In the Matter of Transfer Application) ·	FINAL ORDER APPROVING TEMPORARY
T-14042, Yamhill County)	CHANGES IN PLACE OF USE AND POINTS
)	OF DIVERSION .

Authority

Oregon Revised Statute (ORS) 540.505 to 540.580 establish the process in which a water right holder may submit a request to temporarily transfer the place of use and, if necessary to convey the water to the temporary place of use, the point of diversion authorized under an existing water right.

Oregon Administrative Rule (OAR) Chapter 690, Division 380 implements the statutes and provides the Department's procedures and criteria for evaluating transfer applications.

Applicant

MEADOW RIDGE FARMS, INC. PO BOX 808 CARLTON, OR 97111

Findings of Fact

- On July 1, 2022, MEADOW RIDGE FARMS, INC. filed an application to temporarily change the places of use and to change the points of diversion to serve the proposed places of use under Certificates 13450, 13451, 20112, 20573, 22557, and 39209 for a period of 5 years. The Department assigned the application number T-14042.
- Notice of the application for transfer was published on July 12, 2022, pursuant to OAR 690-380-4000.
- 3. The first right to be temporarily transferred is as follows:

Certificate: 13450 in the name of J.L. JENNINGS (perfected under Permit S-10816)

Use: IRRIGATION of 57.0 ACRES

Priority Date: JANUARY 31, 1933

Rate: 0.72 CUBIC FOOT PER SECOND

This is a final order in other than a contested case. This order is subject to judicial review under ORS 183.484. Any petition for judicial review must be filed within the 60-day time period specified by ORS 183.484(2). Pursuant to ORS 536.075 and OAR 137-004-0080, you may petition for judicial review or petition the Director for reconsideration of this order. A petition for reconsideration may be granted or denied by the Director, and if no action is taken within 60 days following the date the petition was filed, the petition shall be deemed denied.

Limit/Duty: The amount of water used for irrigation, together with the amount secured

under any other right existing for the same lands, shall be limited to ONE-EIGHTIETH of one cubic foot per second per acre, or its equivalent for each acre irrigated and shall conform to such reasonable rotation system as may

be ordered by the proper state officer.

Temporary Transfer Review Criteria

- 20. Water has been used within the last five years according to the terms and conditions of the rights. There is no evidence available that would demonstrate that the rights are subject to forfeiture under ORS 540.610.
- 21. A pump, pipeline, and sprinkler system sufficient to use the full amount of water allowed under the existing rights are present.
- 22. The proposed changes would prevent the lands from which the water right is removed during the period of the temporary transfer from receiving water under the transferred rights, as required by ORS 540.523(7).
- 23. The proposed changes would not result in injury to other water rights. This finding is made through an abbreviated review recognizing that the transfer may be revoked under ORS

540.523(5) if the Department later finds that the transfer is causing injury to any existing water right.

Conclusions of Law

The temporary changes in place of use and points of diversion to convey water to the temporary place of use proposed in Temporary Transfer Application T-14042 are consistent with the requirements of ORS 540.523 and OAR 690-380-8000.

Now, therefore, it is ORDERED:

- The temporary change in place of use and change in points of diversion to convey water to the temporary place of use proposed in Temporary Transfer Application T-14042 are approved.
- 2. The former place of use shall not be irrigated as part of these water rights during the 2022, 2023, 2024, 2025, and 2026 irrigation seasons.
- The use shall revert to the authorized place of use at the end of the 2026 irrigation season.
 The authorization to use the additional point of diversion shall be terminated concurrently.
- 4. The approval of this temporary transfer may be revoked or modified if the Department finds the changes cause injury to any existing water right.
- 5. The quantity of water diverted at the proposed temporary points of diversion shall not exceed the quantity of water lawfully available at the original points of diversion.
- 6. A subsequent application for permanent transfer of Certificates 13450, 13451, 20112, 20573, 22557, and 39209 shall be subject to a full and complete review to determine consistency with the requirements of OAR Chapter 690, Division 380. Approval of this temporary transfer does not establish a precedent for approval of a subsequent application filed for a permanent transfer.
- The use of water at the temporary place of use authorized by this transfer shall be in accordance with the terms and conditions of Certificates 13450, 13451, 20112, 20573, 22557, and 39209.
- 8. The time during which water is used under this approved temporary transfer does not apply toward a finding of forfeiture under ORS 540.610.
- 9. Water use measurement conditions:
 - a. Before water use may begin under this order, the water user shall install a totalizing flow meter, or, with prior approval of the Director, another suitable measuring device, at each point of diversion.
 - b. The water user shall maintain the meters or measuring devices in good working order.

