Summary of Injury Review:

- ☐ The proposed transfer will result in another, existing water right not receiving previously available water to which it is legally entitled or result in significant interference with a surface water source as per 690-380-0100(3).

Summary of GW-SW Transfer Similarity Review:

- ☐ The proposed SW-GW transfer doesn't meet the definition of "similarly" as per OAR 690-380-2130.

This is only a summary. Documentation is attached and should be read thoroughly to understand the basis for determinations.

The information provided in the application is insufficient to evaluate whether the proposed transfer may be approved because:

- ☐ The water well reports provided with the application do not correspond to the water rights affected by the transfer.
- ☐ The application does not include water well reports or a description of the well construction details sufficient to establish the ground water body developed or proposed to be developed.
- ☐ Other _____

1. Basic description of the changes proposed in this transfer: This proposed transfer relates to certificate 95194, which authorizes the use of groundwater from a single existing well (CLAC 56004, "Well 2") for year-round nursery use on 29.0 acres, with a maximum pumping rate of 0.51 cfs. The POU location is in the Elliot's Prairie region, several miles due east of Woodburn, Oregon.

This transfer proposes to add an additional POA (APOA), a well not yet drilled ("Well 3), to certificate 95194.

2. Will the proposed POA develop the same aquifer (source) as the existing authorized POA?
☒ Yes ☐ No Comments: The authorized POA, CLAC 56004, is 159 ft deep and obtains groundwater from water-bearing sand and gravel beds within the Willamette Aquifer system (Gannett and Caldwell, 1998; Conlon and others, 2005; Woodward and others, 1998). The proposed APOA is planned to be approximately 350 feet deep; despite its greater planned depth, the proposed APOA will also obtain groundwater from the same Willamette Aquifer system.
3. a) Is there more than one source developed under the right (e.g., basalt and alluvium)?
☐ Yes ☒ No _____
- b) If yes, estimate the portion of the right supplied by each of the sources and describe any limitations that will need to be placed on the proposed change (rate, duty, etc.): N/A

4. a) Will this proposed change, at its maximum allowed rate of use, likely result in an increase in interference with **another ground water right**?
☐ Yes ☒ No Comments: The proposed location for the APOA is only 60 feet from the authorized POA, and thus no appreciable increases in interference to other groundwater rights are likely to occur.
- b) If yes, would this proposed change, at its maximum allowed rate of use, likely result in another groundwater right not receiving the water to which it is legally entitled?
☐ Yes ☐ No If yes, explain: N/A
5. a) Will this proposed change, at its maximum allowed rate of use, likely result in an increase in interference with **another surface water source**?
☐ Yes ☒ No Comments: The proposed location for the APOA is only 60 feet from the authorized POA, and thus no appreciable increases in interference to nearby surface water sources are likely to occur.
- b) If yes, at its maximum allowed rate of use, what is the expected change in degree of interference with any **surface water sources** resulting from the proposed change?
Stream: _____ ☐ Minimal ☐ Significant
Stream: _____ ☐ Minimal ☐ Significant
Provide context for minimal/significant impact: N/A
6. For SW-GW transfers, will the proposed change in point of diversion affect the surface water source similarly (as per OAR 690-380-2130) to the authorized point of diversion specified in the water use subject to transfer?
☐ Yes ☐ No Comments: N/A
7. What conditions or other changes in the application are necessary to address any potential issues identified above: None
8. Any additional comments: None

Conclusions of Law

The additional point of appropriation proposed in Transfer Application T-14258 are consistent with the requirements of ORS 537.705 and 540.505 to 540.580 and OAR 690-380-5000.

3. Approval of this transfer application does not constitute nor grant legal access onto or through another person's property for purposes of accessing the new point of appropriation.
4. Water right Certificate 95194 is cancelled. A new certificate will be issued describing the portion of the right not affected by this transfer.
5. The quantity of water diverted at the new additional point of appropriation (Well 3), together with that diverted at the original point of appropriation (Well 2), shall not exceed the quantity of water lawfully available at the original point of appropriation (Well 2).

