Enclosure

BEFORE THE WATER RESOURCES DEPARTMENT OF THE STATE OF OREGON

In the Matter of Permit Amendment)	FINAL ORDER
T-14579, HARNEY County)	APPROVING A CHANGE IN PLACE OF USE
)	AND POINT OF APPROPRIATION

Authority

Oregon Revised Statute (ORS) 537.211 establishes the process in which a water right permit holder may submit a request to change the point of appropriation and/or place of use authorized under an existing water right permit.

Applicant

KELLY SINGHOSE AND TRAVIS SINGHOSE PO BOX 816 BURNS, OR 97720

Findings of Fact

- 1. On December 18, 2024, Kelly Singhose and Travis Singhose, filed an application to change the point of appropriation and to change in place of use under Permit G-17486. The Department assigned the application number T-14579.
- On December 8, 2015, the Department approved an assignment of the permit to Travis L. and Kelly R. Singhose.
- 3. Notice of the application for the permit amendment was published in the Department's weekly notice on December 24, 2024, and in the Burns Times-Herald newspaper on June 25, 2025, and July 2, 2025, pursuant to ORS 540.520(5).
- 4. On June 15, 2021, the Department issued a Proposed Final Order to approve an extension of time application, but limiting use of water under Permit G-17486 to the amount already developed (1.63 cubic feet per second for irrigation of 130.2 acres). On July 30, 2021, the Applicant timely filed a protest of the proposed final order.
- 5. August 6, 2024, the applicant's attorney and the Department signed a stipulated agreement to withdraw the protest of the proposed final order. That stipulated agreement is attached as Attachment 1.

This is a final order in other than contested case. This order is subject to judicial review under ORS 183.484. Any petition for judicial review must be filed within the 60 day time period specified by ORS 183.484(2). Pursuant to ORS 536.075 and OAR 137-004-0080 you may either petition for judicial review or petition the Director for reconsideration of this order. A petition for reconsideration may be granted or denied by the Director, and if no action is taken within 60 days following the date the petition was filed, the petition shall be deemed denied.

- 6. On March 31, 2025, and April 4, 2025, the Department contacted both the applicant's agent and attorneys via email regarding deficiencies in the application, specifically, the explanation of the purpose of the application is to reduce the number of acres and the rate under Permit G-17486, however, the applicant did not submit a cancellation affidavit and both the map labeled "PERMIT AMENDMENT "OFF" MAP" and the map labeled "PERMIT AMENDMENT "TO" MAP" do not clearly describe the amendment proposed under Permit Amendment Application T-14579.
- 7. On April 10, 2025, the applicant's agent submitted amended application pages and maps, satisfying the deficiencies.
- 8. On July 11, 2025, the Department approved an extension of time for complete application of water to October 1, 2026. The extension of time final order contains a development limitation and limits Permit G-17486 to no more than 1.63 cubic feet per second for irrigation of 130.2 acres.
- 9. The permit to be amended is as follows:

Permit:

G-17486 in the name of BROKEN R RANCH LLC (assigned to TRAVIS L. AND

KELLY R. SINGHOSE)

Use:

IRRIGATION of 309.8 ACRES

Priority Date: JANUARY 13, 2014

Quantity:

3.87 CUBIC FEET PER SECOND

Rate/Duty:

The amount of water used for irrigation under this right, together with the amount secured under any other right existing for the same lands, is limited to a diversion of ONE-EIGHTIETH of one cubic foot per second and 3.0 acrefeet for each acre irrigated during the irrigation season of each year.

Permit Amendment Review Criteria

- 12. The changes would not result in injury to other water rights.
- 13. The proposed place of use is owned and/or controlled by the permit holder.
- 14. The changes do not enlarge the permit.
- 15. The changes do not alter any other terms of the permit.
- 16. The proposed place of use is contiguous to the authorized place of use.

Conclusions of Law

The change in point of appropriation and place of use proposed by Permit Amendment Application T-14579 is consistent with the requirements of ORS 537.211.

Now, therefore, it is ORDERED:

- 1. The change in point of appropriation and place of use proposed by Permit Amendment Application T-14579 is approved.
- 2. Approval of this permit amendment application does not constitute nor grant legal access onto or through another person's property for purposes of accessing the new points of appropriation, or place of use.
- 3. Permit G-18963, in the name of TRAVIS L. AND KELLY R. SINGHOSE, is issued to replace Permit G-17486, and incorporates the amendments approved by this order, the extension of time and the assignment. Permit G-17486, in the name of BROKEN R RANCH LLC (assigned to TRAVIS L. AND KELLY R. SINGHOSE), is no longer of any force or effect.
- 4. The quantity of water diverted at the new points of appropriation, (ROBEY WELL 1 (HARN 52225/52882), WELL C (HARN 52853), and WELL D (HARN 52863)), shall not exceed the quantity of water lawfully available at the original point of appropriation, (ROBEY WELL 2).
- 5. Water use measurement conditions:
 - a. Before water use may begin under this order, the water user shall install a totalizing flow meter, or, with prior approval of the Director, another suitable measuring device, at each point of appropriation (new and existing).

- b. The water user shall maintain the meters or measuring devices in good working order.
- c. The water user shall allow the Watermaster access to the meters or measuring devices; provided however, where the meters or measuring devices are located within a private structure, the Watermaster shall request access upon reasonable notice.
- 6. Water shall be acquired from the same aquifer as the original point of appropriation.
- 7. The former place of use shall no longer be irrigated as part of this permit.
- 8. All other terms and conditions of Permit G-18963 remain the same.

Dated in Salem, Oregon on JUL 1 4 2025

) Agency Case No. G-17753
)

RECITALS

WHEREAS Permit G-17486 was issued on August 28, 2015, authorizing the use of 3.87 cfs from Well 2 in the Sage Hen Creek Basin for irrigation of 309.8 acres.

WHEREAS, on January 23, 2019, Travis L. and Kelly R. Singhose ("Applicant") applied for a permit amendment (Application T-13110), to amend the place of use and point of appropriation, and add additional points of appropriation, under Permit G-17486.

WHEREAS, on October 14, 2020, the Oregon Water Resources Department ("Department") issued a final order approving T-13110 with specified terms and conditions, canceling Permit G-17486, and issuing superseding Permit G-18470 to replace Permit G-17486.

WHEREAS, on December 2, 2020 the Department issued a Reconsideration Order rescinding the Final Order approving Application T-13110, denying the requested permit amendments, canceling the superseding permit, and reinstating Permit G-17486. The Department determined that the permit completion date for G-17486 had expired and that an approved extension of the completion date was required before Permit G-17486 could be amended.

WHEREAS, on February 11, 2021, the Applicant filed an Application for Extension of Time (G-17753 Extension Application), requesting the time to apply water to full beneficial use under the terms and conditions of Permit G-17486 be extended from August 28, 2020, to October 1, 2023.

