BEFORE THE WATER RESOURCES DEPARTMENT
OF THE
STATE OF OREGON

In the Matter of Transfer Application) FINAL ORDER APPROVING A TEMPORARY
T-14410, Umatilla County) CHANGE IN PLACE OF USE

Authority

Oregon Revised Statute (ORS) 540.505 to 540.580 establish the process in which a water right holder may submit a request to temporarily transfer the place of use and, if necessary to convey the water to the temporary place of use, the point of diversion authorized under an existing water right.

Oregon Administrative Rule (OAR) Chapter 690, Division 380 implements the statutes and provides the Department's procedures and criteria for evaluating transfer applications.

Applicant

DAVID CORREA
31777 ANDREWS ROAD
ECHO, OR 97826

Findings of Fact

1. On February 29, 2024, David Correa filed an application to temporarily change the place of use under the Umatilla River Decree Vol. 3, Page 127 for a period of 4 years. The Department assigned the application number T-14410.
2. Notice of the application for transfer was published on March 12, 2024 pursuant to OAR 690-380-4000.
3. The portion of the first right to be temporarily transferred is as follows:

Decree: Water rights evidenced by the Umatilla River Decree, (Vol. 3, Page 239/Elmer Reeves) Vol. 3, Page 239/ Geo L. Ward) (Vol. 3, Page 239/ B.F. McCullough, J.A. Mendenhall) and Vol. 15, Page 432/ Frank Correa Sr.) the portions identified as in the name of Pioneer Irrigation Company

Use: IRRIGATION of 49.0 ACRES

Priority Date: JANUARY 9, 1900

This is a final order in other than a contested case. This order is subject to judicial review under ORS 183.484. Any petition for judicial review must be filed within the 60-day time period specified by ORS 183.484(2). Pursuant to ORS 536.075 and OAR 137-004-0080, you may petition for judicial review or petition the Director for reconsideration of this order. A petition for reconsideration may be granted or denied by the Director, and if no action is taken within 60 days following the date the petition was filed, the petition shall be deemed denied.

Limit/Duty: Subject to the provisions of the Umatilla River Decree Vol. 3, Page 127

7. The uses tabulated above in Volume 3, Pages 239 and 240, and Volume 15, Pages 432 of the Umatilla River Decree identified as the Pioneer Ditch delivery system, but do not describe the location of the point of diversion from the Umatilla River through the Westland Irrigation canal at G#2 (the Pioneer/Courtney headgate). Information is available indicating that the point of diversion on the Umatilla River is located as follows:

Twp	Rng	Mer	Sec	Q-Q	Survey Coordinates
3 N	29 E	WM	21	SW NE	W.I.D. DIVERSION - NORTH 76°45'56" E. 2913.19 FEET FROM THE W1/4 CORNER OF SECTION 21

8. Temporary Transfer Application T-14410 proposes to temporarily change the place of use of the right to:

IRRIGATION					
Twp	Rng	Mer	Sec	Q-Q	Acres
3 N	28 E	WM	12	NE SE	11.0

9. There are water right Permits S-55061, S-55192, S-55190, and S-54633 for primary irrigation that are located on portions of the "TO" lands described in Finding of Facts Nos. 3, and 6. During the term of the Temporary Transfer, water use under these permits will either be already shut off, not allocated any water this season, cannot supply enough water, have not been activated by mitigation, or no intended water to be used for these acres and thus shall not be exercised.

10. A portion of the authorized "FROM" lands have appurtenant supplemental water rights for irrigation described in water use Permit S-7400 and Certificate 31294.

11. Temporary Transfer Application T-14410 proposes to temporarily transfer a water right within the boundaries of Westland Irrigation District. The district was notified of the proposed temporary transfer and did not provide any comments.

Temporary Transfer Review Criteria

12. Water has been used within the last five years according to the terms and conditions of the rights. There is no evidence available that would demonstrate that the rights are subject to forfeiture under ORS 540.610.

13. A diversion structure and ditch sufficient to use the full amount of water allowed under the existing rights are present.

14. The proposed change would prevent the lands from which the water rights are removed during the period of the temporary transfer from receiving water under the transferred rights, as required by ORS 540.523(7).

15. The proposed change would not result in injury to other water rights. This finding is made through an abbreviated review recognizing that the transfer may be revoked under ORS

540.523(5) if the Department later finds that the transfer is causing injury to any existing water right.

