The time allowed to complete the transfer is specified in the final order. YOU SHOULD GIVE PARTICULAR ATTENTION TO THE TIME LIMIT. The water right for any portion of the authorized change in character of use or change in place of use NOT carried out within the time allowed will be lost.

You are required to hire a Certified Water Rights Examiner (CWRE) to complete a Claim of Beneficial Use report and map which must be submitted to this Department within one year of the date you complete the change(s) or within one year of the completion date authorized in the transfer final order, whichever occurs first.

If you have any questions related to the approval of this transfer, you may contact me by telephone at (503) 986-0881 or by e-mail at Teri.K.Hranac@wrd.state.or.us.

Now, therefore, it is ORDERED:

1. The change in place of use proposed in Transfer Application T-11269 is approved.

If the Director notifies the water user to install totalizing flow meters or other measuring devices, the water user shall install such devices specified by the Director within the period allowed in the notice. Once installed, the water user shall maintain the meters or measuring devices in good working order and shall allow the Watermaster access to the meters or measuring devices.

5. The former place of use of the transferred right shall no longer receive water under the right.

6. The approved change shall be completed and full beneficial use of the water shall be made on or before **October 1, 2013**. SUBJECT: Water Right Transfer Application T-11269

Please find enclosed the Preliminary Determination indicating that, based on the information available, the Department intends to approve application T-11269. This document is an intermediate step in the approval process; water may not be used legally as proposed in the transfer application until a Final Order has been issued by the Department.

A public notice is being published in the Department's weekly publication simultaneously with issuance of the Preliminary Determination. The notice initiates a 30-day period in which any person may file either a protest opposing the decision proposed by the Department in the Preliminary Determination or a standing statement supporting the Department's decision.

If no protest is filed, the Department will issue a Final Order consistent with the Preliminary Determination. You should receive a copy of the Final Order about 30 days after the close of the protest period.

If a protest is filed, the application may be referred to a contested case proceeding. A contested case provides an opportunity for the proponents and opponents of the decision proposed in the Preliminary Determination to present information and arguments supporting their position in a quasi-judicial proceeding.

Please do not hesitate to contact me at 503-986-0881 or Teri.K.Hranac@wrd.state.or.us if I may be of assistance.

Authority

ORS 537.705 and 540.505 to 540.580 establish the process in which a water right holder may submit a request to transfer the point of appropriation, place of use, or character of use authorized under an existing water right. OAR Chapter 690, Division 380 implements the statutes and provides the Department's procedures and criteria for evaluating transfer applications.

Applicant

WILLIAM MARTIN
DOUGLAS MARTIN
THOMSON MARTIN

RUFUS, OR 97050

Findings of Fact

Background

1. On July 7, 2011, WILLIAM, DOUGLAS, AND THOMSON MARTIN filed an application to change the place of use under Certificate 64105. The Department assigned the application number T-11269.

2. On July 27, 2011, the applicant corrected a scrivener's error in the place of use proposed to be transferred.

3. The portion of the right to be transferred is as follows:

Certificate:	64105 in the name of WILLIAM F. AND BARBARA B. MARTIN (perfected under Permit G-7301)
Use:	IRRIGATION of 16.2 ACRES
Priority Date:	MARCH 7, 1977
Rate:	0.086 CUBIC FOOT PER SECOND
Limit/Duty:	The amount of water used for irrigation, together with the amount secured under any other right existing for the same lands, shall be limited to ONE-EIGHTIETH of one cubic foot per second, or its equivalent for each acre irrigated, and shall be further limited to a diversion of not to exceed 3.0

Transfer Review Criteria (OAR 690-380-4010)

6. Water has been used within the last five years according to the terms and conditions of the right(s). There is no information in the record that would demonstrate that the right is subject to forfeiture under ORS 540.610.

7. A pump, pipeline, and sprinkler system sufficient to use the full amount of water allowed under the existing right were present within the five-year period prior to submittal of Transfer Application T-11269.

8. The proposed change would not result in enlargement of the right.

9. The proposed change would not result in injury to other water rights.

Determination and Proposed Action

The change in place of use proposed in Transfer Application T-11269 appears to be consistent with the requirements of ORS 537.705 and 540.505 to 540.580 and OAR 690-380-5000. If protests are not filed pursuant to OAR 690-380-4030, the application will be approved.

