ORDER ON WITHDRAWN APPLICATION

Reference: Transfer Application T-14043

The above referenced transfer application was withdrawn from the record of the Water Resources Department on March 8, 2023, by Special Order Volume 127, Page 982 (copy enclosed).

The transfer application is no further force or effect.

If you have any questions related to this transfer, you may contact your caseworker, Arla Davis, by telephone at 503-979-3129 or by e-mail at Arla.L.Davis@oregon.gov.

Sincerely,

Nila Kamis

OF THE STATE OF OREGON

In the Matter of Transfer Application)	FINAL ORDER WITHDRAWING AN
T-14043, Lake County)	EMERGENCY USE DROUGHT TEMPORARY

Authority

Oregon Revised Statute (ORS) 536.750 establishes the process in which a water right holder may submit a request to temporarily transfer the use, place of use or point of diversion of water in the event of a declaration of drought, without complying with the notice and waiting requirements under ORS 540.520. Oregon Administrative Rule (OAR) Chapter 690, Division 019 implements the statutes and provides the Department's procedures and criteria for evaluating drought transfer applications.

Applicant

BELL A LAND AND CATTLE CO. PO BOX 97 LA PINE, OR 97339

Findings of Fact

- On June 27, 2022, BELL A LAND AND CATTLE CO. filed an application to temporarily add four additional points of appropriation under Certificate 89345 for the remainder of the 2022 irrigation season or the term of the Governor's declared drought, whichever is shorter. The Department assigned the application number T-14043.
- Notice of the application for transfer was published on July 12, 2022, pursuant to OAR 690-380-4000.
- On February 16, 2023, the Department received written correspondence by email from the agent for the applicant requesting to withdraw Emergency Use Drought Temporary Application T-14067.

This is a final order in other than a contested case. This order is subject to judicial review under ORS 183.484. Any petition for judicial review must be filed within the 60-day time period specified by ORS 183.484(2). Pursuant to ORS 536.075 and OAR 137-004-0080, you may petition for judicial review or petition the Director for reconsideration of this order. A petition for reconsideration may be granted or denied by the Director, and if no action is taken within 60 days following the date the petition was filed, the petition shall be deemed denied.

Now, therefore, it is ORDERED:

Emergency Use Drought Temporary Application T-14043 in the name of BELL A LAND AND CATTLE CO., is withdrawn and of no further force of effect.

Dated in Salem, Oregon on

MAR 0 8 2023

Lisa J. Jaramillo, Transfer and Conservation Section Manager, for

DOUGLAS ECWOODCOCK, ACTING DIRECTOR

Oregon Water Resources Department

Mailing Date:

Groundwater Transfer Review Summary Form

Transfer/PA # T- 14043
GW Reviewer Darrick E. Boschmann Date Review Completed: 08/18/2022
Summary of Same Source Review:
☐ The proposed change in point of appropriation is not within the same aquifer as per OAR 690-380-2110(2).
Summary of Injury Review:
The proposed transfer will result in another, existing water right not receiving previously available water to which it is legally entitled or result in significant interference with a surface water source as per 690-380-0100(3).
Summary of GW-SW Transfer Similarity Review:
☐ The proposed SW-GW transfer doesn't meet the definition of "similarly" as per OAR 690-380-2130.
This is only a summary. Documentation is attached and should be read thoroughly to understand the basis for determinations.

Ground Water Review Form

in interference with these wells.

