7. Water has been used within the last five years according to the terms and conditions of the right. There is no information in the record that would demonstrate that the right is subject to forfeiture under ORS 540.610.
8. A pump, pipeline, and sprinkler system sufficient to use the full amount of water allowed under the existing right were present within the five-year period prior to submittal of Application T-10363.
9. The proposed change would not result in enlargement of the right.

10. The proposed change would not result in injury to other water rights.

Conclusions of Law

The additional points of appropriation proposed in application T-10363 are consistent with the requirements of ORS 537.705 and ORS 540.505 to 540.580, and OAR 690-380-5000.

Now, therefore, it is **ORDERED**:

1. The additional points of appropriation proposed in application T-10363 are approved.
2. The right to the use of the water is restricted to beneficial use at the place of use described and is subject to all other conditions and limitations contained in Certificate 83368 and any related decree.
3. Water right certificate 83368 is cancelled.
4. Water shall be acquired from the same aquifer (water source) as the original points of appropriation.
5. The quantity of water diverted at the additional points of appropriation, together with that diverted at the original points of appropriation, shall not exceed the quantity of water lawfully available at the original points of appropriation.
6. When required by the Department, the water user shall install, maintain and operate an in-line flow meter or other suitable device for measuring and recording the quantity of water diverted. The type and plans of the measuring device must be approved by the Department prior to beginning construction and shall be installed under the general supervision of the Department.
7. The approved changes shall be completed and full beneficial use of the water shall be made on or before **October 1, 2010**. A Claim of Beneficial Use prepared by a Certified Water Rights Examiner shall be submitted by the applicant to the Department within one year after the deadline for completion of the changes and full beneficial use of the water.
8. When satisfactory proof of the completed changes is received, a new certificate confirming the right transferred will be issued.

Attachments: Well 10 information.pdf; COBU well list.pdf

Hi Darrick and Jerry,

I am working on preparing a certificate for T-10363 under a reimbursement authority project.

A condition of the transfer final order issued February 24, 2009 in Special Order Volume 77, Page 318, reads:
"Water shall be acquired from the same aquifer (water source) as the original points of appropriation."

There are 9 original wells and 2 additional wells for a total of 11 wells.

The Claim of Beneficial Use received April 17, 2015 by Gary L DeJarnatt, CWRE, lists the following correlations of wells (see pdf):

Well 1 (original) -- HARN 1098
Well 2 (original) -- HARN 1097
Well 3 (original) -- HARN 1323
Well 4 (original) -- HARN 1322
Well 5 (original) -- HARN 50887
Well 6 (original) -- HARN 50315/HARN 51793
Well 7 (original) -- HARN 1319/HARN 51543
Well 8 (original) -- HARN 1318/HARN 51539
Well 9 (original) -- N/A
Well 10 (additional) -- N/A -- apparently there is no well log, but see the attached pdf
Well 11 (additional) -- HARN 50640

QUESTION: Are the two new wells (Well 10 and Well 11) in the same aquifer as the nine original wells?

Thanks for your help!
Kerry

The wells shall be maintained in accordance with the General Standards for the Construction and Maintenance of Water Wells in Oregon.

Water shall be acquired from the same aquifer (water source) as the original points of appropriation.

The quantity of water diverted at the additional points of appropriation, together with that diverted at the original points of appropriation, shall not exceed the quantity of water lawfully available from the original points of appropriation

When required by the Department, the water user shall install, maintain, and operate an in-line flow meter or other suitable device for measuring and recording the quantity of water diverted. The type and plans of the measuring device must be approved by the Department prior to beginning construction and shall be installed under the general supervision of the Department.

The right to the use of the water for the above purpose is restricted to beneficial use on the lands or place of use described.

This certificate is issued to confirm TWO ADDITIONAL POINTS OF APPROPRIATION approved by an order of the Water Resources Director entered FEBRUARY 24, 2009, at Special Order Volume 77, Page 318, approving Transfer Application 10363, supersedes Certificate 83368, State record of Water Right Certificates.

