REFERENCE: District Temporary Transfer Application T-14313

Enclosed is a copy of the final order approving your TEMPORARY water right transfer application.

The temporary change shall be effective at the **beginning of the 2023 irrigation season**. The use shall revert to the original authorized place of use at the **end of the 2026 irrigation season**.

If you have any questions related to the approval of this temporary transfer, you may contact your caseworker, Scott Grew, by telephone at (503) 986-0890 or by e-mail at [Scott.a.grew@water.oregon.gov](mailto:Scott.a.grew@water.oregon.gov).

**Temporary Transfer Review Criteria**

- Water has been used within the last five years according to the terms and conditions of the rights. There is no evidence available that would demonstrate that the rights are subject to forfeiture under ORS 540.610.
- A pump, pipeline, and sprinkler system sufficient to use the full amount of water allowed under the existing rights are present.
- The proposed changes would prevent the lands from which the water right is removed during the period of the temporary transfer from receiving water under the transferred rights, as required by ORS 540.523(7).

11. The proposed changes would not result in injury to other water rights. This finding is made through an abbreviated review recognizing that the transfer may be revoked under ORS 540.523(5) if the Department later finds that the transfer is causing injury to any existing water right.

### Conclusions of Law

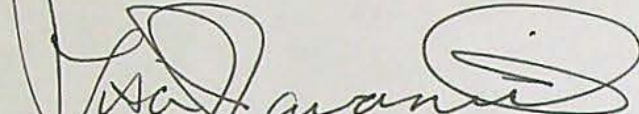

The temporary changes in place of use and additional point of appropriation to convey water to the temporary place of use proposed in Temporary Transfer Application T-14313 are consistent with the requirements of ORS 540.523 and OAR 690-380-8000.

### Now, therefore, it is ORDERED:

1. The temporary change in places of use and additional point of appropriation to convey water to the temporary place of use proposed in Temporary Transfer Application T-14313 are approved.
2. The former place of use **shall not** be irrigated as part of these water rights during the 2023, 2024, 2025, and 2026 irrigation seasons.
3. The use shall revert to the authorized place of use at the end of the 2026 irrigation season. The authorization to use the additional point of diversion shall be terminated concurrently.
4. The approval of this temporary transfer may be revoked or modified if the Department finds the changes cause injury to any existing water right.
5. The quantity of water diverted at the proposed temporary additional point of appropriation, together with that diverted at the original points of appropriation, shall not exceed the quantity of water lawfully available at the original points of appropriation.
6. A subsequent application for permanent transfer of Certificates 64872 and 86567 shall be subject to a full and complete review to determine consistency with the requirements of OAR Chapter 690, Division 380. Approval of this temporary transfer does not establish a precedent for approval of a subsequent application filed for a permanent transfer.
7. The use of water at the temporary place of use authorized by this transfer shall be in accordance with the terms and conditions of Certificates 64872 and 86567.
8. The time during which water is used under this approved temporary transfer does not apply toward a finding of forfeiture under ORS 540.610.
9. Water use measurement conditions:
  - a. Before water use may begin under this order, the water user shall install a totalizing flow meter, or, with prior approval of the Director, another suitable measuring device, at each point of appropriation (new and existing).
  - b. The water user shall maintain the meters or measuring devices in good working order.

- c. The water user shall allow the Watermaster access to the meters or measuring devices; provided however, where the meters or measuring devices are located within a private structure, the Watermaster shall request access upon reasonable notice.
10. The use of the remaining water rights described by Certificates 64872 and 86567 shall continue to be in accordance with the terms and conditions of Certificates 64872 and 86567.

Measurement Condition Information for the Applicant

(To be sent with the Draft Preliminary Determination or Final Order)

Transfer #: T- 14313

In order to avoid enlargement of the right or injury to other rights, a totalizing flow meter will be required to be installed prior to diversion of water, as a condition of this transfer:

at each point of diversion/appropriation (new and existing) OR

at each new point of diversion/appropriation.

For additional information, or to obtain approval of a different type of measurement device, the applicant should contact the area Watermaster:

Watermaster name: Greg Wacker

# Groundwater Transfer Review Summary Form

Transfer/PA # T- 14313 (temp)

GW Reviewer Travis Brown Date Review Completed: 5/31/2024

## Summary of Same Source Review:

The proposed change in point of appropriation is not within the same aquifer as per OAR 690-380-2110(2).

## Summary of Injury Review:

The proposed transfer will result in another, existing water right not receiving previously available water to which it is legally entitled or result in significant interference with a surface water source as per 690-380-0100(3).

