Watermaster Review Form Transfer Application

Watermaster Review Form: Water Right Transfer

Oregon Water Resources Department 725 Summer St NE, Suite A Salem, Oregon 97301-1266 (503) 986-0900 www.oregon.gov/OWRD

Transfer Application: T-14239

Review Due Date: 06/11/2023

Applicant Name: Westwood Farms	
Proposed Changes:	
Reviewer(s): G. Wacker Date of Review: 05/18/2023	
 Do you have <u>evidence</u> that the right has not been used in the last 5 years and that the presumption forfeiture would not likely be rebuttable? Yes ✓ No If "Yes", attach evidence (e.g. dated aerial photo showing pavement or building on the land for >5 yrs.) 	
2. Is there a history of regulation on the source that serves this (or these) right(s) that has involved to transferred right(s) and downstream water rights? Yes No Generally characterize the frequency of any regulation or explain why regulation has not occurred:	
3. Have headgate notices been issued for the source that serves the transferred right(s)? Yes ✓ No Records not available.	
4. In your estimation, after the proposed change, would distribution of water for the right(s) result is regulation of other water rights that would not have occurred if use under the original right(s) was/were maximized? Yes No If "Yes", explain:	n
5. In your estimation, if the proposed change is approved, are there upstream water rights that would be affected? Yes ✓ No If "Yes", describe how the rights would be affected and list the rights affected:	

6.	Check here if it appears that downstream water rights benefit from return flows resulting from the current use of the transferred right(s)? If you check the box, generally characterize the locations where the return flows likely occur and list the water rights that benefit most:
7.	N/A For POD changes and instream transfers, check here if there are channel losses between the old and new PODs or within the proposed instream reach? If you check the box, describe and, if possible, estimate the losses:
8.	N/A For instream transfers that propose protection of a reach beyond the mouth of the source stream: N/A Would the quantity be measureable into the receiving stream consistent with OAR 690-077-0015(8)? Yes No
9.	For POU changes: ✓ N/A Is it likely the original place of use would continue to receive water from the same source? ✓ Yes No If "Yes", explain:
10	For POU or USE changes: N/A In your best judgment, would use of the existing right at "full face value," result in the diversion of more water than can be used beneficially and without waste? Yes No If "Yes", explain:
11	 For POU changes that involve micro-irrigation: N/A a. Has the applicant made changes (absent a transfer) to convert to micro-irrigation within the current place of use boundary of the water right proposed for transfer, and previously demonstrated to the Department through monitoring and site inspections by the Watermaster that the proposed transfer will not result in injury or enlargement? Yes No If "Yes", explain:

).	(or portions thereof) as those lands involved in this transfer?
	Yes No If "Yes", answer the following:
	i. Were there any problems with more acres being irrigated (or wetted) than were authorized under the temporary transfer? Yes No If "Yes", explain:
	ii. Did the designated areas that were to remain dry (or not wetted) under the temporary transfer actually remain dry? Yes No If "No", explain:
	iii. Did the applicant comply with and meet all of the conditions of the temporary transfer? Yes No If "No", explain:
	iv. Do you have any other observations regarding the temporary transfer? Yes No If "Yes", describe:
	v. Did the applicant demonstrate to the Department through monitoring and site inspections by the Watermaster that neither injury nor enlargement occurred as a result of the temporary transfer? Yes No If "No", explain:
	c. To the best of your knowledge, if this transfer is approved, does it appear that:
	i. "Injury" will occur to other water rights that share the same source? Yes No If "Yes", explain:
	ii. "Enlargement" of the water right being transferred will occur? Yes No If "Yes", explain:

12. Are there other issues not identified through the above questions that should be considered in determining whether the change "can be effected without injury to other rights"?
Yes ✓ No If "Yes", explain:
13. What alternatives may be available for addressing any issues identified above:
14. Do conditions need to be included in the transfer order to avoid enlargement of the right or injury to other rights? No Yes, as checked and provided below:
For POU changes that involve micro-irrigation, provide the monitoring and reporting conditions necessary to prevent injury/enlargement:
A Headgate should be required prior to diverting water.
Measurement Devices for POD or POA: (if this condition is selected, also fill in the top sections of Page 4)
a. Before water use may begin under this order, the water user shall install a totalizing flow meter*, or, with prior approval of the Director, another suitable measuring device, of at each point of diversion/appropriation (new and existing) OR at each new point of diversion/appropriation with the exception that water rights issued to the Bureau of Reclamation or an irrigation district (or similar entity) are not subject to this condition.
b. The water user shall maintain the meters or measuring devices in good working order.
c. The water user shall allow the Watermaster access to the meters or measuring devices; provided however, where the meters or measuring devices are located within a private structure, the Watermaster shall request access upon reasonable notice.
Reservoir water use measurement: (if this condition is selected, also fill in the top sections of Page 4)
a. Before water use may begin under this order, the water user shall install staff qaqes*, or, with prior approval of the Director, other suitable measuring devices, that measure the entire range and stage between empty and full in each reservoir. Staff gages shall be United States Geological Survey style.
b. Before water use may begin under this order, if the reservoir is located in channel, weirs or other suitable measuring devices must be installed upstream and downstream of the reservoir, and, an adjustable outlet valve must be installed. The water user shall maintain such devices in good working order. A written waiver may be obtained, if in the judgment of the Director, the installation of weirs or other suitable measuring devices, or the adjustable outlet valve, will provide no public benefit.
* The following alternative device(s) should be substituted for the bold, underlined device in the above
selected condition: Submerged Orifice
Weir Submerged Office Parshall Flume Flow Restrictor

Watermaster Review Form

Transfer Application

Last revised May 2019

Oregon Water Resources Department

Measurement Condition Information for the Applicant

(To be sent with the Draft Preliminary Determination or Final Order)

Transfer #: T- 14239

725 Summer Street NE, Suite A

Salem, OR 97301-1266

TACS

In order to avoid enlargement of the right or injury to other rights, a totalizing flow meter will
be required to be installed <u>prior to diversion of water</u> , as a condition of this transfer:
✓ at each point of diversion/appropriation (new and existing) OR
at each new point of diversion/appropriation.
For additional information, or to obtain approval of a different type of measurement device, the applicant should contact the area Watermaster:
Watermaster name: Greg Wacker
District: 16
Address: 725 Summer St NE Ste A
City/State/Zip: Salem, OR 97301
Phone: 971-719-6262
Email: gregory.j.wacker@water.oregon.gov
Note: If a device other than the one specified in the Preliminary Determination or Final Order is approved by the Watermaster, fill out and mail the form below to the Salem office.

Approval of an Alternate Measurement Device T- (to be filled out after consultation with the applicant, or after a site visit)
On behalf of the Director, I authorize use of the following suitable alternate measurement device:
Watermaster signature District Date
If this form is used for approval of an alternative measurement device, it must be mailed to:
Oregon Water Resources Department

Groundwater Transfer Review Summary Form

Transfer/PA # T- 14239
GW Reviewer <u>Gabriela Ferreira</u> Date Review Completed: <u>December 19, 2023</u>
Summary of Same Source Review:
☐ The proposed change in point of appropriation is not within the same aquifer as per OAR 690-380-2110(2).
Summary of Injury Review:
☐ The proposed transfer will result in another, existing water right not receiving previously available water to which it is legally entitled or result in significant interference with a surface water source as per 690-380-0100(3).
Summary of GW-SW Transfer Similarity Review:
☐ The proposed SW-GW transfer doesn't meet the definition of "similarly" as per OAR 690-380-2130.
This is only a summary. Documentation is attached and should be read thoroughly to understand the basis for determinations.

