REFERENCE: Transfer Application T-14237

Enclosed is a copy of the final order approving your water right transfer application.

The time allowed to complete the transfer is specified in the final order. YOU SHOULD GIVE PARTICULAR ATTENTION TO THE TIME LIMIT. The water right for any portion of the authorized change in character of use or change in place of use NOT carried out within the time allowed will be lost.

An extension of the time limit can be allowed only upon a showing that diligent effort has been made to complete the actual change(s) within the time allowed.

You are required to hire a Certified Water Rights Examiner (CWRE) to complete a Claim of Beneficial Use report and map which must be submitted to this Department within one year of the date you complete the change(s) or within one year of the completion date authorized in the transfer final order, whichever occurs first.

If you have any questions related to the approval of this transfer, you may contact your caseworker, Dante Luongo, by telephone at (971) 304-5006 or by e-mail at Dante.j.luongo@water.oregon.gov.

Authority

Oregon Revised Statutes (ORS) 537.705 and 540.505 to 540.580 establish the process in which a water right holder may submit a request to transfer the point of diversion, place of use, or character of use authorized under an existing water right. Oregon Administrative Rules (OAR) Chapter 690, Division 380 implement the statutes and provides the Department's procedures and criteria for evaluating transfer applications.

Applicant

BRIAN THOMPSON
55805 HWY 74
HEPPNER, OR 97836

Findings of Fact

1. On May 5, 2023, BRIAN THOMPSON filed an application for an additional point of diversion and to change the place of use under Certificate 96670, and to change the place of use for Certificates 96669 and 96671. The Department assigned the application number T-14237.
2. Notice of the application for transfer was published on May 16, 2023, pursuant to OAR 690-380-4000. No comments were filed in response to the notice.
3. On March 13, 2024, the Department sent a copy of the draft Preliminary Determination proposing to approve Transfer Application T-14237 to the applicant. The draft Preliminary Determination cover letter set forth a deadline of April 12, 2024, for the applicant to respond. The applicant requested that the Department proceed with issuance of a Preliminary Determination and provided the necessary information to demonstrate that the applicant is authorized to pursue the transfer.

This final order is subject to judicial review by the Court of Appeals under ORS 183.482. Any petition for judicial review must be filed within the 60-day time period specified by ORS 183.482(1). Pursuant to ORS 536.075 and OAR 137-003-0675, you may petition for judicial review or petition the Director for reconsideration of this order. A petition for reconsideration may be granted or denied by the Director, and if no action is taken within 60 days following the date the petition was filed, the petition shall be deemed denied.

4. On May 17, 2024, the Department issued a Preliminary Determination proposing to approve Transfer Application T-14237 and sent a copy to the applicant. Additionally, notice of the Preliminary Determination for the transfer application was published in the Department's weekly notice on May 21, 2024, and in the East Oregonian newspaper on May 21 and May 28, 2024, pursuant to ORS 540.520 and OAR 690-380-4020. No protests were filed in response to the notices.

12. The Oregon Department of Fish and Wildlife (ODFW) has determined that a fish screen is necessary at the new point of diversion to prevent fish from entering the diversion and that the diversion is not currently equipped with an appropriate fish screen. This diversion may be eligible for screening cost-share funds.

Transfer Review Criteria [OAR 690-380-0100(14), 690-380-4010(2) and OAR 690-380-2110(2)]

13. Water has been used within the last five years according to the terms and conditions of the rights. There is no information in the record that would demonstrate that the rights are subject to forfeiture under ORS 540.610.
14. A water delivery system sufficient to use the full amount of water allowed under the existing rights was present within the five-year period prior to submittal of Transfer Application T-14237.
15. The water rights are subject to transfer as defined in ORS 540.505(4) and OAR 690-380-0100(14).
16. The proposed point of diversion for Certificate 96670 develops water from the same source as the authorized points of diversion, as required by OAR 690-380-2110(2).
17. The proposed changes, as conditioned, would not result in enlargement of the rights.
18. The proposed change, as conditioned, would not result in injury to other existing water rights.