## Summary of GW-SW Transfer Similarity Review:

The proposed SW-GW transfer doesn't meet the definition of "similarly" as per OAR 690-380-2130.

*This is only a summary. Documentation is attached and should be read thoroughly to understand the basis for determinations.*

## Ground Water Review Form:

- Water Right Transfer
- Permit Amendment
- GR Modification
- Other: Temporary Transfer

Application: T-14313

Applicant Name: Kraemer Farms LLC

- Proposed Changes:  POA     APOA     SW→GW     RA  
 USE     POU     OTHER

Reviewer(s): Travis Brown

Date of Review: 5/31/2024

Date Returned to WRSD: 5/31/2024

The information provided in the application is insufficient to evaluate whether the proposed transfer may be approved because:

- The water well reports provided with the application do not correspond to the water rights affected by the transfer.
- The application does not include water well reports or a description of the well construction details sufficient to establish the ground water body developed or proposed to be developed.
- Other \_\_\_\_\_

- 
1. Basic description of the changes proposed in this transfer: Applicant proposes to temporarily change the POU and add an APOA for Certificate 86567, which authorizes Irrigation of 182.9 acres at a maximum combined rate of 1.3 cfs from 3 authorized POA: Well 1/MARI 5576, Lone Pine Well/MARI 5618, Drake Well/MARI 5625. The proposed temporary transfer would change the POU and add an APOA (MARI 14) for 40.0 acres of the total 182.9 acres authorized by Certificate 86567; 0.284 cfs of Certificate 86567 could, therefore, be pumped from the proposed APOA (MARI 14) (pro-rated based on the subject acreage). However, MARI 14 is also authorized to pump up to 1.45 cfs for Irrigation of 116.3 acres under Certificate 87469. Therefore, the maximum combined pumping rate for MARI 14 under the proposed change would be 1.734 cfs.
  2. Will the proposed POA develop the same aquifer (source) as the existing authorized POA?  
 Yes     No    Comments: The authorized POA and proposed APOA all produce groundwater from the Columbia River Basalt aquifer system (Conlon et al., 2005).
  3. a) Is there more than one source developed under the right (e.g., basalt and alluvium)?  
 Yes     No    Comments: The authorized POA all produce groundwater solely from the Columbia River Basalt aquifer system (Conlon et al., 2005).  
 b) If yes, estimate the portion of the right supplied by each of the sources and describe any limitations that will need to be placed on the proposed change (rate, duty, etc.): N/A

4. a) Will this proposed change, at its maximum allowed rate of use, likely result in an increase in interference with **another ground water right**?  
 Yes  No Comments: The proposed APOA (MARI 14) is substantially closer to neighboring well, MARI 18259, which is an authorized POA on Certificates 80697, 87529, and 87530. The closer proximity to MARI 18259 will likely increase interference with this well.
- b) If yes, would this proposed change, at its maximum allowed rate of use, likely result in another groundwater right not receiving the water to which it is legally entitled?  
 Yes  No If yes, explain: Proposed APOA, MARI 14, is ~1,130 ft away from MARI 18259, whereas the nearest authorized POA, MARI 5625, is ~5,890 ft away. The potential for injury to MARI 18259 was analyzed using the Theis (1935) solution for drawdown in a confined aquifer (see attached Well Interference Analysis). Hydraulic parameters used for the analysis were derived from regional data and studies (Pumping Test Reports; Conlon et al., 2005; McFarland and Morgan, 1996). Results of the analysis indicate that drawdown at MARI 18259 could likely exceed 25 ft by the end of the irrigation season, which is unlikely to result in injury of MARI 18259, which has a reported water column of greater than 500 ft as of March 2023.
5. a) Will this proposed change, at its maximum allowed rate of use, likely result in an increase in interference with **another surface water source**?  
 Yes  No Comments: None of the nearby streams have incised into the Columbia River Basalt aquifer; therefore, the Columbia River Basalt aquifer does not appear to be hydraulically connected to a nearby surface water source and no increase in surface water interference is anticipated.
- b) If yes, at its maximum allowed rate of use, what is the expected change in degree of interference with any **surface water sources** resulting from the proposed change?  
 Stream: \_\_\_\_\_  Minimal  Significant  
 Provide context for minimal/significant impact: N/A
6. For SW-GW transfers, will the proposed change in point of diversion affect the surface water source similarly (as per OAR 690-380-2130) to the authorized point of diversion specified in the water use subject to transfer?  
 Yes  No Comments: N/A
7. What conditions or other changes in the application are necessary to address any potential issues identified above: None
8. Any additional comments: None

Proposed Changes:  POU  POD  POA  USE  OTHER

Reviewer(s): G. Wacker

Date of Review: 09/18/2023

1. Do you have evidence that the right has not been used in the last 5 years and that the presumption of forfeiture would not likely be rebuttable?  Yes  No If "Yes", attach evidence (e.g. dated aerial photo showing pavement or building on the land for >5 yrs.)
  