	The water waffected by		ided with the app	lication do not corres	spond to the water rights	
					on of the well construction proposed to be developed.	
	Other					
1.	POAs autho 1950 for irri maximum ra	rized under GR gation of 48.0 ac ate of 0.668 cfs (Claim 2814. GR cres by the currer 300 gpm). GR C	Claim 2814 has a printly authorized POA laim 2814 was modified.	oposed transfer modifies ority date of March 31, (Well 1, MARI 4850) and fied by T-12494 (final not yet constructed).	
	the authoriz	ed location of W	ell 2. APOA MA	the second secon	l, MARI 4848) and move uthorized POA on GR e of 0.0668 cfs.	
_	*****	10011	The second of th		1.1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1	

Will the proposed POA develop the same aquifer (source) as the existing authorized POA? Yes No Comments: Depth to bedrock (Columbia River Basalt) near the POAs is approximately 600 to 650 feet below land surface (bls). The currently authorized POA, MARI 4850 is completed to a depth of 44 feet bls. Proposed APOA MARI 4848 is completed to a depth of 40 feet bls. The proposed construction for Well 2 would be to a total depth of 110 feet bls and is not changed by the proposed new location. The authorized POAs, MARI 4850 and Well 2, obtain groundwater from the alluvial aquifer system, more specifically the Willamette aquifer or water-bearing zones within the upper Willamette confining unit which are considered to be part of a single alluvial aquifer system within this area of the Willamette Basin (Gannett and Caldwell, 1998). The proposed APOA MARI 4848 would similarly develop the Willamette aguifer,

3.	a) Is there more than one source developed under the right (e.g., basalt and alluvium)? Yes No
	b) If yes, estimate the portion of the right supplied by each of the sources and describe any limitations that will need to be placed on the proposed change (rate, duty, etc.):
4.	a) Will this proposed change, at its maximum allowed rate of use, likely result in an increase in interference with another ground water right?
	Yes No Comments: Several wells were identified near the proposed POAs that could be affected by the proposed change, including MARI 4801, MARI 4851, and MARI 4799, which are all completed to depths less than 50 feet bls. The currently authorized POAs, MARI 4850 and proposed APOA MARI 4848 are completed to depths of 44 and 40 feet bls respectively. The proposed POA Well 2 would be completed to a depth of 110 feet bls. Therefore, the POAs and nearby wells that will likely be affected by the proposed use do not fully penetrate the sedimentary aquifer in this area, which the USGS estimates at ~600-650 feet thick (Gannett and Caldwell, 1998). Consequently, injury due to the proposed change would not be found because the potentially-affected well(s) do not fully penetrate the shared aquifer (OAR 690-008-0001(8)(c)).
	b) If yes, would this proposed change, at its maximum allowed rate of use, likely result in another groundwater right not receiving the water to which it is legally entitled? Yes No If yes, explain: N/A
5.	a) Will this proposed change, at its maximum allowed rate of use, likely result in an increase in interference with another surface water source?
	Yes No Comments: The currently authorized POA MARI 4850 is approximately 8,000 ft from the nearest perennial surface water source (Willamette River). The proposed modification to the location of Well 2 is approximately 250 feet east of the currently authorized location; proposed APOA MARI 4848 is approximately 650 feet southeast of authorized POA MARI 4850. The shallow wells (MARI 4848 and MARI 4850) are constructed within Holocene gravel deposits from the Willamette River floodplain. In general, these deposits have a saturated thickness of 20-40 feet and the water level is closely tied to stream stage in the Willamette River (Conlon et al., 2005). The relatively small changes in distance between authorized POAs and proposed POA locations to the nearest perennial surface water source, at the maximum rate authorized (300 gpm), is unlikely to result in an increase in interference with nearby surface water sources.
	b) If yes, at its maximum allowed rate of use, what is the expected change in degree of interference with any surface water sources resulting from the proposed change? Stream:
	Stream:
	Provide context for minimal/significant impact: N/A
6.	For SW-GW transfers, will the proposed change in point of diversion affect the surface water source similarly (as per OAR 690-380-2130) to the authorized point of diversion specified in the water use subject to transfer? Yes No Comments: N/A
7.	What conditions or other changes in the application are necessary to address any potential issues identified above:

Transfer Application: T-14239

8. Any additional comments: None

May 15, 2023

JOHN P. COLEMAN PO BOX 82 ST. PAUL, OR 97137

Reference: Application T- 14239

On May 1, 2023, OWRD received your water Groundwater Registration Modification application. The application was accompanied by \$1250.00. Our receipt number 140619 is enclosed.

By copy of this letter, we are asking the Watermaster for a report regarding the potential for injury to existing water rights which may be caused by the requested change. A review form will also be sent to our groundwater staff to determine whether the proposed well accesses the same source of water as the original well.

