BEFORE THE WATER RESOURCES DEPARTMENT
OF THE
STATE OF OREGON

In the Matter of Permit Amendment) FINAL ORDER
T-14007, Benton County) APPROVING A CHANGE IN PLACE OF USE

Authority

Oregon Revised Statute (ORS) 537.211 establishes the process in which a water right permit holder may submit a request to change the point of appropriation and/or place of use authorized under an existing water right permit.

Applicant

VINEYARD MOUNTAIN WATER AND IMPROVEMENT DISTRICT
6495 NW CONCORD
CORVALLIS, OR 97330

Findings of Fact

1. On June 12, 2017, VINEYARD MOUNTAIN WATER AND IMPROVEMENT DISTRICT filed an application to change the place of use under Permit G-18326. The Department assigned the application number T-14007.
2. On April 23, 2002 the Department approved an extension of time for complete application of water to October 1, 2019.
3. On February 14, 2020, the Department approved an extension of time for complete application of water to October 1, 2096.
4. Notice of the application for the permit amendment was published in the Department's weekly notice on June 7, 2022, pursuant to ORS 540.520(5).
5. Permit Amendment Application T-14007 proposes to change the place of use of the permit to:

This is a final order in other than contested case. This order is subject to judicial review under ORS 183.484. Any petition for judicial review must be filed within the 60 day time period specified by ORS 183.484(2). Pursuant to ORS 536.075 and OAR 137-004-0080 and OAR 690-01-0005 you may either petition for judicial review or petition the Director for reconsideration of this order. A petition for reconsideration may be granted or denied by the Director, and if no action is taken within 60 days following the date the petition was filed, the petition shall be deemed denied.

Permit Amendment Review Criteria

6. The change would not result in injury to other water rights.
7. The proposed place of use is owned and/or controlled by the permit holder.
8. The change does not enlarge the permit.
9. The change does not alter any other terms of the permit.
10. The proposed place of use is contiguous to the authorized place of use.

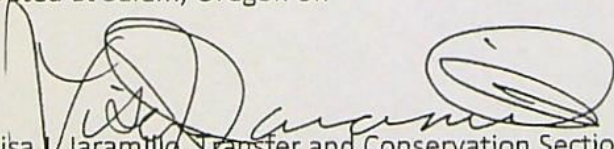

Conclusions of Law

The change in place of use proposed by Permit Amendment Application T-14007 is consistent with the requirements of ORS 537.211.

Now, therefore, it is ORDERED:

1. The change in place of use proposed by Permit Amendment Application T-14007 is approved.
2. Permit G-18823, in the name of VINEYARD MOUNTAIN WATER AND IMPROVEMENT DISTRICT, is issued to replace Permit G-17846, and incorporates the amendments approved by this order and the extension of time. Permit G-17846, in the name of VINEYARD MOUNTAIN WATER AND IMPROVEMENT DISTRICT, is no longer of any force or effect.
3. The former place of use shall no receive water under this permit.
4. All other terms and conditions of Permit G-18823 remain the same.

Permit Amendment T-14007 Conditions:

The former place of use shall no receive water under this permit.

Permit Amendment T-12684 Conditions:

The quantity of water diverted at the new point of appropriation (Well 5), shall not exceed the quantity of water lawfully available at the original point of appropriation (Well 1).

Permit Amendment T-8868 Conditions:

The quantity of water diverted at the new point of appropriation (well), together with that diverted at the authorized points of appropriation (wells), shall not exceed the maximum rate allowed under the water right permit.

The water user shall install and maintain a headgate, an in-line flow meter, weir, or other suitable device for measuring and recording the quantity of water diverted. The type and plans

of the headgate and measuring device must be approved by the Department prior to beginning construction and shall be installed under the general supervision of the Department.

Water shall be acquired from the same aquifer as the original points of appropriation.