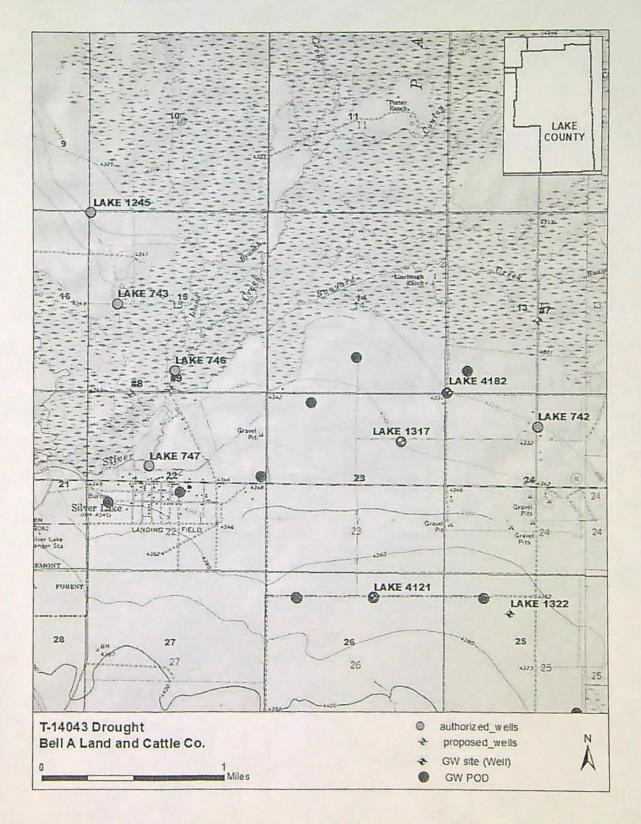

Transfer Application: T-14043 Will the proposed POA develop the same aquifer (source) as the existing authorized POA? ☐ No Comments: Groundwater in the Fort Rock Valley-Christmas Valley area (Fort Rock Classified Area) is identified as a single groundwater system. Groundwater is found in both a shallower predominantly basin-fill sediment unit and a deeper predominantly volcanic rocks and sediments unit below. The predominantly basin fill sediment unit and the predominantly volcanic rocks and sediment unit both readily yield groundwater, and the two units are hydraulically connected. Miller (1986) describes the groundwater source as the main groundwater reservoir. That reservoir includes groundwater in different geologic units. The reservoir has three characteristics. First, the "natural" groundwater level changes less than 1.5 feet annually, indicating the system is highly modulated. Second, the 1980s potentiometric surface was approximately 4292 feet elevation amsl basin-wide with Silver Lake an exception. Third, the reservoir consists of numerous water producing zones in several formations, all having an essentially common potentiometric level, and all being very transmissive in general. The authorized wells produce groundwater from water bearing zones within the predominantly basin-fill sediment and/or the underlying predominantly volcanic rocks and sediment unit of the main groundwater reservoir. The proposed wells will also produce groundwater from water bearing zones within the main groundwater reservoir. 3. a) Is there more than one source developed under the right (e.g., basalt and alluvium)? Yes ⊠ No b) If yes, estimate the portion of the right supplied by each of the sources and describe any limitations that will need to be placed on the proposed change (rate, duty, etc.): a) Will this proposed change, at its maximum allowed rate of use, likely result in an increase in interference with another ground water right?

b) If yes, would this proposed change, at its maximum allowed rate of use, likely result in another groundwater right not receiving the water to which it is legally entitled?

existing wells than the currently authorized wells. This will result in an incremental increase

Page 2 of 5 Version: 20210204

	☐ Yes ☐ No If yes, explain:
	The nearest authorized POA to proposed APOA LAKE 1317 is POD 1 under certificate
	86688 (LAKE 4182) which is located ~2000 feet to the northeast. The potential increase in
	drawdown was calculated using the Theis equation (see attachments). The values used for
	the calculation are conservative and appropriate until better values become available. The
	calculation used an intermediate storage coefficient (0.001). The transmissivity used in the
	calculation (15,000 ft²/day) is from Morgan (1988) and McFarland and Ryals (1991). At the
	maximum allowed pumping rate (5.94 cfs), the results indicate a drawdown of ~21 feet,
	which would not meet the standard of "substantial or undue interference".
	The long term impact on the groundwater quetom should be the same. That impact is to
	The long-term impact on the groundwater system should be the same. That impact is to continue contributing to the ongoing annual Fort Rock Classified area groundwater level
	decline.
	decine.
5.	a) Will this proposed change, at its maximum allowed rate of use, likely result in an increase in interference with another surface water source?
	Yes No Comments: The proposed APOA are not located significantly closer to
	surface water sources than the currently authorized wells. The currently authorized wells are
	already in close proximity to surface water. The overall interference with surface water
	would be expected to remain the same if this transfer were approved.
	b) If yes, at its maximum allowed rate of use, what is the expected change in degree of interference with any surface water sources resulting from the proposed change?
	Stream:
	Stream:
	Provide context for minimal/significant impact:
6.	For SW-GW transfers, will the proposed change in point of diversion affect the surface
	water source similarly (as per OAR 690-380-2130) to the authorized point of diversion
	specified in the water use subject to transfer?
	Yes No Comments:
7.	What conditions or other changes in the application are necessary to address any potential
	issues identified above: none.
8.	Any additional comments: none.