19. All other application requirements are met.

Conclusions of Law

The additional point of diversion and change in place of use proposed in Transfer Application T-14237 are consistent with the requirements of ORS 537.705 and 540.505 to 540.580 and OAR 690-380-5000.

Now, therefore, it is ORDERED:

1. The additional point of diversion and change in place of use proposed in Transfer Application T-14237 are approved.
2. The right to the use of the water is restricted to beneficial use at the place of use described and is subject to all other conditions and limitations contained in Certificates 96669, 96670, and 96671 and any related decree.
3. Approval of this transfer application does not constitute nor grant legal access onto or through another person's property for purposes of accessing the new point of diversion and the new place of use.
4. Water right Certificates 96669, 96670, and 96671 are cancelled. New certificates will be issued for Certificates 96670 and 96671 describing those portions of the rights not affected by this transfer.
5. The quantity of water diverted at the new additional point of diversion (POD #2), together with that diverted at the original points of diversion (POINT 2, POINT 3, and WCDIC POD), shall not exceed the quantity of water lawfully available at the original points of diversion (POINT 2, POINT 3, and WCDIC POD).
6. Water shall be acquired from the same source as the original points of diversion.
7. The former places of use of the transferred rights shall no longer receive water under the rights.
8. Water use measurement conditions:
 - a. Before water use may begin under this order, the water user shall install a totalizing flow meter, or, with prior approval of the Director, another suitable measuring device, at each point of diversion (new and existing).
 - b. The water user shall maintain the meters or measuring devices in good working order.
 - c. The water user shall allow the Watermaster access to the meters or measuring devices; provided however, where the meters or measuring devices are located within a private structure, the Watermaster shall request access upon reasonable notice.

9. Prior to diverting water, the water user shall install an approved fish screen at the new point of diversion and shall provide to the OWRD a written statement from Oregon Department of Fish and Wildlife (ODFW) that the installed screen meets the state's criteria, or that ODFW has determined a screen is not necessary.
10. The water user shall operate and maintain the fish screen at the new point of diversion consistent with ODFW's operational and maintenance standards. If ODFW determines the screen is not functioning properly, and is unsuccessful in working with the water user to meet ODFW standards, ODFW may request that OWRD regulate the use of water until OWRD receives notification from ODFW that the fish screen is functioning properly.
11. Full beneficial use of the water shall be made, consistent with the terms of this order, on or before **October 1, 2025**. A Claim of Beneficial Use prepared by a Certified Water Right Examiner shall be submitted by the applicant to the Department within one year after the deadline for completion of the changes and full beneficial use of the water.
12. After satisfactory proof of beneficial use is received, a new certificate confirming the rights transferred will be issued.

confirms the right to use the waters of WILLOW CREEK, a tributary of COLUMBIA RIVER for IRRIGATION of 17.5 ACRES.

This right was confirmed by decree of the Circuit Court of the State of Oregon for Morrow County. The decree is of record at Salem, in the Order Record of the Water Resources Director in Volume 1, at Page 73. The date of priority is 1883.

Water use measurement conditions:

- A. The water user shall maintain the totalizing flow meter or other suitable measuring device as approved by the Director in good working order at each new point of diversion.

The quantity of water diverted at the additional point of diversion, together with that diverted at the original points of diversion, shall not exceed the quantity of water lawfully available at the original points of diversion.

In order to avoid enlargement of the right or injury to other rights, it is preferable to have a flowmeter installed that reads instantaneous, totalizes, and has real-time access so the Watermaster can access the flow data. However, if the flowmeter will not work and provide the real time data, the Watermaster can approve an alternative type of measuring device that will provide instantaneous data, totalizes, and will provide real time access to the flow data.

The water user shall maintain a headgate to control and regulate the quantity of water diverted as required by the Department.

