REFERENCE: Transfer Application T-13865

Enclosed is a copy of the final order approving your water right transfer application.

The time allowed to complete the transfer is specified in the final order. YOU SHOULD GIVE PARTICULAR ATTENTION TO THE TIME LIMIT. The water right for any portion of the authorized change in character of use or change in place of use NOT carried out within the time allowed will be lost.

An extension of the time limit can be allowed only upon a showing that diligent effort has been made to complete the actual change(s) within the time allowed.

You are required to hire a Certified Water Rights Examiner (CWRE) to complete a Claim of Beneficial Use report and map which must be submitted to this Department within one year of the date you complete the change(s) or within one year of the completion date authorized in the transfer final order, whichever occurs first.

If you have any questions related to the approval of this transfer, you may contact your caseworker, Scott Grew, by telephone at (503) 986-0890 or by e-mail at Scott.A.Grew@oregon.gov.

Authority

Oregon Revised Statutes (ORS) 537.705 and 540.505 to 540.580 establish the process in which a water right holder may submit a request to transfer the point of appropriation, place of use, or character of use authorized under an existing water right. Oregon Administrative Rules (OAR) Chapter 690, Division 380 implement the statutes and provides the Department's procedures and criteria for evaluating transfer applications.

Applicant

CHARLES D. AND CHERYL A. NOFZIGER
PO BOX 36
CHRISTMAS VALLEY, OR 97641

Findings of Fact

1. On November 22, 2021, CHARLES D. AND CHERYL A. NOFZIGER, filed an application to change the points of appropriation and place of use under Certificates 76468, 91152, 91153 and to change the place of use under Certificate 83338. The Department assigned the application number T-13865.
2. Notice of the application for transfer was published on December 7, 2021, pursuant to OAR 690-380-4000. No comments were filed in response to the notice.
3. On March 11, 2022, the Department sent a copy of the draft Preliminary Determination proposing to approve Transfer Application T-13865 to the applicants. The draft Preliminary Determination cover letter set forth a deadline of April 10, 2022, for the applicants to respond. The applicants requested that the Department proceed with issuance of a Preliminary Determination and provided the necessary information to demonstrate that the applicant is authorized to pursue the transfer.

This final order is subject to judicial review by the Court of Appeals under ORS 183.482. Any petition for judicial review must be filed within the 60-day time period specified by ORS 183.482(1). Pursuant to ORS 536.075 and OAR 137-003-0675, you may petition for judicial review or petition the Director for reconsideration of this order. A petition for reconsideration may be granted or denied by the Director, and if no action is taken within 60 days following the date the petition was filed, the petition shall be deemed denied.

4. On March 29, 2022, the agent for the applicant requested the completion date of October 1, 2027 in order to provide enough time to complete the proposed changes. The Department granted the longer time for completion per OAR 690-380-5140 (3).
5. On June 1, 2022, the Department issued a Preliminary Determination proposing to approve Transfer Application T-13865 and sent a copy to the applicants. Additionally, notice of the Preliminary Determination for the transfer application was published in the Department's weekly notice on June 7, 2022, and in the Lakeview Examiner newspaper on June 15 and 22, 2022, pursuant to ORS 540.520 and OAR 690-380-4020. No protests were filed in response to the notice.

Transfer Review Criteria (OAR 690-380-4010)

17. Water has been used within the last five years according to the terms and conditions of the rights. There is no information in the record that would demonstrate that the rights are subject to forfeiture under ORS 540.610.

18. A pump, pipeline, and sprinkler system sufficient to use the full amount of water allowed under the existing right(s) were present within the five-year period prior to submittal of Transfer Application T-13865.
19. The proposed changes would not result in enlargement of the rights.
20. The proposed changes would not result in injury to other water rights.
21. All other application requirements are met.

Conclusions of Law

The changes in point of appropriation and changes in place of use proposed in Transfer Application T-13865 are consistent with the requirements of ORS 537.705 and 540.505 to 540.580 and OAR 690-380-5000.

