map for Juniper Flat DIC is totally accurate in describing the place of use on my property. I have 90 acres of JFDIC irrigation water rights. I wish to move 5 acres off and leave the remaining 85 acres in the center pivot. In the above table all of the water rights on Tax Lot 3000 are listed on the left as described in the certificate. On the right it shows I am moving 5 acres and what I believe is the correct location of the remaining 85 acres within the center pivot.

the number listed is the number of acres being converted from irrigation to pond maintenance.

Juniper Flats tracks these uses as "acre equivalents" to know how much to assess the landowner for and how much water to deliver.

For Place of Use or Character of Use Changes

Are there other water right certificates, water use permits or ground water registrations associated with the "from" or the "to" lands? \boxtimes Yes \square No

Pursuant to ORS 540.510, any "layered" water use such as an irrigation right that is supplemental to a primary right proposed for transfer must be included in the transfer or be cancelled. Any change to a ground water registration must be filed separately in a ground water registration modification application.

Describe the construction of the authorized and proposed well(s) in Table 3 for any wells that do not have a well log. For *proposed wells not yet constructed or built*, provide "a best estimate" for each requested information element in the table. The Department recommends you consult a licensed well driller, geologist, or certified water right examiner to assist with assembling the information necessary to complete Table 3.

Any well(s) in this listing must be clearly tied to corresponding well(s) described in Table 1 and shown on the accompanying application map. Failure to provide the information will delay the processing of your transfer application until it is received. The information is necessary for the department to assess whether the proposed well(s) will access the same source aquifer as the authorized point(s) of appropriation

Additional remarks: Any acreage that is not in the proposed location column is proposed to be canceled. The total to be canceled is 6.9 acres of irrigation and 38.5 acres of supplemental irrigation. This will leave 7.1 acres of irrigation and 85 acres of supplemental irrigation in the location described about. Since Certificate 76971 was not issued for the maximum allowable rate of water, I wish to cancel no water and move the entire 0.89 cfs to the location described above. 	□ N/A	Certified Water Right Examiner (CWRE) Stamp and Original Signature. For a list of CWREs, see http://apps.wrd.state.or.us/apps/wr/cwre_license_view/ . CWRE stamp and signature are not required for substitutions.
	⊠ N/A	If more than three water rights are involved, separate maps are needed for each water right.
		Permanent quality printed with dark ink on good quality paper.
		The size of the map can be $8\frac{1}{2} \times 11$ inches, $8\frac{1}{2} \times 14$ inches, 11×17 inches, or up to 30×30 inches. For 30×30 inch maps, one extra copy is required.
		A north arrow, a legend, and scale.
		The scale of the map must be: 1 inch = 400 feet, 1 inch = 1,320 feet, the scale of the Final Proof/Claim of Beneficial Use Map (the map used when the permit was certificated), the scale of the county assessor map if the scale is not smaller than 1 inch = 1,320 feet, or a scale that has been pre-approved by the Department.
		Township, Range, Section, ¼ ¼, DLC, Government Lot, and other recognized public land survey lines.
		Tax lot boundaries (property lines) are required. Tax lot numbers are recommended.
		Major physical features including rivers and creeks showing direction of flow, lakes and reservoirs, roads, and railroads.
		Major water delivery system features from the point(s) of diversion/appropriation such as main pipelines, canals, and ditches.
		Existing place of use that includes separate hachuring for each water right, priority date, and use including number of acres in each quarter-quarter section, government lot, or in each quarter-quarter section as projected within government lots, donation land claims, or other recognized public land survey subdivisions. If less than the entirety of the water right is being changed, a separate hachuring is needed for lands left unchanged.
		Proposed place of use that includes separate hachuring for each water right, priority date, and use including number of acres in each quarter-quarter section, government lot, or in each quarter-quarter section as projected within government lots, donation land claims, or other recognized public land survey subdivisions.
		Existing point(s) of diversion or well(s) with distance and bearing or coordinates from a recognized survey corner. This information can be found in your water right certificate or permit.
RECEIVERBY		If you are proposing a change in point(s) of diversion or well(s), show the proposed location

*Example for Line 5a calculation to transfer 45.0 acres of Primary Certificate 12345 (total 1.25 cfs for 100 acres) and 45.0 acres of Supplemental Certificate 87654 (1/80 cfs per acre) on the same land:

1. For irrigation calculate cfs for each water right involved as follows:

a. Divide total authorized cfs by total acres in the water right (for C12345, 1.25 cfs ÷100 ac); then multiply by the number of acres to be transferred to get the transfer cfs (x 45 ac= 0.56 cfs).

b. If the water right certificate does not list total cfs, but identifies the allowable use as 1/40 or 1/80 of a cfs per acre; multiply number of acres proposed for change by either 0.025 (1/40) or 0.0125 (1/80). (For C87654, 45.0 ac x 0.0125 cfs/ac = 0.56 cfs)

2. Add cfs for the portions of water rights on all the land included in the transfer; however do not count cfs for supplemental rights on acreage for which you have already calculated the cfs fee for the primary right on the same land. The fee should be assessed only once for each "on the ground" acre included in the transfer. (In this example, blank 5a would be only 0.56 cfs, since both rights serve the same 45.0 acres. Blank 5b would be 0 and Line 5 would then also become 0).