The water user shall operate and maintain the fish screen at the new point of diversion consistent with Oregon Department of Fish and Wildlife's (ODFW) operational and maintenance standards. The right to the use of the water for the above purpose is restricted to beneficial use on the lands or place of use described and is subject to all other conditions and limitations contained in said decree.

SUBJECT: Water Right Transfer Application T-14237

Please find enclosed the Preliminary Determination indicating that, based on the information available, the Department intends to approve application T-14237. This document is an intermediate step in the approval process; water may not be used legally as proposed in the transfer application until a Final Order has been issued by the Department. Please read this entire letter carefully to determine your responsibility for additional action.

A public notice is being published in the Department's weekly publication and in the East Oregonian newspaper, simultaneously with issuance of the Preliminary Determination. The notice initiates a period in which any person may file either a protest opposing the decision proposed by the Department in the Preliminary Determination or a standing statement supporting the Department's decision. The protest period will end 30 days after the last date of newspaper publication.

If no protest is filed, the Department will issue a Final Order consistent with the Preliminary Determination. You should receive a copy of the Final Order about 30 days after the close of the protest period.

If a protest is filed, the application may be referred to a contested case proceeding. A contested case provides an opportunity for the proponents and opponents of the decision proposed in the Preliminary Determination to present information and arguments supporting their position in a quasi-judicial proceeding.

Please don't hesitate to contact me at 971 304-5006 or Dante.J.Luongo@water.oregon.gov, if I may be of assistance.

Sincerely,

Authority

Oregon Revised Statutes (ORS) 537.705 and 540.505 to 540.580 establish the process in which a water right holder may submit a request to transfer the point of diversion, place of use, or character of use authorized under an existing water right. Oregon Administrative Rules (OAR) Chapter 690, Division 380 implement the statutes and provides the Department's procedures and criteria for evaluating transfer applications.

BRIAN THOMPSON
55805 HWY 74
HEPPNER, OR 97836

Findings of Fact

1. On May 5, 2023, Brian Thompson filed an application for an additional point of diversion and to change the place of use under Certificate 96670, and to change the place of use for Certificates 96669 and 96671. The Department assigned the application number T-14237.
2. Notice of the application for transfer was published on May 16, 2023, pursuant to OAR 690-380-4000. No comments were filed in response to the notice.
3. On March 15, 2024, the Department sent a copy of the draft Preliminary Determination proposing to approve Transfer Application T-14237 to the applicant. The draft Preliminary Determination cover letter set forth a deadline of April 14, 2024, for the applicant to respond. The applicant requested that the Department proceed with issuance of a Preliminary Determination and provided the necessary information to demonstrate that the applicant is authorized to pursue the transfer.

4. The first right to be transferred is as follows:

Certificate: 96669 in the name of WILLOW CREEK DISTRICT IMPROVEMENT CO. and BRIAN THOMPSON (confirmed by Willow Creek, Gilliam & Morrow Counties (F), 1910 Decree)

Pursuant to OAR 690-380-4030, any person may file a protest or standing statement within 30 days after the last date of publication of the newspaper notice or the Department's weekly notice as prescribed by OAR 690-380-4020, whichever is later, of this preliminary determination.

11. The Oregon Department of Fish and Wildlife (ODFW) has determined that a fish screen is necessary at the new point of diversion to prevent fish from entering the diversion and that the diversion is not currently equipped with an appropriate fish screen. This diversion may be eligible for screening cost-share funds.

Transfer Review Criteria [OAR 690-380-0100(14), 690-380-4010(2) and OAR 690-380-2110(2)]

12. Water has been used within the last five years according to the terms and conditions of the rights. There is no information in the record that would demonstrate that the rights are subject to forfeiture under ORS 540.610.
13. A water delivery system sufficient to use the full amount of water allowed under the existing rights was present within the five-year period prior to submittal of Transfer Application T-14237.
14. The water rights are subject to transfer as defined in ORS 540.505(4) and OAR 690-380-0100(14).
15. The proposed point of diversion for Certificate 96670 develops water from the same source as the authorized points of diversion, as required by OAR 690-380-2110(2).
16. The proposed changes, as conditioned, would not result in enlargement of the rights.
17. The proposed change, as conditioned, would not result in injury to other existing water rights.
18. All other application requirements are met.