Watermaster Review Form: Water Right Transfer

Oregon Water Resources Department 725 Summer St NE, Suite A Salem, Oregon 97301-1266 (503) 986-0900 www.oregon.gov/OWRD

Transfer Application: T-14043

Review Due Date: 08/10/2022

Applica	ant Name: Bell A Land and Cattle
Propos	sed Changes: POU POD POA USE OTHER
Reviev	ver(s): Giffin Date of Review: 07/13/2022
1.	Do you have <u>evidence</u> that the right has not been used in the last 5 years and that the presumption of forfeiture would not likely be rebuttable? Yes No If "Yes", attach evidence (e.g. dated aerial photo showing pavement or building on the land for >5 yrs.)
2.	Is there a history of regulation on the source that serves this (or these) right(s) that has involved the transferred right(s) and downstream water rights? Yes V No Generally characterize the frequency of any regulation or explain why regulation has not occurred:
3.	Have headgate notices been issued for the source that serves the transferred right(s)? Yes No Records not available.
4.	In your estimation, after the proposed change, would distribution of water for the right(s) result in regulation of other water rights that would not have occurred if use under the original right(s) was/were maximized? Yes No If "Yes", explain:
5.	In your estimation, if the proposed change is approved, are there upstream water rights that would be affected? Yes No If "Yes", describe how the rights would be affected and list the rights most affected:

6.	Check here if it appears that downstream water rights benefit from return flows resulting from the current use of the transferred right(s)? If you check the box, generally characterize the locations where the return flows likely occur and list the water rights that benefit most:
7.	For POD changes and instream transfers, check here if there are channel losses between the old and new PODs or within the proposed instream reach? If you check the box, describe and, if possible, estimate the losses:
8.	N/A For instream transfers that propose protection of a reach beyond the mouth of the source stream: N/A Would the quantity be measureable into the receiving stream consistent with OAR 690-077-0015(8)? Yes No
9.	For POU changes: N/A Is it likely the original place of use would continue to receive water from the same source? Yes No If "Yes", explain:
10	For POU or USE changes: N/A In your best judgment, would use of the existing right at "full face value," result in the diversion of more water than can be used beneficially and without waste? Yes No If "Yes", explain:
11	 For POU changes that involve micro-irrigation: N/A Has the applicant made changes (absent a transfer) to convert to micro-irrigation within the current place of use boundary of the water right proposed for transfer, and previously demonstrated to the Department through monitoring and site inspections by the Watermaster that the proposed transfer will not result in injury or enlargement? Yes No If "Yes", explain:

Watermaster Review Form Transfer Application

b.	Has a temporary transfer of this nature been previously filed and approved on the same lands (or portions thereof) as those lands involved in this transfer?
	Yes No If "Yes", answer the following:
	i. Were there any problems with more acres being irrigated (or wetted) than were authorized under the temporary transfer? Yes No If "Yes", explain:
	ii. Did the designated areas that were to remain dry (or not wetted) under the temporary transfer actually remain dry? Yes No If "No", explain:
	iii. Did the applicant comply with and meet all of the conditions of the temporary transfer? Yes No If "No", explain:
	iv. Do you have any other observations regarding the temporary transfer? Yes No If "Yes", describe:
	v. Did the applicant demonstrate to the Department through monitoring and site inspections by the Watermaster that neither injury nor enlargement occurred as a result of the temporary transfer? Yes No If "No", explain:
	c. To the best of your knowledge, if this transfer is approved, does it appear that: i. "Injury" will occur to other water rights that share the same source?
	Yes No If "Yes", explain:
	ii. "Enlargement" of the water right being transferred will occur? Yes No If "Yes", explain:

Watermaster Review Form	Transfer Application
12. Are there other issues not identified through the above questions that should be considered determining whether the change "can be effected without injury to other rights"?	ered in
Yes No If "Yes", explain:	
13. What alternatives may be available for addressing any issues identified above:	
14. Do conditions need to be included in the transfer order to avoid enlargement of the right other rights? No Yes, as checked and provided below:	t or injury to
For POU changes that involve micro-irrigation, provide the monitoring and reporting necessary to prevent injury/enlargement:	ng conditions

This certificate describes that portion of the water right confirmed by Certificate 86160, State Record of Water Right Certificates, NOT modified by the provisions of an order of the Water Resources Director entered DEC 22 2014, approving Transfer Application T-11629.

The issuance of this superseding certificate does not confirm the status of the water right in regard to the provisions of ORS 540.610 pertaining to forfeiture or abandonment.

The wells shall be maintained in accordance with the General Standards for the Construction and Maintenance of Water Wells in Oregon. The works constructed shall maintain an air line and pressure gauge or an access port for measuring line, adequate to determine water level elevation at all times.

