REFERENCE: Transfer Application T-14580

Enclosed is a copy of the final order approving your water right transfer application.

The time allowed to complete the transfer is specified in the final order. YOU SHOULD GIVE PARTICULAR ATTENTION TO THE TIME LIMIT. The water right for any portion of the authorized change in character of use or change in place of use NOT carried out within the time allowed will be lost.

An extension of the time limit can be allowed only upon a showing that diligent effort has been made to complete the actual change(s) within the time allowed.

You are required to hire a Certified Water Rights Examiner (CWRE) to complete a Claim of Beneficial Use report and map which must be submitted to this Department within one year of the date you complete the change(s) or within one year of the completion date authorized in the transfer final order, whichever occurs first.

If you have any questions related to the approval of this transfer, you may contact your caseworker, Dante Luongo, by telephone at (971) 304-5006 or by e-mail at Dante.j.luongo@water.oregon.gov.

STATE OF OREGON**

In the Matter of Transfer Application)	FINAL ORDER
T-14580, Marion County)	APPROVING ADDITIONAL POINTS OF
)	APPROPRIATION

Authority

Oregon Revised Statutes (ORS) 537.705 and 540.505 to 540.580 establish the process in which a water right holder may submit a request to transfer the point of appropriation, place of use, or character of use authorized under an existing water right. Oregon Administrative Rules (OAR) Chapter 690, Division 380 implement the statutes and provides the Department's procedures and criteria for evaluating transfer applications.

Applicant

JENSEN FAMILY LLC
C/O MARK TRIBBETT
5289 BLUEGRASS LANE
SILVERTON, OR 97381

Findings of Fact

1. On December 18, 2024, Jensen Family LLC, c/o Mark Tribbett filed an application for additional points of appropriation under Certificate 42225. The Department assigned the application number T-14580.
2. Notice of the application for transfer was published on December 24, 2024, pursuant to OAR 690-380-4000. No comments were filed in response to the notice.
3. On March 11, 2025, the Department sent a copy of the draft Preliminary Determination to the applicant, proposing to approve Transfer Application T-14580. The draft Preliminary Determination cover letter provided a deadline of April 10, 2025, for the applicant to respond and submit the required information. The applicant requested that the Department proceed with issuance of a Preliminary Determination and provided the necessary information to demonstrate that the applicant is authorized to pursue the transfer.

This final order is subject to judicial review by the Court of Appeals under ORS 183.482. Any petition for judicial review must be filed within the 60-day time period specified by ORS 183.482(1). Pursuant to ORS 536.075 and OAR 137-003-0675, you may petition for judicial review or petition the Director for reconsideration of this order. A petition for reconsideration may be granted or denied by the Director, and if no action is taken within 60 days following the date the petition was filed, the petition shall be deemed denied.

4. On April 25, 2025, the Department issued a Preliminary Determination proposing to approve Transfer Application T-14580 and sent a copy to the applicant. Additionally, notice of the Preliminary Determination for the transfer application was published in the Department's weekly notice on April 29, 2025, and in the Woodburn Independent newspaper on May 7 and 14, 2025, pursuant to ORS 540.520 and OAR 690-380-4020. No protests were filed in response to the notice.

5. The right to be transferred is as follows:

Certificate: 42225 in the name of DONALD D. KUENZI (perfected under Permit G-4559)
Use: IRRIGATION OF 42.6 ACRES
Priority Date: APRIL 9, 1969
Rate: 0.53 CUBIC FOOT PER SECOND
Limit/Duty: The amount of water used for irrigation, together with the amount secured under any other right existing for the same lands, shall be limited to ONE-EIGHTIETH of one cubic foot per second per acre, or its equivalent for each acre irrigated and shall be further limited to a diversion of not to exceed 2.5 acre feet per acre for each acre irrigated during the irrigation season of each year.

Transfer Review Criteria [OAR 690-380-0100(14), OAR 690-380-4010(2), and OAR 690-380-2110(2)]

7. Water has been used within the last five years according to the terms and conditions of the right. There is no information in the record that would demonstrate that the right is subject to forfeiture under ORS 540.610.
8. A water delivery system sufficient to use the full amount of water allowed under the existing right was present within the five-year period prior to submittal of Transfer Application T-14580.
9. The water right is subject to transfer as defined in ORS 540.505(4) and OAR 690-380-0100(14).
10. The proposed points of appropriation develop groundwater from the same aquifer as the authorized point of appropriation, as required by OAR 690-380-2110(2).
11. The proposed change, as conditioned, would not result in enlargement of the right.
12. The proposed change, as conditioned, would not result in injury to other existing water rights.
13. All other application requirements are met.