Now, therefore, it is ORDERED:

1. The change in points of appropriation and change in places of use proposed in Transfer Application T-13865 are approved.
2. The right to the use of the water is restricted to beneficial use at the place of use described and is subject to all other conditions and limitations contained in Certificates 76468, 83338, 91152, 91153, and any related decree.
3. Water right Certificates 76468, 83338, 91152, and 91153 are cancelled. A new certificate will be issued describing that portion of the Certificate 76468 not affected by this transfer.
4. For Certificate 76468 the quantity of water diverted at the new point of appropriation (Well 1), shall not exceed the quantity of water lawfully available at the original point of appropriation (Well 2).
5. For Certificate 91152, the quantity of water diverted at the new point of appropriation (Well 1), shall not exceed the quantity of water lawfully available at the original point of appropriation (Well 3).
6. For Certificate 91153, the quantity of water diverted at the new point of appropriation (Well 1), shall not exceed the quantity of water lawfully available at the original point of appropriation (Well 3).
7. Water use measurement conditions:
 - a. Before water use may begin under this order, the water user shall install a totalizing flow meter, or, with prior approval of the Director, another suitable measuring device, at each point of appropriation (new and existing).
 - b. The water user shall maintain the meters or measuring devices in good working order.

- c. The water user shall allow the Watermaster access to the meters or measuring devices; provided however, where the meters or measuring devices are located within a private structure, the Watermaster shall request access upon reasonable notice.
8. Water shall be acquired from the same aquifer (water source) as the original points of appropriation.
9. The former places of use of the transferred right shall no longer receive water under the rights.
10. Full beneficial use of the water shall be made, consistent with the terms of this order, on or before **October 1, 2027**. A Claim of Beneficial Use prepared by a Certified Water Right Examiner shall be submitted by the applicant to the Department within one year after the deadline for completion of the changes and full beneficial use of the water.
11. After satisfactory proof of beneficial use is received, new certificates confirming the rights transferred will be issued.

SUBJECT: Water Right Transfer Application T-13865

Please find enclosed the Preliminary Determination indicating that, based on the information available, the Department intends to approve application T-13865. This document is an intermediate step in the approval process; water may not be used legally as proposed in the transfer application until a Final Order has been issued by the Department. Please read this entire letter carefully to determine your responsibility for additional action.

A public notice is being published in the Department's weekly publication and in the Lakeview Examiner newspaper, simultaneously with issuance of the Preliminary Determination. The notice initiates a period in which any person may file either a protest opposing the decision proposed by the Department in the Preliminary Determination or a standing statement supporting the Department's decision. The protest period will end 30 days after the last date of newspaper publication.

If no protest is filed, the Department will issue a Final Order consistent with the Preliminary Determination. You should receive a copy of the Final Order about 30 days after the close of the protest period.

If a protest is filed, the application may be referred to a contested case proceeding. A contested case provides an opportunity for the proponents and opponents of the decision proposed in the Preliminary Determination to present information and arguments supporting their position in a quasi-judicial proceeding.

IMPORTANT: Due to COVID-19, the Department's office is closed to walk-in services. The Department encourages the submission of protests by U.S. Mail. Please consider mailing early to ensure the Department receives the protest by the deadline specified above.

Please contact me at scott.a.grew@water.oregon.gov or 503-986-0890 if I may be of assistance.

Sincerely,

Scott Grew

Authority

Oregon Revised Statutes (ORS) 537.705 and 540.505 to 540.580 establish the process in which a water right holder may submit a request to transfer the point of appropriation, place of use, or character of use authorized under an existing water right. Oregon Administrative Rules (OAR) Chapter 690, Division 380 implement the statutes and provides the Department's procedures and criteria for evaluating transfer applications.

Applicant

CHARLES D. AND CHERYL A. NOFZIGER
PO BOX 36
CHRISTMAS VALLEY, OR 97641

Findings of Fact

1. On November 22, 2021, CHARLES D. AND CHERYL A. NOFZIGER, filed an application to change the points of appropriation and place of use under Certificates 76468, 91152, 91153 and to change the place of use under Certificate 83338. The Department assigned the application number T-13865.
2. Notice of the application for transfer was published on December 7, 2021, pursuant to OAR 690-380-4000. No comments were filed in response to the notice.
3. On March 11, 2022, the Department sent a copy of the draft Preliminary Determination proposing to approve Transfer Application T-13865 to the applicants. The draft Preliminary Determination cover letter set forth a deadline of April 10, 2022, for the applicants to respond. The applicants requested that the Department proceed with issuance of a Preliminary Determination and provided the necessary information to demonstrate that the applicant is authorized to pursue the transfer.
4. On March 29, 2022, the agent for the applicant requested the completion date of October 1, 2027 in order to provide enough time to complete the proposed changes. The Department granted the longer time for completion per OAR 690-380-5140 (3).

Pursuant to OAR 690-380-4030, any person may file a protest or standing statement within 30 days after the last date of publication of notice of this preliminary determination.