WHEREAS, on June 15, 2021, the Department issued a Proposed Final Order approving the G-17753 Extension Application, but limiting use of water under Permit G-17486 to the amount already developed (1.63 cubic feet per second for irrigation of 130.2 acres).

WHEREAS, on July 30, 2021, the Applicant timely filed a protest of the Proposed Final Order.

WHEREAS, the Applicant and the Department (collectively, the "Parties") have agreed to a settle this matter pursuant to the stipulations identified below.

Page 1 – STIPULATED AGREEMENT TO WITHDRAW PROTEST

54119-76545 4881-0512-0441.2

NOW THEREFORE, the Applicant and the Department stipulate and agree to the following:

STIPULATIONS

- 1. The Applicant and the Department agree to jointly request the Administrative Law Judge to hold the contested case in this matter in abeyance until June 3, 2025.
- 2. The Applicant agrees to apply to the Department for a permit amendment materially similar to T-13110, but limited to the amount approved in the Proposed Final Order on the G-17753 Extension Application (1.63 cubic feet per second for irrigation of 130.2 acres). The Department will waive all application fees associated with the permit amendment application.
- 3. Upon receipt of the permit amendment application, the Department will process the application on a priority basis. While the Department cannot predetermine the outcome of the application, the Department acknowledges that the full, intended execution of this Stipulated Agreement is contingent on the Department approving a permit amendment materially consistent with the approval issued on October 14, 2020, but limited to the amount approved in the Proposed Final Order on the G-17753 Extension Application (1.63 cubic feet per second for irrigation of 130.2 acres).
- 4. If the Department intends to issue a final order approving a permit amendment materially consistent with the approval issued on October 14, 2020, but limited to the amount approved in the Proposed Final Order on the G-17753 Extension Application (1.63 cubic feet per second for irrigation of 130.2 acres), the Department will notify the Applicant 14 days before issuance of the final order.
- 5. The Applicant will notify the Department within 7 days before issuance of the final order if it agrees that the final order approving the permit amendment is materially consistent with the approval issued on October 14, 2020, but limited to the amount approved in the Proposed Final Order on T-17753 (1.63 cubic feet per second for irrigation of 130.2 acres).
- 6. On the intended date of issuance of the final order described in Paragraph 4, the Applicant agrees to withdraw its protest in this matter, and the Department agrees to issue the final order described in Paragraph 4, and a final order on the G-17753 Extension Application that is materially consistent with the attached draft Final Order Incorporating Stipulated Agreement (Exhibit A).
- 7. The Department will withdraw this matter from the Office of Administrative Hearings within 7 days of the completion of each of the events described in Paragraph 6.
- 8. The Applicant and the Department stipulate that timely completion of each of the events described in Paragraphs 1 through 6 is a necessary condition of withdrawal of this matter from the Office of Administrative Hearings. If any such event is not completed in the manner and time required, the parties will meet and confer in an attempt to resolve the departure from the anticipated outcome. If the parties cannot resolve the issue, this Stipulated Agreement shall terminate, and the Applicant and the Department will request

Special Order Volume 135, Page 119

the Office of Administrative Hearings to resume the contested case proceeding in this matter.

- 9. The Applicant and the Department each certify that they have read, understand, and agree with the entire Stipulated Agreement including the draft Final Order Incorporating Stipulated Agreement, have had a reasonable opportunity to request changes to the Stipulated Agreement, and have signed the Stipulated Agreement of their own free will and accord.
- 10. The Applicant and the Department understand and agree that this Stipulated Agreement and all documents incorporated by reference set forth the entire agreement entered into among the Applicant and the Department.
- 11. The Applicant and the Department understand and agree that this Stipulated Agreement, including timely completion of each of the events described in Paragraphs 1 through 6, and the Final Order Incorporating Stipulated Agreement issued pursuant to this Stipulated Agreement, constitute the complete and final resolution of the protest.
- 12. The Applicant and the Department agree that, upon the Department's timely issuance of the final orders as described in Paragraph 6, the Applicant waives any and all right to petition for judicial review of this Stipulated Agreement, and waives any and all right to request reconsideration, petition for judicial review, or appeal the Final Order Incorporating Stipulated Agreement. This provision does not prevent Applicant from participating in any proceeding initiated through a third-party challenge to the Final Order Incorporating Stipulated Agreement.
- 13. The Applicant and the Department represent, warrant, and agree that the person who executes this Stipulated Agreement on its behalf has the full right and authority to do so.
- 14. This Stipulated Agreement may be signed in counterparts.

IT IS SO AGREED.

On behalf of Travis L, and Kelly R. Singhose

Steven L. Shropshire

Application:

G-17753

Permit:

G-17486

Basin:

12 - Malheur Lake / Watermaster District 10

Date of Priority:

January 13, 2014.

Source of Water:

Well 2 in Sage Hen Creek Basin

Purpose or Use:

irrigation of 309.8 acres

Maximum Rate:

3.87 cubic feet per second (cfs)

This Extension of Time request is being processed in accordance with Oregon Revised Statute 537.630 and 539.010(5), and Oregon Administrative Rule Chapter 690, Division 315.

Appeal Rights

This final order is subject to judicial review by the Court of Appeals under ORS 183.482. Any petition for judicial review must be filed within the 60-day time period specified by ORS 183.482(1). Pursuant to ORS 536.075 and OAR 137-003-0675, you may petition for judicial review or petition the Director for reconsideration of this order. A petition for reconsideration may be granted or denied by the Director, and if no action is taken within 60 days following the date the petition was filed, the petition shall be deemed denied.

Application History

Permit G-17486 was issued by the Department on July 28, 2015. The permit specified complete application of water to beneficial use by August 28, 2020. On February 11, 2021, Travis L. and Kelly R. Singhose (Singhose) submitted an Application for Extension of Time for Permit G-17486. In accordance with OAR 690-315-0050(2), on June 15, 2021, the Department issued a Proposed Final Order proposing to extend the time to fully apply water to beneficial use to October 1, 2023. The protest period closed July 30, 2021, in accordance with OAR 690-315-0060(1). On July 30, 2021, Singhose submitted a timely protest to the proposed final order. On March 22, 2023, the Department referred the proposed order and protest to the Office of Administrative Hearings for a contested case hearing. The matter was assigned case number 2023-OWRD-00127.

