23 S	31 E	WM	28	SE SE	40.0

8. Applications T-10333 and T-10338 propose to add an authorized point of diversion to:

Twp	Rng	Mer	Sec	Q-Q	Survey Coordinates
23 S	31 E	WM	22	NW SW	NELSON DITCH - 1500 FEET NORTH AND 100 FEET EAST FROM THE SW CORNER OF SECTION 22

9. Notice of the application for transfer was published pursuant to ORS 540.520 and OAR 690-380-4000. No comments were filed in response to the notice.
10. Pursuant to OAR 690-380-2120(2)(a), evidence has been submitted that the actual, current point of diversion for the water right in question, as described in Findings of Fact #3 through #7, has been in use for more than ten years.
11. Pursuant to OAR 690-380-2120(2)(c) the Watermaster provided a statement that to her knowledge there was no complaint of injury due to the use of water at the actual, current point of diversion, prior to the transfer request.
12. On October 16, 2007, all affected water right holders were notified of the proposed transfer by mail, pursuant to 690-380-2120(4). No comments were received in response to that notice.
13. The Oregon Department of Fish and Wildlife (ODFW) determined that the diversion is not currently equipped with an appropriate fish screening and/or by-pass device. ODFW further determined that a fish screening and/or by-pass device may be required in the future at the new point of diversion to prevent fish from entering the diversion and/or safely transport fish back to the body of water from which the fish were diverted.
14. Water has been used within the last five years according to the terms and conditions of the rights, and no evidence is available that would demonstrate that the rights are subject to forfeiture under ORS 540.610.
15. A diversion structure and ditch sufficient to use the full amount of water allowed under the existing rights are present.
16. The proposed change would not result in enlargement of the rights.
17. The proposed change would not result in injury to other water rights.

Conclusions of Law

The proposed additional point of diversion in applications T-10333 and T-10338 are consistent with the requirements of ORS 540.505 to 540.580, and OAR 690-380-5000.

Now, therefore, it is **ORDERED**:

1. The changes proposed in T-10333 and T-10338 are approved.
2. The right to the use of the water is restricted to beneficial use at the place of use described, and is subject to all other conditions and limitations contained in the 1926 Silvies River Decree.
3. The proposed change shall be effective immediately upon issuance of the special order approving T-10333 and T-10338.
4. The following entries in the 1926 Silvies River Decree: **Volume 9 at Page 152** in the name of THE WILLIAM HANLEY CO.; **Volume 9 at Page 170** in the name of F.L. MACE; **Volume 9 at Page 175** in the name of CHAS NELSON; **Volume 9 at Page 179**, in the name of PACIFIC LIVESTOCK CO.; and **Volume 9 at Page 201**, in the name of C.G. SMITH, are hereby modified.
5. The quantity of water diverted at the additional point of diversion, together with that diverted at the old point of diversion, shall not exceed the quantity of water lawfully available at the original point of diversion.
6. Within one year of receiving written notification from the Oregon Department of Fish and Wildlife (ODFW) that a fish screening and/or by-pass device is required, the water user shall install a screening and/or by-pass device, as appropriate, at the new point of diversion. The fish screening and/or by-pass device must meet ODFW's design and construction standards. Prior to installation, the water user shall obtain written approval from ODFW that the required screening and/or by-pass device meets ODFW's criteria. Once installed the water user shall maintain and operate the fish screening and/or by-pass device, as appropriate, at the point of diversion consistent with ODFW's operational and maintenance standards.
7. Prior to October 1, 2009, the water user shall install and maintain a headgate, an in-line flow meter, weir, or other suitable device for measuring and recording the quantity of water diverted. The type and plans of the headgate and measuring device must be approved by the Department prior to beginning construction and shall be installed under the general supervision of the Department.

Sarah, here are the injury reviews for these two transfers.

Here is a few notes for who ever gets to review these transfers:

On T-10333 - There are some remaining rights that I suppose should be mapped within 1/4 1/4 sections.

Some of the irrigated acres on the map are not in agreement with the application.

The SW 1/4, section 34 is Rattlesnake Land and Cattle and the app shows this as Bell A land.

The decree list other authorized diversions than the application and map have, and some are on the West Fork side of the Silvies. The lands are in sections 33, 34 and 4.

On T-10338, The McRay dam in the SE 1/4 section 11, may deliver water to the acres in the SE 1/4 section 11. If so, this is not listed as a authorized diversion on the application or the map. If this is an additional

pod transfer, the authorized diversion on the application will not deliver water to the lands on the application.