The water user shall maintain a weir, meter, or other suitable measuring device and keep a complete record of the amount of ground water withdrawn.

The right to the use of the water for the above purpose is restricted to beneficial use on the lands or place of use described.

The use of water shall be limited when it interferes with any prior surface or ground water rights.

WITNESS the signature of the Water Resources Director, affixed DEC 22 2014

Dwight French, Water Right Services Division Administrator, for

Thomas M. Byler, Director

Oregon Water Resources Department

Office of the Governor State of Oregon

EXECUTIVE ORDER NO. 22-07

DETERMINATION OF A STATE OF DROUGHT EMERGENCY IN DESCHUTES, GRANT, LAKE, AND MALHEUR COUNTIES.

At the request of Deschutes County (by Resolution No. 2022-021, dated March 16, 2022), Grant County (by Resolution No. 22-11, dated April 6, 2022), Lake County (by resolution 2022-02C, dated April 5, 2022) and Malheur County (by Resolution Amended R22-09, recorded April 13, 2022), and based on the recommendations of the Drought Readiness Council and the Water Supply Availability Committee, and pursuant to ORS 536.740, I find the low snowpack, low reservoir levels, and low streamflow have caused or will cause natural and economic disaster conditions in Deschutes, Grant, Lake and Malheur Counties.

Forecasted water supply conditions and precipitation levels are not expected to improve. Drought is likely to have a significant economic impact on the farm, ranch, vineyard, recreation, tourism and natural resources sectors, as well as an impact on drinking water, fish and wildlife, and important minimum flows for public instream uses and other natural resources dependent on adequate precipitation, stored water, and streamflow in these areas. Extreme conditions are expected to affect local growers and livestock, increase the potential for fire, shorten the growing season, and decrease water supplies.

Conditions continue to be monitored by the State's natural resource and public safety agencies, including the Oregon Water Resources Department, the Oregon Office of Emergency Management, the Oregon Office of the State Fire Marshal, and the Oregon Department of Forestry's Fire Protection Division.

Preparation and resiliency to drought are vital to the health and safety of persons, property, and the economic security of the citizens and businesses of these counties. I, therefore, declare that a severe, continuing drought emergency exists and is likely to continue to exist in Deschutes, Grant, Lake and Malheur Counties.

NOW, THEREFORE, IT IS HEREBY DIRECTED AND ORDERED:

 The Oregon Department of Agriculture is directed to coordinate and provide assistance in seeking federal resources to mitigate drought conditions and assist in agricultural recovery in Deschutes, Grant, Lake and Malheur Counties.

Office of the Governor State of Oregon

EXECUTIVE ORDER NO. 22-07 PAGE TWO

- II. The Oregon Water Resources Department and the Water Resources Commission are directed to coordinate and provide assistance to water users in Deschutes, Grant, Lake and Malheur Counties as the Department and Commission determine necessary and appropriate in accordance with ORS 536.700 to 536.780.
- III. The Oregon Water Resources Department is directed to seek information from the Oregon Department of Fish and Wildlife to help understand the impacts of water availability on Oregon's fish and wildlife, as necessary and appropriate in accordance with ORS 536.700 to 536.780.
- IV. The Office of Emergency Management is directed to coordinate and assist as needed with assessment and mitigation activities to address current and projected conditions in Deschutes, Grant, Lake and Malheur Counties.
- V. All other state agencies are directed to coordinate with the above agencies and provide appropriate state resources as needed to assist affected political subdivisions and water users in Deschutes, Grant, Lake and Malheur Counties.
- VI. This Executive Order expires on December 31, 2022.

Done at Salem, Oregon, this 25th day of April, 2022.

Kate Brown GOVERNOR

Kuti Bener

ATTEST:

Shemia Fagan SECRETARY OF STATE

STATE OF OREGON

COUNTY OF LAKE

CERTIFICATE OF WATER RIGHT

THIS CERTIFICATE ISSUED TO

BELL "A" LAND & CATTLE CO PO BOX 97 LaPINE OR 97739

NW FARM CREDIT SERVICE, FLCA PO BOX 607 559 S 7TH ST REDMOND OR 97756

confirms the right to use the waters of FIVE WELLS in the GOOSE & SUMMER LAKE BASIN for SUPPLEMENTAL IRRIGATION of 4000.49 ACRES.