Determination and Proposed Action

The additional point of diversion and change in place of use proposed in Transfer Application T-14237 appear to be consistent with the requirements of ORS 537.705 and 540.505 to 540.580 and OAR 690-380-5000. If protests are not filed pursuant to OAR 690-380-4030, the application will be approved.

If Transfer Application T-14237 is approved, the final order will include the following:

1. *The additional point of diversion and change in place of use proposed in Transfer Application T-14237 are approved.*

2. *The right to the use of the water is restricted to beneficial use at the place of use described and is subject to all other conditions and limitations contained in Certificates 96669, 96670, and 96671 and any related decree.*
3. *Approval of this transfer application does not constitute nor grant legal access onto or through another person's property for purposes of accessing the new point of diversion and the new place of use.*
4. *Water right Certificates 96669, 96670, and 96671 are cancelled. New certificates will be issued for Certificates 96670 and 96671 describing those portions of the rights not affected by this transfer.*
5. *The quantity of water diverted at the new additional point of diversion (POD #2), together with that diverted at the original points of diversion (POINT 2, POINT 3, and WCDIC POD), shall not exceed the quantity of water lawfully available at the original points of diversion (POINT 2, POINT 3, and WCDIC POD).*
6. *Water shall be acquired from the same source as the original points of diversion.*
7. *The former places of use of the transferred rights shall no longer receive water under the rights.*
8. *Water use measurement conditions:*
 - a. *Before water use may begin under this order, the water user shall install a totalizing flow meter, or, with prior approval of the Director, another suitable measuring device, at each point of diversion (new and existing).*
 - b. *The water user shall maintain the meters or measuring devices in good working order.*
 - c. *The water user shall allow the Watermaster access to the meters or measuring devices; provided however, where the meters or measuring devices are located within a private structure, the Watermaster shall request access upon reasonable notice.*
9. *Prior to diverting water, the water user shall install an approved fish screen at the new point of diversion and shall provide to the OWRD a written statement from Oregon Department of Fish and Wildlife (ODFW) that the installed screen meets the state's criteria, or that ODFW has determined a screen is not necessary.*
10. *The water user shall operate and maintain the fish screen at the new point of diversion consistent with ODFW's operational and maintenance standards. If ODFW determines the screen is not functioning properly, and is unsuccessful in working with the water user to meet ODFW standards, ODFW may request that OWRD regulate the use of water until OWRD receives notification from ODFW that the fish screen is functioning properly.*

11. Full beneficial use of the water shall be made, consistent with the terms of this order, on or before **October 1, 2025**. A Claim of Beneficial Use prepared by a Certified Water Right Examiner shall be submitted by the applicant to the Department within one year after the deadline for completion of the changes and full beneficial use of the water.
12. After satisfactory proof of beneficial use is received, a new certificate confirming the rights transferred will be issued.

Oregon Water Resources Department

This Preliminary Determination was prepared by Dante Luongo. If you have questions about the information in this document, you may reach me at 971-304-5006 or Dante.J.Luongo@water.oregon.gov.

Protests

Under the provisions of ORS 540.520(6) & (7) and OAR 690-380-4030, within 30 days after the last date of publication of the newspaper notice or the Department's weekly notice as prescribed by OAR 690-380-4020, whichever is later, any person may file, jointly or severally, a protest expressing opposition of approval of the transfer application and disagreement with this Preliminary Determination or a standing statement in support of this Preliminary Determination. If this Preliminary Determination determines that a change in point of diversion or appropriation would result in injury, the applicant may file a notification of intent to pursue approval of the transfer under OAR 690-380-5030 to 690-380-5050. Protests and standing statements must be received by the Water Resources Department within 30 days after the last date of publication of the newspaper notice or the Department's weekly notice as prescribed by OAR 690-380-4020, whichever is later.