If Transfer Application T-11269 is approved, the final order will include the following:

1. *The change in place of use proposed in application T-11269 is approved.*

2. *The right to the use of the water is restricted to beneficial use at the place of use described, and is subject to all other conditions and limitations contained in Certificate 64105 and any related decree.*

3. *Water right certificate 64105 is cancelled. A new certificate will be issued describing that portion of the right not affected by this transfer.*

4. *The Director may require the water user to install a totalizing flow meter or other suitable measuring devices at each point of appropriation. If the Director notifies the water user to install totalizing flow meters or other measuring devices, the water user shall install such devices specified by the Director within the period allowed in the notice. Once installed, the water user shall maintain the meters or measuring devices in good working order and shall allow the Watermaster access to the meters or measuring devices.*

5. *The former place of use of the transferred right shall no longer receive water under the right.*

6. *The approved change shall be completed and full beneficial use of the water shall be made on or before* ***October 1, 2012****. A Claim of Beneficial Use prepared by a Certified Water Right Examiner shall be submitted by the applicant to the Department within one year after the deadline for completion of the change and full beneficial use of the water.*

7. *When satisfactory proof of the completed change is received, a new certificate confirming the right transferred will be issued.*

Hi, Larry:

I am enclosing my first draft of the draft Preliminary Determination. I cannot issue it until August 8, 2011 (end of 30 day comment period). I thought I would let you take a look at it and see if you see any problems with it.

I noticed that on Table 2 (page 6) on the "from lands", you listed the quarter/quarter for the 8.3 acres of land as NWNE. The certificate does not have any lands in Section 7 in the NWNE. It does however have lands in the NWNW. I assumed this is what you wanted as it corresponds to the map.

Thanks, Larry.

Any change to a ground water registration must be filed separately in a ground water registration modification application.

For Substitution (ground water supplemental irrigation will be substituted for surface water primary irrigation)

Ground water supplemental Permit or Certificate # _____;
Surface water primary Certificate # _____.

For a change from Supplemental Irrigation Use to Primary Irrigation Use

Identify the primary certificate to be cancelled. Certificate # _____

For a change in point(s) of appropriation (well(s)) or additional point(s) of appropriation:

☐ Well log(s) are attached for each authorized and proposed well(s) that are clearly labeled and associated with the corresponding well(s) in Table 1 above and on the accompanying application map. (**Tip**: You may search for well logs on the Department's web page at: http://apps2.wrd.state.or.us/apps/gw/well_log/Default.aspx)

OR

☐ Describe the construction of the authorized and proposed well(s) in Table 3 for any wells that do not have a well log.

Table 3. Construction of Point(s) of Appropriation

Any well(s) in this listing must be clearly tied to corresponding well(s) described in Table 1 and shown on the accompanying application map. Failure to provide adequate information is likely to delay the processing of your transfer application. For proposed wells, we recommend that you consult a licensed well driller, geologist, or certified water right examiner for the proper information needed to complete the table.

Hi, Larry:

I am enclosing my first draft of the draft Preliminary Determination. I cannot issue it until August 8, 2011 (end of 30 day comment period). I thought I would let you take a look at it and see if you see any problems with it.

I noticed that on Table 2 (page 6) on the "from lands", you listed the quarter/quarter for the 8.3 acres of land as NWNE. The certificate does not have any lands in Section 7 in the NWNE. It does however have lands in the NWNW. I assumed this is what you wanted as it corresponds to the map.

Thanks, Larry.

Watermaster Review Form: Water Right Transfer

Transfer Application: T-11269 Review Due Date: 8/7/2011

Applicant Name: William, Douglas and Thomas Martin

Proposed Changes: ☒ POU ☐ POD ☐ POA ☐ USE ☐ OTHER

Reviewer(s): Robert Wood Date of Review: Jul. 15, 2011

1. Do you have information suggesting that the water rights may be subject to forfeiture? ☐ Yes ☒ No If "Yes", describe the information and indicate if you intend to file a cancellation affidavit or if you need additional time to determine if a cancellation affidavit should be filed: N/A

2. Is there a history of regulation on the source that serves the right proposed for transfer that has involved the right and downstream water rights? ☐ Yes ☒ No Generally characterize the frequency of any regulation or explain why regulation has not occurred: Source is ground water. As of this date, there haven't been any ground water related issues in this general area.