2. Is there a history of regulation on the source that serves this (or these) right(s) that has involved the transferred right(s) and downstream water rights?  Yes  No Generally characterize the frequency of any regulation or explain why regulation has not occurred:
  
3. Have headgate notices been issued for the source that serves the transferred right(s)?  
 Yes  No  Records not available.
  
4. In your estimation, after the proposed change, would distribution of water for the right(s) result in regulation of other water rights that would not have occurred if use under the original right(s) was/were maximized?  Yes  No If "Yes", explain:
  
5. In your estimation, if the proposed change is approved, are there upstream water rights that would be affected?  Yes  No If "Yes", describe how the rights would be affected and list the rights most affected:

6. Check here  if it appears that downstream water rights benefit from return flows resulting from the current use of the transferred right(s)? If you check the box, generally characterize the locations where the return flows likely occur and list the water rights that benefit most:

N/A

7. For POD changes and instream transfers, check here if there are channel losses between the old and new PODs or within the proposed instream reach? If you check the box, describe and, if possible, estimate the losses:

N/A

8. For instream transfers that propose protection of a reach beyond the mouth of the source stream:

N/A Would the quantity be measureable into the receiving stream consistent with OAR 690-077-0015(8)?  Yes  No

9. For POU changes:  N/A Is it likely the original place of use would continue to receive water from the same source?  Yes  No If "Yes", explain:

10. For POU or USE changes:  N/A In your best judgment, would use of the existing right at "full face value," result in the diversion of more water than can be used beneficially and without waste?

Yes  No If "Yes", explain:

11. For POU changes that involve micro-irrigation:  N/A

- a. Has the applicant made changes (absent a transfer) to convert to micro-irrigation within the current place of use boundary of the water right proposed for transfer, and previously demonstrated to the Department through monitoring and site inspections by the Watermaster that the proposed transfer will not result in injury or enlargement?

Yes  No If "Yes", explain:

b. Has a temporary transfer of this nature been previously filed and approved on the same lands (or portions thereof) as those lands involved in this transfer?

Yes  No If "Yes", answer the following:

i. Were there any problems with more acres being irrigated (or wetted) than were authorized under the temporary transfer?  Yes  No If "Yes", explain:

ii. Did the designated areas that were to remain dry (or not wetted) under the temporary transfer actually remain dry?  Yes  No If "No", explain:

iii. Did the applicant comply with and meet all of the conditions of the temporary transfer?  Yes  No If "No", explain:

iv. Do you have any other observations regarding the temporary transfer?  Yes  No If "Yes", describe:

v. Did the applicant demonstrate to the Department through monitoring and site inspections by the Watermaster that neither injury nor enlargement occurred as a result of the temporary transfer?  Yes  No If "No", explain:

c. To the best of your knowledge, if this transfer is approved, does it appear that:

i. "Injury" will occur to other water rights that share the same source?  Yes  No If "Yes", explain:

ii. "Enlargement" of the water right being transferred will occur?  Yes  No If "Yes", explain:

12. Are there other issues not identified through the above questions that should be considered in determining whether the change "can be effected without injury to other rights"?

Yes  No If "Yes", explain:

13. What alternatives may be available for addressing any issues identified above:

14. Do conditions need to be included in the transfer order to avoid enlargement of the right or injury to other rights?  No  Yes, as checked and provided below:

For POU changes that involve micro-irrigation, provide the monitoring and reporting conditions necessary to prevent injury/enlargement:

A Headgate should be required prior to diverting water.

Measurement Devices for POD or POA: (if this condition is selected, also fill in the top sections of Page 4)

a. Before water use may begin under this order, the water user shall install a **totalizing flow meter\***, or, with prior approval of the Director, another suitable measuring device,  at each point of diversion/appropriation (new and existing) OR at each new point of diversion/appropriation  with the exception that water rights issued to the Bureau of Reclamation or an irrigation district (or similar entity) are not subject to this condition.

b. The water user shall maintain the meters or measuring devices in good working order.

c. The water user shall allow the Watermaster access to the meters or measuring devices; provided however, where the meters or measuring devices are located within a private structure, the Watermaster shall request access upon reasonable notice.