Transfer Review Criteria (OAR 690-380-4010)

16. Water has been used within the last five years according to the terms and conditions of the rights. There is no information in the record that would demonstrate that the rights are subject to forfeiture under ORS 540.610.
17. A pump, pipeline, and sprinkler system sufficient to use the full amount of water allowed under the existing right(s) were present within the five-year period prior to submittal of Transfer Application T-13865.
18. The proposed changes would not result in enlargement of the rights.
19. The proposed changes would not result in injury to other water rights.
20. All other application requirements are met.

Determination and Proposed Action

The changes in point of appropriation and changes in place of use proposed in Transfer Application T-13865 appears to be consistent with the requirements of ORS 537.705 and 540.505 to 540.580 and OAR 690-380-5000. If protests are not filed pursuant to OAR 690-380-4030, the application will be approved.

If Transfer Application T-13865 is approved, the final order will include the following:

- 1. The change in point of appropriation and change in places of use proposed in Transfer Application T-13865 are approved.*
- 2. The right to the use of the water is restricted to beneficial use at the place of use described and is subject to all other conditions and limitations contained in Certificates 76468, 83338, 91152, 91153, and any related decree.*
- 3. Water right Certificates 76468, 83338, 91152, and 91153 are cancelled. A new certificate will be issued describing that portion of the Certificate 76468 not affected by this transfer.*
- 4. For Certificate 76468 the quantity of water diverted at the new point of appropriation (Well 1), shall not exceed the quantity of water lawfully available at the original point of appropriation (Well 2).*
- 5. For Certificate 91152, the quantity of water diverted at the new point of appropriation (Well 1), shall not exceed the quantity of water lawfully available at the original point of appropriation (Well 3).*
- 6. For Certificate 91153, the quantity of water diverted at the new point of appropriation (Well 1), shall not exceed the quantity of water lawfully available at the original point of appropriation (Well 3).*
- 7. Water use measurement conditions:*
 - a. Before water use may begin under this order, the water user shall install a totalizing flow meter, or, with prior approval of the Director, another suitable measuring device, at each point of appropriation (new and existing).*
 - b. The water user shall maintain the meters or measuring devices in good working order.*
 - c. The water user shall allow the Watermaster access to the meters or measuring devices; provided however, where the meters or measuring devices are located within a private structure, the Watermaster shall request access upon reasonable notice.*
- 8. Water shall be acquired from the same aquifer (water source) as the original point of appropriation.*
- 9. The former place of use of the transferred right shall no longer receive water under the right.*
- 10. Full beneficial use of the water shall be made, consistent with the terms of this order, on or before October 1, 2027. A Claim of Beneficial Use prepared by a Certified Water Right Examiner shall be submitted by the applicant to the Department within one year after the deadline for completion of the changes and full beneficial use of the water.*

11. *After satisfactory proof of beneficial use is received, new certificates confirming the rights transferred will be issued.*

Reference: Water Right Transfer Application T-13865

Your water right transfer is in the first of three phases of processing. Enclosed is a draft of the Department's Preliminary Determination regarding Transfer Application T-13865. The document reflects the Department's conclusion that, based on the information currently available, the transfer will be approved. Your response and submittal of the items outlined below are required by April 10, 2022.

Required items needing your immediate attention:

1. Please carefully review the Draft Preliminary Determination to verify that it accurately reflects the changes you intend to make and to become familiar with the proposed conditions.
2. **Respond in writing by April 10, 2022** with acknowledgement that you agree to the proposed action and conditions.
3. If you find any errors, please let me know.
4. **REQUIRED:** You must submit a **Report of Ownership** for the lands where the water right(s) are currently located (i.e., the FROM lands). This report:
 - a) Must be prepared by a title company;
 - b) Shall include a "prepared by" statement and the date the title company prepared the report printed on the cover sheet;
 - c) Must be:
 - i. Prepared within 3 months of the Draft Preliminary Determination showing current ownership; **OR**
 - ii. Prepared within 3 months of recording of a water right conveyance agreement; **OR**
 - iii. Have a prepared date showing ownership at the time a water right conveyance agreement was recorded.

If water right conveyance agreements are involved, it is helpful to provide copies of those agreements along with the Report of Ownership.

IMPORTANT: In order for the Department to clearly understand the date that the title company prepared the Report of Ownership, the title company must indicate/state the date that they prepared the report on the coversheet and/or first page of the report.