Conclusions of Law

The temporary change in places of use proposed in Temporary Transfer Application T-14410 is consistent with the requirements of ORS 540.523 and OAR 690-380-8000.

Now, therefore, it is ORDERED:

1. The temporary change in places of use proposed in Temporary Transfer Application T-14410 is approved.
2. The former places of use **shall not** be irrigated as part of these water rights during the 2024, 2025, 2026, 2027 irrigation seasons.
3. The use shall revert to the authorized places of use at the end of the 2027 irrigation season.
4. The approval of this temporary transfer may be revoked or modified if the Department finds the change causes injury to any existing water right.
5. A subsequent application for permanent transfer of Umatilla River Decree at Vol. 3, Page 127 shall be subject to a full and complete review to determine consistency with the requirements of OAR Chapter 690, Division 380. Approval of this temporary transfer does not establish a precedent for approval of a subsequent application filed for a permanent transfer.
6. The use of water at the temporary places of use authorized by this transfer shall be in accordance with the terms and conditions of Umatilla River Decree at Vol. 3, Page 127.
7. The time during which water is used under this approved temporary transfer does not apply toward a finding of forfeiture under ORS 540.610.
8. Water use measurement conditions:
 - a. Before water use may begin under this order, the water user shall install a totalizing flow meter, or, with prior approval of the Director, another suitable measuring device, at each point of diversion (new and existing).
 - b. The water user shall maintain the meters or measuring devices in good working order.
 - c. The water user shall allow the Watermaster access to the meters or measuring devices; provided however, where the meters or measuring devices are located within a private structure, the Watermaster shall request access upon reasonable notice.

9. The use of the remaining water rights described by Umatilla River Decree at Vol. 3, Page 127 shall continue to be in accordance with the terms and conditions of said Decree.

Proposed Changes: POU POD POA USE OTHER

Reviewer(s): Greg Silbernagel

Date of Review: 05/31/2024

1. Do you have evidence that the right has not been used in the last 5 years and that the presumption of forfeiture would not likely be rebuttable? Yes No If "Yes", attach evidence (e.g. dated aerial photo showing pavement or building on the land for >5 yrs.)

2. Is there a history of regulation on the source that serves this (or these) right(s) that has involved the transferred right(s) and downstream water rights? Yes No Generally characterize the frequency of any regulation or explain why regulation has not occurred:

The Pioneer Irrigation District was notified in 2023 that they need to install a totalizing measurement on the Pioneer Ditch. We have been flexible for 2024 to allow them time to get one installed. We anticipate regulation in 2025 if a measurement device is not installed. Use of water under this transfer without a Watermaster Approved Measurement Device will result in regulation.

3. Have headgate notices been issued for the source that serves the transferred right(s)?

Yes No Records not available.

4. In your estimation, after the proposed change, would distribution of water for the right(s) result in regulation of other water rights that would not have occurred if use under the original right(s) was/were maximized? Yes No If "Yes", explain:

5. In your estimation, if the proposed change is approved, are there upstream water rights that would be affected? Yes No If "Yes", describe how the rights would be affected and list the rights most affected:

6. Check here if it appears that downstream water rights benefit from return flows resulting from the current use of the transferred right(s)? If you check the box, generally characterize the locations where the return flows likely occur and list the water rights that benefit most:

N/A

7. For POD changes and instream transfers, check here if there are channel losses between the old and new PODs or within the proposed instream reach? If you check the box, describe and, if possible, estimate the losses:

N/A

8. For instream transfers that propose protection of a reach beyond the mouth of the source stream:

N/A Would the quantity be measureable into the receiving stream consistent with OAR 690-077-0015(8)? Yes No

9. For POU changes: N/A Is it likely the original place of use would continue to receive water from the same source? Yes No If "Yes", explain:

10. For POU or USE changes: N/A In your best judgment, would use of the existing right at "full face value," result in the diversion of more water than can be used beneficially and without waste?

Yes No If "Yes", explain:

11. For POU changes that involve micro-irrigation: N/A

a. Has the applicant made changes (absent a transfer) to convert to micro-irrigation within the current place of use boundary of the water right proposed for transfer, and previously demonstrated to the Department through monitoring and site inspections by the Watermaster that the proposed transfer will not result in injury or enlargement?