This right was perfected under Permit G-10039. The date of priority is FEBRUARY 28, 1983. The amount of water to which this right is entitled is limited to an amount actually used beneficially, and shall not exceed 19.81 CUBIC FEET PER SECOND (CFS), being 2.18 CFS from Well 1; 5.55 CFS from Well 2; 5.94 CFS from Well 3; 3.17 CFS from Well 4; and 2.97 CFS from Well 5, or its equivalent in case of rotation, measured at the wells.

The wells are located as follows:

Twp	Rng	Mer	Sec	Q-Q	Measured Distances
28 S	14 E	WM	15	NW NW	WELL 1: 50 FEET SOUTH AND 60 FEET EAST FROM THE NW CORNER OF SECTION 15
28 S	14 E	WM	15	NW SW	WELL 2: 80 FEET SOUTH AND 850 FEET EAST FROM THE W1/4 CORNER OF SECTION 15
28 S	14 E	WM	15	SE SW	WELL 3: 600 FEET NORTH AND 2550 FEET EAST FROM THE SW CORNER OF SECTION 15
28 S	14 E	WM	22	SE NW	WELL 4: 2150 FEET SOUTH AND 1800 FEET EAST FROM THE NW CORNER OF SECTION 22
28 S	14 E	WM	24	NW NE	WELL 5: 950 FEET SOUTH AND 2510 FEET WEST FROM THE NE CORNER OF SECTION 24

The amount of water used for irrigation, together with the amount secured under any other right existing for the same lands, is limited to a diversion of ONE-EIGHTIETH of one cubic foot per second, or its equivalent for each acre irrigated, and shall be further limited to a diversion of not to exceed 3.0 acrefeet per acre for each acre irrigated during the irrigation season of each year.

This certificate describes that portion of the water right confirmed by Certificate 86160, State Record of Water Right Certificates, NOT modified by the provisions of an order of the Water Resources Director entered <u>DEC 22 2014</u>, approving Transfer Application T-11629.

The issuance of this superseding certificate does not confirm the status of the water right in regard to the provisions of ORS 540.610 pertaining to forfeiture or abandonment.

The wells shall be maintained in accordance with the General Standards for the Construction and Maintenance of Water Wells in Oregon. The works constructed shall maintain an air line and pressure gauge or an access port for measuring line, adequate to determine water level elevation at all times.

The water user shall maintain a weir, meter, or other suitable measuring device and keep a complete record of the amount of ground water withdrawn.

The right to the use of the water for the above purpose is restricted to beneficial use on the lands or place of use described.

The use of water shall be limited when it interferes with any prior surface or ground water rights.

WITNESS the signature of the Water Resources Director, affixed DEC 22 2014

Dwight French Water Right Services Division Administrator, for

Thomas M. Byler, Director

July 11, 2022

BELL A LAND AND CATTLE CO. PO BOX 97 LA PINE, OR 97339

Reference: Application T-14043

On June 27, 2022, OWRD received your water right Temporary Transfer Application. The application was accompanied by \$200.00. Our receipt number 138529 is enclosed.

By copy of this letter, we are asking the Watermaster for a report regarding the potential for injury to existing water rights which may be caused by the requested change.

Except as provided under ORS 540.510(3) for municipalities, you may not *temporarily* use water from the new point of appropriation until a final order approving the temporary transfer application has been issued by the Department. Additionally, pursuant to OAR 690-380-8010, the lands <u>from</u> which an irrigation water right is to be temporarily transferred and the land <u>to</u> which the right is to be temporarily transferred may not both receive water during the same season. If the temporary transfer is approved during an irrigation season and water has already been used at the currently authorized location during that season, then the temporary transfer will not take effect until the following season.

If the land is sold before the temporary transfer is approved, the buyer's consent to the temporary transfer will be required unless a recorded deed or other legal document clearly established that the water right was not conveyed in the sale.

If you have any questions, please contact the Transfer Section at (503) 979-9931.