6. Water shall be acquired from the same aquifer (water source) as the original point of appropriation.
7. Water Use Measurement Conditions:
 - a. Before water use may begin under this order, the water user shall install a totalizing flow meter, or, with prior approval of the Director, another suitable measuring device, at each point of appropriation (new and existing).
 - b. The water user shall maintain the meters or measuring devices in good working order.
 - c. The water user shall allow the Watermaster access to the meters or measuring devices; provided however, where the meters or measuring devices are located within a private structure, the Watermaster shall request access upon reasonable notice.
8. Full beneficial use of the water shall be made, consistent with the terms of this order, on or before **October 1, 2025**. A Claim of Beneficial Use prepared by a Certified Water Right Examiner shall be submitted by the applicant to the Department within one year after the deadline for completion of the change and full beneficial use of the water.
9. After satisfactory proof of beneficial use is received, a new certificate confirming the right transferred will be issued.

SUBJECT: Water Right Transfer Application T-14258

Please find enclosed the Preliminary Determination indicating that, based on the information available, the Department intends to approve application T-14258. This document is an intermediate step in the approval process; water may not be used legally as proposed in the transfer application until a Final Order has been issued by the Department. Please read this entire letter carefully to determine your responsibility for additional action.

A public notice is being published in the Department's weekly publication, simultaneously with issuance of the Preliminary Determination. The notice initiates a period in which any person may file either a protest opposing the decision proposed by the Department in the Preliminary Determination or a standing statement supporting the Department's decision. The protest period will end 30 days after the Department's notice.

If no protest is filed, the Department will issue a Final Order consistent with the Preliminary Determination. You should receive a copy of the Final Order about 30 days after the close of the protest period.

If a protest is filed, the application may be referred to a contested case proceeding. A contested case provides an opportunity for the proponents and opponents of the decision proposed in the Preliminary Determination to present information and arguments supporting their position in a quasi-judicial proceeding.

Please don't hesitate to contact me at 503 979-9607 or Kim.R.French@water.oregon.gov, if I may be of assistance.

The additional point of appropriation proposed in Transfer Application T-14258 appears to be consistent with the requirements of ORS 537.705 and 540.505 to 540.580 and OAR 690-380-5000. If protests are not filed pursuant to OAR 690-380-4030, the application will be approved.

If Transfer Application T-14258 is approved, the final order will include the following:

1. *The additional point of appropriation proposed in Transfer Application T-14258 is approved.*

3. *Approval of this transfer application does not constitute nor grant legal access onto or through another person's property for purposes of accessing the new point of appropriation.*
4. *Water right Certificate 95194 is cancelled. A new certificate will be issued describing the portion of the right not affected by this transfer.*
5. *The quantity of water diverted at the new additional point of appropriation (Well 3), together with that diverted at the original point of appropriation (Well 2), shall not exceed the quantity of water lawfully available at the original point of appropriation (Well 2).*
6. *Water shall be acquired from the same aquifer (water source) as the original point of appropriation.*

7. *Water Use Measurement Conditions:*

- a. *Before water use may begin under this order, the water user shall install a totalizing flow meter, or, with prior approval of the Director, another suitable measuring device, at each point of appropriation (new and existing).*
 - b. *The water user shall maintain the meters or measuring devices in good working order.*
 - c. *The water user shall allow the Watermaster access to the meters or measuring devices; provided however, where the meters or measuring devices are located within a private structure, the Watermaster shall request access upon reasonable notice.*
8. *Full beneficial use of the water shall be made, consistent with the terms of this order, on or before **October 1, 2025**. A Claim of Beneficial Use prepared by a Certified Water Right Examiner shall be submitted by the applicant to the Department within one year after the deadline for completion of the change and full beneficial use of the water.*
9. *After satisfactory proof of beneficial use is received, a new certificate confirming the right transferred will be issued.*

If this Preliminary Determination determines that a change in point of diversion or appropriation would result in injury, the applicant may file a notification of intent to pursue approval of the transfer under OAR 690-380-5030 to 690-380-5050. Protests and standing statements must be received by the Water Resources Department within 30 days after the last

date of publication of the newspaper notice or the Department's weekly notice as prescribed by OAR 690-380-4020, whichever is later.

Protests must be in writing and received in hard copy form with the appropriate statutory protest filing fee; protests cannot be filed by electronic mail. [OAR 690-002-0025(3) and 690-380-0100(9)]. The protest must include the following:

- The person's name, address, and telephone number;
- All reasonably ascertainable issues and all reasonably available arguments supporting the person's position by the close of the protest period. Failure to raise a reasonably ascertainable issue in a protest or failure to provide sufficient specificity to afford the Department an opportunity to respond to the issue may preclude consideration of the issue during the hearing;
- If you are the applicant, a protest fee of \$480 required by ORS 536.050; and
- If you are not the applicant, a protest fee of \$950 required by ORS 536.050 and proof of service of the protest upon the applicant.