Conclusions of Law

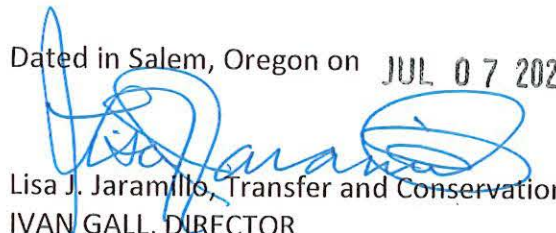

The additional points of appropriation proposed in Transfer Application T-14580 are consistent with the requirements of ORS 537.705 and 540.505 to 540.580 and OAR 690-380-5000.

Now, therefore, it is ORDERED:

1. The additional points of appropriation proposed in Transfer Application T-14580 are approved.
2. The right to the use of the water is restricted to beneficial use at the place of use described and is subject to all other conditions and limitations contained in Certificate 42225 and any related decree.

3. Approval of this transfer application does not constitute nor grant legal access onto or through another person's property for purposes of accessing the new points of appropriation.
4. Water right Certificate 42225 is cancelled.
5. The quantity of water diverted at the new additional points of appropriation (Well 2, Well, 3 and GR-859 Well), together with that diverted at the original point of appropriation (Certificate 42225 Well), shall not exceed the quantity of water lawfully available at the original point of appropriation (Certificate 42225 Well).
6. Water shall be acquired from the same aquifer (water source) as the original point of appropriation.
7. Water use measurement conditions:
 - a. Before water use may begin under this order, the water user shall install a totalizing flow meter, or, with prior approval of the Director, another suitable measuring device, at each point of appropriation (new and existing).
 - b. The water user shall maintain the meters or measuring devices in good working order.
 - c. The water user shall allow the Watermaster access to the meters or measuring devices; provided however, where the meters or measuring devices are located within a private structure, the Watermaster shall request access upon reasonable notice.
8. Full beneficial use of the water shall be made, consistent with the terms of this order, on or before **October 1, 2026**. A Claim of Beneficial Use prepared by a Certified Water Right Examiner shall be submitted by the applicant to the Department within one year after the deadline for completion of the change and full beneficial use of the water.
9. After satisfactory proof of beneficial use is received, a new certificate confirming the right transferred will be issued.

SUBJECT: Water Right Transfer Application T-14580

Please find enclosed the Preliminary Determination indicating that, based on the information available, the Department intends to approve application T-14580. This document is an intermediate step in the approval process; water may not be used legally as proposed in the transfer application until a Final Order has been issued by the Department. Please read this entire letter carefully to determine your responsibility for additional action.

A public notice is being published in the Department's weekly publication and in the Woodburn Independent newspaper, simultaneously with issuance of the Preliminary Determination. The notice initiates a period in which any person may file either a protest opposing the decision proposed by the Department in the Preliminary Determination or a standing statement supporting the Department's decision. The protest period will end 30 days after the last date of newspaper publication.

If no protest is filed, the Department will issue a Final Order consistent with the Preliminary Determination. You should receive a copy of the Final Order about 30 days after the close of the protest period.

If a protest is filed, the application may be referred to a contested case proceeding. A contested case provides an opportunity for the proponents and opponents of the decision proposed in the Preliminary Determination to present information and arguments supporting their position in a quasi-judicial proceeding.

Please don't hesitate to contact me at 971 304-5006 or Dante.J.Luongo@water.oregon.gov Richman., if I may be of assistance.

Sincerely,

Dante Luongo

In the Matter of Transfer Application)	PRELIMINARY DETERMINATION

)	POINTS OF APPROPRIATION

Authority

Oregon Revised Statutes (ORS) 537.705 and 540.505 to 540.580 establish the process in which a water right holder may submit a request to transfer the point of appropriation, place of use, or character of use authorized under an existing water right. Oregon Administrative Rules (OAR) Chapter 690, Division 380 implement the statutes and provides the Department's procedures and criteria for evaluating transfer applications.

JENSEN FAMILY LLC
C/O MARK TRIBBETT

SILVERTON, OR 97381

Findings of Fact

1. On December 18, 2024, Jensen Family LLC, c/o Mark Tribbett filed an application for additional points of appropriation under Certificate 42225. The Department assigned the application number T-14580.
2. Notice of the application for transfer was published on December 24, 2024, pursuant to OAR 690-380-4000. No comments were filed in response to the notice.
3. On March 11, 2025, the Department sent a copy of the draft Preliminary Determination to the applicant, proposing to approve Transfer Application T-14580. The draft Preliminary Determination cover letter provided a deadline of April 10, 2025, for the applicant to respond and submit the required information. The applicant requested that the Department proceed with issuance of a Preliminary Determination and provided the necessary information to demonstrate that the applicant is authorized to pursue the transfer.

