Enclosed is a copy of the order approving your water right transfer applications.

A time to complete the transfers is given in the order. YOU SHOULD GIVE PARTICULAR ATTENTION TO THE TIME LIMIT. The water right for any portion of the authorized change in use or change in place of use NOT carried out within the time allowed will be lost.

An extension of the time limit can be allowed only upon a showing that diligent effort has been made to complete the actual changes within the time allowed.

You have the requirement to hire a Certified Water Right Examiner (CWRE) to complete a Claim of Beneficial Use report and map which must be submitted to this department within one year of the date you completed the changes or within one year of the completion date authorized in the transfers, whichever occurs first.

Sincerely,

for Doug Parrow

The applicants requested that the Department proceed with issuance of a Preliminary Determination and provided the necessary information to demonstrate that the applicant is authorized to pursue the transfer.
12. On July 27, 2007, the Department issued a Preliminary Determination proposing to approve Transfer Applications T-10323 and T-10324 and mailed a copy to the applicants. Additionally, notice of the Preliminary Determination for the transfer application was published on the Department's weekly notice on July 31, 2007, and in the Burns Times Herald newspaper on August 8, 15, and 22, 2007, pursuant to ORS 540.520 and OAR 690-380-4020. 15. The proposed changes would not result in enlargement of the rights.
16. The proposed changes would not result in injury to other water rights.

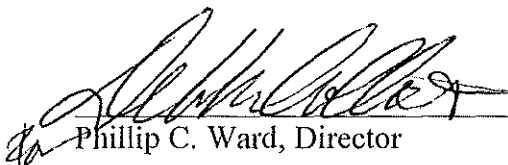

Conclusions of Law

The changes in place of use and points of appropriation proposed in application T-10323 and the change in points of appropriation proposed in application T-10324 are consistent with the requirements of ORS 537.705 and 540.505 to 540.580 and OAR 690-380-5000.

Now, therefore, it is ORDERED:

1. The changes in place of use and points of appropriation proposed in application T-10323 are approved.
2. The change in points of appropriation proposed in application T-10324 is approved.
3. Water right certificates 50593 and 60713 are cancelled. A new certificate will be issued describing that portion of Certificate 60713 not affected by application T-10324.
4. The right to the use of the water is restricted to beneficial use at the place of use described, and is subject to all other conditions and limitations contained in Certificates 50593 and 60713.
5. Water shall be acquired from the same aquifer (water source) as the original point of appropriation.
6. The quantity of water diverted at the new points of appropriation shall not exceed the quantity of water lawfully available at the original points of appropriation.
7. The former place of use of the transferred right under application T-10323 shall no longer receive water under the right.
8. When required by the Department, the water user shall install, maintain and operate an in-line flow meter or other suitable device for measuring and recording the quantity of water diverted. The type and plans of the measuring device must be approved by the Department prior to beginning construction and shall be installed under the general supervision of the Department.
9. The approved changes shall be completed and full beneficial use of the water shall be made on or before **October 1, 2008**. A Claim of Beneficial Use prepared by a Certified Water Rights Examiner shall be submitted by the applicant to the Department within one year after the deadline for completion of the changes and full beneficial use of the water.
10. When satisfactory proof of the completed changes is received, new certificates confirming the rights transferred will be issued.

in feet in feet

or

$$Q_{\text{pump}} = \frac{(\text{Hp})(\text{conversion factor})}{(\text{lift} + \text{pressure}) \text{ total head in feet}} = \text{cfs}$$

Conversion factors:

$$\text{Centrifugal Pump, 75\% eff. } \frac{(550 \text{ ft lb/sec/Hp})(.75)}{(62.4 \text{ lb/cu ft})} = 6.61 \text{ ft}^4/\text{sec/Hp}$$

Turbine & Submersible Pumps, 80% eff. $\frac{(550 \text{ ft lb/sec/Hp})(.80)}{(62.4 \text{ lb/cu ft})} = 7.04 \text{ ft}^4/\text{sec/Hp}$

Efficiencies have been assumed to be 75% for centrifugal pump installations and 80% for turbine or submersible pumps. See the list below of converted psi's to feet of head. These figures account for minor friction losses. If the system involves unusually long pipelines friction losses should be accounted for by using standard charts and formulas.

Refer to the conversion table below to compute PSI to head for pump pressure in feet.

$$[(\text{psi}/.433)(1.1) = \text{head (in feet/psi)} = 2.54 \text{ feet head/psi}]$$

1. Time Limits:

a. Permits or transfer Final Orders contain any or all of the following dates; the date when the actual construction work was to begin, the date when the construction was to be completed, and the date when the complete application of water to the proposed use is to be completed by. These dates may be referred to as ABC dates. Describe how the water user has complied with each of the development timelines established in the permit or transfer final order:

	Dates from permit or transfer final order	Date accomplished	Description of actions taken by water user to comply with the time limits
Begin construction	9-2007	9-2007	APPLICATION PROCESS.

RE: Transfer Applications 10323 and 10324

Dear Mr. Blackburn,

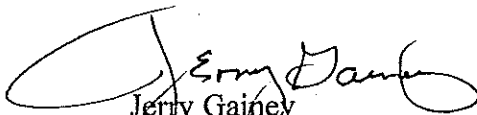

The Department received the Claim of Beneficial Use (Claim) for the above referenced transfers on August 13, 2009. We are returning the Claim because:

- A. The required fee of \$150 was not submitted with the Claim.
- B. The Claim references incorrect transfer numbers. See attached transfer order.