3. Check here if it appears that downstream water rights benefit from return flows resulting from the current use of the right? ☐ If you check the box, generally characterize the locations where the return flows likely occur and list the water rights that benefit most: No known return flows.

4. Are there upstream water rights that would be affected by the proposed change? ☐ Yes ☒ No If "Yes", describe how the rights would be affected and list the rights most affected: N/A

5. For POD changes and instream transfers, check here if there are channel losses between the old and new PODs or within the proposed instream reach? ☐ If you check the box, describe and, if possible, estimate the losses: N/A

6. Would distribution of water for the right after the proposed change result in regulation of other water rights that would not have occurred if use of the existing right was maximized? ☐ Yes ☒ No If "Yes", explain: N/A

7. For POU changes, would the original place of use continue to receive water from the same source? ☐ Yes ☒ No ☐ N/A If "Yes", explain: N/A

8. For POU or USE changes, would use of the existing right at "full face value," result in the diversion of more water than can be used beneficially and without waste? ☐ Yes ☒ No If "Yes", explain: N/A

9. Are there other issues not identified through the above questions? ☐ Yes ☒ No If "Yes", explain: N/A

10. What alternatives may be available for addressing any issues identified above: N/A

11. Have headgate notices been issued for the source that serves the right? ☐ Yes ☒ No

12. The checked water control and measurement conditions should be included in the transfer:

Headgates: ☒ **NA**	☐ Present and should be maintained.	☐ Should be required prior to diverting water.	☐ May be required in the future.

Measurement Devices:

☐ *The water user shall maintain and operate the existing measurement device and shall make such improvements as may be required by the Department.*

Surface Water Diversion or Groundwater Point of Appropriation:

☒ *The Director may require the water user to install a totalizing flow meter or other suitable measuring devices at each point of diversion/appropriation. If the Director notifies the water user to install totalizing flow meters or other measuring devices, the water user shall install such devices specified by the Director within the period allowed in the notice. Once installed, the water user shall maintain the meters or measuring devices in good working order and shall allow the Watermaster access to the meters or measuring devices.*

☐ *Water use measurement conditions:* (if this condition is selected, also fill in the top sections of page 3)

a. ***Before water use may begin*** *under this order, the water user shall install a* ***totalizing flow meter****, or, with prior approval of the Director, another suitable measuring device, at each point of diversion/appropriation.*

b. *The water user shall maintain the meters or measuring devices in good working order.*

c. *The water user shall allow the Watermaster access to the meters or measuring devices; provided however, where the meters or measuring devices are located within a private structure, the Watermaster shall request access upon reasonable notice.*

Reservoirs:

☐ *The Director may require the water user to install staff gages or other suitable measuring devices that measure the entire range and stage between empty and full in each reservoir. Staff gages shall be United States Geological Survey style. Additionally, if the reservoir is located in-channel, weirs or other suitable measuring devices may be required upstream and downstream of the reservoir, and an adjustable outlet valve may be required. If the Director notifies the water user to install adjustable outlet valves, staff gages, weirs, or other suitable measuring devices, the water user shall install such devices specified by the Director within the period allowed in the notice. Once installed, the water user shall maintain the devices in good working order and shall allow the Watermaster access to the devices.*

Reference: Application T- 11269

On July 7, 2011, we received your water right Transfer application. The application was accompanied by $900.00. Our receipt number 103328 is enclosed.

By copy of this letter, we are asking the Watermaster for a report regarding the potential for injury to existing water rights which may be caused by the requested change.

Your application will be examined to determine whether additional information is needed. We will notify you if further information or corrections to the application or map are required.

Except as provided under ORS 540.510(3) for municipalities, you may not use water for the new use, in the new place of use or from the new point of [diversion *or* appropriation] until a final order approving the transfer application has been issued by the Department. In order to avoid any possible forfeiture of the water right, you should continue to use the water as described by your existing water right. If the land is sold before the transfer is approved, the buyer's consent to the transfer will be required unless a recorded deed or other legal document clearly established that the water right was not conveyed in the sale.

If you have any questions, please contact the Transfer Section at (503)986-0883.