Protests must be in writing and received in hard copy form with the appropriate statutory protest filing fee; protests cannot be filed by electronic mail. [OAR 690-002-0025(3) and 690-380-0100(9)]. The protest must include the following:

- The person's name, address, and telephone number;

- All reasonably ascertainable issues and all reasonably available arguments supporting the person's position by the close of the protest period. Failure to raise a reasonably ascertainable issue in a protest or failure to provide sufficient specificity to afford the Department an opportunity to respond to the issue may preclude consideration of the issue during the hearing;
- If you are the applicant, a protest fee of \$480 required by ORS 536.050; and
- If you are not the applicant, a protest fee of \$950 required by ORS 536.050 and proof of service of the protest upon the applicant.

Requests for Standing

Under the provisions of OAR 690-380-4030(5), the Department shall provide to persons who have filed standing statements as defined under OAR 690-380-0100(11) notice of any differences between the Department's Preliminary Determination and the Final Order, notice of a hearing on the application under OAR 137-003-0535, and an opportunity to request limited party status or party status in the hearing.

Requests for standing must be received in the Water Resources Department no later than 30 days after the last date of publication of the newspaper notice or the Department's weekly notice as prescribed by OAR 690-380-4020, whichever is later. Requests for standing must be in writing, and must include the following:

- The requester's name, mailing address and telephone number;
- If the requester is representing a group, association or other organization, the name, address and telephone number of the represented group;
- A statement that the requester supports the preliminary determination as issued.

After the protest period has ended, the Director will either issue a Final Order or schedule a contested case hearing. The contested case hearing will be scheduled only if a protest has been filed under OAR 690-380-4030. In accordance with OAR 690-380-4200, notice and conduct of the hearing shall:

- Be under the applicable provisions of ORS 183.310 to 183.550, pertaining to contested cases, and the hearing shall be held in the area where the rights are located unless all parties stipulate otherwise; and
- If a protest has asserted that a water right to be transferred has been forfeited through non-use, include the notice and procedures described in OAR 690-017-0500 to 690-017-0900.

If after hearing the Department issues a proposed Final Order finding that a change in point of diversion or appropriation will result in injury, the applicant may file a notification of intent to pursue approval of the transfer under OAR 690-380-5030 to 690-380-5050 within 15 days of receipt of the proposed order. Notwithstanding 690-002-0175, if the applicant files a notification of intent to pursue approval of the transfer under 690-380-5030 to 690-380-5050, the deadline for filing exceptions to the proposed order shall be 30 days after the Department provides notice to the parties that the transfer does not meet the requirements of 690-380-5030 to 690-380-5050.

If you do not request a hearing within 30 days after the close of the protest period, or if you withdraw a request for a hearing, notify the Department or the administrative law judge that you will not appear, or fail to appear at a scheduled hearing, the Director may issue a final order by default. If the Director issues a Final Order by default, the Department designates the relevant portions of its files on this matter, including all materials that you have submitted relating to this matter, as the record for purpose of proving a *prima facie* case upon default.

You may be represented by an attorney at the hearing. Legal aid organizations may be able to assist a party with limited financial resources. Generally, partnerships, corporations, associations, governmental subdivisions, or public or private organizations are represented by an attorney. However, consistent with OAR 690-002-0020 and OAR 690-137-0555, an agency representative may represent partnerships, corporations, associations, governmental subdivisions or public, or private organizations if the Department determines that appearance of a person by an authorized representative will not hinder the orderly and timely development of the record in this case.

☐ Yes ☒ No If "Yes", explain:

12. Are there other issues not identified through the above questions that should be considered in determining whether the change "can be effected without injury to other rights"?