Pursuant to OAR 690-380-4030, any person may file a protest or standing statement within 30 days after the last date of publication of the newspaper notice or the Department's weekly notice as prescribed by OAR 690-380-4020, whichever is later, of this preliminary determination.

4. The right to be transferred is as follows:

Certificate: 42225 in the name of DONALD D. KUENZI (perfected under Permit G-4559)
Use: IRRIGATION OF 42.6 ACRES

Transfer Review Criteria [OAR 690-380-0100(14), OAR 690-380-4010(2), and OAR 690-380-2110(2)]

6. Water has been used within the last five years according to the terms and conditions of the right. There is no information in the record that would demonstrate that the right is subject to forfeiture under ORS 540.610.
7. A water delivery system sufficient to use the full amount of water allowed under the existing right was present within the five-year period prior to submittal of Transfer Application T-14580.
8. The water right is subject to transfer as defined in ORS 540.505(4) and OAR 690-380-0100(14).
9. The proposed points of appropriation develop groundwater from the same aquifer as the authorized point of appropriation, as required by OAR 690-380-2110(2).
10. The proposed change, as conditioned, would not result in enlargement of the right.
11. The proposed change, as conditioned, would not result in injury to other existing water rights.
12. All other application requirements are met.

Determination and Proposed Action

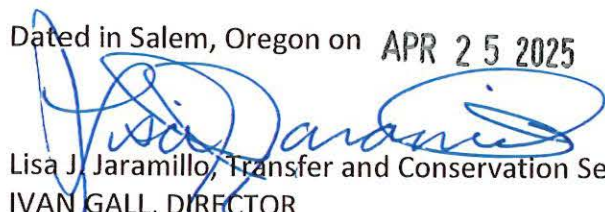

The additional points of appropriation proposed in Transfer Application T-14580 appear to be consistent with the requirements of ORS 537.705 and 540.505 to 540.580 and OAR 690-380-5000. If protests are not filed pursuant to OAR 690-380-4030, the application will be approved.

If Transfer Application T-14580 is approved, the final order will include the following:

1. *The additional points of appropriation proposed in Transfer Application T-14580 are approved.*
2. *The right to the use of the water is restricted to beneficial use at the place of use described and is subject to all other conditions and limitations contained in Certificate 42225 and any related decree.*
3. *Approval of this transfer application does not constitute nor grant legal access onto or through another person's property for purposes of accessing the new points of appropriation.*
4. *Water right Certificate 42225 is cancelled.*

5. *The quantity of water diverted at the new additional points of appropriation (Well 2, Well, 3 and GR-859 Well), together with that diverted at the original point of appropriation (Certificate 42225 Well), shall not exceed the quantity of water lawfully available at the original point of appropriation (Certificate 42225 Well).*
6. *Water shall be acquired from the same aquifer (water source) as the original point of appropriation.*
7. *Water use measurement conditions:*
 - a. *Before water use may begin under this order, the water user shall install a totalizing flow meter, or, with prior approval of the Director, another suitable measuring device, at each point of appropriation (new and existing).*
 - b. *The water user shall maintain the meters or measuring devices in good working order.*
 - c. *The water user shall allow the Watermaster access to the meters or measuring devices; provided however, where the meters or measuring devices are located within a private structure, the Watermaster shall request access upon reasonable notice.*
8. *Full beneficial use of the water shall be made, consistent with the terms of this order, on or before **October 1, 2026**. A Claim of Beneficial Use prepared by a Certified Water Right Examiner shall be submitted by the applicant to the Department within one year after the deadline for completion of the change and full beneficial use of the water.*
9. *After satisfactory proof of beneficial use is received, a new certificate confirming the right transferred will be issued.*

Protests

Under the provisions of ORS 540.520(6) & (7) and OAR 690-380-4030, within 30 days after the last date of publication of the newspaper notice or the Department's weekly notice as prescribed by OAR 690-380-4020, whichever is later, any person may file, jointly or severally, a protest expressing opposition of approval of the transfer application and disagreement with this Preliminary Determination or a standing statement in support of this Preliminary Determination. If this Preliminary Determination determines that a change in point of diversion or appropriation would result in injury, the applicant may file a notification of intent to pursue approval of the transfer under OAR 690-380-5030 to 690-380-5050. Protests and standing statements must be received by the Water Resources Department within 30 days after the last date of publication of the newspaper notice or the Department's weekly notice as prescribed by OAR 690-380-4020, whichever is later.