Yes No If "Yes", explain:

b. Has a temporary transfer of this nature been previously filed and approved on the same lands (or portions thereof) as those lands involved in this transfer?

Yes No If "Yes", answer the following:

i. Were there any problems with more acres being irrigated (or wetted) than were authorized under the temporary transfer? Yes No If "Yes", explain:

ii. Did the designated areas that were to remain dry (or not wetted) under the temporary transfer actually remain dry? Yes No If "No", explain:

iii. Did the applicant comply with and meet all of the conditions of the temporary transfer? Yes No If "No", explain:

iv. Do you have any other observations regarding the temporary transfer?

Yes No If "Yes", describe:

v. Did the applicant demonstrate to the Department through monitoring and site inspections by the Watermaster that neither injury nor enlargement occurred as a result of the temporary transfer? Yes No If "No", explain:

c. To the best of your knowledge, if this transfer is approved, does it appear that:

i. "Injury" will occur to other water rights that share the same source?

Yes No If "Yes", explain:

ii. "Enlargement" of the water right being transferred will occur?

Yes No If "Yes", explain:

12. Are there other issues not identified through the above questions that should be considered in determining whether the change "can be effected without injury to other rights"?

Yes No If "Yes", explain:

Applicant needs notified that a measurement device within the Westland Irrigation District is not a sufficient measurement device and will not count as a measurement device for this transfer or any other Pioneer Irrigation District water rights.

13. What alternatives may be available for addressing any issues identified above:

Install a measurement device on the Pioneer Ditch.

14. Do conditions need to be included in the transfer order to avoid enlargement of the right or injury to other rights? No Yes, as checked and provided below:

For POU changes that involve micro-irrigation, provide the monitoring and reporting conditions necessary to prevent injury/enlargement:

A Headgate should be required prior to diverting water.

Measurement Devices for POD or POA: (if this condition is selected, also fill in the top sections of Page 4)

a. Before water use may begin under this order, the water user shall install a totalizing flow meter, or, with prior approval of the Director, another suitable measuring device, at each point of diversion/appropriation (new and existing) OR at each new point of diversion/appropriation with the exception that water rights issued to the Bureau of Reclamation or an irrigation district (or similar entity) are not subject to this condition.*

b. The water user shall maintain the meters or measuring devices in good working order.

c. The water user shall allow the Watermaster access to the meters or measuring devices; provided however, where the meters or measuring devices are located within a private structure, the Watermaster shall request access upon reasonable notice.

Reservoir water use measurement: (if this condition is selected, also fill in the top sections of Page 4)

a. Before water use may begin under this order, the water user shall install staff gages, or, with prior approval of the Director, other suitable measuring devices, that measure the entire range and stage between empty and full in each reservoir. Staff gages shall be United States Geological Survey style.*

b. Before water use may begin under this order, if the reservoir is located in channel, weirs or other suitable measuring devices must be installed upstream and downstream of the reservoir, and, an adjustable outlet valve must be installed. The water user shall maintain such devices in good working order. A written waiver may be obtained, if in the judgment of the Director, the installation of weirs or other suitable measuring devices, or the adjustable outlet valve, will provide no public benefit.

* The following alternative device(s) should be substituted for the bold, underlined device in the above selected condition:

Weir
 Parshall Flume
 Other: _____

Submerged Orifice
 Flow Restrictor

On February 29, 2024, the Department received your water right Temporary Transfer Application. The application was accompanied by \$1422.00. Receipt number 142486 is enclosed.

By copy of this letter, we are asking the Watermaster for a report regarding the potential for injury to existing water rights which may be caused by the requested change.

Except as provided under ORS 540.510(3) for municipalities, you may not *temporarily* use water at the new place of use until a final order approving the temporary transfer application has been issued by the Department. Additionally, pursuant to OAR 690-380-8010, the lands from which an irrigation water right is to be temporarily transferred and the land to which the right is to be temporarily transferred may not both receive water during the same season. If the temporary transfer is approved during an irrigation season and water has already been used at the currently authorized location during that season, then the temporary transfer will not take effect until the following season.

If the land is sold before the temporary transfer is approved, the buyer's consent to the temporary transfer will be required unless a recorded deed or other legal document clearly established that the water right was not conveyed in the sale.