- c. The water user shall allow the Watermaster access to the meters or measuring devices; provided however, where the meters or measuring devices are located within a private structure, the Watermaster shall request access upon reasonable notice.
- The use of the remaining water rights described by Certificates 13451, 22557, and 39209 shall continue to be in accordance with the terms and conditions of Certificates 13451, 22557, and 39209.

1.	Do you have <u>evidence</u> that the right has not been used in the last 5 years and that the presumption of forfeiture would not likely be rebuttable? Yes No If "Yes", attach evidence (e.g. dated aerial photo showing pavement or building on the land for >5 yrs.)
2.	Is there a history of regulation on the source that serves this (or these) right(s) that has involved the transferred right(s) and downstream water rights? Yes No Generally characterize the frequency of any regulation or explain why regulation has not occurred:
3.	Have headgate notices been issued for the source that serves the transferred right(s)? Yes No Records not available.
4.	In your estimation, after the proposed change, would distribution of water for the right(s) result in regulation of other water rights that would not have occurred if use under the original right(s) was/were maximized? Yes No If "Yes", explain:
5.	In your estimation, if the proposed change is approved, are there upstream water rights that would be affected? Yes No If "Yes", describe how the rights would be affected and list the rights most affected:

6.	Check here if it appears that downstream water rights benefit from return flows resulting from the current use of the transferred right(s)? If you check the box, generally characterize the locations where the return flows likely occur and list the water rights that benefit most:
	N/A For POD changes and instream transfers, check here if there are channel losses between the old and new PODs or within the proposed instream reach? If you check the box, describe and, if possible, estimate the losses:
8.	N/A For instream transfers that propose protection of a reach beyond the mouth of the source stream: N/A Would the quantity be measureable into the receiving stream consistent with OAR 690-077-0015(8)? Yes No
9.	For POU changes: N/A Is it likely the original place of use would continue to receive water from the same source? Yes No If "Yes", explain:
10.	For POU or USE changes: N/A In your best judgment, would use of the existing right at "full face value," result in the diversion of more water than can be used beneficially and without waste? Yes No If "Yes", explain:
11	 For POU changes that involve micro-irrigation: N/A a. Has the applicant made changes (absent a transfer) to convert to micro-irrigation within the current place of use boundary of the water right proposed for transfer, and previously demonstrated to the Department through monitoring and site inspections by the Watermaster that the proposed transfer will not result in injury or enlargement?

b. Has a temporary transfer of this nature been previously filed and approved on the same lands (or portions thereof) as those lands involved in this transfer?
Yes No If "Yes", answer the following:
i. Were there any problems with more acres being irrigated (or wetted) than were authorized under the temporary transfer? Yes No If "Yes", explain:
ii. Did the designated areas that were to remain dry (or not wetted) under the temporary transfer actually remain dry? Yes No If "No", explain:
iii. Did the applicant comply with and meet all of the conditions of the temporary transfer? Yes No If "No", explain:
iv. Do you have any other observations regarding the temporary transfer? Yes No If "Yes", describe:
v. Did the applicant demonstrate to the Department through monitoring and site inspections by the Watermaster that neither injury nor enlargement occurred as a result of the temporary transfer? Yes No If "No", explain:
c. To the best of your knowledge, if this transfer is approved, does it appear that: i. "Injury" will occur to other water rights that share the same source?
Yes No If "Yes", explain:
ii. "Enlargement" of the water right being transferred will occur? Yes No If "Yes", explain:

12. Are there other issues not identified through the above questions that should be considered in determining whether the change "can be effected without injury to other rights"?
Yes No If "Yes", explain:
Tes (No III) es y explains
13. What alternatives may be available for addressing any issues identified above:
14. Do conditions need to be included in the transfer order to avoid enlargement of the right or injury to other rights? No ves, as checked and provided below:
For POU changes that involve micro-irrigation, provide the monitoring and reporting conditions
necessary to prevent injury/enlargement:
A Headgate should be required prior to diverting water.
Measurement Devices for POD or POA: (if this condition is selected, also fill in the top sections of Page 4)
a. Before water use may begin under this order, the water user shall install a totalizing flow meter*, or, with prior approval of the Director, another suitable measuring device, at each point of
diversion/appropriation (new and existing) OR at each new point of diversion/appropriation
with the exception that water rights issued to the Bureau of Reclamation or an irrigation
district (or similar entity) are not subject to this condition.
b. The water user shall maintain the meters or measuring devices in good working order.
c. The water user shall allow the Watermaster access to the meters or measuring devices; provided however, where the meters or measuring devices are located within a private structure, the Watermaster shall request access upon reasonable notice.
Reservoir water use measurement: (if this condition is selected, also fill in the top sections of Page 4)
a. Before water use may begin under this order, the water user shall install staff gages*,
or, with prior approval of the Director, other suitable measuring devices, that measure the entire range and stage between empty and full in each reservoir. Staff gages shall be United States
Geological Survey style.
b. Before water use may begin under this order, if the reservoir is located in channel, weirs or other
suitable measuring devices must be installed upstream and downstream of the reservoir, and, an adjustable outlet valve must be installed. The water user shall maintain such devices in good working
order. A written waiver may be obtained, if in the judgment of the Director, the installation of weirs or
other suitable measuring devices, or the adjustable outlet valve, will provide no public benefit.
* The following alternative device(s) should be substituted for the bold, underlined device in the above
selected condition: Submerged Orifice
Claus Backvietes
Parshall Flume

Reference: Application T-14042

On July 1, 2022, OWRD received your water right Temporary Transfer Application. The application was accompanied by \$2905.00. Our receipt number 138570 is enclosed.

By copy of this letter, we are asking the Watermaster for a report regarding the potential for injury to existing water rights which may be caused by the requested change.

Except as provided under ORS 540.510(3) for municipalities, you may not *temporarily* use water at the new place of use or from the new point of diversion/appropriation until a final order approving the temporary transfer application has been issued by the Department. Additionally, pursuant to OAR 690-380-8010, the lands <u>from</u> which an irrigation water right is to be temporarily transferred and the land <u>to</u> which the right is to be temporarily transferred may not both receive water during the same season. If the temporary transfer is approved during an irrigation season and water has already been used at the currently authorized location during that season, then the temporary transfer will not take effect until the following season.

If the land is sold before the temporary transfer is approved, the buyer's consent to the temporary transfer will be required unless a recorded deed or other legal document clearly established that the water right was not conveyed in the sale.

If you have any questions, please contact the Transfer Section at (503) 979-9931.

	FEE WORKSHEET for TEMPORARY DROUGHT TRANSFERS		
1	Base Fee (includes drought application and recording fee for up to 1 cfs)	1	\$200.00
	Enter the cfs for the portions of the rights to be transferred (see example below*):		
	(2a)		
	Subtract 1.0 from the number in 2a above: (2b)		
	If 2b is 0, enter 0 on line 2 » » » » » » » » » » » » » » » »

2	multiply 2c by \$50, then enter on line 2 » » » » » » » » »	2	
3	Add entries on lines 1 through 2 above » » » » » » » » » Transfer Fee:	3	

^{*}Example for Line 2a calculation to transfer 45.0 acres of Primary Certificate 12345 (total 1.25 cfs for 100 acres) and 45.0 acres of Supplemental Certificate 87654 (1/80 cfs per acre) on the same land:

14042

^{1.} Divide total authorized cfs by total acres in the water right (for C12345, 1.25 cfs \div 100 ac); then multiply by the number of acres to be transferred to get the transfer cfs (x 45 ac= 0.56 cfs).