Requests for Standing

Under the provisions of OAR 690-380-4030(5), the Department shall provide to persons who have filed standing statements as defined under OAR 690-380-0100(11) notice of any differences between the Department's Preliminary Determination and the Final Order, notice of a hearing on the application under OAR 137-003-0535, and an opportunity to request limited party status or party status in the hearing.

Requests for standing must be received in the Water Resources Department no later than 30 days after the last date of publication of the newspaper notice or the Department's weekly notice as prescribed by OAR 690-380-4020, whichever is later. Requests for standing must be in writing, and must include the following:

- The requester's name, mailing address and telephone number;
- If the requester is representing a group, association or other organization, the name, address and telephone number of the represented group;
- A statement that the requester supports the preliminary determination as issued.

After the protest period has ended, the Director will either issue a Final Order or schedule a contested case hearing. The contested case hearing will be scheduled only if a protest has been filed under OAR 690-380-4030. In accordance with OAR 690-380-4200, notice and conduct of the hearing shall:

- Be under the applicable provisions of ORS 183.310 to 183.550, pertaining to contested cases, and the hearing shall be held in the area where the rights are located unless all parties stipulate otherwise; and
- If a protest has asserted that a water right to be transferred has been forfeited through non-use, include the notice and procedures described in OAR 690-017-0500 to 690-017-0900.

If after hearing the Department issues a proposed Final Order finding that a change in point of diversion or appropriation will result in injury, the applicant may file a notification of intent to pursue approval of the transfer under OAR 690-380-5030 to 690-380-5050 within 15 days of receipt of the proposed order. Notwithstanding 690-002-0175, if the applicant files a notification of intent to pursue approval of the transfer under 690-380-5030 to 690-380-5050, the deadline for filing exceptions to the proposed order shall be 30 days after the Department provides notice to the parties that the transfer does not meet the requirements of 690-380-5030 to 690-380-5050.

If you do not request a hearing within 30 days after the close of the protest period, or if you withdraw a request for a hearing, notify the Department or the administrative law judge that you will not appear, or fail to appear at a scheduled hearing, the Director may issue a final order by default. If the Director issues a Final Order by default, the Department designates the relevant portions of its files on this matter, including all materials that you have submitted relating to this matter, as the record for purpose of proving a *prima facie* case upon default.

You may be represented by an attorney at the hearing. Legal aid organizations may be able to assist a party with limited financial resources. Generally, partnerships, corporations, associations, governmental subdivisions, or public or private organizations are represented by an attorney. However, consistent with OAR 690-002-0020 and OAR 690-137-0555, an agency representative may represent partnerships, corporations, associations, governmental subdivisions or public, or private organizations if the Department determines that appearance of a person by an authorized representative will not hinder the orderly and timely development of the record in this case.

Your water right transfer is in the first of three phases of processing. Enclosed is a draft of the Department's Preliminary Determination regarding Transfer Application T-14258. The document reflects the Department's conclusion that, based on the information currently available, the transfer will be approved. Your response and submittal of the items outlined below are required by December 30, 2023.

Required items needing your immediate attention:

1. Please carefully review the Draft Preliminary Determination to verify that it accurately reflects the changes you intend to make and to become familiar with the proposed conditions.
2. **Respond in writing** by December 30, 2023, with acknowledgement that you agree to the proposed action and conditions.
3. If you find any errors, please let me know.
4. **REQUIRED:** You must submit a **Report of Ownership** for the lands where the water right is currently located (i.e., the FROM lands). This report:
 - a) Must be prepared by a title company;
 - b) Shall include a "prepared by" statement and the date the title company prepared the report printed on the cover sheet;
 - c) Must:
 - i. Be prepared no earlier than 3 months prior to the date of issuance of the Draft Preliminary Determination showing current ownership; **OR**
 - ii. Be prepared within 3 months of the date the water right conveyance agreement was recorded; **OR**
 - iii. Show ownership for the FROM land at the time a water right conveyance agreement was recorded.

If water right conveyance agreements are involved, it is helpful to provide copies of those agreements along with the Report of Ownership.

IMPORTANT: In order for the Department to clearly understand the date that the title company prepared the Report of Ownership, the title company must indicate/state the date that they prepared the report on the coversheet and/or first page of the report.