If you have any questions, please contact the Transfer Section at (503) 986-0935.

Part 2 of 5 – Temporary Transfer Application Map Checklist

OWRD

Your temporary transfer application will be returned if any of the map requirements listed below are not met.

Items and matches the existing water right map. Check all boxes that apply.

- N/A If more than three water rights are involved, separate maps are needed for each water right.
- Permanent quality printed with dark ink on good quality paper.
- The size of the map can be 8½ x 11 inches, 8½ x 14 inches, 11 x 17 inches, or up to 30 x 30 inches. For 30 x 30 inch maps, one extra copy is required.
- A north arrow, a legend, and scale.
- The scale of the map must be: 1 inch = 400 feet, 1 inch = 1,320 feet; the scale of the Final Proof/Claim of Beneficial Use Map (the map used when the permit was certificated); the scale of the county assessor map if the scale is not smaller than 1 inch = 1,320 feet; or a scale that has been pre-approved by the Department.
- Township, Range, Section, ¼ ¼, DLC, Government Lot, and other recognized public land survey lines.
- Tax lot boundaries (property lines) are required. Tax lot numbers are recommended.
- Major physical features including rivers and creeks showing direction of flow, lakes and reservoirs, roads, and railroads.
- Major water delivery system features from the point(s) of diversion/appropriation such as main pipelines, canals, and ditches.
- Existing place of use that includes separate hachuring for each water right, priority date, and use including number of acres in each quarter-quarter section, government lot, or in each quarter-quarter section as projected within government lots, donation land claims, or other recognized public land survey subdivisions. If less than the entirety of the water right is being changed, a separate hachuring is needed for lands left unchanged.
- N/A Proposed temporary place of use that includes separate hachuring for each water right, priority date, and use including number of acres in each quarter-quarter section, government lot, or in each quarter-quarter section as projected within government lots, donation land claims, or other recognized public land survey subdivisions.
- Existing point(s) of diversion or well(s) with distance and bearing or coordinates from a recognized survey corner. This information can be found in your water right certificate or permit.
- N/A If you are proposing a change in point(s) of diversion or well(s) to convey water to the new temporary place of use, show the proposed location and label it clearly with distance and bearing or coordinates. If GPS coordinates are used, latitude-longitude coordinates may be expressed as either degrees-minutes-seconds with at least one digit after the decimal

(example – $42^{\circ}32'15.5''$) or degrees-decimal with five or more digits after the decimal (example – 42.53764°).

FEE WORKSHEET for TEMPORARY DROUGHT TRANSFERS			
1	Base Fee (includes drought application and recording fee for up to 1 cfs)	1	\$200.00
2	Enter the cfs for the portions of the rights to be transferred (see example below*): _____ (2a) Subtract 1.0 from the number in 2a above: _____ (2b) If 2b is 0, enter 0 on line 2 » » » » » » » » » » » » » » » » If 2b is greater than 0, round up to the nearest whole number: _____ (2c) and multiply 2c by \$50, then enter on line 2 » » » » » » » »	2	
3	Add entries on lines 1 through 2 above » » » » » » » Transfer Fee:	3	

*Example for Line 2a calculation to transfer 45.0 acres of Primary Certificate 12345 (total 1.25 cfs for 100 acres) and 45.0 acres of Supplemental Certificate 87654 (1/80 cfs per acre) on the same land:

1. Divide total authorized cfs by total acres in the water right (for C12345, $1.25 \text{ cfs} \div 100 \text{ ac}$); then multiply by the number of acres to be transferred to get the transfer cfs ($45 \text{ ac} \times 0.0125 \text{ cfs/ac} = 0.56 \text{ cfs}$).
2. If the water right certificate does not list total cfs, but identifies the allowable use as 1/40 or 1/80 of a cfs per acre; multiply number of acres proposed for change by either 0.025 (1/40) or 0.0125 (1/80). (For C87654, $45.0 \text{ ac} \times 0.0125 \text{ cfs/ac} = 0.56 \text{ cfs}$)
3. Add cfs for the portions of water rights on all the land included in the transfer; however do not count cfs for supplemental rights on acreage for which you have already calculated the cfs fee for the primary right on the same land. The fee should be assessed only once for each "on the ground" acre included in the transfer. (In this example, blank 2a would be only 0.56 cfs, since both rights serve the same 45.0 acres. Blank 2b would be 0 and Line 2 would then also become 0).