- d) Must include a list of owners at the time the report was generated; **AND**
 - e) Must include a legal description of the property where the water right to be transferred is currently located (i.e., the FROM lands).
5. You must provide a notarized statement of consent signed by any landowner listed in the Report of Ownership who is not already included in the transfer application. The Department's statement of consent form (**Consent By Deeded Landowner**) is available at:
[https://www.oregon.gov/OWRD/WRDFormsPDF/consent to transfer form.pdf](https://www.oregon.gov/OWRD/WRDFormsPDF/consent%20to%20transfer%20form.pdf)
6. Notice of this transfer will need to be published in a newspaper with general circulation in the area where the water rights are currently located. You will be responsible for the charges. The newspaper you listed on the application is not an approved for publication in that area. The papers for that region are either Bend Bulletin or Lakeview Examiner. Please provide the name of the newspaper you wish the Department to use for publication of the notice of the Preliminary Determination.

Conditions to your water right...

The Watermaster has required a water measurement device(s) at the new diversion point(s) prior to diversion of water. Enclosed is a contact information sheet to assist you in pursuing additional information or approval of the required (or alternate) device(s).

Please note the proposed date by which all conditions must be met: October 1, 2023. If the required completion date is insufficient to comply with any of the conditions, you may request more time, at no cost to you, during this stage of processing. **Please let me know by the comment deadline if you will need more time and explain the reasons why.**

What happens next...

Once the Preliminary Determination is issued a publication period is required. Because there is more than ¼ mile between the new and the authorized points of appropriation the Department will publish notice of the transfer in a local newspaper having a general circulation in the area of the water right at least once per week for two consecutive weeks. You are responsible for sending a check to cover the cost of publication prior to the issuance of the Preliminary Determination and publication of notice. As outlined in OAR 690-380-4020(3), publication costs include both the direct cost of the notice and indirect processing costs (not to exceed 20% of the direct costs) for processing.

Issuance of the Preliminary Determination will occur shortly after we receive:

1. Your written response to the conditions and proposed action in the Draft Preliminary Determination (e-mail is acceptable); and
2. The Report of Ownership, including affidavits of consent from any landowners shown in the ownership report who have not signed the transfer application. The title company must indicate/state the date that they prepared the ownership report on the coversheet and/or first page of the report.

3. The newspaper you listed on the application is not an approved for publication in that area. The papers for that region are either Bend Bulletin or Lakeview Examiner. Please name of the newspaper you wish the Department to use for publication of the notice of the Preliminary Determination.

If we do not receive the items listed above by April 10, 2022, a Preliminary Determination may be issued denying the application as incomplete.

Please contact me at scott.a.grew@oregon.gov or 503-986-0890 if I may be of assistance.

Sincerely,

Scott Grew

Stacy and Kelly,

Can you check your list to see if we can publish in a periodical called the Frontier Advertiser? Seems kind of fishy to me but that is what they are asking for.

Just wanted to check our list of acceptables.

The applicant is located in Christmas Valley. Is it just a little east of Halloween Hallow?
This is for this [RA file](#).

Thank you!

Groundwater Transfer Review Summary Form

Transfer/PA # T- 13865

GW Reviewer D. Boschmann Date Review Completed: 12/15/2021

Summary of Same Source Review:

- ☐ The proposed change in point of appropriation is not within the same aquifer as per OAR 690-380-2110(2).

Summary of Injury Review:

Summary of GW-SW Transfer Similarity Review:

- ☐ The proposed SW-GW transfer doesn't meet the definition of "similarly" as per OAR 690-380-2130.

This is only a summary. Documentation is attached and should be read thoroughly to understand the basis for determinations.

The information provided in the application is insufficient to evaluate whether the proposed transfer may be approved because:

- ☐ The water well reports provided with the application do not correspond to the water rights affected by the transfer.
 - ☐ The application does not include water well reports or a description of the well construction details sufficient to establish the ground water body developed or proposed to be developed.
 - ☐ Other _____
-

1. Basic description of the changes proposed in this transfer: _____

This application is related the following four certificates:

Certificate 76468 (T 8830RR)

Certificate 83338

Certificate 91152

Certificate 91153

Certificate 76468 (T 8830RR) authorizes groundwater pumping from one well (POD 1 = LAKE 1165) for primary irrigation of 125.0 acres in the Goose & Summer Lakes Basin (Summer Lake Subbasin; Fort Rock Classified Area). The following changes are proposed:

1. Add one APOA (LAKE 1166) located ~0.5 miles north.
2. Transfer 5.0 acres of the POU within the same section.

Certificate 83338 authorizes groundwater pumping from one well (POD 1 = LAKE 1166) for primary irrigation of 10.3 acres in the Goose & Summer Lakes Basin (Summer Lake Subbasin; Fort Rock Classified Area). The following changes are proposed:

1. Transfer all 10.3 acres of the POU within the same ¼ section.

Certificate 91152 authorizes groundwater pumping from one well (POD 1 = LAKE 1027) for primary irrigation of 121.6 acres in the Goose & Summer Lakes Basin (Summer Lake Subbasin; Fort Rock Classified Area). The following changes are proposed:

1. Add one APOA (LAKE 1166) located ~12.7 miles to the northeast.
2. Transfer 95.5 acres of the POU to 27S/19E-8.
3. Transfer 26.1 acres of the POU within the same ¼ section.*

Certificate 91153 authorizes groundwater pumping from one well (POD 1 = LAKE 1027) for primary irrigation of 9.2 acres in the Goose & Summer Lakes Basin (Summer Lake Subbasin; Fort Rock Classified Area). The following changes are proposed:

1. Change the authorized well to LAKE 1166 located ~12.7 miles to the northeast.
2. Transfer all 9.2 acres of the POU to 27S/19E-8.

This application is broadly similar to temporary transfer T-12318.

*note that it appears there is an error in the table on page 13 of the application. The table lists 27S/19E-19 while the application map lists the TO location as 27S/17E-19. This review considers the application map as the accurate location.

2. Will the proposed POA develop the same aquifer (source) as the existing authorized POA?

☒ Yes ☐ No Comments: _____

Groundwater in the Fort Rock Valley-Christmas Valley area (Fort Rock Classified Area) is identified as a single groundwater system. Groundwater is found in both a shallower predominantly basin-fill sediment unit and a deeper predominantly volcanic rocks and sediments unit below. The predominantly basin fill sediment unit and the predominantly volcanic rocks and sediment unit both readily yield groundwater and the two units are hydraulically connected.

Miller (1986) describes the groundwater source as the main groundwater reservoir. That reservoir includes groundwater in different geologic units. The reservoir has three characteristics. First, the "natural" groundwater level changes less than 1.5 feet annually, indicating the system is highly modulated. Second, the 1980s potentiometric surface was approximately 4292 feet elevation amsl basin-wide with Silver Lake an exception. Third, the reservoir consists of numerous water producing zones in several formations, all having an essentially common potentiometric level, and all being very transmissive in general.

The authorized and proposed wells all appear to be drilled through the predominantly basin-fill sediment unit into the underlying predominantly volcanic rocks and sediment unit.

3. a) Is there more than one source developed under the right (e.g., basalt and alluvium)?

☐ Yes ☒ No See above.

b) If yes, estimate the portion of the right supplied by each of the sources and describe any limitations that will need to be placed on the proposed change (rate, duty, etc.): _____

4. a) Will this proposed change, at its maximum allowed rate of use, likely result in an increase in interference with **another ground water right**?

☒ Yes ☐ No Comments: _____

The proposed APOA is located approximately 12.7 miles northeast and 0.5 miles north of the currently authorized wells. This will result in an incremental increase in interference with existing authorized wells to the northeast and north

b) If yes, would this proposed change, at its maximum allowed rate of use, likely result in another groundwater right not receiving the water to which it is legally entitled?

☐ Yes ☒ No If yes, explain: _____

The nearest authorized POA to the proposed APOA is POD 1 under Inchoate: T-5531 RR (LAKE 1156) which is located ~2990 feet to the northeast. The potential increase in drawdown was calculated using the Theis equation (see attachments). The values used for the calculation are conservative and appropriate until better values become available. The calculation used an intermediate storage coefficient (0.001). The transmissivity used in the calculation (15,000 ft²/day) is from Morgan (1988) and McFarland and Ryals (1991). At the pro-rated pumping rate of the full duty over the full irrigation season (0.68 cfs), the results indicate a drawdown of <2.5 feet, which should be within the capacity of the nearby well.

The long term impact on the groundwater system should be the same. That impact is to continue contributing to the ongoing annual Fort Rock Classified area groundwater level decline. See attached hydrograph.

5. a) Will this proposed change, at its maximum allowed rate of use, likely result in an increase in interference with **another surface water source**?

☐ Yes ☒ No Comments: The proposed APOA is located further way from Paulina Marsh and Summer Lake than the currently authorized well. This will result in a decrease in interference with these surface water sources.

b) If yes, at its maximum allowed rate of use, what is the expected change in degree of interference with any **surface water sources** resulting from the proposed change?

Stream: _____

☐ Minimal ☐ Significant

Stream: _____

☐ Minimal ☐ Significant

Provide context for minimal/significant impact: _____

6. For SW-GW transfers, will the proposed change in point of diversion affect the surface water source similarly (as per OAR 690-380-2130) to the authorized point of diversion specified in the water use subject to transfer?

