As modified under the provisions of the order of the Water Resources Director, entered on November 17, 1976, approving transfer application No. 3356, a portion of the right previously described by the certificate recorded at page 16306, Volume 13, State Record of Water Right Certificates, in the names of Albert and C. O. Bigelow and George Sparlin, now exists for the appropriation of not to exceed 0.87 cubic foot per second of water from Williams Creek, with a date of priority of 1858, for irrigation of a certain 30.0 acres in NW $\frac{1}{4}$ SE $\frac{1}{4}$ and 12.0 acres in SW $\frac{1}{4}$ SE $\frac{1}{4}$ of Section 23; and 10.0 acres in NW $\frac{1}{4}$ SW $\frac{1}{4}$ of Section 24, Township 38 South, Range 5 West, W.M., by diversion of water through the Little Williams Ditch, from a point of diversion located 180 feet North and 400 feet West from the Center Corner of Section 26, being within the SE $\frac{1}{4}$ NW $\frac{1}{4}$ of Section 26, Township 38 South, Range 5 West, W.M.

The applicant herein, owner of the lands above described, proposes to change the point of diversion therefrom, without loss of priority, to a point located 860 feet South and 100 feet West from the Center Corner of Section 23, being within the NE $\frac{1}{4}$ SW $\frac{1}{4}$ of Section 23, Township 38 South, Range 5 West, W.M.

Notice of the application, pursuant to ORS 540.510, was published in the Grants Pass Daily Courier, a newspaper printed and having general circulation in Josephine County, Oregon, for a period of three weeks in the issues of December 21 and 28, 1977; and January 4, 1978.

Mr. Robert B. Steimer, Watermaster, has filed a statement to the effect that the proposed change in point of diversion may be made without injury to existing rights.

No objections having been filed and it appearing that the proposed change in point of diversion may be made without injury to existing rights, the application

should be approved.

NOW, THEREFORE, it hereby is ORDERED that the requested change in point of diversion, as described herein, without loss of priority, is approved.

It is FURTHER ORDERED that the quantity of water diverted at the new point of diversion shall not exceed the quantity of water available at the old point of diversion under the subject right, and shall not exceed 0.87 cubic foot per second.

It is FURTHER ORDERED that the following provisions shall be effective when in the judgment of the watermaster it becomes necessary to install headgates and measuring devices:

That the diversion works shall include an in line flow meter, a weir, or other suitable device for measuring the water to which the applicant is entitled;

That the type and plans of the measuring device be approved by the watermaster before the beginning of construction work and that the weir or measuring device be installed under the general supervision of said watermaster.

It is FURTHER ORDERED that the construction work shall be completed and the change in point of diversion of water made on or before October 1, 1979.

It is FURTHER ORDERED that upon proof satisfactory to the Water Resources Director of completion of works and beneficial use of water to the extent intended under the provisions of this order, a confirming certificate of water right shall be issued to the applicant herein.