Protests must be in writing and received in hard copy form with the appropriate statutory protest filing fee; protests cannot be filed by electronic mail. [OAR 690-002-0025(3) and 690-380-0100(9)]. The protest must include the following:

- The person's name, address, and telephone number;
- All reasonably ascertainable issues and all reasonably available arguments supporting the person's position by the close of the protest period. Failure to raise a reasonably ascertainable issue in a protest or failure to provide sufficient specificity to afford the Department an opportunity to respond to the issue may preclude consideration of the issue during the hearing;
- If you are the applicant, a protest fee of \$480 required by ORS 536.050; and
- If you are not the applicant, a protest fee of \$950 required by ORS 536.050 and proof of service of the protest upon the applicant.

Requests for Standing

Under the provisions of OAR 690-380-4030(5), the Department shall provide to persons who have filed standing statements as defined under OAR 690-380-0100(11) notice of any differences between the Department's Preliminary Determination and the Final Order, notice of a hearing on the application under OAR 137-003-0535, and an opportunity to request limited party status or party status in the hearing.

Requests for standing must be received in the Water Resources Department no later than 30 days after the last date of publication of the newspaper notice or the Department's weekly notice as prescribed by OAR 690-380-4020, whichever is later. Requests for standing must be in writing, and must include the following:

- The requester's name, mailing address and telephone number;
- If the requester is representing a group, association or other organization, the name, address and telephone number of the represented group;
- A statement that the requester supports the preliminary determination as issued.

After the protest period has ended, the Director will either issue a Final Order or schedule a contested case hearing. The contested case hearing will be scheduled only if a protest has been filed under OAR 690-380-4030. In accordance with OAR 690-380-4200, notice and conduct of the hearing shall:

- Be under the applicable provisions of ORS 183.310 to 183.550, pertaining to contested cases, and the hearing shall be held in the area where the rights are located unless all parties stipulate otherwise; and
- If a protest has asserted that a water right to be transferred has been forfeited through non-use, include the notice and procedures described in OAR 690-017-0500 to 690-017-0900.

If after hearing the Department issues a proposed Final Order finding that a change in point of diversion or appropriation will result in injury, the applicant may file a notification of intent to pursue approval of the transfer under OAR 690-380-5030 to 690-380-5050 within 15 days of receipt of the proposed order. Notwithstanding 690-002-0175, if the applicant files a notification of intent to pursue approval of the transfer under 690-380-5030 to 690-380-5050, the deadline for filing exceptions to the proposed order shall be 30 days after the Department provides notice to the parties that the transfer does not meet the requirements of 690-380-5030 to 690-380-5050.

If you do not request a hearing within 30 days after the close of the protest period, or if you withdraw a request for a hearing, notify the Department or the administrative law judge that you will not appear, or fail to appear at a scheduled hearing, the Director may issue a final order by default. If the Director issues a Final Order by default, the Department designates the relevant portions of its files on this matter, including all materials that you have submitted relating to this matter, as the record for purpose of proving a *prima facie* case upon default.

You may be represented by an attorney at the hearing. Legal aid organizations may be able to assist a party with limited financial resources. Generally, partnerships, corporations, associations, governmental subdivisions, or public or private organizations are represented by an attorney. However, consistent with OAR 690-002-0020 and OAR 690-137-0555, an agency representative may represent partnerships, corporations, associations, governmental subdivisions or public, or private organizations if the Department determines that appearance of a person by an authorized representative will not hinder the orderly and timely development of the record in this case.