This application <u>may</u> require publication of a notice for two consecutive weeks in a newspaper with general circulation in the area where the water right is located. If it is determined that newspaper notice will be required, the Department will prepare the notice and notify you of the cost. You will be responsible for submitting payment to the Department prior to publication of the notice.

You may not use water for the new point of appropriation until a final order approving recognition of the groundwater registration modification application has been issued by the Department. If the land is sold before the modification is approved, the buyer's consent to the modification will be required unless a recorded deed or other legal document clearly established that the groundwater registration was not conveyed in the sale.

Please refer to the following page for a chart showing the steps and expected timelines for the processing of your application.

If you have any questions, please contact the Transfer Section at (503) 979-9931.

RE: Application for Groundwater Registration Modification for GR-2814 in the Name of Westwood Farms, Inc.

Dear Kelly:

GSI Water Solutions, Inc. (GSI) is submitting the enclosed Groundwater Registration Modification on behalf of Westwood Farms, Inc (Applicant). The Applicant is proposing to change the location of Well 2 and add Pump Well as an additional point of appropriation to GR-2814.

The required application documents, request for assignment, and associated fees of \$1,250 and \$120 are enclosed.

Please contact me if you have any questions or concerns. My phone number is 541-753-0933.

Sincerely,

Zach Pike-Urlacher

Water Resources Consultant

Explain in your own words what you propose to accomplish with this modification; and why: The applicant is proposing to change the location of Well 2 and add Pump Well as an additional point of appropriation to GR-2814.

Check this box if this project is fi	lly or partially	y funded by the	e American	Recovery	and Reinvestment
Act. (Federal stimulus dollars)					

	(Check one box)
×	By signing this application, I (we) understand that, upon receipt of the draft preliminary determination and prior to Department approval of the Groundwater modification, I (we) will be required to provide landownership information and evidence that I am authorized to pursue the modification as identified in OAR 690-382-0400(16)(a); OR
	I (we) affirm the applicant is a municipality as defined in ORS 540.510(3)(b) and that the right is in the name of the municipality or a predecessor; OR
	I (we) affirm that the applicant is an entity with the authority to condemn property and is acquiring the property to which the Groundwater registration proposed for modification is appurtenant by condemnation and have attached supporting documentation.

I understand that prior to Department approval of the groundwater registration modification, I may be required to submit payment to the Department for publication of a notice in a newspaper with general circulation in the area where the groundwater registration is located, once per week for two consecutive weeks. If more than one qualifying newspaper is available, I suggest publishing the notice in the following paper: Statesman Journal.

firm that the information contained in this application is true and accurate.

John Coleman, Owner, Westwood Farms

Print Name (and Title if applicable)

4/21/2023

Is the applicant the sole owner of the land on which the Groundwater registration modification or portion thereof, is located? X Yes No if NO, include signatures of all deeded landowners (and malling and/or e-mail addresses if different than the applicant's) or attach affidavits of consent (and mailing and/or e-mail addresses) from all landowners or individuals/entities to which the Groundwater registration has been conveyed.

RECEIVED

MAY 0 1 2023

OWRD

For a modification in place of use or character of use:

Are there other water right certificates, water use permits, or Groundwater registrations associated with the "from" or "to" lands?

Yes No N/A – no change of place of use requested.

If YES, list the other certificate, water use permit, or other Groundwater registration numbers:

Pursuant to OAR 690-382-0200, any "layered" water use, such as an irrigation right that is supplemental to a primary irrigation right proposed for transfer, must be concurrently transferred with the registration or be cancelled. Any change to a water right must be filed separately in a transfer application. Any change to a water use permit must be filed separately with a permit amendment. Any modification to a Groundwater registration on the "to" lands must be filed separately with a Groundwater registration modification.

For modifications in point(s) of appropriation (well(s) or additional point(s) of appropriation:

Well log(s) are attached for each well that are clearly labeled and associated with the corresponding well(s) in Table 1 above and on the accompanying application map.