☐ Yes ☐ No Comments: _____

What conditions or other changes in the application are necessary to address any potential issues identified above: _____

The following are technical groundwater review recommendations. It is recognized that one or more technically recommended conditions may or may not be allowed under the transfer process rules and statutes. This technical groundwater review relies on other appropriate and authorized Department staff to make that determination.

Large flowmeter condition for both the "To" and "From" POA wells.

7. Any additional comments: none.

Transfer Application: T-13865

Review Due Date: 12/31/2021

Applicant Name: Charles Nofziger

Proposed Changes: ☒ POU ☒ POD ☐ POA ☐ USE ☐ OTHER

Reviewer(s): Giffin

Date of Review: 12/02/2021

1. Do you have evidence that the right has not been used in the last 5 years and that the presumption of forfeiture would not likely be rebuttable? ☐ Yes ☒ No If "Yes", attach evidence (e.g. dated aerial photo showing pavement or building on the land for >5 yrs.)
2. Is there a history of regulation on the source that serves this (or these) right(s) that has involved the transferred right(s) and downstream water rights? ☐ Yes ☒ No Generally characterize the frequency of any regulation or explain why regulation has not occurred:
3. Have headgate notices been issued for the source that serves the transferred right(s)?
☐ Yes ☒ No ☐ Records not available.
4. In your estimation, after the proposed change, would distribution of water for the right(s) result in regulation of other water rights that would not have occurred if use under the original right(s) was/were maximized? ☐ Yes ☒ No If "Yes", explain:
5. In your estimation, if the proposed change is approved, are there upstream water rights that would be affected? ☐ Yes ☒ No If "Yes", describe how the rights would be affected and list the rights most affected:

6. Check here ☐ if it appears that downstream water rights benefit from return flows resulting from the current use of the transferred right(s)? If you check the box, generally characterize the locations where the return flows likely occur and list the water rights that benefit most:

☒ N/A

7. For POD changes and instream transfers, check here if there are channel losses between the old and new PODs or within the proposed instream reach? If you check the box, describe and, if possible, estimate the losses:

☒ N/A

8. For instream transfers that propose protection of a reach beyond the mouth of the source stream:

☒ N/A Would the quantity be measureable into the receiving stream consistent with OAR 690-077-0015(8)? ☐ Yes ☐ No

9. For POU changes: ☐ N/A Is it likely the original place of use would continue to receive water from the same source? ☐ Yes ☒ No If "Yes", explain:

And we will actively watch the "off" lands.

10. For POU or USE changes: ☐ N/A In your best judgment, would use of the existing right at "full face value," result in the diversion of more water than can be used beneficially and without waste?

☐ Yes ☒ No If "Yes", explain:

11. For POU changes that involve micro-irrigation: ☒ N/A

- a. Has the applicant made changes (absent a transfer) to convert to micro-irrigation within the current place of use boundary of the water right proposed for transfer, and previously demonstrated to the Department through monitoring and site inspections by the Watermaster that the proposed transfer will not result in injury or enlargement?

☐ Yes ☐ No If "Yes", explain:

- b. Has a temporary transfer of this nature been previously filed and approved on the same lands (or portions thereof) as those lands involved in this transfer?

☒ Yes ☐ No If "Yes", answer the following:

i. Were there any problems with more acres being irrigated (or wetted) than were authorized under the temporary transfer? ☐ Yes ☒ No If "Yes", explain:
However I did not have access of Aerial photography from 2016-2020.

ii. Did the designated areas that were to remain dry (or not wetted) under the temporary transfer actually remain dry? ☒ Yes ☐ No If "No", explain:
From the best I can tell.

iii. Did the applicant comply with and meet all of the conditions of the temporary transfer? ☒ Yes ☐ No If "No", explain:

iv. Do you have any other observations regarding the temporary transfer?
☐ Yes ☒ No If "Yes", describe:

v. Did the applicant demonstrate to the Department through monitoring and site inspections by the Watermaster that neither injury nor enlargement occurred as a result of the temporary transfer? ☒ Yes ☐ No If "No", explain:

- c. To the best of your knowledge, if this transfer is approved, does it appear that:

i. "Injury" will occur to other water rights that share the same source?
☐ Yes ☒ No If "Yes", explain:

ii. "Enlargement" of the water right being transferred will occur?
☐ Yes ☒ No If "Yes", explain:

As long as the "off" lands truly remain off.