☐ Yes ☒ No If "Yes", explain:

Water Right and Diversion Transfer Comment Form

*(ODFW provides this review to WRD so that WRD can make findings
according to statutory requirements.)*

Reference Transfer #: T-14237, Brian Thompson

Date of review: 12/18/2023

A. The Oregon Department of Fish and Wildlife (ODFW) does not believe this proposed transfer will injure any instream water rights.

B. *Fish screen requirements pursuant to ORS 540.525 or 540.532:*

Screen Now

Finding of Fact: The Oregon Department of Fish and Wildlife (ODFW) has determined that a fish screen is necessary at the new point of diversion to prevent fish from entering the diversion and that the diversion is not currently equipped with an appropriate fish screen. This diversion may be eligible for screening cost-share funds.

Condition: Prior to diverting water, the water user shall install an approved fish screen at the new point of diversion and shall provide to the OWRD a written statement from Oregon Department of Fish and Wildlife (ODFW) that the installed screen meets the state's criteria, or that ODFW has determined a screen is not necessary.

The water user shall operate and maintain the fish screen at the new point of diversion consistent with ODFW's operational and maintenance standards. If ODFW determines the screen is not functioning properly, and is unsuccessful in working with the water user to meet ODFW standards, ODFW may request that OWRD regulate the use of water until OWRD receives notification from ODFW that the fish screen is functioning properly.

Additional Fish Screening and Passage Information for the Applicant

(To be completed by ODFW for WRD to provide to the applicant.)

Transfer #: T-14237, Brian Thompson

The applicant should be aware that fish screening and passage may be required for certain changes in point of diversion

Fish screening is required as a condition of this transfer. The fish screen must meet ODFW's design, construction, operational and maintenance standards.

Pursuant to ORS 498.306, cost-share funds may be available to assist in the installation of fish screening.

The applicant should contact the ODFW staff member below to obtain additional information on the design, construction, operational, and maintenance standards for the fish screen and to obtain information about ODFW's cost-sharing program for screening.

Prior to installation, the water user must obtain written approval from ODFW that the required screen meets ODFW's criteria.

ODFW staff name: Nathaniel Ashley

Address: PO BOX 515; W HWY 26 PATTERSON RD

City/State/Zip: John Day, OR 97845

Phone: (541)575-0561

This transfer may trigger requirements for fish passage under ORS 509.585 because a new point of diversion will be constructed, an existing point of diversion's capacity will be increased, or an existing point of diversion will be abandoned. The applicant should contact the ODFW staff member below for a determination of whether native migratory fish are or were present at the applicable location, which will determine whether fish passage must be addressed.

Reference: Application T-14237

On May 5, 2023, the Department received your water right Permanent Transfer Application. The application was accompanied by \$4490.00. Receipt number 140649 is enclosed.

By copy of this letter, we are asking the Watermaster for a report regarding the potential for injury to existing water rights which may be caused by the requested change.

This application may require publication of a notice for two consecutive weeks in a newspaper with general circulation in the area where the water right is located. If it is determined that newspaper notice will be required, the Department will prepare the notice and notify you of the cost. You will be responsible for submitting payment to the Department prior to publication of the notice.

Except as provided under ORS 540.510(3) for municipalities, you may not use water in the new place of use or from the new point of diversion appropriation until a final order approving the transfer application has been issued by the Department. In order to avoid any possible forfeiture of the water right, you should continue to use the water as described by your existing water right.

If the land is sold before the application is approved, the buyer's consent to the application will be required unless a recorded deed or other legal document clearly established that the water right was not conveyed in the sale.

Refer to the following page for a chart showing the steps and expected timelines for the processing of your application.

If you have any questions, please contact the Transfer Section at (503) 986-0935.

Part 2 of 5 – Transfer Application Map

Your transfer application will be returned if any of the map requirements listed below ~~are~~ ^{CWRE} not met.

