Groundwater Transfer Review Summary Form

Transfer/PA # T- 14422 RA

GW Reviewer Stacey Garrison/Travis Brown Date Review Completed: 5/20/2024

Summary of Same Source Review:

☐ The proposed change in point of appropriation is not within the same aquifer as per OAR 690-380-2110(2).

Summary of Injury Review:

☐ The proposed transfer will result in another, existing water right not receiving previously available water to which it is legally entitled or result in significant interference with a surface water source as per 690-380-0100(3).

Summary of GW-SW Transfer Similarity Review:

☐ The proposed SW-GW transfer doesn't meet the definition of "similarly" as per OAR 690-380-2130.

This is only a summary. Documentation is attached and should be read thoroughly to understand the basis for determinations.

The information provided in the application is insufficient to evaluate whether the proposed transfer may be approved because:

- ☐ The water well reports provided with the application do not correspond to the water rights affected by the transfer.
- ☐ The application does not include water well reports or a description of the well construction details sufficient to establish the ground water body developed or proposed to be developed.
- ☐ Other _____

-
1. Basic description of the changes proposed in this transfer: Applicant proposes to add one APOA, PROP 474 referred to as Well 16 by the applicant, to Certificate 27979. The authorized POA is LANE 16100, referred to as Well 8 by the applicant.
 2. Will the proposed POA develop the same aquifer (source) as the existing authorized POA?
☒ Yes ☐ No Comments: The authorized POA (LANE 16100) develops the unconfined and highly permeable coarse-grained Holocene alluvial deposits of the Middle Fork of the Willamette River, with shallow groundwater levels that approximate the stage of the adjacent reaches of the river. Based on the location and proposed construction, the proposed APOA (PROP 474) is anticipated to develop the same unconfined and highly permeable coarse-grained Holocene alluvial deposits.
 3. a) Is there more than one source developed under the right (e.g., basalt and alluvium)?
☐ Yes ☒ No _____
b) If yes, estimate the portion of the right supplied by each of the sources and describe any limitations that will need to be placed on the proposed change (rate, duty, etc.): N/A

- ☒ Yes ☐ No Comments: The closest groundwater user to the authorized POA Well 8 (LANE 16100) and the proposed APOA Well 16 (PROP 474) that is not owned by the applicant is LANE 16103 authorized under Claim GR 923 at an elevation of 467 ft amsl and located 1,431 ft northwest from the authorized POA (LANE 16100) and 1,095 ft north from the proposed APOA (PROP 474).

- ☐ Yes ☒ No If yes, explain: Given the efficient hydraulic connection with surface water, short distance to surface water, and unconfined conditions of the aquifer it is not anticipated that drawdown caused by pumping the proposed APOA (PROP 474) will result in another groundwater user not receiving the water to which it is legally entitled.

- ☐ Yes ☒ No Comments: The Middle Fork of the Willamette River is 523 ft south of the authorized POA (LANE 16100) and 604 ft south of the proposed APOA (PROP 474). There is no increased interference anticipated.

2. Is there a history of regulation on the source that serves this (or these) right(s) that has involved the transferred right(s) and downstream water rights? ☐ Yes ☒ No Generally characterize the frequency of any regulation or explain why regulation has not occurred:

Groundwater has not been regulated in this area.
3. Have headgate notices been issued for the source that serves the transferred right(s)?
☐ Yes ☒ No ☐ Records not available.

5. In your estimation, if the proposed change is approved, are there upstream water rights that would be affected? ☐ Yes ☒ No If "Yes", describe how the rights would be affected and list the rights most affected:

6. Check here ☐ if it appears that downstream water rights benefit from return flows resulting from the current use of the transferred right(s)? If you check the box, generally characterize the locations where the return flows likely occur and list the water rights that benefit most:

☒ N/A

7. For POD changes and instream transfers, check here if there are channel losses between the old and new PODs or within the proposed instream reach? If you check the box, describe and, if possible, estimate the losses:

Reference: Application T-14422

On March 7, 2024, the Department received your water right Permanent Transfer Application. The application was accompanied by \$3340.00. Receipt number 142528 is enclosed.

By copy of this letter, we are asking the Watermaster for a report regarding the potential for injury to existing water rights which may be caused by the requested change. A review form will also be sent to our groundwater staff to determine whether the proposed well accesses the same source of water as the original well.

This application may require publication of a notice for two consecutive weeks in a newspaper with general circulation in the area where the water right is located. If it is determined that newspaper notice will be required, the Department will prepare the notice and notify you of the cost. You will be responsible for submitting payment to the Department prior to publication of the notice.

Except as provided under ORS 540.510(3) for municipalities, you may not use water in the new place of use or from the new point of appropriation until a final order approving the transfer application has been issued by the Department. In order to avoid any possible forfeiture of the water right, you should continue to use the water as described by your existing water right.