1. Basic description of the changes proposed in this transfer: Applicant proposes to add three APOAs to **Certificate 42225**: APOA 2/Well 2 (**PROP 608**), APOA 3/Well 3 (**PROP 609**), APOA 4/Well 4 (**MARI 4749**). The authorized POA on **Certificate 42225** is POA 1/Well 1 (**MARI 6493**), which is authorized to irrigate 42.6 ac at a maximum rate of 0.53 cfs (238 gpm) and a maximum annual volume of 106.5 acre-feet/year. All four POAs are authorized or proposed to be authorized under other transfers: T-13599 approved on 12/12/2024 added APOA 2/Well 2 (**PROP 608**) and APOA 3/Well 3 (**PROP 609**) to **Claim GR-2579** to irrigate 78.7 ac with a maximum annual duty of 196.75 acre-feet/year* and maximum flow of 1.06 cfs (476 gpm); pending T-14581 proposes to add POA 1/Well 1 (**MARI 6493**), APOA 2/Well 2 (**PROP 608**), and APOA 3/Well 3 (**PROP 609**) to **Claim GR-859** with authorized POA APOA 4/Well 4 (**MARI 4749**) for irrigation of 80 ac with a maximum annual duty of 200 acre-feet/year* and maximum flow rate of 0.7442 cfs (336 gpm). 2. Will the proposed POA develop the same aquifer (source) as the existing authorized POA?
☒ Yes ☐ No Comments: The authorized well, POA 1/Well 1 (MARI 6493), is completed to a depth of 185 ft [27 ft amsl] with a static water level, SWL, of 39 ft bls [173 ft amsl] and utilizes the Middle Sedimentary Unit of the Willamette Aquifer, consisting of slightly to moderately consolidated Pleistocene sands and gravels (Gannett and Caldwell, 1998; Conlon et al., 2005). The constructed APOA, APOA 4/Well 4 (MARI 4749), is completed to a depth of 147 ft [52 ft amsl] with a SWL of 25 ft bls [174 ft amsl]. The proposed APOAs, APOA 2/Well 2 (PROP 608) and APOA 3/Well 3 (PROP 609), are anticipated to be completed to a depth of 200 ft [12 ft and 1 ft amsl, respectively]. The Willamette Aquifer is between 100 and 120 ft thick and overlain by 80 ft of fine-grained, low permeability Willamette Silt Gannett and Caldwell, 1998; MARI 4750 and MARI 6489). The three APOAs are anticipated to produce from the same aquifer is the authorized POA.
3. a) Is the existing authorized POA subject to a water level decline condition?
☐ Yes ☒ No Comments: _____

b) If yes, for each POA identify the reference level, most recent spring-high water level, and whether an applicable permit decline condition has been exceeded: NA
4. a) Is there more than one source developed under the right (e.g., basalt and alluvium)?
☐ Yes ☒ No Comments: Only the alluvial source is developed.

b) If yes, estimate the portion of the right supplied by each of the sources and describe any limitations that will need to be placed on the proposed change (rate, duty, etc.): NA

5. a) Will this proposed change, at its maximum allowed rate of use, likely result in an increase in interference with **another ground water right**?

☒ Yes ☐ No Comments: Proposed APOA 3/Well 3 (PROP 609) is ~750 ft northwest of MARI 6489, a POA on Certificate 47840 with priority date 5/23/1973. The authorized POA/POA 1 (MARI 6493) is ~1956 ft southwest of MARI 6489. The reduced distance is anticipated to increase interference with MARI 6489.

b) If yes, would this proposed change, at its maximum allowed rate of use, likely result in another groundwater right not receiving the water to which it is legally entitled?

☐ Yes ☒ No If yes, explain: The maximum drawdown produced by APOA 3/Well 3 (PROP 609) is not anticipated to result in MARI 6489 not receiving the water to which it is legally entitled.

6. a) Will this proposed change, at its maximum allowed rate of use, likely result in an increase in interference with **another surface water source**?

☒ Yes ☐ No Comments: Proposed APOA 3/Well 3 (PROP 609) is ~1680 ft northwest of Howell Prairie Creek. The authorized POA/POA 1 (MARI 6493) is ~2300 ft west Howell Prairie Creek. The reduced distance is anticipated to increase interference with Howell Prairie Creek.

b) If yes, at its maximum allowed rate of use, what is the expected change in degree of interference with any **surface water sources** resulting from the proposed change?

Stream: Howell Prairie Creek ☒ Minimal ☐ Significant

Provide context for minimal/significant impact: The Willamette Aquifer in this area is overlain by about 80 ft of the Willamette Silt Unit (WSU). Howell Prairie Creek is partially incised into the WSU and appears to be underlain by about 40-50 ft low permeability sediments from the WSU. Given the confined nature of the aquifer and presence of a thick sequence of low permeability sediments, interference with surface water sources is assumed to be minimal.

7. For SW-GW transfers, will the proposed change in point of diversion affect the surface water source similarly (as per OAR 690-380-2130) to the authorized point of diversion specified in the water use subject to transfer?