Please be sure that the transfer application map you submit includes all the required items and matches the existing water right map. Check all boxes that apply.

- ☒ ☐ N/A Certified Water Right Examiner (CWRE) Stamp and Original Signature. For a list of CWREs, see http://apps.wrd.state.or.us/apps/wr/cwre_license_view/. CWRE stamp and signature are not required for substitutions.

- ☒ Permanent quality printed with dark ink on good quality paper.
- ☒ The size of the map can be 8½ x 11 inches, 8½ x 14 inches, 11 x 17 inches, or up to 30 x 30 inches. For 30 x 30 inch maps, one extra copy is required.
- ☒ A north arrow, a legend, and scale.
- ☒ The scale of the map must be: 1 inch = 400 feet, 1 inch = 1,320 feet, the scale of the Final Proof/Claim of Beneficial Use Map (the map used when the permit was certificated), the scale of the county assessor map if the scale is not smaller than 1 inch = 1,320 feet, or a scale that has been pre-approved by the Department.

FEE WORKSHEET for PERMANENT TRANSFER (except Substitution)

1. For irrigation calculate cfs for each water right involved as follows:
 - a. Divide total authorized cfs by total acres in the water right (for C12345, $1.25 \text{ cfs} \div 100 \text{ ac}$); then multiply by the number of acres to be transferred to get the transfer cfs ($\times 45 \text{ ac} = 0.56 \text{ cfs}$).
 - b. If the water right certificate does not list total cfs, but identifies the allowable use as $1/40$ or $1/80$ of a cfs per acre; multiply number of acres proposed for change by either 0.025 ($1/40$) or 0.0125 ($1/80$). (For C87654, $45.0 \text{ ac} \times 0.0125 \text{ cfs/ac} = 0.56 \text{ cfs}$)
2. Add cfs for the portions of water rights on all the land included in the transfer; however **do not count cfs for supplemental rights on acreage for which you have already calculated the cfs fee for the primary right on the same land**. The fee should be assessed only once for each "on the ground" acre included in the transfer. (In this example, blank 5a would be only 0.56 cfs , since both rights serve the same 45.0 acres. Blank 5b would be 0 and Line 5 would then also become 0).

Describe the current water delivery system or the system that was in place at some time within the last five years. Include information on the pumps, canals, pipelines, and sprinklers used to divert, convey, and apply the water at the authorized place of use.

Water is diverted from the east bank of Willow Creek at the WCDIC POD located in T2S, R25E, WM. In the NE NW of Section 27, From the diversion point water flows north 4.6 ± miles through the Heppner/Lexington pipeline where it is then diverted into an 8" branch pipeline that extends northwesterly 975 ± feet to a point where it crosses to the west side of Willow Creek and continues 1.4 ± in a northwesterly direction along the western side of the farmland. This branch pipeline is used to irrigate ground authorized for irrigation under Certificates C 96669, C 96670, and C 96671. There are riser pipes and valves located along the branch pipeline. Side roll irrigation machines and portable handlines are connected to the risers and are used to irrigate the farmland.

_____ gallons per minute (gpm)

Describe the current water delivery system or the system that was in place at some time within the last five years. Include information on the pumps, canals, pipelines, and sprinklers used to divert, convey, and apply the water at the authorized place of use.

Water is diverted from the east bank of Willow Creek at the WCDIC POD located in T2S, R25E, WM. In the NE NW of Section 27, From the diversion point water flows north 4.6 ± miles through the Heppner/Lexington pipeline where it is then diverted into an 8" branch pipeline that extends northwesterly 975 ± feet to a point where it crosses to the west side of Willow Creek and continues 1.4 ± in a northwesterly direction along the western side of the farmland. This branch pipeline is used to irrigate ground authorized for irrigation under Certificates C 96669, C 96670, and C 96671. There are riser pipes and valves located along the branch pipeline. Side roll irrigation machines and portable handlines are connected to the risers and are used to irrigate the farmland.