(Tip: You may search for well logs on the Department's web page at: http://apps.wrd.state.or.us/apps/gw/well log/)

RECEIVED
MAY 0 1 2023

AND/OR OWRD

Describe the construction of the authorized and proposed well(s) in Table 3 for any wells that do not have a well log. For proposed wells not yet constructed or built, provide "a best estimate" for each requested information element in the table. The Department recommends you consult a licensed well driller, geologist, or certified water right examiner to assist with assembling the information necessary to complete Table 3.

Table 3. Construction of Point(s) of Appropriation

Any well(s) in this listing must be clearly tied to corresponding well(s) described in Table 1 and shown on the accompanying application map. Failure to provide adequate information is likely to delay the processing of your modification application until it is received. The information is necessary for the department to assess whether the proposed well(s) will access the same source aquifer as the authorized point(s) of appropriation (POA). The Department is prohibited by law from approving POA changes that do not access the same source aquifer.

BEFORE THE WATER RESOURCES DEPARTMENT OF THE STATE OF OREGON

In the Matter of Ground Water) FINAL ORDER APPROVING
Registration Modification Application) RECOGNITION OF AN ADDITIONAL
T-12494, Marion County) POINT OF APPROPRIATION

Authority

Oregon Revised Statutes (ORS) 537.610, 537.705 and 540.505 to 540.580 establish the process in which the holder of a certificate of registration may submit a request for recognition of modifications to the place of use, character of use or point of appropriation under a ground water certificate of registration.

Oregon Administrative Rules (OAR) Chapter 690, Divisions 382 and 380 implement the statutes and provide the Department's procedures and criteria for evaluating ground water registration modification applications.

Applicant

WESTWOOD FARMS PO BOX 128 SAINT PAUL, OR 97137 MAY 0 1 2023

Findings of Fact

- On September 29, 2016, WESTWOOD FARMS filed a ground water registration modification application to add an additional point of appropriation under Registration Application GR-2814 (Certificate of Registration GR-2655) and Registration Application GR-533 (Certificate of Registration GR-510). The Department assigned the application number T-12494.
- Notice of the application for ground water registration modification was published on June 13, 2017, pursuant to OAR 690-382-0600. No comments were filed in response to the notice.
- On September 5, 2017, the Department contacted the agent for the applicant by email regarding a deficiency in the application.
- On September 8, 2017, the agent for the applicant submitted documentation to satisfy the deficiency.
- On February 21, 2018, the Department emailed a copy of the draft Preliminary Determination proposing to approve Groundwater Registration Modification Application T-12494 to the applicant and agent. The draft Preliminary Determination cover letter set forth a deadline of March 21, 2018, for the applicant to respond. The applicant requested that the Department

This final order is subject to judicial review by the Court of Appeals under ORS 183.482. Any petition for judicial review must be filed within the 60-day time period specified by ORS 183.482(1). Pursuant to ORS 536.075 and OAR 137-003-0675, you may petition for judicial review or petition the Director for reconsideration of this order. A petition for reconsideration may be granted or denied by the Director, and if no action is taken within 60 days following the date the petition was filed, the petition shall be deemed denied.

Special Order Volume 109, Page 232

proceed with issuance of a Preliminary Determination and provided the necessary information to demonstrate that the applicant is authorized to pursue the groundwater registration modification.

- 6. On July 9, 2018, the Department issued a Preliminary Determination proposing to approve Groundwater Registration Modification Application T-12494 and sent a copy to the applicant. Additionally, notice of the Preliminary Determination for the Groundwater Registration Modification application was published on the Department's weekly notice on July 10, 2018, and in the Silverton Appeal newspaper on June 6 and 13, 2018, pursuant to ORS 540.520 and OAR 690-380-4020. No protests were filed in response to the notice.
- 7. The first ground water registration to be modified is as follows:

Registration: Application GR-2814 (Certificate of Registration GR-2655), in the name of

ELDON PUGH (assigned to ECHO RIDGE FARMS INC.; ARROWHEAD

FARMS INC., AND WESTWOOD FARMS, INC.)