☐ Yes ☐ No Comments: NA

8. What conditions or other changes in the application are necessary to address any potential issues identified above: NA

9. Any additional comments: _____

Reviewer(s): G. Wacker

Date of Review: 01/03/2025

1. Do you have evidence that the right has not been used in the last 5 years and that the presumption of forfeiture would not likely be rebuttable? ☐ Yes ☒ No If "Yes", attach evidence (e.g. dated aerial photo showing pavement or building on the land for >5 yrs.)
2. Is there a history of regulation on the source that serves this (or these) right(s) that has involved the transferred right(s) and downstream water rights? ☐ Yes ☒ No Generally characterize the frequency of any regulation or explain why regulation has not occurred:
3. Have headgate notices been issued for the source that serves the transferred right(s)?
☐ Yes ☒ No ☐ Records not available.
4. In your estimation, after the proposed change, would distribution of water for the right(s) result in regulation of other water rights that would not have occurred if use under the original right(s) was/were maximized? ☐ Yes ☒ No If "Yes", explain:
5. In your estimation, if the proposed change is approved, are there upstream water rights that would be affected? ☐ Yes ☒ No If "Yes", describe how the rights would be affected and list the rights most affected:

6. Check here ☐ if it appears that downstream water rights benefit from return flows resulting from the current use of the transferred right(s)? If you check the box, generally characterize the locations where the return flows likely occur and list the water rights that benefit most:

☒ N/A

7. For POD changes and instream transfers, check here if there are channel losses between the old and new PODs or within the proposed instream reach? If you check the box, describe and, if possible, estimate the losses:

☒ N/A

8. For instream transfers that propose protection of a reach beyond the mouth of the source stream:

☒ N/A Would the quantity be measureable into the receiving stream consistent with OAR 690-077-0015(8)? ☐ Yes ☐ No

9. For POU changes: ☒ N/A Is it likely the original place of use would continue to receive water from the same source? ☐ Yes ☐ No If "Yes", explain:

10. For POU or USE changes: ☒ N/A In your best judgment, would use of the existing right at "full face value," result in the diversion of more water than can be used beneficially and without waste? ☐ Yes ☐ No If "Yes", explain:

11. For POU changes that involve micro-irrigation: ☒ N/A

- a. Has the applicant made changes (absent a transfer) to convert to micro-irrigation within the current place of use boundary of the water right proposed for transfer, and previously demonstrated to the Department through monitoring and site inspections by the Watermaster that the proposed transfer will not result in injury or enlargement?

☐ Yes ☐ No If "Yes", explain:

- b. Has a temporary transfer of this nature been previously filed and approved on the same lands (or portions thereof) as those lands involved in this transfer?

☐ Yes ☐ No If "Yes", answer the following:

- i. Were there any problems with more acres being irrigated (or wetted) than were authorized under the temporary transfer? ☐ Yes ☐ No If "Yes", explain:

- ii. Did the designated areas that were to remain dry (or not wetted) under the temporary transfer actually remain dry? ☐ Yes ☐ No If "No", explain:

- iii. Did the applicant comply with and meet all of the conditions of the temporary transfer? ☐ Yes ☐ No If "No", explain:

- iv. Do you have any other observations regarding the temporary transfer? ☐ Yes ☐ No If "Yes", describe:

- v. Did the applicant demonstrate to the Department through monitoring and site inspections by the Watermaster that neither injury nor enlargement occurred as a result of the temporary transfer? ☐ Yes ☐ No If "No", explain:

- c. To the best of your knowledge, if this transfer is approved, does it appear that:

- i. "Injury" will occur to other water rights that share the same source? ☐ Yes ☐ No If "Yes", explain:

- ii. "Enlargement" of the water right being transferred will occur? ☐ Yes ☐ No If "Yes", explain:

12. Are there other issues not identified through the above questions that should be considered in determining whether the change "can be effected without injury to other rights"?

☐ Yes ☒ No If "Yes", explain:

13. What alternatives may be available for addressing any issues identified above:

14. Do conditions need to be included in the transfer order to avoid enlargement of the right or injury to other rights? ☐ No ☒ Yes, as checked and provided below:

☐ For POU changes that involve micro-irrigation, provide the monitoring and reporting conditions necessary to prevent injury/enlargement:

☐ A Headgate should be required prior to diverting water.

☒ Measurement Devices for POD or POA: (if this condition is selected, also fill in the top sections of Page 4)

*a. Before water use may begin under this order, the water user shall install a **totalizing flow meter***, or, with prior approval of the Director, another suitable measuring device, ☒ at each point of diversion/appropriation (new and existing) **OR** at each new point of diversion/appropriation ☐ with the exception that water rights issued to the Bureau of Reclamation or an irrigation district (or similar entity) are not subject to this condition.*

b. The water user shall maintain the meters or measuring devices in good working order.

c. The water user shall allow the Watermaster access to the meters or measuring devices; provided however, where the meters or measuring devices are located within a private structure, the Watermaster shall request access upon reasonable notice.