Extension of Time Conditions:

Checkpoint Condition

The permit holder must submit a completed Progress Report Form to the Department by October 1, 2020, 2025, 2030, 2035, 2040, 2045, 2050, 2055, 2060, 2065, 2070, 2075, 2080, 2085, 2090, and 2095.

- a) At each checkpoint, the permit holder shall submit and the Department shall review evidence of the permit holder's diligence towards completion of the project and compliance with terms and conditions of the permit and extension. If, after this review, the Department determines the permit holder has not been diligent in developing and perfecting the water use permit, or complied with all terms and conditions, the Department shall modify or further condition the permit or extension to ensure future compliance, or begin cancellation proceedings on the undeveloped portion of the permit pursuant to ORS 537.260 or 537.410, or require submission of a final proof survey pursuant to ORS 537.250;
- b) The Department shall provide notice of receipt of progress reports in its weekly notice and shall allow a 30 day comment period for each report. The Department shall provide notice of its determination to anyone who submitted comments.

Last Extension Condition

This shall be the last extension of time granted for Permit G 18326. Any future extensions of time request will be denied.

Development Benchmark Condition

The permit holder is required to submit a Claim of Beneficial Use within one year of the submittal of a Progress Report, as described in Item 1 of this section, which demonstrates that 130 homes have been connected to the District water system, and full beneficial use of the water has been made. Upon determination by the Department, that the Progress Report submitted demonstrates full development of the permit, the Department may order the permit holder to submit a Claim of Beneficial Use within one year.

Original Permit Conditions:

Measurement, recording and reporting conditions:

- A. Before water use may begin under this permit, the permittee shall install a meter or other suitable measuring device as approved by the Director. The permittee shall maintain the meter or measuring device in good working order.

- B. The permittee shall allow the watermaster access to the meter or measuring device; provided however, where the meter or measuring device is located within a private structure, the watermaster shall request access upon reasonable notice.
- C. The Director may require the permittee to keep and maintain a record of the amount (volume) of water used and may require the permittee to report water use on a periodic schedule as established by the Director. In addition, the Director may require the permittee to report general water use information, the periods of water use and the place and nature of use of water under the permit. The Director may provide an opportunity for the permittee to submit alternative reporting procedures for review and approval

If substantial interference with a senior water right occurs due to withdrawal of water from any well listed on this permit, then use of water from the well(s) shall be discontinued or reduced and/or the schedule of withdrawal shall be regulated until or unless the Department approves or implements an alternative administrative action to mitigate the interference. The Department encourages junior and senior appropriators to jointly develop plans to mitigate interferences.

STANDARD CONDITIONS

The wells shall be constructed in accordance with the General Standards for the Construction and Maintenance of Water Wells in Oregon. The works shall be equipped with a usable access port, and may also include an air line and pressure gauge adequate to determine water level elevation in the well at all times.

The use shall conform to such reasonable rotation system as may be ordered by the proper state officer.

Prior to receiving a certificate of water right, the permit holder shall submit the results of a pump test meeting the department's standards, to the Water Resources Department. The Director may require water level or pump test results every ten years thereafter.

Failure to comply with any of the provisions of this permit may result in action including, but not limited to, restrictions on the use, civil penalties, or cancellation of the permit.

This permit is for the beneficial use of water without waste. The water user is advised that new regulations may require the use of best practical technologies or conservation practices to achieve this end.

By law, the land use associated with this water use must be in compliance with statewide land-use goals and any local acknowledged land-use plan.

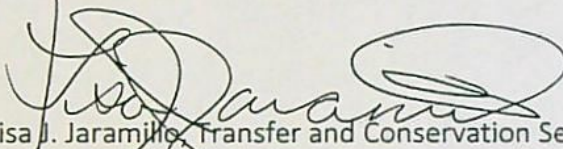

The use of water shall be limited when it interferes with any prior surface or ground water rights.

The Director finds that the proposed use(s) of water described by this permit, as conditioned, will not impair or be detrimental to the public interest.