Cc: Watermaster Dist. #11, Jeremy T. Giffin (via email)

	⊠ N/A	Supplemental Form D – For water rights served by or issued in the name of a district. Complete when the temporary transfer applicant is not the district.
	□ N/A	Oregon Water Resources Department's Land Use Information Form with approval and signature from each local land use authority in which water is to be diverted, conveyed, and/or used. Not required if water is to be diverted, conveyed, and/or used only on federal lands or if <u>all</u> of the following apply: a) a change in place of use only, b) no structural changes, c) the use of water is for irrigation only, and d) the use is located within an irrigation district or an exclusive farm use zone.
\boxtimes	□ N/A	Water Well Report/Well Log for changes in point(s) of appropriation (well(s)) or additional point(s) of appropriation (if necessary to convey water to the proposed place of use).
	WE AR Al Ac Other/	aff Use Only) E RETURNING YOUR APPLICATION FOR THE FOLLOWING REASON(S): Explication fee not enclosed/insufficient Map not included or incomplete and Use Form not enclosed or incomplete additional signature(s) required Part is incomplete and incomplete and incomplete and incomplete and incomplete are provided as a signature of the provided and incomplete are provided as a signature of the provided and incomplete are provided as a signature of the provided are provided as a signature

Part 2 of 5 - Temporary Transfer Application Map Checklist

Your temporary transfer application will be returned if any of the map requirements listed OWRD below are not met.

Please be sure that the temporary transfer application map you submit includes all the required items and matches the existing water right map. Check all boxes that apply.

	≥ N/A	If more than three water rights are involved, separate maps are needed for each water right.
\boxtimes		Permanent quality printed with dark ink on good quality paper.
\boxtimes		The size of the map can be $8\% \times 11$ inches, $8\% \times 14$ inches, 11×17 inches, or up to 30×30 inches. For 30×30 inch maps, one extra copy is required.
\boxtimes		A north arrow, a legend, and scale.
\boxtimes		The scale of the map must be: 1 inch = 400 feet, 1 inch = 1,320 feet; the scale of the Final Proof/Claim of Beneficial Use Map (the map used when the permit was certificated); the scale of the county assessor map if the scale is not smaller than 1 inch = 1,320 feet; or a scale that has been pre-approved by the Department.
\boxtimes		Township, Range, Section, ¼ ¼, DLC, Government Lot, and other recognized public land survey lines.
\boxtimes		Tax lot boundaries (property lines) are required. Tax lot numbers are recommended.
\boxtimes		Major physical features including rivers and creeks showing direction of flow, lakes and reservoirs, roads, and railroads.
\boxtimes		Major water delivery system features from the point(s) of diversion/appropriation such as main pipelines, canals, and ditches.
\boxtimes		Existing place of use that includes separate hachuring for each water right, priority date, and use including number of acres in each quarter-quarter section, government lot, or in each quarter-quarter section as projected within government lots, donation land claims, or other recognized public land survey subdivisions. If less than the entirety of the water right is being changed, a separate hachuring is needed for lands left unchanged.
\boxtimes	□ N/A	Proposed temporary place of use that includes separate hachuring for each water right, priority date, and use including number of acres in each quarter-quarter section, government lot, or in each quarter-quarter section as projected within government lots, donation land claims, or other recognized public land survey subdivisions.
\boxtimes		Existing point(s) of diversion or well(s) with distance and bearing or coordinates from a recognized survey corner. This information can be found in your water right certificate or permit.
	□ N/A	If you are proposing a change in point(s) of diversion or well(s) to convey water to the new temporary place of use, show the proposed location and label it clearly with distance and bearing or coordinates. If GPS coordinates are used, latitude-longitude coordinates may be expressed as either degrees-minutes-seconds with at least one digit after the decimal (example – 42°32′15.5″) or degrees-decimal with five or more digits after the decimal (example – 42.53764°).

Part 3 of 5 - Fee Worksheet

1000	FEE WORKSHEET for TEMPORARY (not drought) TRANSFERS		
1	Base Fee (includes temporary change to one water right for up to 1 cfs)	1	\$950.00
	Number of water rights included in transfer: 1 (2a)		
	Subtract 1 from the number in 3a above: 0 (2b) If only one water right this will be 0		
2	Multiply line 2b by \$310.00 and enter » » » » » » » » » » » »	2	
	Do you propose to change the place of use for a non-irrigation use?		RECEIVE
	☑ No: enter 0 on line 3 » » » » » » » » » » » » » » » »		
	Yes: enter the cfs for the portions of the rights to be transferred: (3a)		JUN 2 7 202
	Subtract 1.0 from the number in 3a above: (3b)		
	If 3b is 0, enter 0 on line 3 » » » » » » » » » » » » » » » »		OWRD
	If 3b is greater than 0, round up to the nearest whole number: (3c) and		
3	multiply 4c by \$210.00, then enter on line 3	3	
	Do you propose to change the place of use for an irrigation use?		
	□ No: enter 0 on line 4 » » » » » » » » » » » » » » » » » »		
	Yes: enter the number of acres in the footprint of the place of use for the		
	portions of the rights to be transferred:(4a)		
4	Multiply the number of acres in 4a above by \$2.70 and enter on line 4 » »	4	
5	Add entries on lines 1 through 4 above » » » » » » » » » » Subtotal:	5	
	Is this transfer:		
	necessary to complete a project funded by the Oregon Watershed		
	Enhancement Board (OWEB) under ORS 541.932?		
	endorsed in writing by ODFW as a change that will result in a net benefit to		
	fish and wildlife habitat?		
	If one or more boxes is checked, multiply line 5 by 0.5 and enter on line 6 »	0.00	
6	If no box is applicable, enter 0 on line 7» » » » » » » » » » » » » » »	6	
7	Subtract line 6 from line 5 » » » » » » » » » » » » Transfer Fee:	7	