Final Order: Permit G-17486

Page 1 of 4

FINDINGS OF FACT

- 1. On [[DATE OF STIPULATED AGREEMENT]], the Department and Singhose entered into a Stipulated Agreement. The Stipulated Agreement is attached hereto and incorporated by reference.
- 2. In accordance with the Stipulated Agreement, on the date of this Final Order Incorporating Stipulated Agreement, Singhose withdrew its protest of the June 15, 2021 Proposed Final Order and the Department approved Singhose's [[DATE OF PERMIT AMENDMENT APPLICATION]] application to amend Permit G-17486 to, among other things, add wells HARN 52225/52882 (Robey Well 1), HARN 52853 (Well C), and HARN 52863 (Well D) as additional points of appropriation. Because the Department has approved Singhose's application to amend Permit G-17486, the "permit amendment condition" included in the June 15, 2011 Proposed Final Order is no longer necessary.
- 3. Except as expressly stated herein, the Department adopts and incorporates by reference the findings in the June 15, 2021 Proposed Final Order.
- 4. Findings of Fact 9 and 13 of the June 15, 2021 Proposed Final Order are modified to replace all references to "Robey Well 2" with "Robey Well 1." The February 11, 2021 Application for Extension of Time for Permit G-17486 shows that well HARN 52225/52882 is "Robey Well 1," and that "Robey Well 2" has not yet been drilled.
- At the time of issuance of the June 15, 2021 Proposed Final Order, the Department found that it was reasonable to extend the deadline for applying water to full beneficial use within the terms and conditions of the Permit G-17486 to October 1, 2023, subject to certain limitations and conditions. To compensate for the time that has passed during the protest/contested case hearing process, the Department now finds that it is reasonable to extend the deadline for applying water to full beneficial use within the terms and conditions of the Permit G-17486 to October 1, 2026.

LIMITATIONS AND CONDITIONS

At time of issuance of the Proposed Final Order the Department concluded that, based on the factors demonstrated by the applicant, any comments received, and information within the file, the permit may be extended subject to the limitations and conditions in the Proposed Final Order. Because the Department has approved Singhose's [[DATE]] application to amend Permit G-17486, the "permit amendment condition" included in the Proposed Final Order is no longer necessary, and the "meter installation" condition should be modified to require installation of meters in all wells included in the permit amendment application

Final Order: Permit G-17486

1. Meter Installation

The permit holder shall install the required meters within 6 months from the date of issuance of this Final Order approving this extension of time, on all wells identified for use in the Final Order approving permit amendment application [[APPLICATION NUMBER]], being [[INSERT LIST OF ALL WELLS AUTHORIZED BY PERMIT AMENDMENT]]. The permit holder shall submit evidence of installation that identifies the type of meter installed, the date the meter was installed, the well log identification, and the Well ID tag information for each well.

If the required evidence of installation is not submitted by <6 MONTHS FROM DATE OF FO>, the extension of time will be terminated.

3. Static Water Level Measurements

The permit holder shall make the required March static water level measurements for all wells utilized under this permit by no later than March 31, YEAR, and shall submit the measurements within 30 days from when the measurement is taken.

If the required March static water level measurements are not made by no later than March 31, [[YEAR]], and submitted within 30 days from when the measurement is taken, the extension of time will be terminated.

4. <u>Development Limitation</u>

The use of water under this permit shall be limited to no more than 1.63 cubic feet per second for irrigation of 130.2 acres. This represents the 130.2 acres developed at the authorized place of use under Permit G-17486 at one-eightieth of one cubic foot per second for each acre irrigated.

CONCLUSION OF LAW

The applicant has demonstrated good cause for the permit extension pursuant to ORS 537.630, 539.010(5) and OAR 690-315-0040(2).

ORDER

The extension of time for Application G-17753, Permit G-17486, therefore, is approved subject to the conditions contained herein. The deadline for applying water to full beneficial use within the terms and conditions of the permit is extended from August 28, 2020, to October 1, 2026.

Final Order: Permit G-17486 Page 3 of 4

Permit Amendment T-14579 Conditions:

The quantity of water diverted at the new points of appropriation, (ROBEY WELL 1 (HARN 52225/52882), WELL C (HARN 52853), and WELL D (HARN 52863)) shall not exceed the quantity of water lawfully available at the original point of appropriation, (ROBEY WELL 2).

Water use measurement conditions:

- a. Before water use may begin under this order, the water user shall install a totalizing flow meter, or, with prior approval of the Director, another suitable measuring device, at each point of appropriation (new and existing).
- b. The water user shall maintain the meters or measuring devices in good working order.
- c. The water user shall allow the Watermaster access to the meters or measuring devices; provided however, where the meters or measuring devices are located within a private structure, the Watermaster shall request access upon reasonable notice.

Water shall be acquired from the same aquifer as the original point of appropriation.

The former place of use shall no longer be irrigated as part of this permit.

Extension of Time Limitations and Conditions:

LIMITATIONS AND CONDITIONS

At time of issuance of the Proposed Final Order the Department concluded that, based on the factors demonstrated by the applicant, any comments received, and information within the file, the permit may be extended subject to the limitations and conditions in the Proposed Final Order. Because the Department has approved Singhose's December 18, 2024, application to amend Permit G-17486, the "permit amendment condition" included in the Proposed Final Order is no longer necessary, and the "meter installation" condition should be modified to require installation of meters in all wells included in the permit amendment application.

Meter Installation

The permit holder shall install the required meters within 6 months from the date of issuance of this Final Order approving this extension of time, on all wells identified for use in the Final Order approving Permit Amendment Application T-14579 that have been constructed, being HARN 52225/52882 (Robey Well 1), HARN 52853 (Well C), and HARN 52863 (Well D). The permit holder shall submit evidence of installation that identifies the type of meter installed, the date the meter was installed, the well log identification, and the Well ID tag information for each well.

If the required evidence of installation is not submitted by January 11, 2026, the extension of time will be terminated.

Static Water Level Measurements

The permit holder shall make the required March static water level measurements for all wells utilized under this permit by no later than March 31, 2026, and shall submit the measurements within 30 days from when the measurement is taken.

If the required static water level measurements are not made by no later than March 31, 2026, and submitted within 30 days from when the measurement is taken, the extension of time will be terminated.

Development Limitation

The use of water under this permit shall be limited to no more than 1.63 cubic feet per second for irrigation of 130.2 acres. This represents the 130.2 acres developed at the authorized place of use under Permit G-17486 at one-eightieth of one cubic foot per second for each acre irrigated.

Original Permit Conditions:

Measurement Devices, and Recording / Reporting of Annual Water Use Conditions

- A. Before water use may begin under this permit, the permittee shall install a totalizing flow meter at each point of appropriation. The permittee shall maintain the device in good working order.
- B. The permittee shall allow the watermaster access to the meter or measuring device; provided however, where the meter or measuring device is located within a private structure, the watermaster shall request access upon reasonable notice.
- C. The permittee shall keep a complete record of the volume of water diverted each month, and shall submit a report which includes water-use measurements to the Department annually, or more frequently as may be required by the Director. Further, the Director may require the permittee to report general water use information, including the place and nature of use of water under the permit.
- D. The Director may provide an opportunity for the permittee to submit alternative measuring and reporting procedures for review and approval.