^{2.} If the water right certificate does not list total cfs, but identifies the allowable use as 1/40 or 1/80 of a cfs per acre; multiply number of acres proposed for change by either 0.025 (1/40) or 0.0125 (1/80). (For C87654, 45.0 ac x 0.0125 cfs/ac = 0.56 cfs)

^{3.} Add cfs for the portions of water rights on all the land included in the transfer; however do not count cfs for supplemental rights on acreage for which you have already calculated the cfs fee for the primary right on the same land. The fee should be assessed only once for each "on the ground" acre included in the transfer. (In this example, blank 2a would be only 0.56 cfs, since both rights serve the same 45.0 acres. Blank 2b would be 0 and Line 2 would then also become 0).

In the Matter of Instream Lease IL-1498
Yamhill County

FINAL ORDER TERMINATING
INSTREAM LEASE

OWRD

Oregon Revised Statute (ORS) 537.348 establishes the process in which a water right holder may submit a request to lease an existing water right for instream purposes. Oregon Administrative Rule (OAR) Chapter 690, Division 077 implements the statutes and provides the Department's procedures and criteria for evaluating instream lease applications.

Lessor

Thornton Ranch, LLC 19976 NW Moores Valley Road Yamhill, OR 97148

Findings of Fact

AFR P.S. TUPE

- On April 30, 2020, Thornton Ranch LLC filed an application to renew instream lease IL-1498, involving the entirety of Certificates 13450 and 13451 and a portion of Certificate 38612.
- The lease application requested to protect water instream for five years, terminating on October 31, 2024. A Final Order approving this lease was issued by the Department on June 8, 2021, as evidenced by Special Order Volume 116, Page 882.
- The final order contained a condition allowing the Lessor and the Lessee to terminate the lease in any year of the lease, prior to the lease being exercised that season, with written notification to the Department.
- On March 30, 2022, the Department received a request from Thornton Ranch, LLC to terminate the lease and mitigation credit project prior to the 2022 instream use period.
- The lease was exercised during the 2020 and 2021 water use periods ending on September 30, 2021.

This is a final order in other than contested case. This order is subject to judicial review under ORS 183.484. Any petition for judicial review must be filed within the 60 day time period specified by ORS 183.484(2). Pursuant to ORS 536.075 and OAR 137-004-0080 you may either petition for judicial review or petition the Director for reconsideration of this order. A petition for reconsideration may be granted or denied by the Director, and if no action is taken within 60 days following the date the petition was filed, the petition shall be deemed denied.

Conclusions of Law

The Department concludes that terminating the lease in advance of the 2022 instream use period is consistent with OAR 690-077.

Now, therefore it is ORDERED:

The Instream Lease described herein is TERMINATED and no longer in effect.

NOTE TO APPLICANTS

In order for your application to be processed by the Water Resources Department (WRD), this Land Use Information Form must be completed by a local government planning official in the jurisdiction(s) where your water right will be used and developed. The planning official may choose to complete the form while you wait, or return the receipt stub to you. Applications received by WRD without the Land Use Form or the receipt stub will be returned to you. Please be aware that your application will not be approved without land use approval.

This form is NOT required if:

- 1) Water is to be diverted, conveyed, and/or used only on federal lands; OR
- 2) The application is for a water right transfer, allocation of conserved water, exchange, permit amendment, or ground water registration modification, and <u>all</u> of the following apply:
 - The existing and proposed water use is located entirely within lands zoned for exclusive farm-use or within an irrigation district;
 - b) The application involves a change in place of use only;
 - The change does not involve the placement or modification of structures, including but not limited to water diversion, impoundment, distribution facilities, water wells and well houses; and
 - d) The application involves irrigation water uses only.

NOTE TO LOCAL GOVERNMENTS

The person presenting the attached Land Use Information Form is applying for or modifying a water right. The Water Resources Department (WRD) requires its applicants to obtain land-use information to be sure the water rights do not result in land uses that are incompatible with your comprehensive plan. Please complete the form or detach the receipt stub and return it to the applicant for inclusion in their water right application. You will receive notice once the applicant formally submits his or her request to the WRD. The notice will give more information about WRD's water rights process and provide additional comment opportunities. You will have 30 days from the date of the notice to complete the land-use form and return it to the WRD. If no land-use information is received from you within that 30-day period, the WRD may presume the land use associated with the proposed water right is compatible with your comprehensive plan. Your attention to this request for information is greatly appreciated by the Water Resources Department. If you have any questions concerning this form, please contact the WRD's Customer Service Group at 503-986-0801.