☐ Reservoir water use measurement: (if this condition is selected, also fill in the top sections of Page 4)

*a. Before water use may begin under this order, the water user shall install **staff gages***, or, with prior approval of the Director, other suitable measuring devices, that measure the entire range and stage between empty and full in each reservoir. Staff gages shall be United States Geological Survey style.*

b. Before water use may begin under this order, if the reservoir is located in channel, weirs or other suitable measuring devices must be installed upstream and downstream of the reservoir, and, an adjustable outlet valve must be installed. The water user shall maintain such devices in good working order. A written waiver may be obtained, if in the judgment of the Director, the installation of weirs or other suitable measuring devices, or the adjustable outlet valve, will provide no public benefit.

* The following alternative device(s) should be substituted for the bold, underlined device in the above selected condition:

☐ Weir
☐ Parshall Flume
☐ Other: ____

☐ Submerged Orifice

On December 18, 2024, the Department received your water right Permanent Transfer Application. The application was accompanied by \$2660.00. Receipt number 144429 is enclosed.

By copy of this letter, we are asking the Watermaster for a report regarding the potential for injury to existing water rights which may be caused by the requested change. A review form will also be sent to our groundwater staff to determine whether the proposed well accesses the same source of water as the original well.

This application may require publication of a notice for two consecutive weeks in a newspaper with general circulation in the area where the water right is located. If it is determined that newspaper notice will be required, the Department will prepare the notice and notify you of the cost. You will be responsible for submitting payment to the Department prior to publication of the notice.

Except as provided under ORS 540.510(3) for municipalities, you may not use water from the new point of appropriation until a final order approving the transfer application has been issued by the Department. In order to avoid any possible forfeiture of the water right, you should continue to use the water as described by your existing water right.

If the land is sold before the application is approved, the buyer's consent to the application will be required unless a recorded deed or other legal document clearly established that the water right was not conveyed in the sale.

