5. Diminishment of a certain Water Right during the 2007 Irrigation Season

On April 19, 2007, Stacey Wells, authorized representative for Westland Irrigation District, stated that 7.55 acres of water right under Certificate 80450 existing at the proposed place of use shall be diminished from primary irrigation to supplemental irrigation, and supplement Certificate 76715. The location of the water right is described in the following table:

Diminishment to Supplemental Irrigation Certificate 80450						
Twp	Rng	Mer	Sec	Qtr - Qtr	TL	Acres
4 N	28 E	WM	17	SW NE	3700	7.55

6. The district temporary transfer application satisfies the criteria of OAR 690-385-4000, contains the information required under OAR 690-385-2000, and includes maps meeting the requirements of OAR 690-385-2200.
7. The water rights are subject to transfer as defined in OAR 690-385-0100(17).
8. The proposed change in place of use would not result in enlargement of the rights.
9. The proposed changes in place of use would not result in injury to other rights.

Conclusions of Law

1. The proposed change in place of use in Transfer Application T-10347 satisfies the requirements of ORS 540.574(3) and 540.570.
2. The portion of the right described in Findings of Fact #5 will be diminished to supplemental irrigation during the 2007 irrigation season.

Now, therefore, it is ORDERED:

1. The proposed changes to the water rights evidenced by Certificates 76715, 79439 and 80450 are approved.
2. The temporary transfer is effective for the 2007 irrigation season.
3. The right to the use of the water is restricted to beneficial use at the place of use described and is subject to all other conditions and limitations contained in Certificates 76715, 79439 and any related decree.
4. Pursuant to OAR 690-385-3130, the use of water for supplemental irrigation at the proposed place of use under Certificate 80450, as described in Findings of Fact #5, is restricted to the total rate and duty described by Certificate 76715, and may be used only to make up a deficiency of supply.
5. The use of water on the lands from which the water right is transferred and at the new temporary place of use during the same irrigation season or calendar year is prohibited and may subject the district and landowner to civil penalties.
6. The use of water under this temporary transfer may be conditioned or revoked at any time to the extent necessary to avoid injury if the Department finds the transfer causes injury to any existing water right.

7. At the end of the 2007 irrigation season all uses of water under this temporary transfer revert automatically to the terms and conditions of the original water right permit, certificate, or adjudication as evidenced by a court decree.

Watermaster Review Form: Water Right Transfer

Transfer Application: T-10347

Review Due Date: _____

Applicant Name: Westland Irrigation District - Mueller to Quick

Proposed Changes: ☒ POU ☐ POD ☐ POA ☐ USE ☐ OTHER

Reviewer(s): Molly Reid, Assistant Watermaster

Date of Review: Apr. 24, 2007

1. Do you have information suggesting that the water rights may be subject to forfeiture?
☐ Yes ☒ No If "Yes", describe the information and indicate if you intend to file a cancellation affidavit or if you need additional time to determine if a cancellation affidavit should be filed: _____
2. Is there a history of regulation on the source that serves the right proposed for transfer that has involved the right and downstream water rights? ☒ Yes ☐ No Generally characterize the frequency of any regulation or explain why regulation has not occurred:
Umatilla River Water to lower river users, HID - Maxwell Canal, and WEID, regulated annually - regulated in mid to late summer when water is insufficient to meet all water rights.
3. Check here if it appears that downstream water rights benefit from return flows resulting from the current use of the right? ☒ If you check the box, generally characterize the locations where the return flows likely occur and list the water rights that benefit most:
Maxwell diversion (1904 water right) is below Mueller land and potentially benefits from any return flow. WEID's 1909 right also could benefit from any return flow..
4. Are there upstream water rights that would be affected by the proposed change?
☒ Yes ☐ No If "Yes", describe how the rights would be affected and list the rights most affected: Maxwell diversion above Quick lands - would not benefit from the change but WEID's 1909 water right would.
5. For POD changes and instream transfers, check here if there are channel losses between the old and new PODs or within the proposed instream reach? ☐ If you check the box, describe and, if possible, estimate the losses: _____
6. Would distribution of water for the right after the proposed change result in regulation of other water rights that would not have occurred if use of the existing right was maximized?
☐ Yes ☒ No If "Yes", explain: _____
7. For POU changes, would the original place of use continue to receive water from the same source? ☐ Yes ☒ No ☐ N/A If "Yes", explain: _____
8. For POU or USE changes, would use of the existing right at "full face value," result in the diversion of more water than can be used beneficially and without waste? ☐ Yes ☒ No If "Yes", explain: _____

9. Are there other issues not identified through the above questions? ☐ Yes ☒ No If "Yes", explain: _____
10. What alternatives may be available for addressing any issues identified above: _____
11. Have headgate notices been issued for the source that serves the right? ☐ Yes ☒ No
12. What water control and measurement conditions should be included in the transfer:

Measurement Devices	☒ Present and should be maintained.	☐ Should be required prior to diverting water.	☐ May be required in the future.
Headgates	☒ Present and should be maintained.	☐ Should be required prior to diverting water.	☐ May be required in the future.