- d) Must include a list of owners at the time the report was generated; **AND**
 - e) Must include a legal description of the property where the water right to be transferred is currently located (i.e., the FROM lands).
5. You must provide a notarized statement of consent signed by any landowner listed in the Report of Ownership who is not already included in the transfer application. The Department's statement of consent form (**Consent By Deeded Landowner**) is available at: [https://www.oregon.gov/OWRD/WRDFormsPDF/consent to transfer form.pdf](https://www.oregon.gov/OWRD/WRDFormsPDF/consent%20to%20transfer%20form.pdf)

Conditions of your water right...

The Watermaster has required a water measurement device at both the new and existing points of appropriation prior to appropriation of water. Enclosed is a contact information sheet to assist you in pursuing additional information or approval of the required (or alternate) device.

Please note the proposed date by which all conditions must be met: October 1, 2025. If the required completion date is insufficient to comply with any of the conditions, you may request more time, at no cost to you, during this stage of processing. **Please let me know by the comment deadline if you will need more time and explain the reasons why.**

What happens next...

Once the preliminary determination is issued a publication period is required. The Department will publish a notice in their weekly publication, which opens a 30-day period in which the transfer can be protested.

Issuance of the Preliminary Determination will occur shortly after we receive:

1. Your written response to the conditions and proposed action in the Draft Preliminary Determination (e-mail is acceptable); and
2. The Report of Ownership, including affidavits of consent from any landowners shown in the ownership report who have not signed the transfer application. The title company must indicate/state the date that they prepared the ownership report on the coversheet and/or first page of the report.

If we do not receive the items listed above by December 30, 2023, a Preliminary Determination may be issued denying the application as incomplete.

Please don't hesitate to contact me at 503-979-9607 or Kim.R.French@water.oregon.gov, if I may be of assistance.

Summary of Same Source Review:

- ☐ The proposed change in point of appropriation is not within the same aquifer as per OAR 690-380-2110(2).

Summary of Injury Review:

- ☐ The proposed transfer will result in another, existing water right not receiving previously available water to which it is legally entitled or result in significant interference with a surface water source as per 690-380-0100(3).

Summary of GW-SW Transfer Similarity Review:

- ☐ The proposed SW-GW transfer doesn't meet the definition of "similarly" as per OAR 690-380-2130.

This is only a summary. Documentation is attached and should be read thoroughly to understand the basis for determinations.

The information provided in the application is insufficient to evaluate whether the proposed transfer may be approved because:

- ☐ The water well reports provided with the application do not correspond to the water rights affected by the transfer.
- ☐ The application does not include water well reports or a description of the well construction details sufficient to establish the ground water body developed or proposed to be developed.
- ☐ Other _____

1. Basic description of the changes proposed in this transfer: This proposed transfer relates to certificate 95194, which authorizes the use of groundwater from a single existing well (CLAC 56004, "Well 2") for year-round nursery use on 29.0 acres, with a maximum pumping rate of 0.51 cfs. The POU location is in the Elliot's Prairie region, several miles due east of Woodburn, Oregon.

This transfer proposes to add an additional POA (APOA), a well not yet drilled ("Well 3), to certificate 95194.

2. Will the proposed POA develop the same aquifer (source) as the existing authorized POA?
☒ Yes ☐ No Comments: The authorized POA, CLAC 56004, is 159 ft deep and obtains groundwater from water-bearing sand and gravel beds within the Willamette Aquifer system (Gannett and Caldwell, 1998; Conlon and others, 2005; Woodward and others, 1998). The proposed APOA is planned to be approximately 350 feet deep; despite its greater planned depth, the proposed APOA will also obtain groundwater from the same Willamette Aquifer system.
3. a) Is there more than one source developed under the right (e.g., basalt and alluvium)?
☐ Yes ☒ No _____
- b) If yes, estimate the portion of the right supplied by each of the sources and describe any limitations that will need to be placed on the proposed change (rate, duty, etc.): N/A