NOTICE OF CERTIFICATE ISSUANCE

The attached certificate confirms the water right established under the terms of a permit issued by this department. The water right is now appurtenant to the specific place where the use was established as described by the certificate. The water right is limited to a specific amount of water, but not more than can be beneficially used for the purposes stated within the certificate.

This is a final order in other than a contested case. This order is subject to judicial review under ORS 183.484. Any petition for judicial review must be filed within **60 days of the mailing date stated above** as specified by ORS 183.484(2).

This statement of judicial review rights is required under ORS 536.075; it does not alter or add to existing review rights or create review rights that are not otherwise provided by law.

Under ORS 537.260 and 537.270, a water right certificate may be contested before the Water Resources Department within three (3) months of the date it is issued. If a certificate is contested, the qualifying contestant shall be offered an administrative hearing.

Oregon law does not allow the Director to reissue a certificate because of a change in the ownership of the appurtenant place of use. The water must be controlled and not wasted. To change the location of the point of diversion, the character of use, or the location of use requires the advance approval of the Water Resources Director.

If any portion of this water right is not used for five or more consecutive years, then that portion of the right may be subject to forfeiture according to ORS 540.610. Land enrolled in a Federal Reserve Program is not subject to forfeiture during the period of enrollment. Other exceptions to forfeiture are explained in ORS 540.610.

If you have any questions please contact Kerry Kavanagh at 503-986-0927.

SUBJECT: Transfer Application T-10363

Please find enclosed the Preliminary Determination indicating that, based on the information available, the Department intends to approve application T-10363. This document is an intermediate step in the approval process; water may not be used legally as proposed in the transfer application until a Final Order has been issued by the Department. Please read this entire letter carefully to determine your responsibility for additional action.

A public notice is being published in the Department's weekly publication simultaneously with issuance of the Preliminary Determination. The notice initiates a 30-day period in which any person may file either a protest opposing the decision proposed by the Department in the Preliminary Determination or a standing statement supporting the Department's decision.

Because the new point of appropriation is more than ¼ mile from the authorized point of appropriation, the applicant is responsible for giving public notice of the transfer changes in a local newspaper having a general circulation in the area of the water right. The notice must be published at least once a week for three consecutive weeks.

We have prepared the notice for you (*copy enclosed*). The deadline for individuals to file protests or standing statements is 30 days after the date of last publication. Please have the newspaper insert the date of last publication in the proper place. After publication, the Department needs to receive an affidavit specifying the dates the notice was published.

Typically, the newspaper will prepare and mail an original *affidavit of publication* to the Department; however, you will want to request specifically that they do so. The newspaper can mail the affidavit to me at the address above.

If no protest is filed, the Department will issue a Final Order consistent with the Preliminary Determination. You should receive a copy of the Final Order about 30 days after the close of the protest period.

If a protest is filed, the application may be referred to a contested case proceeding. A contested case provides an opportunity for the proponents and opponents of the decision proposed in the Preliminary Determination to present information and arguments supporting their position in a quasi-judicial proceeding.

Please do not hesitate to contact me at (503) 986-0892 or by email, Kody.J.Thurgood@wrdd.or.state.us, if I may be of assistance.

Sincerely,

Field Services Division

ORS 537.705 and 540.505 to 540.580 establish the process in which a water right holder may submit a request to transfer the point of appropriation, place of use, or character of use authorized under an existing water right. OAR Chapter 690, Division 380 implements the statutes and provides the Department's procedures and criteria for evaluating transfer applications.

Transfer Review Criteria (OAR 690-380-4010)

7. A pump, pipeline, and sprinkler system sufficient to use the full amount of water allowed under the existing right were present within the five-year period prior to submittal of Application T-10363.
8. The proposed change would not result in enlargement of the right.
9. The proposed change would not result in injury to other water rights.

Determination and Proposed Action

The additional points of appropriation proposed in application T-10363 appear to be consistent with the requirements of ORS 537.705 and 540.505 to 540.580 and OAR 690-380-4030. If protests are not filed pursuant to OAR 690-380-4030, the application will be approved.

