RE: Transfer Applications 10323 and 10324

Dear Mr. Blackburn,

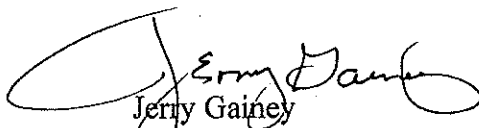

The Department received the Claim of Beneficial Use (Claim) for the above referenced transfers on August 13, 2009. We are returning the Claim because:

- A. The required fee of \$150 was not submitted with the Claim.
- B. The Claim references incorrect transfer numbers. See attached transfer order.

The fee requirement for the submittal of a Claim of Beneficial Use is a new fee enacted by the 2009 Legislature. The fee went into effect on July 24, 2009.

If you have any questions, please feel free to contact me at 503-986-0812.

Sincerely,

Jerry Gainey

In my opinion (assuming the right is valid), the proposed change

☒ MAY BE MADE WITHOUT INJURY ☐ WOULD RESULT IN INJURY\* to an existing water right.

\*The approval of this transfer application would result in injury to other water rights because

In my opinion, the order approving the subject transfer application should include the following in regard to the appropriator installing suitable measuring devices in the diversion works:

This application proposes a change in POU and five additional POAs, All wells involved are developing the same aquifer developed in valley-fill and interbedded volcanic sediments. The authorized wells (1, 2, 3) are HARN 1146, 1144 & 1145 and the proposed wells (4-8) are HARN 51265, 51253, 51256, 51317 & 51260.

I find that the proposed change may be made without injury provided the following: the rights are valid and the Watermaster can approve the proposal.

SUBJECT: Transfer Applications T-10323 and T-10324

Please find enclosed the Preliminary Determination indicating that, based on the information available, the Department intends to approve applications T-10323 and T-10324. This document is an intermediate step in the approval process; water may not be used legally as proposed in the transfer applications until a Final Order has been issued by the Department. Please read this entire letter carefully to determine your responsibility for additional action.

A public notice is being published in the Department's weekly publication simultaneously with issuance of the Preliminary Determination. The notice initiates a 30-day period in which any person may file either a protest opposing the decision proposed by the Department in the Preliminary Determination or a standing statement supporting the Department's decision.

Because the new points of appropriation are more than ¼ mile from the authorized point of appropriation, the applicant is responsible for giving public notice of the transfer changes in a local newspaper having a general circulation in the area of the water right. The notice must be published at least once a week for three consecutive weeks. We have prepared the notice for you (enclosed). The deadline for individuals to file protests or standing statements is 30 days after the date of last publication. Please have the newspaper insert the date of last publication in the proper place.

After publication, the Department needs to receive an **affidavit of publication** specifying the dates the notice was published. Please have the newspaper prepare and mail an original affidavit to me, at the address above, by **September 14, 2007**.

If no protest is filed, the Department will issue a Final Order consistent with the Preliminary Determination. You should receive a copy of the Final Order about 30 days after the close of the protest period.

If a protest is filed, the application may be referred to a contested case proceeding. A contested case provides an opportunity for the proponents and opponents of the decision proposed in the Preliminary Determination to present information and arguments supporting their position in a quasi-judicial proceeding.

Please do not hesitate to contact me at (503) 986-0886 or [Patrick.K.Starnes@wrdd.state.or.us](mailto:Patrick.K.Starnes@wrdd.state.or.us) if I may be of assistance.

Sincerely,

*Sarah Henderson*

SUBJECT: WATER RIGHT TRANSFER # 10323

A change in: POD POD POA USE of water.

In the name(s) of Jett & Dorothy Blackburn, Family Trust

In my opinion (assuming the right is valid), the proposed change

☒ MAY BE MADE WITHOUT INJURY WOULD RESULT IN INJURY\* to an existing water right.

\*The approval of this transfer application would result in injury to other water rights because

\_\_\_\_\_  
\_\_\_\_\_  
\_\_\_\_\_

The existing right may not be valid because \_\_\_\_\_

\_\_\_\_\_  
\_\_\_\_\_

Headgate notices HAVE HAVE NOT Been issued for diversion from the source(s) which serve(s) this right.

If for change in point of diversion, is there any intervening point(s) for diversion between the authorized and proposed points of diversion? (Yes or No) \_\_\_\_\_

In my opinion, the order approving the subject transfer application should include the following in regard to the appropriator installing suitable measuring devices in the diversion works:

\_\_\_\_\_ (1) PRIOR to the diverting of water at the new point of diversion . . .

\_\_\_\_\_ (2) WHEN IN the judgement of the watermaster it becomes necessary . . .

The enclosed copy of the transfer application and map(s) is for your records.

This application proposes a change in POU and five additional POAs. All wells involved are developing the same aquifer developed in valley-fill and interbedded volcanic sediments. The authorized wells (1, 2, 3) are HARN 1146, 1144 & 1145 and the proposed wells (4-8) are HARN 51265, 51253, 51256, 51317 & 51260.

I find that the proposed change may be made without injury provided the following: the rights are valid and the Watermaster can approve the proposal.

SUBJECT: Application T-10323 and T-10324

Enclosed find a draft of our Preliminary Determination regarding transfer applications T-10323 and T-10324. The document reflects the Department's conclusion that, based on the information currently available, the transfer will be approved. This draft is intended to provide you with an opportunity to comment on our findings and conclusions should you wish to do so. Please review the draft carefully to evaluate whether the document is consistent with your intent in seeking the transfer, and whether you agree with the proposed action.

At this time, you must submit a report of ownership and lien information prepared within the last three months by a title company. If there are additional lienholders identified in the report that have not previously been notified of the transfer, you must send notice of the transfer to them, and submit copies of each such notice to the Department to document that each lienholder has been informed of the transfer.

Because some of the new points of appropriation are more than ¼ mile from the authorized point of appropriation the applicant is responsible for publishing notice of the transfer in a local newspaper having a general circulation in the area of the water right. The notice must be published at least once a week for three consecutive weeks. We will provide a copy of the required notice to you upon issuance of the Preliminary Determination.

Issuance of the Preliminary Determination will occur shortly after we receive both your written response and the report of ownership and lien information. If we do not receive your response and the report by July 12, 2007, a Preliminary Determination may be issued denying the application as incomplete.

Please do not hesitate to contact me at (541) 523-8224 Ext. 35 if I may be of assistance.

Sincerely,

Jason Spriet

Reference: Transfer 10323

On February 21, 2007 we received your water right transfer application requesting a place of use and point of appropriation change for use of water from WELLS, tributary to MALHEUR LAKE. The application was accompanied by \$1225. Our receipt 86344 is enclosed.

By copy of this letter, we are asking the Watermaster for his report regarding the potential for injury to existing water rights which may be caused by the change.

Your application will be examined to determine if additional information is needed. You will be contacted following this examination.

Except as provided under ORS 540.510(3) for municipalities, you may not use water for the new use, in the new place of use or from the new point of diversion until the transfer application has been approved. In order to avoid any possible forfeiture of the water right, you should continue to use the water as described by your existing water right. If the land is sold before the transfer is approved, the buyer's consent to the transfer will be required unless a recorded deed or other legal document clearly established that the water right was not conveyed in the sale.

We will notify you if additional information or corrections to the application or map are required.

If you have any questions, please call the Transfer Section, (503)986-0883.