	FEE WORKSHEET for TEMPORARY DROUGHT TRANSFERS									
1	Base Fee (includes drought application and recording fee for up to 1 cfs)	1	\$200.00							
	Enter the cfs for the portions of the rights to be transferred (see example below*):									
	<u>0 (2a)</u>									
	Subtract 1.0 from the number in 2a above: <u>0 (2b)</u>									
	If 2b is 0, enter 0 on line 2 » » » » » » » » » » » » » » » »									
	If 2b is greater than 0, round up to the nearest whole number: 0 (2c) and									
2	multiply 2c by \$50, then enter on line 2 » » » » » » » » »	2	\$0							
3	Add entries on lines 1 through 2 above » » » » » » » » » » Transfer Fee:	3	\$200							

^{*}Example for Line 2a calculation to transfer 45.0 acres of Primary Certificate 12345 (total 1.25 cfs for 100 acres) and 45.0 acres of Supplemental Certificate 87654 (1/80 cfs per acre) on the same land:

14043

^{1.} Divide total authorized cfs by total acres in the water right (for C12345, 1.25 cfs \div 100 ac); then multiply by the number of acres to be transferred to get the transfer cfs (x 45 ac= 0.56 cfs).

^{2.} If the water right certificate does not list total cfs, but identifies the allowable use as 1/40 or 1/80 of a cfs per acre; multiply number of acres proposed for change by either 0.025 (1/40) or 0.0125 (1/80). (For C87654, 45.0 ac x 0.0125 cfs/ac = 0.56 cfs)

^{3.} Add cfs for the portions of water rights on all the land included in the transfer; however do not count cfs for supplemental rights on acreage for which you have already calculated the cfs fee for the primary right on the same land. The fee should be assessed only once for each "on the ground" acre included in the transfer. (In this example, blank 2a would be only 0.56 cfs, since both rights serve the same 45.0 acres. Blank 2b would be 0 and Line 2 would then also become 0).

Part 4 of 5 - Applicant Information and Signature

Applicant Information

FAX NO.
om
1

Explain in your own words what you propose to accomplish with this transfer application and why: Adding new wells to existing water right to aid in providing adequate water for irrigation.

If you need additional space, continue on a separate piece of paper and attach to the application as "Attachment 1".

I (we) affirm that the information contained in this application is true and accurate.

_	Applicant signature	Theresa Cliff, President Print Name (and Title if applicable)	Calo, 6) and 3100
	Applicant signature	Print Name (and Title if applicable)	Date

Is the applicant the sole owner of the land on which the water right, or portion thereof, proposed for transfer is located?

✓ Yes

No

If NO, include signatures of all landowners (and mailing and/or e-mail addresses if different than the applicant's) or attach affidavits of consent from all landowners or individuals/entities (and mailing and/or e-mail addresses) to which the water right(s) has been conveyed.

Description of Water Delivery System

System capacity:	19.81 cubic feet per second (cfs) OR
	gallons per minute (gpm)

Describe the current water delivery system or the system that was in place at some time within the last five years. Include information on the pumps, canals, pipelines, and sprinklers used to divert, convey, and apply the water at the authorized place of use. Water is pumped from authorized wells and conveyed into an existing flood system that irrigates the place of use.

Table 1. Location of Authorized and Proposed Point(s) of Diversion (POD) or Appropriation (POA) (Note: If the POD/POA name is not specified on the certificate, assign it a name or number here.)