Reservoir water use measurement: (if this condition is selected, also fill in the top sections of Page 4)

a. Before water use may begin under this order, the water user shall install **staff gages\***, or, with prior approval of the Director, other suitable measuring devices, that measure the entire range and stage between empty and full in each reservoir. Staff gages shall be United States Geological Survey style.

b. Before water use may begin under this order, if the reservoir is located in channel, weirs or other suitable measuring devices must be installed upstream and downstream of the reservoir, and, an adjustable outlet valve must be installed. The water user shall maintain such devices in good working order. A written waiver may be obtained, if in the judgment of the Director, the installation of weirs or other suitable measuring devices, or the adjustable outlet valve, will provide no public benefit.

\* The following alternative device(s) should be substituted for the bold, underlined device in the above selected condition:

- Weir
- Parshall Flume
- Other: \_\_\_\_\_

- Submerged Orifice
- Flow Restrictor

Reference: Application T-14313

On August 24, 2023, the Department received your water right Temporary Transfer Application. The application was accompanied by \$1458.72. Receipt number 141472 is enclosed.

By copy of this letter, we are asking the Watermaster for a report regarding the potential for injury to existing water rights which may be caused by the requested change.

Except as provided under ORS 540.510(3) for municipalities, you may not *temporarily* use water at the new place of use until a final order approving the temporary transfer application has been issued by the Department. Additionally, pursuant to OAR 690-380-8010, the lands from which an irrigation water right is to be temporarily transferred and the land to which the right is to be temporarily transferred may not both receive water during the same season. If the temporary transfer is approved during an irrigation season and water has already been used at the currently authorized location during that season, then the temporary transfer will not take effect until the following season.

If the land is sold before the temporary transfer is approved, the buyer's consent to the temporary transfer will be required unless a recorded deed or other legal document clearly established that the water right was not conveyed in the sale.

If you have any questions, please contact the Transfer Section at (503) 986-0935.

Part 2 of 5 – Temporary Transfer Application Map Checklist

Your temporary transfer application will be returned if any of the map requirements listed below are not met.

Please be sure that the temporary transfer application map you submit includes all the required items and matches the existing water right map. Check all boxes that apply.

- N/A If more than three water rights are involved, separate maps are needed for each water right.
- Permanent quality printed with dark ink on good quality paper.
- The size of the map can be 8½ x 11 inches, 8½ x 14 inches, 11 x 17 inches, or up to 30 x 30 inches. For 30 x 30 inch maps, one extra copy is required.
- A north arrow, a legend, and scale.
- The scale of the map must be: 1 inch = 400 feet, 1 inch = 1,320 feet; the scale of the Final Proof/Claim of Beneficial Use Map (the map used when the permit was certificated); the scale of the county assessor map if the scale is not smaller than 1 inch = 1,320 feet; or a scale that has been pre-approved by the Department.
- Township, Range, Section, ¼ ¼, DLC, Government Lot, and other recognized public land survey lines.
- Tax lot boundaries (property lines) are required. Tax lot numbers are recommended.
- Major physical features including rivers and creeks showing direction of flow, lakes and reservoirs, roads, and railroads.
- Major water delivery system features from the point(s) of diversion/appropriation such as main pipelines, canals, and ditches.
- Existing place of use that includes separate hachuring for each water right, priority date, and use including number of acres in each quarter-quarter section, government lot, or in each quarter-quarter section as projected within government lots, donation land claims, or other recognized public land survey subdivisions. If less than the entirety of the water right is being changed, a separate hachuring is needed for lands left unchanged.
- N/A Proposed temporary place of use that includes separate hachuring for each water right, priority date, and use including number of acres in each quarter-quarter section, government lot, or in each quarter-quarter section as projected within government lots, donation land claims, or other recognized public land survey subdivisions.
- Existing point(s) of diversion or well(s) with distance and bearing or coordinates from a recognized survey corner. This information can be found in your water right certificate or permit.
- N/A If you are proposing a change in point(s) of diversion or well(s) to convey water to the new temporary place of use, show the proposed location and label it clearly with distance and bearing or coordinates. If GPS coordinates are used, latitude-longitude coordinates may be expressed as either degrees-minutes-seconds with at least one digit after the decimal (example – 42°32’15.5”) or degrees-decimal with five or more digits after the decimal (example – 42.53764°).

the expiration of this agreement without seller's written consent. Purchaser shall not commit or suffer any waste of the property, or any buildings and improvements thereon, and at all times shall maintain the property, and all buildings and improvements thereon, and all alterations thereof, in good condition and repair. Purchaser shall not otherwise make or cause to be made any improvements or alterations to the property which are not in conformity with existing improvements without seller's written consent.