Thanks
June

Enclosure

March 2, 2007

Reference: Nelson Ditch Historic Point of Diversion Transfer

To Transfer Section, Water Resource Department

I have been the watermaster in District 10 since September 1, 2003.

There is a distribution list in the watermaster files in this office that includes the Nelson ditch. The distribution list is dated 1974.

There is a Nelson ditch users list agreement dated 1973.

There is no evidence in the watermaster files in this office of any injury due to the use of the Nelson ditch.

Since I have been in the office, I have found no injury with the diversion on the Nelson ditch.

There may have been injury with culvert capacity down the ditch a couple of miles, however the landowner where the culvert was placed, recently took this out of the ditch.

There are no intervening diversions between the authorized and the present Nelson diversion.

Please let me know if you need other information related to the Nelson diversion.

I have been the watermaster in District 10 since September 1, 2003.

There is a distribution list in the watermaster files in this office that includes the Nelson ditch. The distribution list is dated 1974.

There is a Nelson ditch users list agreement dated 1973.

There is no evidence in the watermaster files in this office of any injury due to the use of the Nelson ditch.

Since I have been in the office, I have found no injury with the diversion on the Nelson ditch.

There may have been injury with culvert capacity down the ditch a couple of miles, however the landowner where the culvert was placed, recently took this out of the ditch.

There are no intervening diversions between the authorized and the present Nelson diversion.

Please let me know if you need other information related to the Nelson diversion.

SUBJECT: Applications T-10333 and T-10338

As we discussed during our phone conversation on August 24th, I have found what I believe to be a few problems in the application and maps for these historic point of diversion transfers. I have outlined these issues below:

- ▶ In the NENE and SENE of Section 28, the transfer map shows 37.5 acres in each quarter. There are 40 acres available to transfer in each, and it appears the entire amount should be included in the transfer.
- ▶ Also in Section 28, the map shows 8.0 acres in the NWSE and 12.0 acres in the SWSE. The application lists 40.0 acres being transferred in each. I assume the map is correct?
- ▶ In the NWNE of Section 3, the decree has 47.3 acres available, but the map and application list 41.3 acres. In the NENW, the decree has 48.22 available, but the map and application list 48.7, and in the NWNW the decree has 49.41 available, but the map and application list 49.4 acres. It appears that all the acres available should be included in the transfer.
- ▶ In the NENW of Section 4, the decree has 30.5 acres available, but the map and application list 40.0 acres, and in the SWNW the decree and transfer map have 11.5 acres and the application lists 15.0 acres.
- ▶ In the SENE of Section 27, the map shows 25.0 acres, but the application and decree show only 20.0 available, and in the NWSE, there are only 35.0 acres available and shown on the application, but the map lists 40.0.
- ▶ The authorized PODs listed on the map and application do not entirely match the PODs in the decree. The authorized diversions for the listed decree numbers are as follows for the acres affected by the transfer:

915262 – Hanley and Upper West Side (Source: East Fork and Foley)
Ditches and Dams (Source: E.F. Silvies and sloughs)

917016 – Mace #2 and Sloughs (Source: Main)

917530 – Dams and Sloughs (Source: E.F. Silvies)

917939 – Smith & Clemens & Homer Mace Slough (Source: Silvies)
Mace, DeWitt, Hanley, Hill Dams, and Chapman Sl. (Source: Silvies)

20165 – F.L. Mace Dams/Dykes (Source: E.F. Silvies)

I have enclosed a copy of a map reflecting the changes and apparent intent of the transfer. If this map correctly shows the applicants' intent, it may be used as the transfer map in place of the original. The application will also need to be modified showing any changes made to the map or as listed above.

If you have questions, please do not hesitate to contact me at Jason.D.Spriet@wrd.state.or.us or (541) 523-8224 Extension 35.

Watermaster Review Form: Water Right Transfer

Transfer Application: T-10338

Review Due Date: 4/19/2007

Applicant Name: Ron Schirm

Proposed Changes: ☐ POU ☒ POD ☐ POA ☐ USE ☒ OTHER

Reviewer(s): June Miller

Date of Review: Apr. 12, 2007

1. Do you have information suggesting that the water rights may be subject to forfeiture?
☐ Yes ☒ No If "Yes", describe the information and indicate if you intend to file a cancellation affidavit or if you need additional time to determine if a cancellation affidavit should be filed: _____
2. Is there a history of regulation on the source that serves the right proposed for transfer that has involved the right and downstream water rights? ☒ Yes ☐ No Generally characterize the frequency of any regulation or explain why regulation has not occurred: I regulate the East Fork Silvies very frequently during irrigation season, delivering water to downstream users, from Mr. Schirm's diversion, to senior rights.
3. Check here if it appears that downstream water rights benefit from return flows resulting from the current use of the right? ☐ If you check the box, generally characterize the locations where the return flows likely occur and list the water rights that benefit most:

4. Are there upstream water rights that would be affected by the proposed change?
☒ Yes ☐ No If "Yes", describe how the rights would be affected and list the rights most affected: rights listed under transfer 10333 will not be effected, if the transfer is approved, as they are transferring to the same diversion as the rights under this transfer.
5. For POD changes and instream transfers, check here if there are channel losses between the old and new PODs or within the proposed instream reach? ☒ If you check the box, describe and, if possible, estimate the losses: minimal, evaporation losses for 1 mile.
6. Would distribution of water for the right after the proposed change result in regulation of other water rights that would not have occurred if use of the existing right was maximized?
☐ Yes ☒ No If "Yes", explain: _____
7. For POU changes, would the original place of use continue to receive water from the same source? ☐ Yes ☐ No ☐ N/A If "Yes", explain: _____
8. For POU or USE changes, would use of the existing right at "full face value," result in the diversion of more water than can be used beneficially and without waste? ☐ Yes ☐ No If "Yes", explain: _____

9. Are there other issues not identified through the above questions? ☒ Yes ☐ No If "Yes", explain: a pod in the SE 1/4 section 2, from the McRay dam, serves a portion of the land in the SE 1/4 section 11, not identified on the map or in the transfer.
10. What alternatives may be available for addressing any issues identified above: amending the transfer and map to include the diversion mentioned above.
11. Have headgate notices been issued for the source that serves the right? ☐ Yes ☒ No
12. What water control and measurement conditions should be included in the transfer:

Measurement Devices	☐ Present and should be maintained.	☒ Should be required prior to diverting water.	☐ May be required in the future.
Headgates	☒ Present and should be maintained.	☐ Should be required prior to diverting water.	☐ May be required in the future.

Jane Miller (watermaster) E-mailed her information about the Nelson Ditch since she has been water master. She used the same Nelson Ditch administration schedule as I did for 21 years. RE: Water Right Transfer Application

On March 1, 2007 the Department received the water right transfer application for a historic point of diversion change, with a check in the amount of \$350.00. We are unable to file this application, the reasons are listed below. Enclosed is a copy of the Oregon Administrative Rules.

Sent by June Miller

1 attached a separate legend

4" / mile

all are one decree V-9 Silver River

Complete

1. If this is a Historic Point of Diversion change there must be evidence that the diversion point has been in use for at least 10 years and there has been no claim of injury prior to the request for the change in point of diversion. The evidence shall include a statement from the local Watermaster, based upon the Watermaster's knowledge and department records that no complaint of injury has been made due to the use of water at the actual current point of diversion. You may contact the local Watermaster, June Miller, at 541-573-2591.

2. The transfer map needs to break down the lands by Decree Number, POD and Priority. The legend must identify the breakdown of the water rights.

3. The transfer map must have a Scale listed. If you are using the decree map then you need to state this so we know where the map came from.

4. A separate Supplemental Form A packet will need to be filled out for each water right (decree) involved in the proposed transfer. Enclosed is a separate packet for each decree.

5. On page 4 of the Supplemental Form A packet, the authorized place of use must be filled out. This describes the allowed lands listed on the water right that will be affected by the proposed transfer.

If you have any questions please contact Carrie Jones at 541-523-8224 ext. 36 in the Baker City office or you may contact the transfer section in the Salem office at 503-986-0883.

We are returning the application materials and original check in the amount of \$350.00. You may re-submit the application once these items have been completed.

Sarah Henderson

The holder of a water right subject to transfer may request to temporarily change the place of use of the water for up to 5 years and, if necessary to convey the water, to temporarily change the point of diversion or appropriation.

The holder of a water right permit may apply to change a point of diversion (POD) or appropriation (POA) or to change the place of use (POU).

Any person who provides comments within the comment period will receive a copy of the Department's preliminary determination of whether the application should be approved or rejected after the Department has completed a review of the application and will be provided an opportunity to protest the application and preliminary determination at that time. The Director may presume that the transfer would be allowed by, and compatible with comprehensive plans unless an affected local government informs the Director otherwise within 30 days of this notice. Comments should be sent to the Transfers Section at the Department's Salem office.