4. a) Will this proposed change, at its maximum allowed rate of use, likely result in an increase in interference with **another ground water right**?
☐ Yes ☒ No Comments: The proposed location for the APOA is only 60 feet from the authorized POA, and thus no appreciable increases in interference to other groundwater rights are likely to occur.
- b) If yes, would this proposed change, at its maximum allowed rate of use, likely result in another groundwater right not receiving the water to which it is legally entitled?
☐ Yes ☐ No If yes, explain: N/A
5. a) Will this proposed change, at its maximum allowed rate of use, likely result in an increase in interference with **another surface water source**?
☐ Yes ☒ No Comments: The proposed location for the APOA is only 60 feet from the authorized POA, and thus no appreciable increases in interference to nearby surface water sources are likely to occur.
- b) If yes, at its maximum allowed rate of use, what is the expected change in degree of interference with any **surface water sources** resulting from the proposed change?
Stream: _____ ☐ Minimal ☐ Significant
Stream: _____ ☐ Minimal ☐ Significant
Provide context for minimal/significant impact: N/A
6. For SW-GW transfers, will the proposed change in point of diversion affect the surface water source similarly (as per OAR 690-380-2130) to the authorized point of diversion specified in the water use subject to transfer?
☐ Yes ☐ No Comments: N/A
7. What conditions or other changes in the application are necessary to address any potential issues identified above: None
8. Any additional comments: None

Reference: Application T-14258

On June 6, 2023, the Department received your water right Permanent Transfer Application. The application was accompanied by \$1840.00. Receipt number 140786 is enclosed.

By copy of this letter, we are asking the Watermaster for a report regarding the potential for injury to existing water rights which may be caused by the requested change. A review form will also be sent to groundwater staff to determine whether the proposed well accesses the same source of water as the original well.

This application may require publication of a notice for two consecutive weeks in a newspaper with general circulation in the area where the water right is located. If it is determined that newspaper notice will be required, the Department will prepare the notice and notify you of the cost. You will be responsible for submitting payment to the Department prior to publication of the notice.

Except as provided under ORS 540.510(3) for municipalities, you may not use water from the new point of appropriation until a final order approving the transfer application has been issued by the Department. In order to avoid any possible forfeiture of the water right, you should continue to use the water as described by your existing water right.

If the land is sold before the application is approved, the buyer's consent to the application will be required unless a recorded deed or other legal document clearly established that the water right was not conveyed in the sale.

Refer to the following page for a chart showing the steps and expected timelines for the processing of your application.

If you have any questions, please contact the Transfer Section at (503) 986-0935.

Please be sure that the transfer application map you submit includes all the required items and matches the existing water right map. Check all boxes that apply.

- ☒ ☐ N/A Certified Water Right Examiner (CWRE) Stamp and Original Signature. For a list of CWREs, see http://apps.wrd.state.or.us/apps/wr/cwre_license_view/. CWRE stamp and signature are not required for substitutions.
- ☐ ☒ N/A If **more than three** water rights are involved, separate maps are needed for each water right.
- ☒ Permanent quality printed with dark ink on good quality paper.
- ☒ The size of the map can be 8½ x 11 inches, 8½ x 14 inches, 11 x 17 inches, or up to 30 x 30 inches. For 30 x 30 inch maps, one extra copy is required.
- ☒ A north arrow, a legend, and scale.
- ☒ The scale of the map must be: 1 inch = 400 feet, 1 inch = 1,320 feet, the scale of the Final Proof/Claim of Beneficial Use Map (the map used when the permit was certificated), the scale of the county assessor map if the scale is not smaller than 1 inch = 1,320 feet, or a scale that has been pre-approved by the Department.
- ☒ Township, Range, Section, ¼ ¼, DLC, Government Lot, and other recognized public land survey lines.
- ☒ Tax lot boundaries (property lines) are required. Tax lot numbers are recommended.
- ☒ Major physical features including rivers and creeks showing direction of flow, lakes and reservoirs, roads, and railroads.
- ☒ Major water delivery system features from the point(s) of diversion/appropriation such as main pipelines, canals, and ditches.
- ☒ Existing place of use that includes separate hachuring for each water right, priority date, and use including number of acres in each quarter-quarter section, government lot, or in each quarter-quarter section as projected within government lots, donation land claims, or other recognized public land survey subdivisions. If less than the entirety of the water right is being changed, a separate hachuring is needed for lands left unchanged.
- ☐ ☒ N/A Proposed place of use that includes separate hachuring for each water right, priority date, and use including number of acres in each quarter-quarter section, government lot, or in each quarter-quarter section as projected within government lots, donation land claims, or other recognized public land survey subdivisions.
- ☒ Existing point(s) of diversion or well(s) with distance and bearing or coordinates from a recognized survey corner. This information can be found in your water right certificate or permit.

If GPS coordinates are used, latitude-longitude coordinates may be expressed as either degrees-minutes-seconds with at least one digit after the decimal (example – 42°32'15.5") or degrees-decimal with five or more digits after the decimal (example – 42.53764°).