12. Are there other issues not identified through the above questions that should be considered in determining whether the change "can be effected without injury to other rights"?

☐ Yes ☒ No If "Yes", explain:

13. What alternatives may be available for addressing any issues identified above:

14. Do conditions need to be included in the transfer order to avoid enlargement of the right or injury to other rights? ☐ No ☒ Yes, as checked and provided below:

☐ For POU changes that involve micro-irrigation, provide the monitoring and reporting conditions necessary to prevent injury/enlargement:

☐ A Headgate should be required prior to diverting water.

☒ Measurement Devices for POD or POA: (if this condition is selected, also fill in the top sections of Page 4)

a. Before water use may begin under this order, the water user shall install a totalizing flow meter, or, with prior approval of the Director, another suitable measuring device, ☒ at each point of diversion/appropriation (new and existing) OR at each new point of diversion/appropriation ☐ with the exception that water rights issued to the Bureau of Reclamation or an irrigation district (or similar entity) are not subject to this condition.*

b. The water user shall maintain the meters or measuring devices in good working order.

c. The water user shall allow the Watermaster access to the meters or measuring devices; provided however, where the meters or measuring devices are located within a private structure, the Watermaster shall request access upon reasonable notice.

☐ Reservoir water use measurement: (if this condition is selected, also fill in the top sections of Page 4)

a. Before water use may begin under this order, the water user shall install staff gages, or, with prior approval of the Director, other suitable measuring devices, that measure the entire range and stage between empty and full in each reservoir. Staff gages shall be United States Geological Survey style.*

b. Before water use may begin under this order, if the reservoir is located in channel, weirs or other suitable measuring devices must be installed upstream and downstream of the reservoir, and, an adjustable outlet valve must be installed. The water user shall maintain such devices in good working order. A written waiver may be obtained, if in the judgment of the Director, the installation of weirs or other suitable measuring devices, or the adjustable outlet valve, will provide no public benefit.

* The following alternative device(s) should be substituted for the bold, underlined device in the above selected condition:

☐ Weir
☐ Parshall Flume
☐ Other: _____

☐ Submerged Orifice
☐ Flow Restrictor

Part 2 of 5 – Transfer Application Map

Your transfer application will be returned if any of the map requirements listed below are not met.

OWRD

Please be sure that the transfer application map you submit includes all the required items and matches the existing water right map. Check all boxes that apply.

- ☒ ☐ N/A Certified Water Right Examiner (CWRE) Stamp and Original Signature. For a list of CWREs, see http://apps.wrd.state.or.us/apps/wr/cwre_license_view/. CWRE stamp and signature are not required for substitutions.
- ☒ ☐ N/A If **more than three** water rights are involved, separate maps are needed for each water right.
- ☒ Permanent quality printed with dark ink on good quality paper.
- ☒ The size of the map can be 8½ x 11 inches, 8½ x 14 inches, 11 x 17 inches, or up to 30 x 30 inches. For 30 x 30 inch maps, one extra copy is required.
- ☒ A north arrow, a legend, and scale.
- ☒ The scale of the map must be: 1 inch = 400 feet, 1 inch = 1,320 feet, the scale of the Final Proof/Claim of Beneficial Use Map (the map used when the permit was certificated), the scale of the county assessor map if the scale is not smaller than 1 inch = 1,320 feet, or a scale that has been pre-approved by the Department.
- ☒ Township, Range, Section, ¼ ¼, DLC, Government Lot, and other recognized public land survey lines.
- ☒ Tax lot boundaries (property lines) are required. Tax lot numbers are recommended.
- ☒ Major physical features including rivers and creeks showing direction of flow, lakes and reservoirs, roads, and railroads.
- ☒ Major water delivery system features from the point(s) of diversion/appropriation such as main pipelines, canals, and ditches.
- ☒ Existing place of use that includes separate hachuring for each water right, priority date, and use including number of acres in each quarter-quarter section, government lot, or in each quarter-quarter section as projected within government lots, donation land claims, or other recognized public land survey subdivisions. If less than the entirety of the water right is being changed, a separate hachuring is needed for lands left unchanged.
- ☒ ☐ N/A Proposed place of use that includes separate hachuring for each water right, priority date, and use including number of acres in each quarter-quarter section, government lot, or in each quarter-quarter section as projected within government lots, donation land claims, or other recognized public land survey subdivisions.