REPRESENTATION: Purchaser certifies that this contract of purchase is accepted and executed on the basis of his own examination and personal knowledge of the premises and opinion of the value thereof; that no attempt has been made to influence his judgment; that no representations as to the condition or repair of said premises have been made by seller or by any agent of seller; that no agreement or promise to alter, repair or improve said premises has been made by seller or by any agent of seller; and that purchaser takes said property and the improvements thereon in the condition existing at the time of this agreement.

TRUTH-IN-LENDING: The purchaser warrants to and covenants with the seller that the real property described in this contract is primarily for purchaser's personal, family, household or agricultural purposes.

ASSIGNMENT: This agreement is personal to the purchaser and purchaser shall not sell, assign, transfer or set over any of his right, title and interest in and to said property or this contract without the prior written consent of the seller, which shall not be unreasonably withheld.

LIENS AND ENCUMBRANCES: The purchaser agrees that he will keep said premises free from mechanic's and all other liens; that he will pay all taxes, water rents, public charges, municipal liens and all other liens or encumbrances which hereafter law-

fully may be imposed upon the premises, promptly before the same or any part thereof become past due, and save seller harmless therefrom and reimburse seller for all costs and attorney fees incurred by him in defending against any such taxes, liens, rents and charges.

DEFAULT: If purchaser fails to perform any of the terms of this Contract, time of payment and performance being of the essence, seller shall, at his option, subject to the following notice requirements, have the following rights:

- (a) To foreclose this contract by strict foreclosure in equity.
- (b) To declare the full unpaid balance of the purchase price immediately due and payable.
- (c) To specifically enforce the terms of this agreement by suit in equity.
- (d) To declare this agreement null and void as of the date of the breach and to retain as liquidated damages the amount of the payment theretofore made upon said premises. Under this option all of the right, title and interest of purchaser shall revert and re-vest in seller without any act of re-entry or without any act by seller to be performed, and purchaser agrees to peaceably surrender said premises to seller, or in default thereof purchaser may, at the option of seller, be treated as a tenant holding over unlawfully after the expiration of a lease and may be ousted and removed as such tenant.

Purchaser shall not be deemed in default for failure to perform any covenant or condition of this contract, other than the failure to make payment as provided for herein until notice of the default has been given by seller to purchaser and purchaser has failed to remedy the default within 30 days after the giving of the notice. Notice for this purpose shall be deemed to have been given by the deposit in the mails of a letter, by certified mail, containing the notice and addressed to purchaser at his last known address. If purchaser fails to make payment as herein required and the failure continues for more than 30 days after the payment becomes due, purchaser shall be deemed in default and seller shall not be obligated to give notice to purchaser of a declaration of the default.

WAIVER: No waiver of a breach of any covenant, term or condition of this agreement shall be a waiver of any other or subsequent breach of the same or any other covenant, term or condition or as a waiver of the covenant, term or condition itself or of this non-waiver clause.

SUCCESSORS INTERESTS: The covenants, conditions and terms of this agreement shall extend to and be binding upon and inure to the benefit of the heirs, personal representatives and assigns of the parties hereto.

LITIGATION FEES AND EXPENSES: In case litigation is started arising directly or indirectly out of this Contract, the losing party shall pay to the prevailing party, in addition to the costs and disbursements allowed by statute, such sum as the court may adjudge reasonable as attorney fees in the litigation in both trial court and appellate courts.

COMPLETE AGREEMENT: This document is the entire, final and complete agreement of the parties pertaining to the sale and purchase of the described property, and supersedes and replaces all written and oral agreements heretofore made or existing by and between the parties or their representatives insofar as the described property is concerned.

INTERPRETATION: In construing this contract, it is understood that the seller or purchaser may be more than one person; that if the context so requires, the singular pronoun shall be taken to mean and include the plural, the masculine shall include the feminine and the neuter, and that generally all grammatical changes shall be made, assumed and implied to make the provisions hereof apply equally to corporations and to individuals; also, in the event of the death of one of the purchasers that the word "purchaser" shall mean only the survivor of them and the heirs and assigns of such survivor.