Additional remarks: I do not believe that the map for Juniper Flat DIC is totally accurate in describing the place of use on my property. I have 90 acres of JFDIC irrigation water rights. I wish to move 5 acres off and leave the remaining 85 acres in the center pivot. In the above table all of the water rights on Tax Lot 3000 are listed on the left as described in the certificate. On the right it shows I am moving 5 acres and what I believe is the correct location of the remaining 85 acres within the center pivot.

the number listed is the number of acres being converted from irrigation to pond maintenance. Juniper Flats tracks these uses as "acre equivalents" to know how much to assess the landowner for and how much water to deliver.

For Place of Use or Character of Use Changes Are there other water right certificates, water use permits or ground water registrations associated with the "from" or the "to" lands?

✓ Yes

No If YES, list the certificate, water use permit, or ground water registration numbers: 77733 & 76971. Pursuant to ORS 540.510, any "layered" water use such as an irrigation right that is supplemental to a primary right proposed for transfer must be included in the transfer or be cancelled. Any change to a ground water registration must be filed separately in a ground water registration modification application. For Substitution (ground water supplemental irrigation will be substituted for surface water primary irrigation) RECEIVED BY OWRD Ground water supplemental Permit or Certificate # ____; Surface water primary Certificate # . OCT 1 3 2015 For a change from Supplemental Irrigation Use to Primary Irrigation Use SALEM, OR Identify the primary certificate to be cancelled. Certificate # For a change in point(s) of appropriation (well(s)) or additional point(s) of appropriation: Well log(s) are attached for each authorized and proposed well(s) that are clearly labeled and associated with the corresponding well(s) in Table 1 above and on the accompanying application map. Tip: You may search for well logs on the Department's web page at: http://apps.wrd.state.or.us/apps/gw/well_log/Default.aspx AND/OR Describe the construction of the authorized and proposed well(s) in Table 3 for any wells that do not have a well log. For proposed wells not yet constructed or built, provide "a best estimate" for each requested information element in the table. The Department recommends you consult a licensed well driller, geologist, or certified water right examiner to assist with assembling the information necessary to complete Table 3.

Table 3. Construction of Point(s) of Appropriation

Any well(s) in this listing must be clearly tied to corresponding well(s) described in Table 1 and shown on the accompanying application map. Failure to provide the information will delay the processing of your transfer application until it is received. The information is necessary for the department to assess whether the proposed well(s) will access the same source aquifer as the authorized point(s) of appropriation (POA). The Department is prohibited by law from approving POA changes that do not access the same source aquifer.

STATE OF OREGON

COUNTY OF WASCO

CERTIFICATE OF WATER RIGHT

THIS CERTIFICATE ISSUED TO

JUNIPER FLAT DISTRICT IMPROVEMENT COMPANY 53333 RESERVATION ROAD MAUPIN, OR 97037

confirms the right to use the waters of DIRECT FLOW FROM CLEAR CREEK AND FROG CREEK AND STORAGE OF 1400 ACRE FEET IN CLEAR LAKE RESERVOIR, a tributary of WHITE RIVER, for IRRIGATION OF 2101.64 ACRES, STOCK, AND MAINTENANCE OF STOCK PONDS (5.85 ACRE EQUIVALENTS).

This right was confirmed by decree of the Circuit Court of the State of Oregon for WASCO COUNTY. The decree is of record at Salem, in the Order Record of the WATER RESOURCES DIRECTOR, in Volume 14 & 18, at Page 398 & 252. The date of priority is JULY 1, 1903 FOR DIRECT FLOW FROM CLEAR CREEK AND FROG CREEK, AND AUGUST 19, 1904, FOR STORAGE IN CLEAR LAKE RESERVOIR.

The amount of water to which this right is entitled is limited to an amount actually beneficially used and shall not exceed ONE ACRE FOOT PER ACRE OR ACRE EQUIVALENT DURING ANY 30-DAY PERIOD UP TO JULY 1ST OF EACH YEAR AND NOT TO EXCEED 3 ACRE FEET PER ACRE OR ACRE EQUIVALENT DURING ANY IRRIGATION SEASON; PROVIDED, THAT THE RATE OF FLOW SHALL NOT EXCEED 1/40 OF A SECOND FOOT PER ACRE OR ACRE EQUIVALENT UP TO JULY 1ST OF EACH YEAR AND THEREAFTER NOT TO EXCEED 1/80 OFA SECOND FOOT PER ACRE OR ACRE EQUIVALENT, EXCEPT IN CASE OF ROTATION.

The point of diversion is located as follows:

NE¼ NE¼, SECTION 34, T. 4 S., R. 9 E., W. M. FROM FROG CREEK; NW¼ SE¼, SECTION 10, T. 5 S., R. 9 E., W.M. FROM CLEAR CREEK; CLEAR LAKE RESERVOIR DAM IS IN THE SE¼ SE¼, SECTION 32, T. 4 S., R. 9 E., W.M.

