ORDER APPROVING
TRANSFER NO. 3608

On March 31, 1977, an application was filed in the office of the Water Resources Director by Tim Stone for a change in place of use and point of diversion under an existing water right of record, pursuant to the provisions of ORS 540.510 to 540.530.

The certificate recorded at Page 16498, Volume 13, State Record of Water Right Certificates, in the name of Ellen M. Carlock, describes a right for the use of not to exceed 0.05 cubic foot per second from Quartz Creek for irrigation of 2.0 acres in SE $\frac{1}{4}$ SW $\frac{1}{4}$ of Section 8, Township 35 South, Range 6 West, W.M., with a date of priority of April, 1889.

Water for the said right is diverted through the Cochrane Ditch from a point located 1150 feet North and 2640 feet East from the Southwest corner of Section 8, being within the SW $\frac{1}{4}$ SE $\frac{1}{4}$ of said Section 8.

The applicant herein, owner of the lands above described, proposes to change the place of use and point of diversion therefrom, and without loss of priority, to irrigate a certain 2.0 acres in SW $\frac{1}{4}$ SE $\frac{1}{4}$ of said Section 8 from a point of diversion located 180 feet North and 210 feet East from the South quarter-corner of Section 8, being within the SW $\frac{1}{4}$ SE $\frac{1}{4}$ of said Section 8.

Mr. Robert B. Steimer, Watermaster, has filed a statement to the effect that the proposed change in place of use and point of diversion may be made without injury to existing rights.

No objection having been filed and it appearing that the proposed change in place of use and point of diversion may be made without injury to existing rights, the application should be approved.

NOW, THEREFORE, it hereby is ORDERED that the requested change in place of use and point of diversion described herein, without loss of priority, is approved.

It is FURTHER ORDERED that the quantity of water diverted at the new point of diversion shall not exceed the quantity of water available at the old point of diversion under the subject right, and shall not exceed 0.05 cubic foot per second.

It is FURTHER ORDERED that the following provisions shall be effective when in the judgement of the watermaster it becomes necessary to install head-gates and measuring devices:

That the diversion works shall include an in line flow meter, a weir, or other suitable device for measuring the water to which the applicant is entitled;

That the type and plans of the measuring device be approved by the watermaster before the beginning of construction work and that the weir or measuring device be installed under the general supervision of said watermaster.

It is FURTHER ORDERED that the construction work shall be completed and the change in point of diversion of water made and said water so transferred shall be applied to beneficial use on or before October 1, 1979.

It is FURTHER ORDERED that the certificate of water right heretofore issued to Ellen M. Carlock and recorded at Page 16498, Volume 13, State Record of Water Right Certificates, is canceled, and upon proof satisfactory to the Water Resources Director of completion of works and beneficial use of water to the extent intended under the provisions of this order, a confirming certificate of water right shall be issued to the applicant herein.

Dated at Salem, Oregon, this 25th day of May, 1977.