FEE WORKSHEET for PERMANENT TRANSFER (except Substitution)

1. For irrigation calculate cfs for each water right involved as follows:
 - a. Divide total authorized cfs by total acres in the water right (*for C12345, 1.25 cfs ÷ 100 ac*); then multiply by the number of acres to be transferred to get the transfer cfs (*x 45 ac = 0.56 cfs*).
 - b. If the water right certificate does not list total cfs, but identifies the allowable use as 1/40 or 1/80 of a cfs per acre; multiply number of acres proposed for change by either 0.025 (1/40) or 0.0125 (1/80). (*For C87654, 45.0 ac x 0.0125 cfs/ac = 0.56 cfs*)
2. Add cfs for the portions of water rights on all the land included in the transfer; however **do not count cfs for supplemental rights on acreage for which you have already calculated the cfs fee for the primary right on the same land**. The fee should be assessed only once for each "on the ground" acre included in the transfer. (*In this example, blank 5a would be only 0.56 cfs, since both rights serve the same 45.0 acres. Blank 5b would be 0 and Line 5 would then also become 0*).

Are there other water right certificates, water use permits or ground water registrations associated with the "from" or the "to" lands? ☐ Yes ☐ No

If YES, list the certificate, water use permit, or ground water registration numbers: _____.

Pursuant to ORS 540.510, any "layered" water use such as an irrigation right that is supplemental to a primary right proposed for transfer must be included in the transfer or be cancelled. Any change to a ground water registration must be filed separately in a ground water registration modification application.

For Substitution (ground water supplemental irrigation will be substituted for surface water primary irrigation)

Ground water supplemental Permit or Certificate # NA;

Surface water primary Certificate # NA.

For a change from Supplemental Irrigation Use to Primary Irrigation Use

Identify the primary certificate to be cancelled. Certificate # NA

For a change in point(s) of appropriation (well(s)) or additional point(s) of appropriation:

- ☒ Well log(s) are attached for each authorized and proposed well(s) that are clearly labeled and associated with the corresponding well(s) in Table 1 above and on the accompanying application map.

Tip: You may search for well logs on the Department's web page at:

http://apps.wrd.state.or.us/apps/gw/well_log/Default.aspx

AND/OR

- ☒ Describe the construction of the authorized and proposed well(s) in Table 3 for any wells that do not have a well log. For *proposed wells not yet constructed or built*, provide "a best estimate" for each requested information element in the table. The Department recommends you consult a licensed well driller, geologist, or certified water right examiner to assist with assembling the information necessary to complete Table 3.

Table 3. Construction of Point(s) of Appropriation

Any well(s) in this listing must be clearly tied to corresponding well(s) described in Table 1 and shown on the accompanying application map. Failure to provide the information will delay the processing of your transfer application until it is received. The information is necessary for the department to assess whether the proposed well(s) will access the same source aquifer as the authorized point(s) of appropriation (POA). The Department is prohibited by law from approving POA changes that do not access the same source aquifer.

Decision Tree: Can Multiple Water Rights be included in a Single Transfer Application?

OAR 690-380-3220 – General Criteria / OAR 690-380-2250 – Suppl Water Right or Permit / OAR 690-380-8020 – Temp Transfer Suppl WR

FOR DIV. 380 TRANSFERS: The following series of questions outlined in the flow chart below can be used to determine if separate transfer applications are required for each water right proposed for transfer. To qualify for including multiple water rights in a single application, a proposed transfer application must meet at least one of the exceptions outlined in OAR 690-380-3220(1)-(4).

- **NOTE:** Only water rights that meet the criteria of a "water use subject to transfer" under ORS 540.505 may be transferred in a Div. 380 Transfer, except as otherwise noted in OAR 540.510, OAR 690-380-2240, & OAR 690-380-2250. Permit Amendments & GR Modifications are administered under ORS 537.211(4) & OAR 690-382, respectively.
- "More than one landowner" does NOT mean two individuals who are married & are both a deeded owner of the parcel(s), nor a single Trust citing more than one name.
- **Other considerations:** The claim of beneficial use for all the water rights involved in a transfer will be evaluated at one time. The Department does not allow sequential or partial perfection of the rights changed through a water right transfer. As a result, the ability of a water right holder to obtain a certificate and/or apply for a subsequent transfer, including a temporary transfer, will be limited if the first transfer includes rights held by other parties who have not completed the authorized changes.