Explain in your own words what you propose to accomplish with this transfer application and why:
We propose to transfer small areas irrigated with hand lines and flood irrigation to an area under a center pivot. The irrigation with a center pivot is a much more economically, (financially), and efficiently, (less water used), use of the irrigation water.

This Temporary Transfer Application is Identical to 2021 Temporary Transfer T-13723 and 2023 Temporary Transfer T-13955.

If you need additional space, continue on a separate piece of paper and attach to the application as "Attachment 1".

Description of Water Delivery System:

System capacity: 6.0 cubic feet per second (cfs) OR

_____ gallons per minute (gpm)

Describe the current water delivery system or the system that was in place at some time within the last five years. Include information on the pumps, canals, pipelines, and sprinklers used to divert, convey, and apply the water at the authorized place of use. These Rights are served by the Pioneer Irrigation Company through the Pioneer Ditch. The Pioneer Ditch received water from the Westland Irr. Dist. Main Canal Headgate # G-2, (Pioneer – Courtney head gate), about 1 mile from the Westland Irr. Dist. Point of Diversion from the Umatilla River.

For Place of Use Changes

Are there other water right certificates, water use permits or ground water registrations associated with the "from" or the "to" lands? Yes No

If YES, list the certificate, water use permit, or ground water registration numbers: [Permit 7400](#)

Pursuant to ORS 540.525, any "layered" water use such as an irrigation right that is supplemental to a primary right proposed for temporary transfer can be included in the transfer or remain unused on the authorized place of use. If the primary water right does not revert soon enough to allow use of the supplemental right within five years, the supplemental right shall become subject to cancellation for nonuse under ORS 540.610.

If a change in point(s) of appropriation (well(s)) or additional point(s) of appropriation is necessary to convey the water to the new temporary place of use you must provide: [N/A](#)

Well log(s) for each authorized and proposed well(s) that are clearly labeled and associated with the corresponding well(s) in Table 1 above and on the accompanying application map. Description of Water Delivery System

System capacity: 14.0 cubic feet per second (cfs) **OR**
 gallons per minute (gpm)

Describe the current water delivery system or the system that was in place at some time within the last five years. Include information on the pumps, canals, pipelines and sprinklers used to divert, convey and apply the water at the authorized place of use. The authorized place of use was flood irrigated from the Allen Ditch Delivery System. The Allen Ditch, 8 ft. wide x 3 ft. deep, diverts water from the Westland Irrigation District's Westland Canal at #G-4C Allen Ditch Headgate. The Allen Ditch delivers water approximately 2.5 miles from this head gate to the Mills Mint Farm parcel. The Mills Mint Farm parcel is irrigated by two center pivots. The acreage in the corners around the pivots in this application are flood irrigated.

Regular Temporary Water Right Transfer Application Checklist

Checked by John

Date 3/4/24

A temporary transfer must be for a change in place of use. A temporary change in POD/POA or APOD/APOA cannot be accepted as a stand-alone change.

A change in POD/POA can accompany the temporary change in place of use, only if the proposed temporary POD/POA is supplying water to the proposed temporary place of use.

(If OK, check box to left; if not, fill in the blank)

1. Page 1 of application: Are all attachments that have been checked actually included?
If not, what is missing? _____
2. Are fees included and correct?
If not, the correct fee would be: _____, so the amount missing is: _____
3. Part 4 of application: Have all the applicants listed at the top of the page signed at the bottom?
If not, whose signature is missing? _____.
4. Are all listed certificates shown by WRIS as non-cancelled?
If not, which are cancelled? _____
For each cancelled certificate, if there has been a remaining right certificate issued that covers the lands in the left side of Table 2, list its number _____ and check the #4 box at left on this checklist.

5. If any certificate is in the name of a "district", is a Supplemental Form D from that district enclosed?
 N/A Form D needed from Included (district)
6. If all #1-#5 boxes on this checklist are checked (with no remaining deficiencies identified), accept the application. Put this check sheet in the transfer folder.

If #1, #2, #3, #4 or #5 on this checklist is deficient, the application cannot be accepted. It should be returned and the deficiencies listed in the "staff" section at the bottom of Application Page 1, unless the applicant or agent can resolve the deficiencies within 2-3 days.