STATE OF OREGON  
 COUNTY OF CLACKAMAS, MARION  
 CERTIFICATE OF WATER RIGHT

THIS CERTIFICATE ISSUED TO

KRAEMER FARMS  
 13318 DOMINIC RD NE  
 MOUNT ANGEL OR 97362

confirms the right to use the waters of WELL 1, LONE PINE WELL, AND DRAKE WELL, tributaries to BUTTE CREEK for IRRIGATION of 182.9 ACRES.

This right was perfected under Permit G-6668. The date of priority is SEPTEMBER 18, 1974. The amount of water to which this right is entitled is limited to an amount actually used beneficially, and shall not exceed 1.3 CUBIC FEET PER SECOND, if available at the original well, or its equivalent in case of rotation, measured at the wells.

The wells are located as follows:

Well	Twp	Rng	Mer	Sec	Q-Q	GLot	DLC	Measured Distances
Original Well 1	6 S	1 E	WM	17	NW NW		43	1110 FEET SOUTH & 80 FEET EAST FROM NW CORNER, SECTION 17
Lone Pine	6 S	1 E	WM	17	SE NW		48	1425 FEET SOUTH & 2075 FEET EAST FROM NW CORNER, SECTION 17
Drake	6 S	1 E	WM	18	SW NE			1900 FEET SOUTH & 1660 FEET WEST FROM NE CORNER, SECTION 18

The amount of water used for irrigation, together with the amount secured under any other right existing for the same lands, is limited to a diversion of ONE-EIGHTIETH of one cubic foot per second, or its equivalent for each acre irrigated, and shall be further limited to a diversion of not to exceed 2.5 acre-feet per acre for each acre irrigated during the irrigation season of each year.

The use shall conform to such reasonable rotation system as may be ordered by the proper state officer.

A description of the place of use to which this right is appurtenant is as follows:

Twp	Rng	Mer	Sec	Q-Q	GLot	DLC	Acres
6 S	1 E	WM	7	SE SE			33.4
6 S	1 E	WM	8	NW SW		43	7.4
6 S	1 E	WM	8	SW SW		43	37.6
6 S	1 E	WM	17	NE NW		48	2.1
6 S	1 E	WM	17	NW NW		43	33.1
6 S	1 E	WM	17	NW NW		48	1.6

**NOTICE OF RIGHT TO RECONSIDERATION OR JUDICIAL REVIEW**

This is an order in other than a contested case. This order is subject to judicial review under ORS 183.484. Any petition for judicial review must be filed within the 60-day time period specified by ORS 183.484(2). Pursuant to ORS 536.075 and OAR 137-004-0080, you may either petition for judicial review or petition the Director for reconsideration of this order. A petition for reconsideration may be granted or denied by the Director, and if no action is taken within 60 days following the date the petition was filed, the petition shall be deemed denied.

Twp	Rng	Mer	Sec	Q-Q	GLot	DLC	Acres
6 S	1 E	WM	17	SW NW		48	13.5
6 S	1 E	WM	17	SE NW		48	15.0
6 S	1 E	WM	18	NE NE	1		35.8
6 S	1 E	WM	18	NW NE			3.4

The quantity of water diverted at the new points of appropriation (wells), together with the quantity of water diverted from the old point of appropriation, shall not exceed the quantity of water available from the original point of appropriation described as follows:

Well	Twp	Rng	Mer	Sec	Q-Q	GLot	DLC	Measured Distances
Original Well 1	6 S	1 E	WM	17	NW NW		43	1110 FEET SOUTH & 80 FEET EAST FROM NW CORNER, SECTION 17

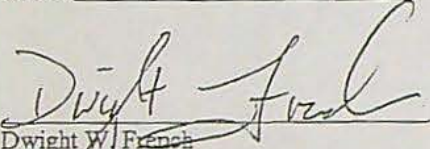

When required by the Department, the water user shall install an in-line flow meter or other suitable device for measuring and recording the quantity of water used. The type and plans of the measuring device must be approved by the Department prior to beginning construction and installed under the general supervision of the Department.

Water shall be acquired from the same aquifer as the original point of appropriation.

This certificate is issued to confirm ADDITIONAL POINTS OF APPROPRIATION approved by an order of the Water Resources Director entered November 30, 1994, at Special Order Volume 48, Page 352, approving Transfer Application 6399, and supersedes Certificate 48480, State record of Water Right Certificates.

The right to the use of the water for the above purpose is restricted to beneficial use on the lands or place of use described.
