It is FURTHER ORDERED that the following provisions shall be effective when in the judgement of the watermaster it becomes

necessary to install headgates and measuring devices.

That the diversion works shall include an in-line flow meter, a weir, or other suitable device for measuring the water to which the applicant is entitled.

That the type and plans of the measuring device be approved by the watermaster before the beginning of construction work and that the weir or measuring device be installed under the general supervision of said watermaster.