Actual construction of the well was to begin within one year from permit issuance (March 15, 1996) and was to be completed on or before October 1, 1998. Complete application of the water was to be made on or before October 1, 1999. By an Extension of Time Final Order dated February 14, 2020, the completion of construction was extended to October 1, 2096, and the completion of the application of the water was extended to on or before October 1, 2096.

On May 23, 2022, OWRD received your water right Permit Amendment Application. The application was accompanied by \$1360.00. Our receipt number 138238 is enclosed.

By copy of this letter, we are asking the Watermaster for a report regarding the potential for injury to existing water rights which may be caused by the requested change.

This application may require publication of a notice for two consecutive weeks in a newspaper with general circulation in the area where the water right is located. If it is determined that newspaper notice will be required, the Department will prepare the notice and notify you of the cost. You will be responsible for submitting payment to the Department prior to publication of the notice.

Except as provided under ORS 540.510(3) for municipalities, you may not use water in the new place of use until a final order approving the application has been issued by the Department.

Refer to the following page for a chart showing the steps and expected timelines for the processing of your application.

*Example for Line 5a calculation to transfer 45.0 acres of Primary Permit S-12345 (total 1.25 cfs for 100 acres) and 45.0 acres of Supplemental Permit S-87654 (1/80 cfs per acre) on the same land:

- For irrigation calculate cfs for each permit involved as follows:
 - Divide total authorized cfs by total acres in the permit (for S-12345, $1.25 \text{ cfs} \div 100 \text{ ac}$); then multiply by the number of acres to be changed to get the application cfs ($\times 45 \text{ ac} = 0.56 \text{ cfs}$).
 - If the water right permit does not list total cfs, but identifies the allowable use as 1/40 or 1/80 of a cfs per acre; multiply number of acres proposed for change by either 0.025 (1/40) or 0.0125 (1/80). (For S-87654, $45.0 \text{ ac} \times 0.0125 \text{ cfs/ac} = 0.56 \text{ cfs}$)
- Add cfs for the portions of permits on all the land included in the application; however **do not count cfs for supplemental permits on acreage for which you have already calculated the cfs fee for the primary permit on the same land.** The fee should be assessed only once for each "on the ground" acre included in the application. (In this example, blank 5a would be only 0.56 cfs, since both permits serve the same 45.0 acres. Blank 5b would be 0 and Line 5 would then also become 0).

Explain in your own words what you propose to accomplish with this permit amendment; and why:
 The water district is trying to correct an issue that was previously misfiled. The place of use and type of use were incorrectly described in the original water right, and they are being changed to match existing water use of quasi-municipal.
 If you need additional space, continue on a separate piece of paper and attach to the application as "Attachment 1".

Check this box if this project is fully or partially funded by the American Recovery and Reinvestment Act. (Federal stimulus dollars)

Is the applicant the permit holder of record? Yes No

If NO, include either:

- A completed assignment form (with required statutory assignment fee), assigning all or a portion of the permit to the applicant(s), OR
- An affidavit of consent from the permit holder(s) of record that gives permission for the applicant to amend the permit.

Has the Completion ("C") Date of the permit(s) in this application expired? Yes No

Are there other water rights certificates, water use permits or ground water registrations associated with the "from" or "to" lands? Yes No

If YES, list the other certificate, permit, or ground water registration numbers: GR-1418 (groundwater modification application is in progress and will be submitted separately)

 If the permit(s) are for irrigation or supplemental irrigation use, other water rights existing on the same land for irrigation that are subject to transfer must either change concurrently or be cancelled. Any change to a water right certificate or ground water registration must be filed separately in a water right transfer application or ground water registration modification application, respectively.