If the land is sold before the application is approved, the buyer's consent to the application will be required unless a recorded deed or other legal document clearly established that the water right was not conveyed in the sale.

Refer to the following page for a chart showing the steps and expected timelines for the processing of your application.

If you have any questions, please contact the Transfer Section at (503) 986-0935.

FEE WORKSHEET for PERMANENT TRANSFER (except Substitution)

[illegible]

*Example for Line 5a calculation to transfer 45.0 acres of Primary Certificate 12345 (total 1.25 cfs for 100 acres) and 45.0 acres of Supplemental Certificate 87654 (1/80 cfs per acre) on the same land:

1. For irrigation calculate cfs for each water right involved as follows:
 - a. Divide total authorized cfs by total acres in the water right (*for C12345, 1.25 cfs ÷ 100 ac*); then multiply by the number of acres to be transferred to get the transfer cfs (*x 45 ac = 0.56 cfs*).
 - b. If the water right certificate does not list total cfs, but identifies the allowable use as 1/40 or 1/80 of a cfs per acre; multiply number of acres proposed for change by either 0.025 (1/40) or 0.0125 (1/80). (*For C87654, 45.0 ac x 0.0125 cfs/ac = 0.56 cfs*)
2. Add cfs for the portions of water rights on all the land included in the transfer; however **do not count cfs for supplemental rights on acreage for which you have already calculated the cfs fee for the primary right on the same land**. The fee should be assessed only once for each "on the ground" acre included in the transfer. (*In this example, blank 5a would be only 0.56 cfs, since both rights serve the same 45.0 acres. Blank 5b would be 0 and Line 5 would then also become 0*).

Explain in your own words what you propose to accomplish with this transfer application, and why:

The Applicant is requesting to add an additional point of appropriation, Well 16, to Certificate 27979.

The Applicant is also requesting a place of use transfer to ensure that the place of use description for this water right aligns with the Applicant's full legally authorized place of use. Although existing Certificate 27979 identifies specific lands within the authorized place of use for this water right, the Applicant is a municipality and is authorized to use this water right within the Applicant's entire municipal service area pursuant to ORS 540.510(3)(a). The place of use specified in Certificate 27979 does not include the Applicant's entire service area. Therefore, the Applicant is requesting that the place of use description for this water right be updated to accurately reflect the Applicant's full authorized place of use.

The Applicant requests that the authorized place of use in the transfer order and any superseding certificate be described as "within boundary of Springfield and adjacent territory."

The place of use specified in Certificate 27979 does not include the Applicant's entire service area. Therefore, the Applicant is requesting that the place of use description for this water right be updated to accurately reflect the Applicant's full authorized place of use, and be described as "within boundary of Springfield and adjacent territory."

For Place of Use or Character of Use Changes

Are there other water right certificates, water use permits or ground water registrations associated with the "from" or the "to" lands? ☐ Yes ☐ No **N/A – Certificate 27979 is for municipal use**

If YES, list the certificate, water use permit, or ground water registration numbers: _____.

 Pursuant to ORS 540.510, any "layered" water use such as an irrigation right that is supplemental to a primary right proposed for transfer must be included in the transfer or be cancelled. Any change to a ground water registration must be filed separately in a ground water registration modification application.

For Substitution (ground water supplemental irrigation will be substituted for surface water primary irrigation) **N/A**

Surface water primary Certificate # _____.

For a change in point(s) of appropriation (well(s)) or additional point(s) of appropriation:

- ☒ Well log(s) are attached for each authorized and proposed well(s) that are clearly labeled and associated with the corresponding well(s) in Table 1 above and on the accompanying application map. [See Well Log for Well 8 \(LANE 16100\) in Attachment E](#)

Tip: You may search for well logs on the Department's web page at:

http://apps.wrd.state.or.us/apps/gw/well_log/Default.aspx

AND/OR

- ☒ Describe the construction of the authorized and proposed well(s) in Table 3 for any wells that do not have a well log. For *proposed wells not yet constructed or built*, provide "a best estimate" for each requested information element in the table. The Department recommends you consult a licensed well driller, geologist, or certified water right examiner to assist with assembling the information necessary to complete Table 3.

Table 3. Construction of Point(s) of Appropriation

Any well(s) in this listing must be clearly tied to corresponding well(s) described in Table 1 and shown on the accompanying application map. Failure to provide the information will delay the processing of your transfer application until it is received. The information is necessary for the department to assess whether the proposed well(s) will access the same source aquifer as the authorized point(s) of appropriation (POA). The Department is prohibited by law from approving POA changes that do not access the same source aquifer.

Hello Kelly,

We are planning to submit a transfer for Springfield Utility Board to add an additional point of appropriation, and update the place of use for a municipal water right. I'm writing to request a map scale waiver for the place of use map in order to show the entire authorized place of use. The attached map uses a scale of 1 inch = 3,700 feet.

Please let me know if you have any questions, or need any other information.

Thank you,
Robyn