Static Water Level Conditions

The Department requires the water user to obtain, from a qualified individual (see below), and report annual static water-levels for each well on the permit. The static water level shall be measured in the month of March. Reports shall be submitted to the Department within 30 days of measurement.

The permittee shall report an initial March static water-level measurement once well construction is complete and annual measurements thereafter. Annual measurements are required whether or not the well is used. The first annual measurement will establish a reference level against which future measurements will be compared. However, the Director may establish the reference level based on an analysis of other water-level data. The Director

may require the user to obtain and report additional water levels each year if more data are needed to evaluate the aquifer system.

All measurements shall be made by a certified water rights examiner, registered professional geologist, registered professional engineer, licensed well constructor or pump installer licensed by the Construction Contractors Board. Measurements shall be submitted on forms provided by, or specified by, the Department. Measurements shall be made with equipment that is accurate to at least the standards specified in OAR 690-217-0045. The Department requires the individual performing the measurement to:

- A. Associate each measurement with an owner's well name or number and a Department well log ID; and
- B. Report water levels to at least the nearest tenth of a foot as depth-to-water below ground surface; and
- C. Specify the method of measurement; and
- D. Certify the accuracy of all measurements and calculations reported to the Department.

The Department may require the discontinuance of groundwater use, or reduce the rate or volume of withdrawal, from the well(s) if any of the following events occur:

- A. Annual water-level measurements reveal an average water-level decline of three or more feet per year for five consecutive years; or
- B. Annual water-level measurements reveal a water-level decline of 15 or more feet in fewer than five consecutive years; or
- C. Annual water-level measurements reveal a water-level decline of 25 or more feet; or
- D. Hydraulic interference leads to a decline of 25 or more feet in any neighboring well with senior priority.

The period of restricted use shall continue until the water level rises above the decline level which triggered the action or the Department determines, based on the permittee's and/or the Department's data and analysis, that no action is necessary because the aquifer in question can sustain the observed declines without adversely impacting the resource or causing substantial interference with senior water rights. The water user shall not allow excessive decline, as defined in Commission rules, to occur within the aquifer as a result of use under this permit. If more than one well is involved, the water user may submit an alternative measurement and reporting plan for review and approval by the Department.

Prior to using water from any well listed on this permit, the permittee shall ensure that the well has been assigned an OWRD Well Identification Number (Well ID tag), which shall be permanently attached to the well. The Well ID shall be used as a reference in any correspondence regarding the well, including any reports of water use, water level, or pump test data.

STANDARD CONDITIONS

Failure to comply with any of the provisions of this permit may result in action including, but not limited to, restrictions on the use, civil penalties, or cancellation of the permit.

If the number, location, source, or construction of any well deviates from that proposed in the permit application or required by permit conditions, this permit may be subject to cancellation, unless the Department authorizes the change in writing.

If substantial interference with surface water or a senior water right occurs due to withdrawal of water from any well listed on this permit, then use of water from the well(s) shall be discontinued or reduced and/or the schedule of withdrawal shall be regulated until or unless the Department approves or implements an alternative administrative action to mitigated the interference. The Department encourages junior and senior appropriators to jointly develop plans to mitigate interferences.

The well(s) shall be constructed and maintained in accordance with the General Standards for the Construction and Maintenance of Water Supply Wells in Oregon. The works shall be equipped with a usable access port adequate to determine water –level elevation in the well at all times.

If the riparian area is disturbed in the process of developing a point of appropriation, the permittee shall be responsible for restoration and enhancement of such riparian area in accordance with ODFW's Fish and Wildlife Habitat Mitigation Policy OAR 635-415. For purposes of mitigation, the ODFW Fish and Wildlife Habitat Mitigation Goals and Standard, OAR 635-415, shall be followed.

The use may be restricted if the quality of downstream waters decreases to the point that those waters no longer meet state or federal water quality standards due to reduced flows.

Where two or more water users agree among themselves as to the manner of rotation in the use of water and such agreement is placed in writing and filed by such water users with the Watermaster, and such rotation system does not infringe upon such prior rights of any water user not party to such rotation plan, the Watermaster shall distribute the water according to such agreement.

Prior to receiving a certificate of water right, the permit holder shall submit to the Water Resources Department the results of a pump test meeting the Department's standards for each point of appropriation (well), unless an exemption has been obtained in writing under OAR 690-217. The Director may require water-level or pump-test data every ten years thereafter.

This permit is for the beneficial use of water without waste. The water user is advised that new regulations may require the use of best practical technologies or conservation practices to achieve this end.

By law, the land use associated with this water use must be in compliance with statewide landuse goals and any local acknowledged land-use plan.

The original permit, issued on August 28, 2015, specified:

- The deadline to begin construction is August 28, 2020. This date cannot be extended.
- The deadline for complete application of the water is August 28, 2020. If the water is not completely applied before this date, the permittee may submit an application for extension of time, which may be approved based upon the merit of the application.

By Extension of Time Final Order dated July 11, 2025, the deadline for complete application of water was extended to on or before October 1, 2026.

Within one year after complete application of water, the permittee shall submit a claim of beneficial use, which includes a map and report, prepared by a Certified Water Right Examiner (CWRE).

Issued **JUL 1 4 2025**

Application for Extension of Time

In the Matter of the for Permit G-1748 the name of Travis	FINAL ORDER						
	Permit Information						
Application:	G-17753						
Permit:	G-17486						
Basin:	12 – Malheur Lake / Watermaster Distric	t 10					
Date of Priority:	January 13, 2014						
Source of Water:	Well 2 in Sage Hen Creek Basin						
Purpose or Use:	irrigation of 309.8 acres						
Maximum Rate: 3.87 cubic feet per second (cfs)							

This Extension of Time request is being processed in accordance with Oregon Revised Statute 537.630 and 539.010(5), and Oregon Administrative Rule Chapter 690, Division 315.

Appeal Rights

This final order is subject to judicial review by the Court of Appeals under ORS 183.482. Any petition for judicial review must be filed within the 60-day time period specified by ORS 183.482(1). Pursuant to ORS 536.075 and OAR 137-003-0675, you may petition for judicial review or petition the Director for reconsideration of this order. A petition for reconsideration may be granted or denied by the Director, and if no action is taken within 60 days following the date the petition was filed, the petition shall be deemed denied.

Application History

Permit G-17486 was issued by the Department on July 28, 2015. The permit specified complete application of water to beneficial use by August 28, 2020. On February 11, 2021, Travis L. and Kelly R. Singhose (Singhose) submitted an Application for Extension of Time for Permit G-17486. In accordance with OAR 690-315-0050(2), on June 15, 2021, the Department issued a Proposed Final Order proposing to extend the time to fully apply water to beneficial use to October 1, 2023. The protest period closed July 30, 2021, in accordance with OAR 690-315-0060(1). On July 30, 2021, Singhose submitted a timely protest to the proposed final order. On March 22, 2023, the Department referred the proposed order and protest to the Office of Administrative Hearings for a contested case hearing. The matter was assigned case number 2023-OWRD-00127.