For a change in point(s) of appropriation (well(s)) or additional point(s) of appropriation:

- Well log(s) are attached for each authorized and proposed well(s) that are clearly labeled and associated with the corresponding well(s) in Table 1 above and on the accompanying application map. (Tip: You may search for well logs on the Department's web page at: http://apps.wrd.state.or.us/apps/gw/well_log/Default.aspx)

AND/OR

- Describe the construction of the authorized and proposed well(s) in Table 3 for any wells that do not have a well log. For *proposed wells not yet constructed or built*, provide "a best estimate" for each requested information element in the table. The Department recommends you consult a licensed well driller, geologist, or certified water right examiner to assist with assembling the information necessary to complete Table 3.

Table 3. Construction of Point(s) of Appropriation

Any well(s) in this listing must be clearly tied to corresponding well(s) described in Table 1 and shown on the accompanying application map. Failure to provide the information will delay the processing of your transfer application until it is received. The information is necessary for the department to assess whether the proposed well(s) will access the same source aquifer as the authorized point(s) of appropriation (POA). The Department is prohibited by law from approving POA changes that do not access the same source aquifer.

Good Afternoon Natalie,

The Department grants a map scale waiver for the [application maps](#). Please include a copy of this email when you file the applications.

As to your evidence of use question, evidence of use is not required for GR Modifications. The Department is not authorized to make a determination of use of a Groundwater Registration. The adjudication court will do that whenever the Groundwater Registrations are adjudicated. Secondly, it appears that you will need to file a permit amendment application instead of a transfer application for Permit G-18326. The permit has not been certificated yet and indeed appears to have been extended to 2096. Evidence of use is not required for a permit amendment.

Hope this helps! If you have any questions, please do not hesitate to contact me.

Hello Kelly,

Here are the two maps I'd like to have the scale okayed. They are for the same area, but one is a water right transfer and the other is a groundwater claim modification. Please let me know if this is ok. The scale on both is 1"=500ft.