1. For irrigation calculate cfs for each water right involved as follows:
 - a. Divide total authorized cfs by total acres in the water right (*for C12345, 1.25 cfs ÷ 100 ac*); then multiply by the number of acres to be transferred to get the transfer cfs (*x 45 ac = 0.56 cfs*).
 - b. If the water right certificate does not list total cfs, but identifies the allowable use as 1/40 or 1/80 of a cfs per acre; multiply number of acres proposed for change by either 0.025 (1/40) or 0.0125 (1/80). (*For C87654, 45.0 ac x 0.0125 cfs/ac = 0.56 cfs*)
2. Add cfs for the portions of water rights on all the land included in the transfer; however **do not count cfs for supplemental rights on acreage for which you have already calculated the cfs fee for the primary right on the same land**. The fee should be assessed only once for each "on the ground" acre included in the transfer. (*In this example, blank 5a would be only 0.56 cfs, since both rights serve the same 45.0 acres. Blank 5b would be 0 and Line 5 would then also become 0*).

For Place of Use or Character of Use Changes

Are there other water right certificates, water use permits or ground water registrations associated with the "from" or the "to" lands? ☐ Yes ☒ No

If YES, list the certificate, water use permit, or ground water registration numbers: N/A.

 Pursuant to ORS 540.510, any "layered" water use such as an irrigation right that is supplemental to a primary right proposed for transfer must be included in the transfer or be cancelled. Any change to a ground water registration must be filed separately in a ground water registration modification application.

For a change in point(s) of appropriation (well(s)) or additional point(s) of appropriation:

- ☒ Well log(s) are attached for each authorized and proposed well(s) that are clearly labeled and associated with the corresponding well(s) in Table 1 above and on the accompanying application map.

Tip: You may search for well logs on the Department's web page at:

http://apps.wrd.state.or.us/apps/gw/well_log/Default.aspx

AND/OR

- ☐ Describe the construction of the authorized and proposed well(s) in Table 3 for any wells that do not have a well log. For *proposed wells not yet constructed or built*, provide "a best estimate" for each requested information element in the table. The Department recommends you consult a licensed well driller, geologist, or certified water right examiner to assist with assembling the information necessary to complete Table 3.

Table 3. Construction of Point(s) of Appropriation

Any well(s) in this listing must be clearly tied to corresponding well(s) described in Table 1 and shown on the accompanying application map. Failure to provide the information will delay the processing of your transfer application until it is received. The information is necessary for the department to assess whether the proposed well(s) will access the same source aquifer as the authorized point(s) of appropriation (POA). The Department is prohibited by law from approving POA changes that do not access the same source aquifer.

Reference: Application T-13865

On November 22, 2021, OWRD received your water right Permanent Transfer Application. The application was accompanied by \$5235.00. Our receipt number 136936; 136762; is enclosed.

By copy of this letter, we are asking the Watermaster for a report regarding the potential for injury to existing water rights which may be caused by the requested change. A review form will also be sent to our groundwater staff to determine whether the proposed well accesses the same source of water as the original well or as the original POD.

This application may require publication of a notice for two consecutive weeks in a newspaper with general circulation in the area where the water right is located. If it is determined that newspaper notice will be required, the Department will prepare the notice and notify you of the cost. You will be responsible for submitting payment to the Department prior to publication of the notice.

Except as provided under ORS 540.510(3) for municipalities, you may not use water in the new place of use or from the new point of appropriation until a final order approving the transfer application has been issued by the Department. In order to avoid any possible forfeiture of the water right, you should continue to use the water as described by your existing water right.

If the land is sold before the application is approved, the buyer's consent to the application will be required unless a recorded deed or other legal document clearly established that the water right was not conveyed in the sale.

Refer to the following page for a chart showing the steps and expected timelines for the processing of your application.

If you have any questions, please contact the Transfer Section at (503) 979-9931.

In making this agreement, OWRD shall require the applicant to pay the full cost of expedited process.
2. **Restrictions.** Applicant and OWRD agree that this Agreement shall not be construed to restrict in any way the decisions and actions by OWRD. OWRD shall be free to exercise independent judgment consistent with existing laws and regulations.
3. **Effective Date and Duration.** Unless otherwise terminated by non-deposit of funds by the Applicant, this Agreement shall become effective on the date on which both parties have signed the Agreement and the full deposit of the estimated cost of the proposed service.

This payment will be placed in an account administered by OWRD and drawn upon as costs are actually incurred. If the actual cost of performing the work is less than payments received, OWRD will refund the unspent balance. If the actual cost of processing exceeds the estimate, the Applicant can either elect to terminate this Agreement or amend the Agreement to reflect the increase in cost.
 - b. The costs stated in this Agreement do not include the statutory application processing and filing fees.