The use shall conform to any reasonable rotation system ordered by the proper state officer.

A description of the place of use to which this right is appurtenant is as follows:

NOTE TO APPLICANTS

In order for your application to be processed by the Water Resources Department (WRD), this Land Use Information Form must be completed by a local government planning official in the jurisdiction(s) where your water right will be used and developed. The planning official may choose to complete the form while you wait, or return the receipt stub to you. Applications received by WRD without the Land Use Form or the receipt stub will be returned to you. Please be aware that your application will not be approved without land use approval.

This form is NOT required if:

- 1) Water is to be diverted, conveyed, and/or used only on federal lands; OR
- 2) The application is for a water right transfer, allocation of conserved water, exchange, permit amendment, or ground water registration modification, and <u>all</u> of the following apply:
 - a) The existing and proposed water use is located entirely within lands zoned for exclusive farm-use or within an irrigation district;
 - b) The application involves a change in place of use only;
 - c) The change does not involve the placement or modification of structures, including but not limited to water diversion, impoundment, distribution facilities, water wells and well houses; and
 - d) The application involves irrigation water uses only.

NOTE TO LOCAL GOVERNMENTS

The person presenting the attached Land Use Information Form is applying for or modifying a water right. The Water Resources Department (WRD) requires its applicants to obtain land-use information to be sure the water rights do not result in land uses that are incompatible with your comprehensive plan. Please complete the form or detach the receipt stub and return it to the applicant for inclusion in their water right application. You will receive notice once the applicant formally submits his or her request to the WRD. The notice will give more information about WRD's water rights process and provide additional comment opportunities. You will have 30 days from the date of the notice to complete the land-use form and return it to the WRD. If no land-use information is received from you within that 30-day period, the WRD may presume the land use associated with the proposed water right is compatible with your comprehensive plan. Your attention to this request for information is greatly appreciated by the Water Resources Department. If you have any questions concerning this form, please contact the WRD's Customer Service Group at 503-986-0801.

Reference: Application T- 12185

On October 13, 2015, we received your water right Transfer application. The application was accompanied by \$3000.00. Our receipt number 117709 is enclosed.

By copy of this letter, we are asking the Watermaster for a report regarding the potential for injury to existing water rights which may be caused by the requested change.

Your application will be examined to determine whether additional information is needed. We will notify you if further information or corrections to the application or map are required.

This application <u>may</u> require publication of a notice for two consecutive weeks in a newspaper with general circulation in the area where the water right is located. If it is determined that newspaper notice will be required, the Department will prepare the notice and notify you of the cost. You will be responsible for submitting payment to the Department prior to publication of the notice.

Except as provided under ORS 540.510(3) for municipalities, you may not use water for the new use or in the new place of use until a final order approving the transfer application has been issued by the Department.

In order to avoid any possible forfeiture of the water right, you should continue to use the water as described by your existing water right.

If the land is sold before the application is approved, the buyer's consent to the application will be required unless a recorded deed or other legal document clearly established that the water right was not conveyed in the sale.

Refer to the following page for a chart showing the steps and expected timelines for the processing of your application.

If you have any questions, please contact the Transfer Section at (503) 986-0807.

Preliminary Determination Issued

Notice of Preliminary Determination

in WRD Weekly Notice and, if statutorily required, in newspaper once a week for 2 or 3 consecutive weeks.

Protest Period ends 30 days after WRD notice, or 30 days after last date of newspaper publication, whichever is later.

Period for developing authorized changes begins as soon as an order is issued approving the changes. If the certificate has been cancelled the right goes into an inchoate state.

Deadline for completion of the changes.

The applicant must make full beneficial use under terms and conditions of the order by the deadline or request an extension of time, or inform the department that he does not intend to complete the change.

If the applicant decides not to complete a change in POD/POA, the Department will issue an order reverting the right to the original POD/POA and issue a new certificate. However, if any other type of change is not completed, the transferred portion of the right is forfeited.

An order may be issued, granting an extension of time for completing the changes.

Applicant submits a Claim of Beneficial
Use prepared by a CWRE within one year
after the completion deadline or the date of
complete beneficial use. There is no
provision for extending the deadline for
submission of the Claim.

Water Right Services Division reviews the Claim, determines whether proof has been made and if so, issues a new certificate. Right is no longer inchoate, but perfected and subject to being transferred.

Transfer Applications: Regular

The holder of a water right may apply to permanently change an existing water use subject to transfer as defined in ORS 540.505(4). An application may involve any of the following changes: Point of diversion or appropriation; Additional point of diversion or appropriation; Historic POD; Place of use; Character of use; Instream; Substitution; or Exchange.

The Department seeks public comment on the recently-filed transfer applications listed below. Any person may comment on a transfer application. Comments must be received by the Department on or before November 19, 2015. Any person who provides comments within the comment period will receive a copy of the Department's preliminary determination of whether the application should be approved or rejected after the Department has completed a review of the application and will be provided an opportunity to protest the application and preliminary determination at that time.