FINDINGS OF FACT

- 1. On August 7, 2024, the Department and Singhose entered into a Stipulated Agreement. The Stipulated Agreement is attached hereto and incorporated by reference.
- In accordance with the Stipulated Agreement, on the date of this Final Order Incorporating Stipulated Agreement, Singhose withdrew its protest of the June 15, 2021 Proposed Final Order and the Department approved Singhose's December 18, 2024, application to amend Permit G-17486 to, among other things, add wells HARN 52225/52882 (Robey Well 1), HARN 52853 (Well C), and HARN 52863 (Well D) as additional points of appropriation. Because the Department has approved Singhose's application to amend Permit G-17486, the "permit amendment condition" included in the June 15, 2021, Proposed Final Order is no longer necessary.
- 3. Except as expressly stated herein, the Department adopts and incorporates by reference the findings in the June 15, 2021, Proposed Final Order.
- 4. Findings of Fact 9 and 13 of the June 15, 2021, Proposed Final Order are modified to replace all references to "Robey Well 2" with "Robey Well 1." The February 11, 2021 Application for Extension of Time for Permit G-17486 shows that well HARN 52225/52882 is "Robey Well 1," and that "Robey Well 2" has not yet been drilled.
- 5. At the time of issuance of the June 15, 2021, Proposed Final Order, the Department found that it was reasonable to extend the deadline for applying water to full beneficial use within the terms and conditions of the Permit G-17486 to October 1, 2023, subject to certain limitations and conditions. To compensate for the time that has passed during the protest/contested case hearing process, the Department now finds that it is reasonable to extend the deadline for applying water to full beneficial use within the terms and conditions of the Permit G-17486 to October 1, 2026.

LIMITATIONS AND CONDITIONS

At time of issuance of the Proposed Final Order the Department concluded that, based on the factors demonstrated by the applicant, any comments received, and information within the file, the permit may be extended subject to the limitations and conditions in the Proposed Final Order. Because the Department has approved Singhose's December 18, 2024, application to amend Permit G-17486, the "permit amendment condition" included in the Proposed Final Order is no longer necessary, and the "meter installation" condition should be modified to require installation of meters in all wells included in the permit amendment application.

1. Meter Installation

The permit holder shall install the required meters within 6 months from the date of issuance of this Final Order approving this extension of time, on all wells identified for use in the Final Order approving permit amendment application T-14579 that have been constructed, being HARN 52225/52882 (Robey Well 1), HARN 52853 (Well C), and

Final Order: Permit G-17486 Page 2 of 3

HARN 52863 (Well D). The permit holder shall submit evidence of installation that identifies the type of meter installed, the date the meter was installed, the well log identification, and the Well ID tag information for each well. If the required evidence of installation is not submitted by January 11, 2026, the extension of time will be terminated.

3. Static Water Level Measurements

The permit holder shall make the required March static water level measurements for all wells utilized under this permit by no later than March 31, 2026, and shall submit the measurements within 30 days from when the measurement is taken.

If the required March static water level measurements are not made by no later than

If the required March static water level measurements are not made by no later than March 31, 2026, and submitted within 30 days from when the measurement is taken, the extension of time will be terminated.

4. Development Limitation

The use of water under this permit shall be limited to no more than 1.63 cubic feet per second for irrigation of 130.2 acres. This represents the 130.2 acres developed at the authorized place of use under Permit G-17486 at one-eightieth of one cubic foot per second for each acre irrigated.

CONCLUSION OF LAW

The applicant has demonstrated good cause for the permit extension pursuant to ORS 537.630, 539.010(5) and OAR 690-315-0040(2).

ORDER

The extension of time for Application G-17753, Permit G-17486, therefore, is approved subject to the conditions contained herein. The deadline for applying water to full beneficial use within the terms and conditions of the permit is extended from August 28, 2020, to October 1, 2026.

PUBLIC NOTICE

Notice of Permit Amendment T-14579

T-14579 filed Kelly Singhose and Travis Singhose, PO Box 816, Burns, OR 97720, propose a point of appropriation and place of use change under Permit G-17486. The permit allows the use of 3.87 cubic feet per second from a well in Sec.15, T25S, R31E, WM for irrigation in Sec. 15, T25S, R31E, WM. The applicant proposes to move the point of appropriation in Sec. 15, T25S, R31E, WM, and to change the place of use to Sec. 10, T25S, R31E, WM. The Water Resources Department has concluded that the proposed permit amendment appears to be consistent with the requirements of ORS 537.211. The last date of newspaper publication is 07/02/2025.

Groundwater Transfer Review Summary Form

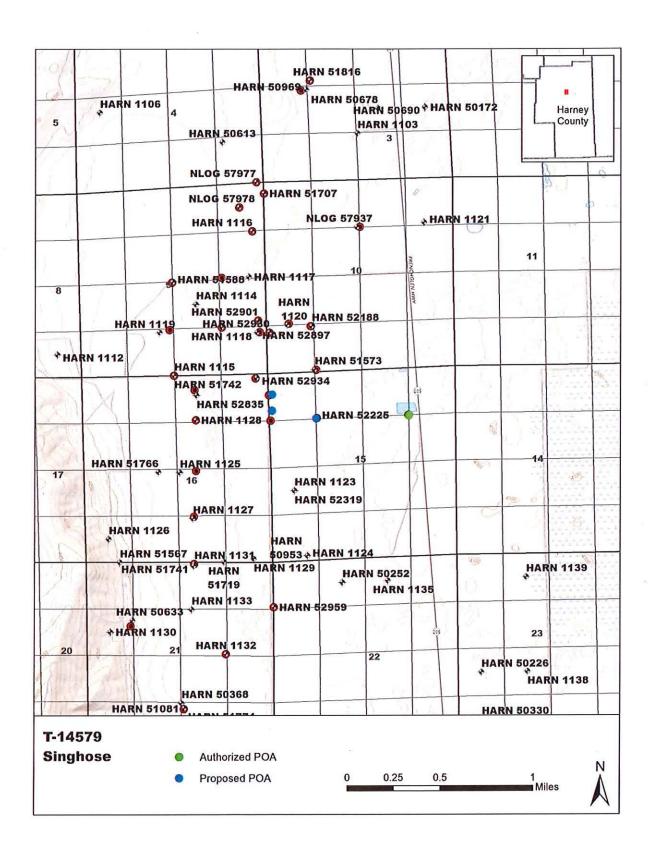

Transfer/PA # T- <u>14579</u>
GW Reviewer <u>Darrick E. Boschmann</u> Date Review Completed: <u>3/31/2025</u>
Summary of Same Source Review:
☐ The proposed change in point of appropriation is not within the same aquifer as per OAR 690-380-2110(2).
Summary of Water Level Decline Condition Review:
\square Water levels at the original point(s) of appropriation have exceeded the allowed decline threshold defined by conditions in the originating water right.
Summary of Injury Review:
☐ The proposed transfer will result in another, existing water right not receiving previously available water to which it is legally entitled or result in significant interference with a surface water source as per 690-380-0100(3).
Summary of GW-SW Transfer Similarity Review:
☐ The proposed SW-GW transfer doesn't meet the definition of "similarly" as per OAR 690-380-2130.
This is only a summary. Documentation is attached and should be read thoroughly to understand the basis for determinations.