POD/POA Name or Number	Is this POD/POA Authorized on the Certificate or is it Proposed?	If POA, OWRD Well Log ID# (or Well ID Tag # L)	Tı	wp	Rng		Sec	y 4	%	Tax Lot, DLC or Gov't Lot	Measured Distances (from a recognized survey corner)

Check all type(s) of temporary change(s) due to drought proposed below (change "CODES" are provided in parentheses):											
	Place of Use (POU)		Point of Appropriation/Well (POA)								
	Character of Use (USE)		Additional Point of Appropriation (APOA)								
	Point of Diversion (POD)		Additional Point of Diversion (APOD)								

Will all of the proposed changes affect the entire water right?

14043 --

∀es	Complete only the Proposed ("to" lands) section of Table 2 on the next page. Use the "CODES" listed above to describe the proposed changes.
☐ No	Complete all of Table 2 to describe the portion of the water right to be changed.

RECEIVED

JUN 2 7 2022

Please use and attach additional pages of Table 2 as needed. See page 6 for instructions.

Do you have questions about how to fill-out the tables? Contact the Department at 503-986-0900 and ask for Transfer Staff.

Table 2. Description of Temporary Changes to Water Right Certificate # 89345

List only the part of the right that will be changed. For the acreage in each ½ ¼, list the change proposed. If more than one change, specify the acreage associated with each change. If more than one POD/POA, specify the acreage associated with each POD/POA.

JUN 27 2022

Water Right Certificate # 89345

For Place of Use Changes

OWRD

Are there other water right certificates, water use permits or ground water registrations associated with the "from" or the "to" lands? ☑ Yes ☐ No

If YES, list the certificate, water use permit, or ground water registration numbers: <u>Silver Creek Decree</u> (V9, P253), 2060, 8569, 8571, 8582, 37617, 44111, 60692, 86158, 86159, 91055, 91056, and S-55013

Pursuant to ORS 540.525, any "layered" water use such as an irrigation right that is supplemental to a primary right proposed for temporary transfer can be included in the transfer or remain unused on the authorized place of use. If the primary water right does not revert soon enough to allow use of the supplemental right within five years, the supplemental right shall become subject to cancellation for nonuse under ORS 540.610.

If a change in point(s) of appropriation (well(s)) or additional point(s) of appropriation is necessary to convey the water to the new temporary place of use you must provide:

Well log(s) for each authorized and proposed well(s) that are clearly labeled and associated with the corresponding well(s) in Table 1 above and on the accompanying application map. (Tip: You may search for well logs on the Department's web page at: http://apps.wrd.state.or.us/apps/gw/well-log/Default.aspx)

AND/OR

Describe the construction of the authorized and proposed well(s) in Table 3 below for any well that does not have a well log. For a proposed well(s) not yet constructed or built, provide "a best estimate" for each requested information element in the table. The Department recommends you consult a licensed well driller, geologist, or certified water right examiner to assist with assembling the information necessary to complete Table 3.

Table 3. Construction of Point(s) of Appropriation

Any well(s) in this listing must be clearly tied to corresponding well(s) described in Table 1 and shown on the accompanying application map. Failure to provide the information will delay the processing of your transfer application until it is received. The information is necessary for the Department to assess whether the proposed well(s) will access the same source aquifer as the authorized point(s) of appropriation (POA). The Department is prohibited by law from approving POA changes that do not access the same source aquifer.

Proposed or Authorized POA Name or Number	Is well already built? (Yes or No)	If an existing well, OWRD Well ID Tag No. L	Total well depth	Casing Diameter	Casing Intervals (feet)	Seal depth(s) (intervals)	Perforated or screened intervals (in feet)	Static water level of completed well (in feet)	Source aquifer (sand, gravel, basalt, etc.)	Well - specific rate (cfs or gpm). If less than full rate of water right

Klamath Basin/County <u>Drought Transfer Applications</u>

Table 4. Klamath Basin/County Well Information (DROUGHT TRANSFER APPLICATIONS ONLY)

Is there currently a flowmeter installed on each of the POAs listed in Table 1 of this application?	☐ Yes	□ No*	
---	-------	-------	--

For each well, please provide a description of the flowmeter location, the serial number, the current flowmeter reading and the date the reading was taken in the table below.

OWNER'S WELL NAME OR NUMBER.	WELL TAG NUMBER (IF AVAILABLE)	WELL LOG ID (E.G., KLAM 1234)	FLOWMETER SERIAL NUMBER	FLOWMETER READING	FLOWMETER DATE	FLOWMETER LOCATION

^{*}Please note that watermaster staff will visit the well to confirm flowmeter presence. Where possible, watermaster staff will take a static water level measurement. Alterations to the well head may be required in order to make the water level measurements.