Use: IRRIGATION of 48.0 ACRES

Tentative

Priority Date: MARCH 1950

Quantity: 0.668 CUBIC FOOT PER SECOND (300 GALLONS PER MINUTE)

Source: ONE WELL within the WILLAMETTE RIVER BASIN

Original Point of Appropriation:

Twp	Rng	Mer	Sec	Q-Q	Measured Distances
6 S	3 W	WM	11	NE NW	7 CHAINS SOUTH AND 39 CHAINS EAST FROM THE NW CORNER OF SECTION 11

Original Place of Use:

Twp	Rng	Mer	Sec	Q-Q	Acres
6 S	3 W	WM	2	SE SW	14.0
6 S	3 W	WM	2	SW SE	14.0
68	3 W	WM	11	NW NE	14.0
6 S	3 W	WM	11	NENW	6.0
				Total	48.0

MAY 0 1 2023

OWRD

8. Based on information provided by the CWRE map, the location of the authorized point of appropriation is better described as follows:

Twp	Rng	Mer	Sec	Q-Q	Measured Distances
6 S	3 W	WM	11	NE NW	462 FEET SOUTH AND 2574 FEET EAST FROM THE NW CORNER OF SECTION 11

 Ground Water Registration Modification Application T-12494 proposes an additional point of appropriation approximately 924 feet from the authorized well, located as follows:

Twp	Rng	Mer	Sec	Q-Q	Measured Distances
6 S	3 W	WM	2	SE SW	WELL 2 - 230 FEET NORTH AND 650 FEET WEST FROM THE N ¼ CORNER OF SECTION 11

10. The second ground water registration to be modified is as follows:

Registration: Application GR-533 (Certificate of Registration GR-510), in the name of

FRANK TONEY (assigned to ECHO RIDGE FARMS INC.; ARROWHEAD

FARMS INC., AND WESTWOOD FARMS, INC.)

Use: IRRIGATION of 3.0 ACRES

Tentative

Priority Date: MAY 1954

Quantity: 0.067 CUBIC FOOT PER SECOND (30 GALLONS PER MINUTE)

Source: PUMP WELL within the WILLAMETTE RIVER BASIN

Original Point of Appropriation:

Twp	Rng	Mer	Sec	Q-Q	Measured Distances
6 S	3 W	WM	11	NW NE	520 FEET SOUTH AND 450 FEET EAST FROM THE N 1/4 CORNER OF SECTION 11

Original Place of Use:

Twp Rng Mer So	c Q-Q Acres
6S 3W WM 1	NW NE 3.0

 Ground Water Registration Modification Application T-12494 proposes an additional point of appropriation approximately 1334 feet from the authorized well, located as follows:

Twp	Rng	Mer	Sec	Q-Q	Measured Distances
6 S	3 W	WM	2	SE SW	WELL 2 - 230 FEET NORTH AND 650 FEET WEST FROM THE N 1/4 CORNER OF SECTION 11

Review Criteria for Ground Water Registration Modification Applications [OAR 690-382-0700(2)]

- 12. The proposed modifications would not result in enlargement of the ground water registration.
- 13. The proposed modifications would not result in a state Scenic Waterway not receiving previously available water during periods in which streamflows are less than the quantities determined by the Department to be necessary to meet the requirements of ORS 390.835.
- The proposed modifications would not result in injury to other water rights.

Conclusion of Law

The additional point of appropriation proposed in Ground Water Registration Modification Application T-12494 is consistent with the requirements of ORS 537.610, 537.705, 540.505 to 540.580 and OAR 690-382-1000.

Now therefore, it is ordered:

- 1. The modifications to Registration Application GR-2814 (Certificate of Registration GR-2655) and Registration Application GR-533 (Certificate of Registration GR-510) are recognized. Recognition of the modifications shall not be construed as a final determination of the right to appropriate ground water under the certificate of registrations or modifications. Such a determination will occur in an adjudication proceeding under ORS 537.670 to 537.695.
- 2. The use of the water is restricted to beneficial use at the place of use described, and is subject to all other conditions and limitations contained in Registration Application GR-2814 (Certificate of Registration GR-2655) and Registration Application GR-533 (Certificate of Registration GR-510) and any related decree.
- 3. Water shall be acquired from the same aquifer (water source) as the original point of appropriation.
- 4. The quantity of water diverted at the additional point of appropriation, together with that diverted at the original points of appropriation, shall not exceed the quantity of water lawfully available at the original points of appropriation.