construction	on is complete and annual measurements thereafter.
	For each POA identify the reference level, most recent spring-high water level, and applicable permit decline condition has been exceeded:
Authori	ized well has not been drilled.
. * .	more than one source developed under the right (e.g., basalt and alluvium)? No Comments:
, , ,	estimate the portion of the right supplied by each of the sources and describe any that will need to be placed on the proposed change (rate, duty, etc.):
in interfere	s proposed change, at its maximum allowed rate of use, likely result in an increasence with another ground water right? No Comments:
	posed wells are located up to approximately 4,000 feet west of the currently well. This will result in an incremental increase in interference with wells to the

	b) If yes, would this proposed change, at its maximum allowed rate of use, likely result in another groundwater right not receiving the water to which it is legally entitled? Yes No If yes, explain:					
	Any increase in interference with existing wells will not meet the standard for substantial or undue interference given the thickness of the aquifer system in the Harney Basin. Additionally, the lands and existing wells proximal to the proposed POA are under the same ownership as the applicant.					
6.	a) Will this proposed change, at its maximum allowed rate of use, likely result in an increase in interference with another surface water source? ☐ Yes ☐ No Comments:					
	There are no perennial surface water sources in the vicinity of the authorized or proposed wells.					
	b) If yes, at its maximum allowed rate of use, what is the expected change in degree of interference with any surface water sources resulting from the proposed change? Stream:					
	Stream:					
7.	For SW-GW transfers, will the proposed change in point of diversion affect the surface water source similarly (as per OAR 690-380-2130) to the authorized point of diversion specified in the water use subject to transfer? Yes No Comments:					
8.	What conditions or other changes in the application are necessary to address any potential issues identified above: <u>none</u> .					
9.	Any additional comments: none.					

Watermaster Review Form: Water Right Transfer

Review Due Date:

Oregon Water Resources Department 725 Summer St NE, Suite A Salem, Oregon 97301-1266 (503) 986-0900 www.oregon.gov/OWRD

Transfer Application: T-14579

Applic	ant Name: Travis L. Singhose & Kelly R. Singhose
Propos	sed Changes: POU POD POA USE OTHER
Reviev	ver(s): Dally Swindlehurst Date of Review: 12/24/2024
1.	Do you have <u>evidence</u> that the right has not been used in the last 5 years and that the presumption of forfeiture would not likely be rebuttable? Yes No If "Yes", attach evidence (e.g. dated aerial photo showing pavement or building on the land for >5 yrs.)
2.	Is there a history of regulation on the source that serves this (or these) right(s) that has involved the transferred right(s) and downstream water rights? Yes No Generally characterize the frequency of any regulation or explain why regulation has not occurred:
3.	Have headgate notices been issued for the source that serves the transferred right(s)? Yes No Records not available.
4.	In your estimation, after the proposed change, would distribution of water for the right(s) result in regulation of other water rights that would not have occurred if use under the original right(s) was/were maximized? Yes No If "Yes", explain:
5.	In your estimation, if the proposed change is approved, are there upstream water rights that would be affected? Yes No If "Yes", describe how the rights would be affected and list the rights most affected:

Wa	atermaster Review Form Transfer	Application
6.	Check here if it appears that downstream water rights benefit from return flows resulting from current use of the transferred right(s)? If you check the box, generally characterize the locations the return flows likely occur and list the water rights that benefit most:	
7.	N/A For POD changes and instream transfers, check here if there are channel losses between the old and new PODs or within the proposed instream reach? If you check the box, describe and, if posestimate the losses:	sible,
8.	N/A For instream transfers that propose protection of a reach beyond the mouth of the source stream N/A Would the quantity be measureable into the receiving stream consistent with OAR 690-077-0015(8)? Yes No	m:
9.	For POU changes: N/A Is it likely the original place of use would continue to receive water	er
10.	from the same source? Yes No If "Yes", explain: D. For POU or USE changes: N/A In your best judgment, would use of the existing right at "face value," result in the diversion of more water than can be used beneficially and without was Yes No If "Yes", explain:	full te?
11.	 a. Has the applicant made changes (absent a transfer) to convert to micro-irrigation within the place of use boundary of the water right proposed for transfer, and previously demonstrate Department through monitoring and site inspections by the Watermaster that the proposed will not result in injury or enlargement? Yes No If "Yes", explain: 	d to the

b.	as a temporary transfer of this nature been previously filed and approved on the same lands r portions thereof) as those lands involved in this transfer?
	Yes No If "Yes", answer the following:
	i. Were there any problems with more acres being irrigated (or wetted) than were authorized under the temporary transfer? Yes No If "Yes", explain
	ii. Did the designated areas that were to remain dry (or not wetted) under the temporary transfer actually remain dry? Yes No If "No", explain:
	iii. Did the applicant comply with and meet all of the conditions of the temporary transfer? Yes No If "No", explain:
	iv. Do you have any other observations regarding the temporary transfer? Yes No If "Yes", describe:
	v. Did the applicant demonstrate to the Department through monitoring and site inspections by the Watermaster that neither injury nor enlargement occurred as a result of the temporary transfer? Yes No If "No", explain:
	 To the best of your knowledge, if this transfer is approved, does it appear that: i. "Injury" will occur to other water rights that share the same source? Yes ✓ No If "Yes", explain:
	ii. "Enlargement" of the water right being transferred will occur? Yes No If "Yes", explain:

Watermaster Review Form	Transfer Application				
12. Are there other issues not identified through the above questions that should be consider determining whether the change "can be effected without injury to other rights"?	ed in				
Yes Ves No If "Yes", explain:					
13. What alternatives may be available for addressing any issues identified above:					
14. Do conditions need to be included in the transfer order to avoid enlargement of the right other rights? No Yes, as checked and provided below:	or injury to				
For POU changes that involve micro-irrigation, provide the monitoring and reporting necessary to prevent injury/enlargement:	; conditions				
A Headgate should be required prior to diverting water.					
Measurement Devices for POD or POA: (if this condition is selected, also fill in the to sections of Page 4)	p				
a. Before water use may begin under this order, the water user shall install a totalizing or, with prior approval of the Director, another suitable measuring device, of at each diversion/appropriation (new and existing) or at each new point of diversion/appropriation with the exception that water rights issued to the Bureau of Reclamation or an indistrict (or similar entity) are not subject to this condition.	ch point of priation prigation				
 b. The water user shall maintain the meters or measuring devices in good working o c. The water user shall allow the Watermaster access to the meters or measuring de however, where the meters or measuring devices are located within a private structure Watermaster shall request access upon reasonable notice. 	vices; provided				
Reservoir water use measurement: (if this condition is selected, also fill in the top see of Page 4)	ctions				
a. Before water use may begin under this order, the water user shall install <u>staff gag</u> or, with prior approval of the Director, other suitable measuring devices, that measure range and stage between empty and full in each reservoir. Staff gages shall be United S Geological Survey style.	the entire				
b. Before water use may begin under this order, if the reservoir is located in channel, weirs or other suitable measuring devices must be installed upstream and downstream of the reservoir, and, an adjustable outlet valve must be installed. The water user shall maintain such devices in good working order. A written waiver may be obtained, if in the judgment of the Director, the installation of weirs other suitable measuring devices, or the adjustable outlet valve, will provide no public benefit.					
* The following alternative device(s) should be substituted for the bold, underlined device selected condition:	e in the above				
Weir Submerged Orifice					
Parshall Flume Flow Restrictor

	Revised 7/1/2021 Permit Amendment Application – Page 1 of 9 TACS

DEC 18 2024

Your permit amendment application <u>will be returned</u> if any of the map requirements listed below are not met.

Please be sure that the map you submit includes all the items listed below and meets the requirements of OAR 690-380-3100, however, the map does <u>not</u> have to be prepared by a Certified Water Right Examiner. Check all boxes that apply.

	⊠ N/A	If more than three permits are involved, separate maps for each permit.
\boxtimes		Permanent quality printed with dark ink on good quality paper.
\boxtimes		The size of the map can be $8\% \times 11$ inches, $8\% \times 14$ inches, 11×17 inches, or up to 30×30 inches. For 30×30 inch maps, one extra copy is required.
\boxtimes		A north arrow, a legend, and scale.
\boxtimes		The scale of the map must be: 1 inch = 400 feet, 1 inch = $1,320$ feet, the scale of the county assessor map if the scale is not smaller than 1 inch = $1,320$ feet, or a scale that has been preapproved by the Department.
\boxtimes		Township, Range, Section, ¼ ¼, DLC, Government Lot, and other recognized public land survey lines.
\boxtimes		Tax lot boundaries (property lines) are required. Tax lot numbers are recommended.
\boxtimes		Major physical features including rivers and creeks showing direction of flow, lakes and reservoirs, roads, and railroads.
\boxtimes		Major water delivery system features from the point(s) of diversion/appropriation such as main pipelines, canals, and ditches.
		Existing place of use that includes separate hachuring for each water use permit, priority date, and use including number of acres in each quarter-quarter section, government lot, or in each quarter-quarter section as projected within government lots, donation land claims, or other recognized public land survey subdivisions. If less than the entirety of the permit is being changed, a separate hachuring is needed for the portion of the permit left unchanged.
	□ N/A	If you are proposing a change in place of use, show the proposed place of use with hachuring that includes separate hachuring for each permit, priority date, and use including number of acres in each quarter-quarter section, government lot, or in each quarter-quarter section as projected within government lots, donation land claims, or other recognized public land survey subdivisions.
\boxtimes		Existing point(s) of diversion or well(s) with distance and bearing or coordinates from a recognized survey corner. This information can be found in your water use permit.
	□ N/A	If you are proposing a change in point(s) of diversion or well(s), show the proposed location and label it clearly with distance and bearing or coordinates. If GPS coordinates are used, latitude-longitude coordinates may be expressed as either degrees-minutes-seconds with at least one digit after the decimal (example $-42^{\circ}32'15.5''$) or degrees-decimal with five or more digits after the decimal (example -42.53764°).

	FEE WORKSHEET for PERMIT AMENDMENT					
1	Base Fee (includes one type of change to one permit for up to 1 cfs)	1	\$1,360			
	Types of change proposed:					
	☐ Place of Use ☐ Point of Diversion/Appropriation					
	Number of above boxes checked =(2a)					
	Subtract 1 from the number in line 2a = (2b) If only one change, this will be 0					
2	Multiply line 2b by \$1090 and enter » » » » » » » » » » » » » » » » » » »	2				
	Number of permits included in Permit Amendment(3a)					
	Subtract 1 from the number in 3a:(3b) If only one permit this will be 0					
3	Multiply line 3b by \$610 and enter » » » » » » » » » » » » » » » » » » »	3				
	Do you propose to add or change a well, or change from a surface water POD to a well?					
	No: enter 0 Yes: enter \$480 for the 1 st well to be added or changed (4a)					
	Do you propose to add or change additional wells?					
	No: enter 0 Yes: multiply the number of additional wells by \$410 (4b)					
4	Add line 4a to line 4b and enter » » » » » » » » » » » » » » » » » » »	4				
	Do you propose to change the place of use?		El C			
	No: enter 0 on line 5					
	Yes: enter the cfs for the portions of the permits to be amended (see below*):(5a)					
	Subtract 1.0 from the number in 5a above:(5b)					
	If 5b is 0, enter 0 on line 5 » » » » » » » » » » » » » » » »					
_	If 5b is greater than 0, round up to the nearest whole number:(5c) and multiply 5c	_				
5	by \$350, then enter on line 5 » » » » » » » » » » » » » » » » » »	5 6				
ь	Add entries on lines 1 through 5 above » » » » » » » » » Subtotal:	0				
	Is this permit amendment: necessary to complete a project funded by the Oregon Watershed Enhancement Board					
	(OWEB) under ORS 541.932?					
	endorsed in writing by ODFW as a change that will result in a net benefit to fish and	800				
	wildlife habitat?					
	If one or more boxes is checked, multiply line 6 by 0.5 and enter on line 7					
7	If no box is applicable, enter 0 on line 7» » » » » » » » » » » » » »	7				
8	Subtract line 7 from line 6 » » » » » » » » » » » » » » Permit Amendment Fee:	8	WAIVED			

*Example for Line 5a calculation to transfer 45.0 acres of Primary Permit S-12345 (total 1.25 cfs for 100 acres) and 45.0 acres of Supplemental Permit S-87654 (1/80 cfs per acre) on the same land:

- 1. For irrigation calculate cfs for each permit involved as follows:
 - a. Divide total authorized cfs by total acres in the permit (for S-12345, 1.25 cfs \div 100 ac); then multiply by the number of acres to be changed to get the application cfs (x 45 ac= 0.56 cfs).
 - b. If the water right permit does not list total cfs, but identifies the allowable use as 1/40 or 1/80 of a cfs per acre; multiply number of acres proposed for change by either 0.025 (1/40) or 0.0125 (1/80). (For S-87654, 45.0 ac x 0.0125 cfs/ac = 0.56 cfs)
- 2. Add cfs for the portions of permits on all the land included in the application; however do not count cfs for supplemental permits on acreage for which you have already calculated the cfs fee for the primary permit on the same land. The fee should be assessed only once for each "on the ground" acre included in the application. (In this example, blank 5a would be only 0.56 cfs, since both permits serve the same 45.0 acres. Blank 5b would be 0 and Line 5 would then also become 0).