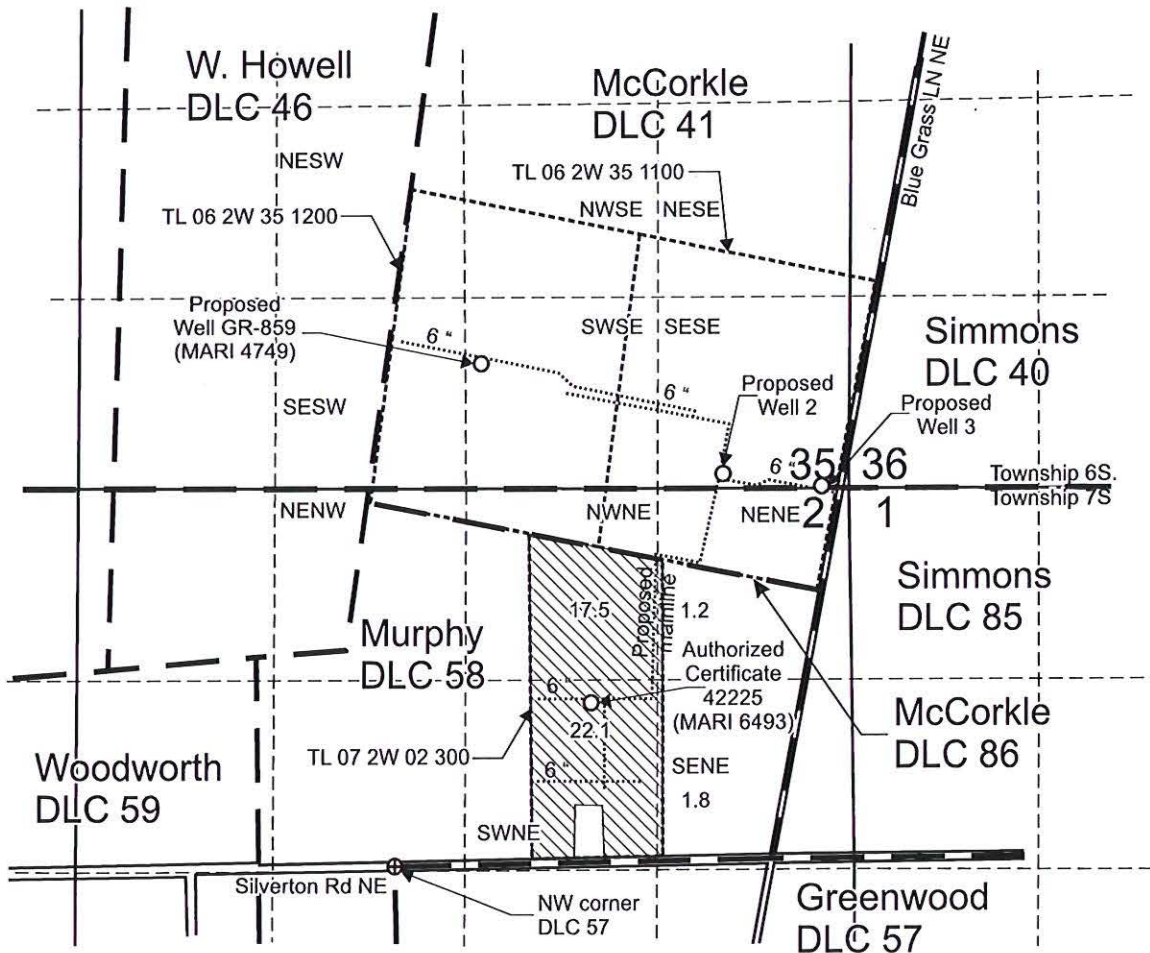

Refer to the following page for a chart showing the steps and expected timelines for the processing of your application.

If you have any questions, please contact the Transfer Section at (503) 986-0935.

- ☒ Permanent quality printed with dark ink on good quality paper.
- ☒ The size of the map can be 8½ x 11 inches, 8½ x 14 inches, 11 x 17 inches, or up to 30 x 30 inches. For 30 x 30 inch maps, one extra copy is required.
- ☒ A north arrow, a legend, and scale.
- ☒ The scale of the map must be: 1 inch = 400 feet, 1 inch = 1,320 feet, the scale of the Final Proof/Claim of Beneficial Use Map (the map used when the permit was certificated), the scale of the county assessor map if the scale is not smaller than 1 inch = 1,320 feet, or a scale that has been pre-approved by the Department.
- ☒ Township, Range, Section, ¼ ¼, DLC, Government Lot, and other recognized public land survey lines.
- ☒ Tax lot boundaries (property lines) are required. Tax lot numbers are recommended.

- ☒ Existing place of use that includes separate hachuring for each water right, priority date, and use including number of acres in each quarter-quarter section, government lot, or in each quarter-quarter section as projected within government lots, donation land claims, or other recognized public land survey subdivisions. If less than the entirety of the water right is being changed, a separate hachuring is needed for lands left unchanged.
- ☐ ☒ N/A Proposed place of use that includes separate hachuring for each water right, priority date, and use including number of acres in each quarter-quarter section, government lot, or in each quarter-quarter section as projected within government lots, donation land claims, or other recognized public land survey subdivisions.

*Example for Line 5a calculation to transfer 45.0 acres of Primary Certificate 12345 (total 1.25 cfs for 100 acres) and 45.0 acres of Supplemental Certificate 87654 (1/80 cfs per acre) on the same land:

1. For irrigation calculate cfs for each water right involved as follows:
 - a. Divide total authorized cfs by total acres in the water right (*for C12345, 1.25 cfs ÷ 100 ac*); then multiply by the number of acres to be transferred to get the transfer cfs (*x 45 ac = 0.56 cfs*).
 - b. If the water right certificate does not list total cfs, but identifies the allowable use as 1/40 or 1/80 of a cfs per acre; multiply number of acres proposed for change by either 0.025 (1/40) or 0.0125 (1/80). (*For C87654, 45.0 ac x 0.0125 cfs/ac = 0.56 cfs*)
2. Add cfs for the portions of water rights on all the land included in the transfer; however **do not count cfs for supplemental rights on acreage for which you have already calculated the cfs fee for the primary right on the same land**. The fee should be assessed only once for each "on the ground" acre included in the transfer. (*In this example, blank 5a would be only 0.56 cfs, since both rights serve the same 45.0 acres. Blank 5b would be 0 and Line 5 would then also become 0*).

FEE WORKSHEET for SUBSTITUTION

1	Base Fee (includes change to one well)	1	\$990.00

For a change in point(s) of appropriation (well(s)) or additional point(s) of appropriation:

- ☒ Well log(s) are attached for each authorized and proposed well(s) that are clearly labeled and associated with the corresponding well(s) in Table 1 above and on the accompanying application map.

- ☒ Describe the construction of the authorized and proposed well(s) in Table 3 for any wells that do not have a well log. For *proposed wells not yet constructed or built*, provide "a best estimate" for each requested information element in the table. The Department recommends you consult a licensed well driller, geologist, or certified water right examiner to assist with assembling the information necessary to complete Table 3.