The fee requirement for the submittal of a Claim of Beneficial Use is a new fee enacted by the 2009 Legislature. The fee went into effect on July 24, 2009.

If you have any questions, please feel free to contact me at 503-986-0812.

Sincerely,

The applicant proposes to change a portion of the place of use from Sects. 27 and 28, T 25 S, R 31 E, W.M. to Sec. 27. Application T-10324 proposes a change in points of appropriation under Certificate 60713. The right allows the use of 0.745 cfs (priority date April 9, 1979) from three wells in Sects. 27 and 28, T 25 S, R 31 E, W.M. (Malheur Lake Basin) for irrigation in Sec. 28. The applicant proposes to change the points of appropriation to five wells located in Sects. 27 and 28, T 25 S, R 31 E, W.M. The Water Resources Department has concluded that the proposed transfers appear to be consistent with the requirements of ORS Chapter 540 and OAR 690-380-5000.

Any person may file, jointly or severally, with the Department a protest or standing statement within 30 days after the date of final publication of notice in the Department's weekly notice or of this newspaper notice, whichever is later. A protest form and additional information on filing protests may be obtained by calling (503) 986-0852. The last date of newspaper publication is August 22, 2007. If no protests are filed, the Department will issue a final order consistent with the preliminary determination.

SUBJECT: Transfer Applications T-10323 and T-10324

Please find enclosed the Preliminary Determination indicating that, based on the information available, the Department intends to approve applications T-10323 and T-10324. This document is an intermediate step in the approval process; water may not be used legally as proposed in the transfer applications until a Final Order has been issued by the Department. Please read this entire letter carefully to determine your responsibility for additional action.

A public notice is being published in the Department's weekly publication simultaneously with issuance of the Preliminary Determination. The notice initiates a 30-day period in which any person may file either a protest opposing the decision proposed by the Department in the Preliminary Determination or a standing statement supporting the Department's decision.

Because the new points of appropriation are more than ¼ mile from the authorized point of appropriation, the applicant is responsible for giving public notice of the transfer changes in a local newspaper having a general circulation in the area of the water right. The notice must be published at least once a week for three consecutive weeks. We have prepared the notice for you (enclosed). The deadline for individuals to file protests or standing statements is 30 days after the date of last publication. Please have the newspaper insert the date of last publication in the proper place.

After publication, the Department needs to receive an **affidavit of publication** specifying the dates the notice was published. Please have the newspaper prepare and mail an original affidavit to me, at the address above, by **September 14, 2007**.

If no protest is filed, the Department will issue a Final Order consistent with the Preliminary Determination. You should receive a copy of the Final Order about 30 days after the close of the protest period.

If a protest is filed, the application may be referred to a contested case proceeding. A contested case provides an opportunity for the proponents and opponents of the decision proposed in the Preliminary Determination to present information and arguments supporting their position in a quasi-judicial proceeding.

Please do not hesitate to contact me at (503) 986-0886 or Patrick.K.Starnes@wrdd.state.or.us if I may be of assistance.

SUBJECT: Application T-10323 and T-10324

Enclosed find a draft of our Preliminary Determination regarding transfer applications T-10323 and T-10324. The document reflects the Department's conclusion that, based on the information currently available, the transfer will be approved. This draft is intended to provide you with an opportunity to comment on our findings and conclusions should you wish to do so. Please review the draft carefully to evaluate whether the document is consistent with your intent in seeking the transfer, and whether you agree with the proposed action.

At this time, you must submit a report of ownership and lien information prepared within the last three months by a title company. If there are additional lienholders identified in the report that have not previously been notified of the transfer, you must send notice of the transfer to them, and submit copies of each such notice to the Department to document that each lienholder has been informed of the transfer.

Because some of the new points of appropriation are more than ¼ mile from the authorized point of appropriation the applicant is responsible for publishing notice of the transfer in a local newspaper having a general circulation in the area of the water right. The notice must be published at least once a week for three consecutive weeks. We will provide a copy of the required notice to you upon issuance of the Preliminary Determination.

Issuance of the Preliminary Determination will occur shortly after we receive both your written response and the report of ownership and lien information. If we do not receive your response and the report by July 12, 2007, a Preliminary Determination may be issued denying the application as incomplete.

Please do not hesitate to contact me at if I may be of assistance.

Sincerely,

Field Services Division

On February 21, 2007 we received your water right transfer application requesting a change in point of appropriation for use of water from WELLS, tributary to MALHEUR LAKE. The application was accompanied by \$350. Our receipt 86344 is enclosed.

By copy of this letter, we are asking the Watermaster for his report regarding the potential for injury to existing water rights which may be caused by the change.

Your application will be examined to determine if additional information is needed. You will be contacted following this examination.

Except as provided under ORS 540.510(3) for municipalities, you may not use water for the new use, in the new place of use or from the new point of diversion until the transfer application has been approved. In order to avoid any possible forfeiture of the water right, you should continue to use the water as described by your existing water right. If the land is sold before the transfer is approved, the buyer's consent to the transfer will be required unless a recorded deed or other legal document clearly established that the water right was not conveyed in the sale.

We will notify you if additional information or corrections to the application or map are required.

If you have any questions, please call the Transfer Section, (503)986-0883.