Agent Information – The agent is authorized to represent the applicant in all matters relating to this application.

AGENT/BUSINESS NAME John A. Short / Water R	ight Services, LLC		PHONE NO. 541-389-2837	ADDITIONAL CONTACT NO.	
ADDRESS				FAX NO.	
PO Box 1830					
СПУ	STATE	ZIP	E-MAIL		
Bend	OR	97709	johnshort@usa.com & brycewrs@gmail.com		
BY PROVIDING AN E-MAIL ADDRESS, CONSENT IS GIVEN TO RECEIVE ALL CORRESPONDENCE FROM THE DEPARTMENT					
ELECTRONICALLY. COPIES OF THE FINAL ORDER DOCUMENTS WILL ALSO BE MAILED.					

Explain in your own words what you propose to accomplish with this permit amendment; and why: This application is being submitted in conjunction with the Stipulated Agreement to Withdraw Protest, OAH Ref. No. 2023-OWRD-00127, Agency Case No. G-17753 (copy attached). Pursuant that Stipulated Agreement, the applicant has agreed to reduce the amount of acreage under Permit G-17486 from 309.8 acres to 130.2 acres and to reduce the authorized rate from 3.87 cfs to 1.63 cfs. Additionally, the applicant seeks to conform the described points of appropriation in the permit to reflect the location of the wells supplying the authorized use. The permit amendment fee is waived per Stipulation No. 2.

If you need additional space, continue on a separate piece of paper and attach to the application as "Attachment 1".

Check this box if this project is fully or partially funded by the American Recovery and Reinvestment Act. (Federa
stimulus dollars)

Is the applicant the permit holder of record? X Yes No

If NO, include either:

- A completed assignment form (with required statutory assignment fee), assigning all or a portion of the permit to the applicant(s), OR
- An affidavit of consent from the permit holder(s) of record that gives permission for the applicant to amend the permit.

Has the Completion ("C") Date of the permit(s) in this application expired?
☐ Yes ☐ No

If YES, this application will not be accepted by the Department.

If NO, what are the completion dates of the permit(s)? See explanation above and the Stipulated Agreement.

- If the permit completion date expires while the Permit Amendment Application is pending, the Department will
 not approve the Permit Amendment Application until an Extension of Time Application is approved for the permit.
- You may consider using the Reimbursement Authority process to expedite the processing of this Permit Amendment Application if the completion date of the permit expires within 6 months of the date of filing this application.

By my signature below, I confirm that I understand:

Prior to Department approval of the permit amendment, I may be required to submit payment to the Department
for publication of a notice in a newspaper with general circulation in the area where the permit is located, once
per week for two consecutive weeks. If more than one qualifying newspaper is available, I suggest publishing the
notice in the following newspaper: <u>Burns Times Herald</u>

Permit Amendment Application – Page 8 of 9

14579 -

Permit # 17486

	Are there other water rights certificates, water use permits or ground water registrations associated with the "from" or "to" lands? \square Yes \boxtimes No
	If YES, list the other certificate, permit, or ground water registration numbers:
	If the permit(s) are for irrigation or supplemental irrigation use, other water rights existing on the same land for irrigation that are subject to transfer must either change concurrently or be cancelled. Any change to a water right certificate or ground water registration must be filed separately in a water right transfer application or ground water registration modification application, respectively.
	For a change in point(s) of appropriation (well(s)) or additional point(s) of appropriation:
	Well log(s) are attached for each authorized and proposed well(s) that are clearly labeled and associated with the corresponding well(s) in Table 1 above and on the accompanying application map. (Tip: You may search for well logs on the Department's web page at: http://apps.wrd.state.or.us/apps/gw/well_log/Default.aspx)
	AND/OR
	Describe the construction of the authorized and proposed well(s) in Table 3 for any wells that do not have a well log. For proposed wells not yet constructed or built, provide "a best estimate" for each requested information element in the table. The Department recommends you consult a licensed well driller, geologist, or certified water right examiner to assist with assembling the information necessary to complete Table 3.
Т	Table 3. Construction of Point(s) of Appropriation Any well(s) in this listing must be clearly tied to corresponding well(s) described in Table 1 and shown on the accompanying application map. Failure to provide the information will delay the processing of your
	the describation of the debut distribution of the state o

Any well(s) in this listing must be clearly tied to corresponding well(s) described in Table 1 and shown or the accompanying application map. Failure to provide the information will delay the processing of your transfer application until it is received. The information is necessary for the department to assess whether the proposed well(s) will access the same source aquifer as the authorized point(s) of appropriation (POA). The Department is prohibited by law from approving POA changes that do not access the same source aquifer.

Proposed or Authorized POA Name or Number	Is well already built? Comments/Remarks

This well appeared to be constructed properly without a well log. Surface seal was cement and in good condition, actually tried to pull easing but could not. Cleaned well out and installed 12 inch liner to the surface with a shale trap at 35 feet.

Re:

Permit Amendment -- G-17486
Travis and Kelly Singhose

Dear Will and Dwight:

Enclosed please find the permit amendment application prepared by Water Rights Services, LLC on behalf of Travis and Kelly Singhose. This is being submitted pursuant to the Stipulated Agreement to Withdraw Protest dated August 7, 2024. Per that agreement, 1) the application does not require a filing fee, and 2) OWRD will process the application on a priority basis.

Please let me know if you have any questions or need any further information in order to process this application.

Thank you again for your efforts to resolve this matter.

Sincerely,

JORDAN RAMIS PC

Steven L. Shropshire

December 19, 2024

Kelly R. and Travis L. Singhose PO Box 816 Burns, OR

Reference: Application T-14579

On December 18, 2024, OWRD received your water right Permit Amendment Application.

By copy of this letter, we are asking the Watermaster for a report regarding the potential for injury to existing water rights which may be caused by the requested change. A review form will also be sent to our groundwater staff to determine whether the proposed well accesses the same source of water as the original well.

This application <u>may</u> require publication of a notice for two consecutive weeks in a newspaper with general circulation in the area where the water right is located. If it is determined that newspaper notice will be required, the Department will prepare the notice and notify you of the cost. You will be responsible for submitting payment to the Department prior to publication of the notice.

Except as provided under ORS 540.510(3) for municipalities, you may not use water in the new place of use or from the new point of appropriation until a final order approving the application has been issued by the Department.

Refer to the following page for a chart showing the steps and expected timelines for the processing of your application.

If you have any questions, please contact the Transfer Section at (503) 986-0935.
