11. The district temporary transfer application satisfies the criteria of OAR 690-385-4000, contains the information required under OAR 690-385-2000, and includes maps meeting the requirements of OAR 690-385-2200.
12. The water rights are subject to transfer as defined in OAR 690-385-0100(17).
13. The proposed change in place of use would not result in enlargement of the rights.
14. The proposed change in place of use would not result in injury to other rights.

Conclusions of Law

1. The proposed changes in place of use in Transfer Application T-10348 satisfies the requirements of ORS 540.574(3) and 540.570.
2. The portions of the rights described in Findings of Fact #7 and #8 will be diminished to supplemental irrigation during the 2007 irrigation season.
3. This transfer will be processed simultaneously with T-10349 (L & L Farms c/o Robert Levy).

Now, therefore, it is ORDERED:

1. The proposed change in Place of Use to the water rights evidenced by Certificates 76717, 76799, 76050, 76051, 75121, 75124, 79439 and 83083 are approved.
2. The temporary transfer is effective for the 2007 irrigation season.
3. The right to the use of the water is restricted to beneficial use at the place of use described and is subject to all other conditions and limitations contained in Certificates 76717, 76799, 76050, 76051, 75121, 75124, 79439 and 83083 and any related decree.
4. Pursuant to OAR 690-385-3130, the use of water for supplemental irrigation at the proposed place of use under Certificate 83083, as described in Findings of Fact #8, is restricted to the total rate and duty described by the existing primary irrigation water rights, Certificate 76051 and 83083, and may only be used to make up a deficiency of supply.
5. The use of water on the lands from which the water right is transferred and at the new temporary place of use during the same irrigation season or calendar year is prohibited and may subject the district and landowner to civil penalties.
6. The use of water under this temporary transfer may be conditioned or revoked at any time to the extent necessary to avoid injury if the Department finds the transfer causes injury to any existing water right.
7. At the end of the 2007 irrigation season all uses of water under this temporary transfer revert automatically to the terms and conditions of the original water right permit, certificate, or adjudication as evidenced by a court decree.

Watermaster Review Form: Water Right Transfer

Transfer Application: T-10348

Review Due Date: 5-8-07

Applicant Name: Westland Irrigation District

Proposed Changes: ☒ POU ☐ POD ☐ POA ☐ USE ☐ OTHER

Reviewer(s): Tony Justus

Date of Review: Apr. 30, 2007

1. Do you have information suggesting that the water rights may be subject to forfeiture?
☐ Yes ☒ No If "Yes", describe the information and indicate if you intend to file a cancellation affidavit or if you need additional time to determine if a cancellation affidavit should be filed: _____
2. Is there a history of regulation on the source that serves the right proposed for transfer that has involved the right and downstream water rights? ☒ Yes ☐ No Generally characterize the frequency of any regulation or explain why regulation has not occurred: The Umatilla River and McKay supplemental are regulated every year due to insufficient flows to serve all rights.
3. Check here if it appears that downstream water rights benefit from return flows resulting from the current use of the right? ☐ If you check the box, generally characterize the locations where the return flows likely occur and list the water rights that benefit most: POU is 4 miles from the river, due to timing and distance it would likely have little effect on others.
4. Are there upstream water rights that would be affected by the proposed change?
☐ Yes ☒ No If "Yes", describe how the rights would be affected and list the rights most affected: _____
5. For POD changes and instream transfers, check here if there are channel losses between the old and new PODs or within the proposed instream reach? ☐ If you check the box, describe and, if possible, estimate the losses: NA
6. Would distribution of water for the right after the proposed change result in regulation of other water rights that would not have occurred if use of the existing right was maximized?
☐ Yes ☒ No If "Yes", explain: _____
7. For POU changes, would the original place of use continue to receive water from the same source? ☐ Yes ☒ No ☐ N/A If "Yes", explain: _____
8. For POU or USE changes, would use of the existing right at "full face value," result in the diversion of more water than can be used beneficially and without waste? ☐ Yes ☒ No If "Yes", explain: _____

9. Are there other issues not identified through the above questions? ☒ Yes ☐ No If "Yes", explain: Certificate 76051 and 79439 lists 21.7 primary water rights in SWNW of Section 23, T. 3N. R.28 EWM. This amount together with the 4.8 acres of certificate 76717 and 79439 exceeds the acres available in this area. The primary available exceeds the supplemental available. Also, Certificate 81417 was replaced by Certificate 83083.
10. What alternatives may be available for addressing any issues identified above: Correct the certificate number and change the 31.7 acres in the SWNW of Section 23 to 29.6 acres so the primary and supplemental acres available match and match the acres available. These corrections will necessitate other changes to the application in the "to" lands.
11. Have headgate notices been issued for the source that serves the right? ☐ Yes ☒ No
12. What water control and measurement conditions should be included in the transfer:

Measurement Devices	☒ Present and should be maintained.	☐ Should be required prior to diverting water.	☐ May be required in the future.
Headgates	☒ Present and should be maintained.	☐ Should be required prior to diverting water.	☐ May be required in the future.

confirms the right to use the waters of UMATILLA RIVER, tributary to COLUMBIA RIVER, for IRRIGATION of 574.00 ACRES and SUPPLEMENTAL IRRIGATION of 1508.80 ACRES. The use allowed herein may be made anytime between November 15 and June 15 of each year that water can be put to beneficial use by irrigation, either for immediate crop growth or for forecast requirements to raise soil moisture to field capacity in the soil profile to be utilized by plant growth in the subsequent growing season.

This right was perfected under Permit S-48968. The date of priority is AUGUST 10, 1981. The amount of water to which this right is entitled is limited to an amount actually used beneficially, and shall not exceed 50.0 CUBIC FEET PER SECOND, or its equivalent in case of rotation, measured at the point of diversion.

The point of diversion is located as follows:

TWP	RNG	MER	SEC	Q-Q	GLot	DLC	SURVEY COORDINATES
3 N	29 E	WM	21	SW NE			WESTLAND CANAL - NORTH 76 DEGREES 45 MINUTES 56 SECONDS EAST, 2913.19 FEET FROM W1/4 CORNER OF SECTION 21

The amount of water used for irrigation, together with the amount secured under any other right existing for the same lands, is limited to ONE-FORTIETH of one cubic foot per second per acre, or its equivalent for each acre irrigated, and shall be further limited to a diversion of not to exceed 1.50 acre-feet per acre for each acre irrigated during the period from November 15 to the last day of February of each year, provided further that the right allowed herein, together with the amount secured under any other right existing for the same lands shall not exceed 4.50 acre-feet for each acre irrigated in any one year, provided further, that the part declared herein to be supplemental irrigation, the right allowed may, in the interest of conserving ground water supplies, be exercised at times when water is available in the ground water supply provided the total quantity diverted from all sources of supply does not exceed the limitation allowed herein.

This is a final order in other than contested case. This order is subject to judicial review under ORS 183.484. Any petition for judicial review must be filed within the 60 day time period specified by ORS 183.484(2). A petition for reconsideration may be granted or denied by the Director, and if no action is taken within 60 days following the date the petition was filed, the petition shall be deemed denied.

The use of water during the period from November 15 to the last day of February of each year shall not establish priority against future appropriation for beneficial use or storage for such beneficial uses, other than similar rights for irrigation from November 15 to the last day of February.

The use shall conform to such reasonable rotation system as may be ordered by the proper state officer.