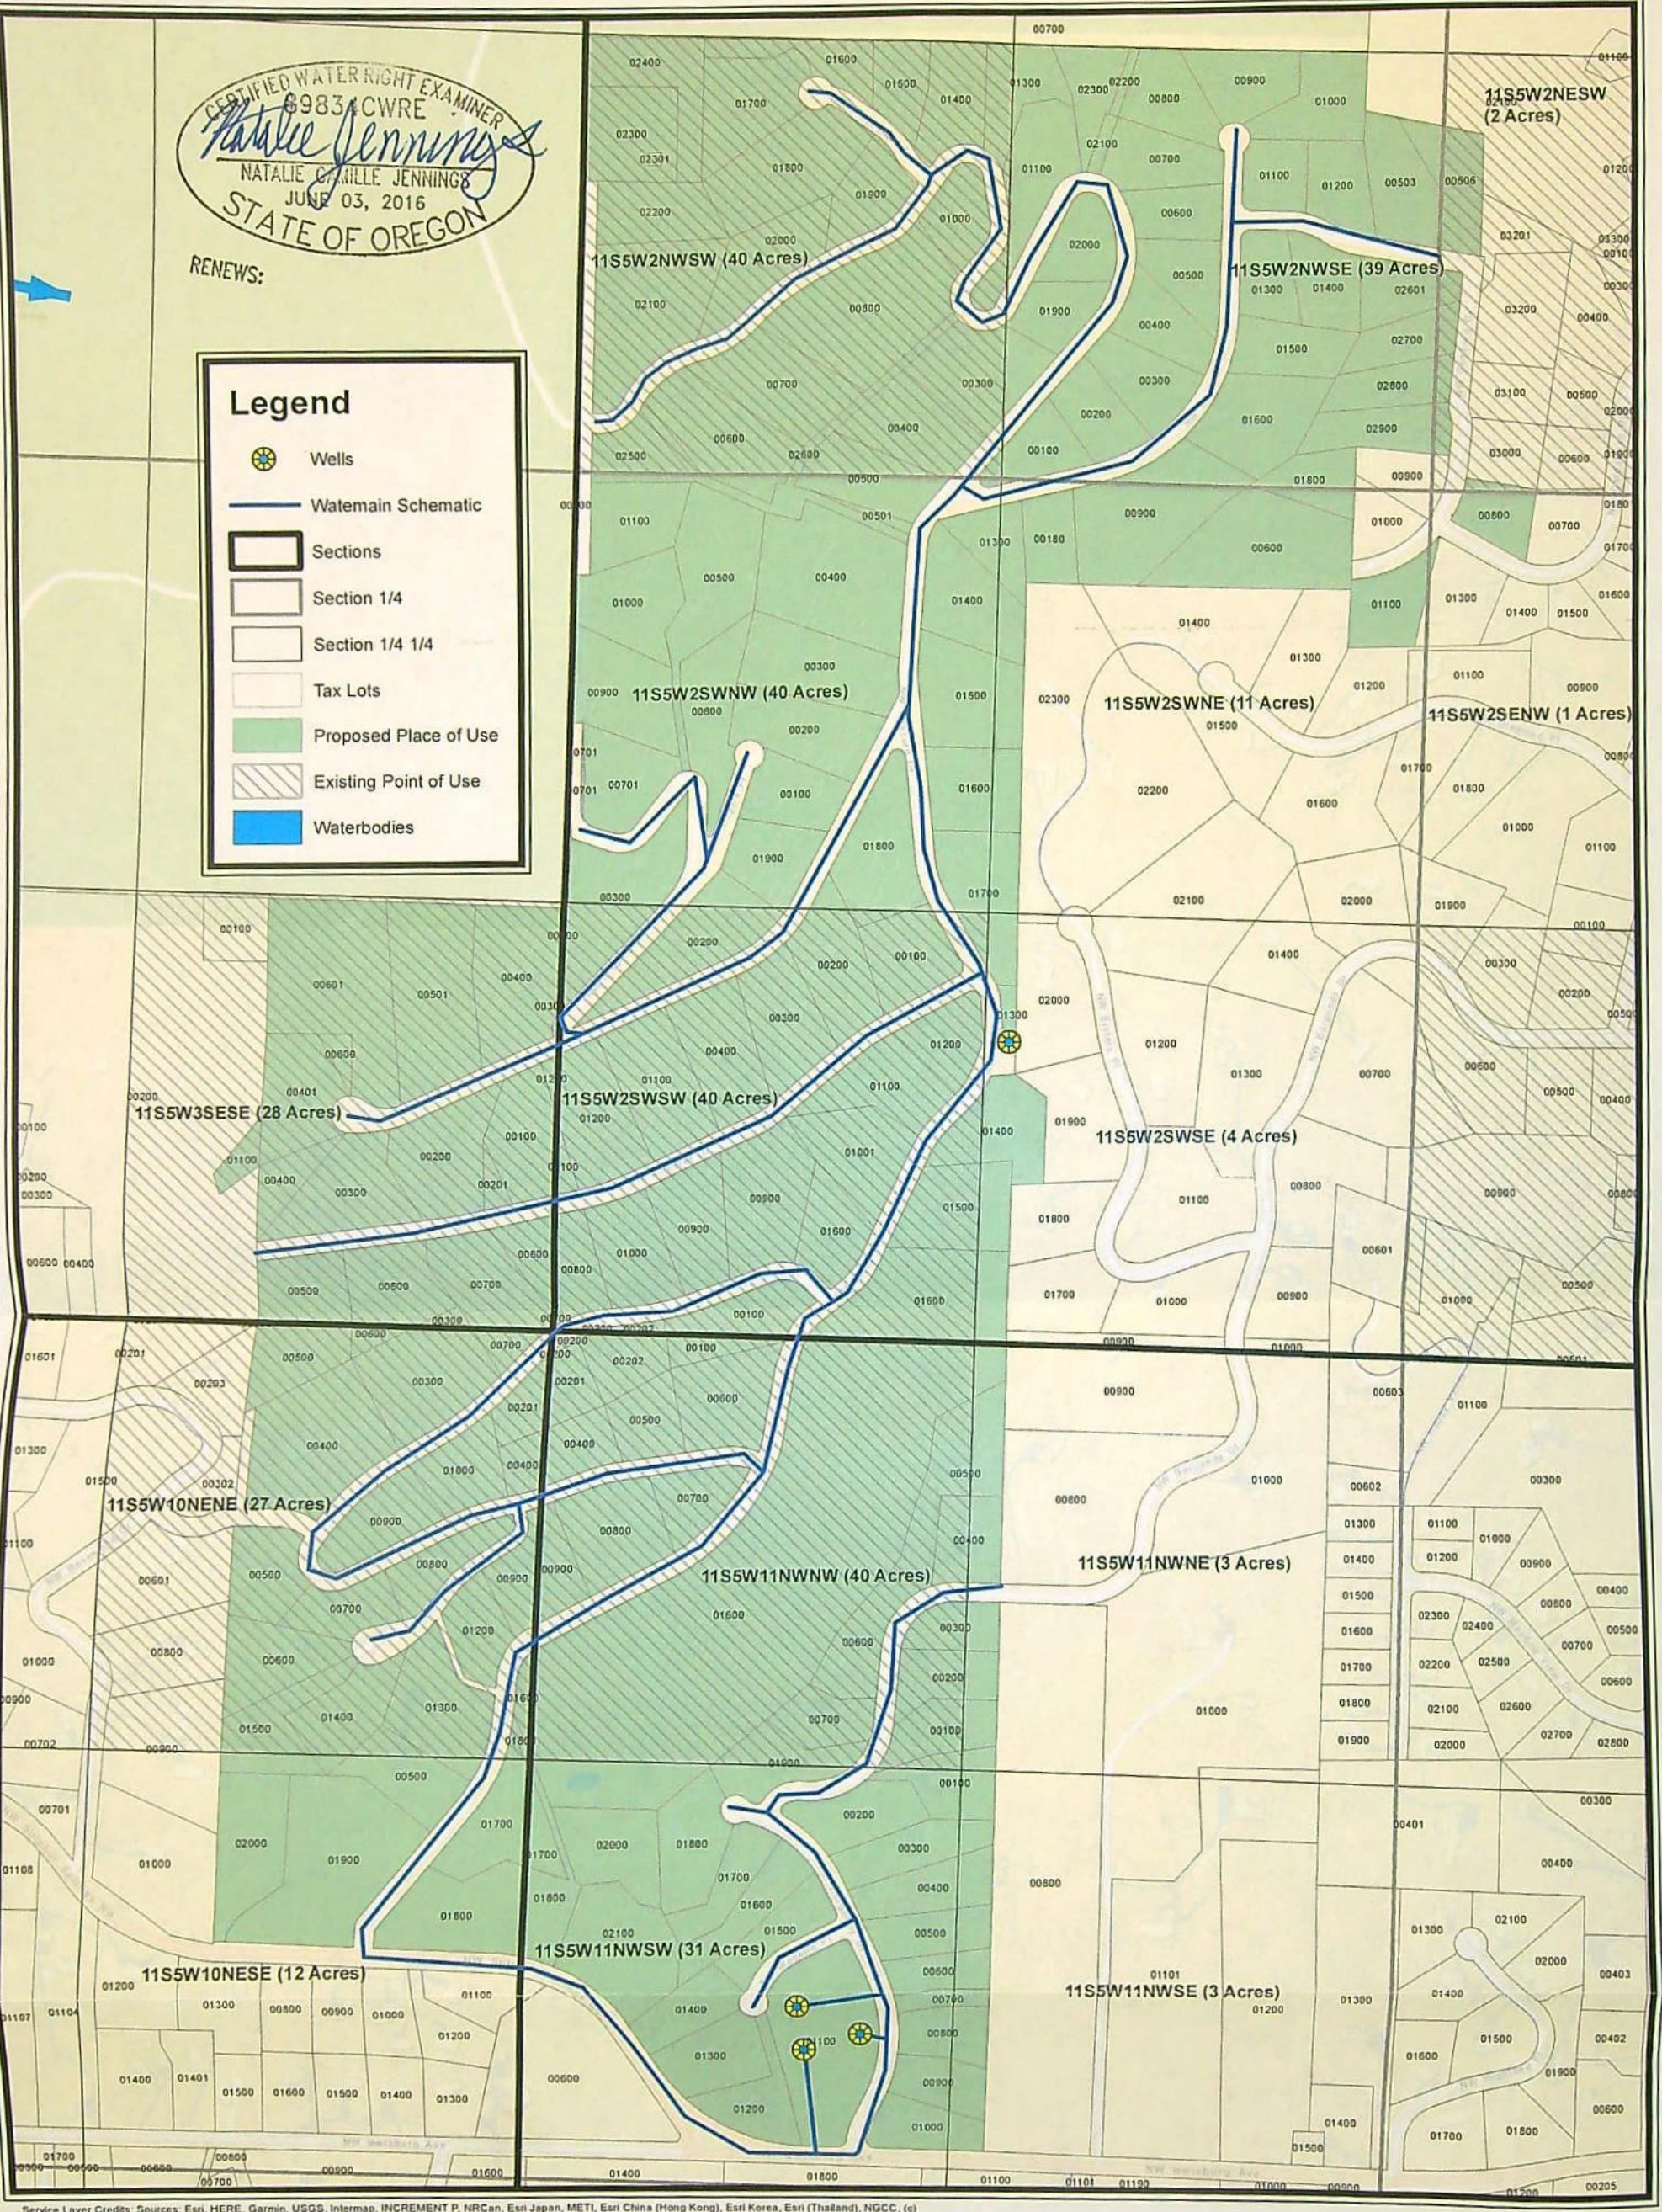

I also have another question on the transfer application that I'm not sure who to ask. On the evidence of use form none of the supporting documents seem to be the right category for what happened. Here is what happened. The people who originally filled out the paperwork for the water right when they constructed the subdivision/water district filled it out improperly and included ¼ ¼s that weren't in the water district and missing some that were in the water district. The water district has always served the full area of the water district because they assumed the water right was filled out correctly because it was done specifically for the subdivision construction. It wasn't until an extension became necessary that they really read the details of it and realized that they needed to transfer the water right to the areas they are

Salem, Oregon 97301-1266
(503) 986-0900
www.wrd.state.or.us

NOTE TO APPLICANTS

In order for your application to be processed by the Water Resources Department (WRD), this Land Use Information Form must be completed by a local government planning official in the jurisdiction(s) where your water right will be used and developed. The planning official may choose to complete the form while you wait, or return the receipt stub to you. Applications received by WRD without the Land Use Form or the receipt stub will be returned to you. Please be aware that your application will not be approved without land use approval.

This form is NOT required if:

- 1) Water is to be diverted, conveyed, and/or used only on federal lands; **OR**
- 2) The application is for a water right transfer, allocation of conserved water, exchange, permit amendment, or ground water registration modification, and **all** of the following apply:
 - a) The existing and proposed water use is located entirely within lands zoned for exclusive farm-use or within an irrigation district;
 - b) The application involves a change in place of use only;
 - c) The change does not involve the placement or modification of structures, including but not limited to water diversion, impoundment, distribution facilities, water wells and well houses; **and**
 - d) The application involves irrigation water uses only.

NOTE TO LOCAL GOVERNMENTS

The person presenting the attached Land Use Information Form is applying for or modifying a water right. The Water Resources Department (WRD) requires its applicants to obtain land-use information to be sure the water rights do not result in land uses that are incompatible with your comprehensive plan. Please complete the form or detach the receipt stub and return it to the applicant for inclusion in their water right application. You will receive notice once the applicant formally submits his or her request to the WRD. The notice will give more information about WRD's water rights process and provide additional comment opportunities. You will have 30 days from the date of the notice to complete the land-use form and return it to the WRD. If no land-use information is received from you within that 30-day period, the WRD may presume the land use associated with the proposed water right is compatible with your comprehensive plan. Your attention to this request for information is greatly appreciated by the Water Resources Department. If you have any questions concerning this form, please contact the WRD's Customer Service Group at 503-986-0801.

B. Description of Proposed Use

Type of application to be filed with the Water Resources Department:

- Permit to Use or Store Water
 Water Right Transfer
 Permit Amendment or Ground Water Registration Modification
 Limited Water Use License
 Allocation of Conserved Water
 Exchange of Water

Source of water: Reservoir/Pond
 Ground Water
 Surface Water (name) _____

Estimated quantity of water needed: 55/year
 cubic feet per second
 gallons per minute
 acre-feet

Intended use of water: Irrigation
 Commercial
 Industrial
 Domestic for _____ household(s)
 Municipal
 Quasi-Municipal
 Instream
 Other _____

Briefly describe:

The water district realized that the water right they currently have was not able to serve all of the lots in the subdivision due to some past paperwork issues. The water usage had been described incorrectly, so currently they cannot legally use water to water anything outside except 1/2 acres for the entire subdivision. They are requesting a change to quasi-municipal so it can be used for lawns and vegetable gardens. The land use of the area is not intended to change, this is simply a paper work issue so the water usage is legal. There is a groundwater claim that is currently held by several property owners that should have been transferred to the water district as part of the subdivision process, but that was not properly completed, so this process will fix this issue as well.

For Local Government Use Only

The following section must be completed by a planning official from each county and city listed unless the project will be located entirely within the city limits. In that case, only the city planning agency must complete this form. This deals only with the local land-use plan. Do not include approval for activities such as building or grading permits.

Please check the appropriate box below and provide the requested information

- Land uses to be served by the proposed water uses (including proposed construction) are allowed outright or are not regulated by your comprehensive plan. Cite applicable ordinance section(s):
- Land uses to be served by the proposed water uses (including proposed construction) involve discretionary land-use approvals as listed in the table below. (Please attach documentation of applicable land-use approvals which have already been obtained. Record of Action/land-use decision and accompanying findings are sufficient.) **If approvals have been obtained but all appeal periods have not ended, check "Being pursued."**

Date 5/25/22

App # G-12088

Permit # G-18326

Permit Amendments are authorized for changes in POD/POA, APOD/APOA, or POU.

(If OK, check box to left; if not, fill in the blank)

1. Is the name of the Permit Amendment applicant the same as the Water Right Permit holder(s) of record?

If not, one of the following must be included with the application:

- ___ a) An affidavit of consent from all Permit holder(s) or the other Permit holders that have not signed the Permit Amendment application form, consenting to the proposed Permit Amendment application; OR,
___ b) A completed Request for Assignment form (and statutory fee) to move all (or portion) of the permit into the Permit Amendment applicant's name.

If not, what is missing? _____

2. Page 1 of application: Are all attachments that have been checked actually included?
If not, what is missing? _____

3. Are fees included and correct? Fee Paid: _____
If not, the correct fee would be: _____, so the amount missing is: _____

4. Part 4 of application: Have all the applicants listed at the top of the page signed at the bottom?
If not, whose signature is missing? _____

5. Are the Permit completion date(s) current?
If the Permit completion date has expired, we **CANNOT** accept the application.

6. If all #1-#5 boxes on this checklist are checked (with no remaining deficiencies identified), accept the application. Put this check sheet in the transfer folder.

If #1, #2, #3, #4 or #5 on this checklist is deficient, the application **CANNOT** be accepted.

It should be returned and the deficiencies listed in the "staff" section at the bottom of Application Page 1, unless the applicant or agent can resolve the deficiencies within 2-3 days.