If application T-10363 is approved, the final order will include the following:

1. The additional points of appropriation proposed in application T-10363 are approved.
2. *The right to the use of the water is restricted to beneficial use at the place of use described and is subject to all other conditions and limitations contained in Certificate 83368 and any related decree.*

3. *Water right certificate 83368 is cancelled.*
4. *Water shall be acquired from the same aquifer (water source) as the original points of appropriation.*
5. *The quantity of water diverted at the additional points of appropriation, together with that diverted at the original points of appropriation, shall not exceed the quantity of water lawfully available at the original points of appropriation.*
6. *When required by the Department, the water user shall install, maintain and operate an in-line flow meter or other suitable device for measuring and recording the quantity of water diverted. The type and plans of the measuring device must be approved by the Department prior to beginning construction and shall be installed under the general supervision of the Department.*
7. *The approved changes shall be completed and full beneficial use of the water shall be made on or before October 1, 2009. A Claim of Beneficial Use prepared by a Certified Water Rights Examiner shall be submitted by the applicant to the Department within one year after the deadline for completion of the changes and full beneficial use of the water.*
8. *When satisfactory proof of the completed changes is received, a new certificate confirming the right transferred will be issued.*

To: Ground Water Rights Files Date: August 21, 2007

From: Michael J. Zwart

Subject: Application Review: T-10363, Spencer Childers

This application proposes two additional POAs as a result of a lack of efficient production from two (or more?) of the nine authorized wells. In particular, authorized well #9 is not adequate to provide for two pivots it was intended to supply. Two additional wells, #10 (no log on file, but general construction and production information is included) and #11 (HARN 50640) are proposed to make up the deficiency. All wells very likely develop the same aquifer despite the lack of well logs for all of them.

I find that the proposed change may be made without injury provided the following: the right is valid and the Watermaster can approve the proposal.

I do have some questions, I tried to call, but it said your mailbox was full. I am showing the certificate under a different cert # of 81597, dated 8/15/05. I wanted to make sure we are working on the same thing. I was also concerned that the draft said that cert # 83368 would be cancelled. Lastly, what do you need from Mr. Childers for the ownership and lien information? He paid cash for this ranch, so there is no lien holder. I faxed you a copy of the Amerititle escrow instructions showing the vested title is in Spencer L. Childers and Florence E. Childers, Co-TTEES of the Spencer L. Childers Family Trust. Did you need something else? I apologize for all of the grief, as I told you before, I used to work for Stock Brokers, so water rights are about as foreign to me as you can get. Thanks for all of your help,

SUBJECT: Application T-10363

Enclosed is a draft of our Preliminary Determination regarding transfer application T-10363. The document reflects the Department's conclusion that, based on the information currently available, the transfer will be approved. This draft is intended to provide you with an opportunity to comment on our findings and conclusions should you wish to do so. Please review the draft carefully to evaluate whether the document is consistent with your intent in seeking the transfer, and whether you agree with the proposed action.

Because the new points of appropriation are more than 1/4 mile from the authorized points of appropriation, the applicant is responsible for publishing notice of the transfer in a local newspaper having a general circulation in the area of the water right. The notice must be published at least once a week for three consecutive weeks. We will provide a copy of the required notice to you upon issuance of the Preliminary Determination.

Issuance of the Preliminary Determination will occur shortly after we receive both your written response and the report of ownership and lien information. If we do not receive your response and the report by May 21, 2008, a Preliminary Determination may be issued denying the application as incomplete.

Please do not hesitate to contact me at 541-523-8224 x 36 or Carrie.R.Jones@wrd.state.or.us if I may be of assistance.

Sincerely,

5. Water has been used within the last five years according to the terms and conditions of the right, and there is no information in the record that would demonstrate that the right is subject to forfeiture under ORS 540.610.
6. A pump, pipeline, and sprinkler system sufficient to use the full amount of water allowed under the existing right were present within the five-year period prior to submittal of Application T-10363.
7. The proposed change would not result in enlargement of the right.
8. The proposed change would not result in injury to other water rights.

Determination and Proposed Action

The additional points of appropriation proposed in application T-10363 appears to be consistent with the requirements of ORS 537.705 and 540.505 to 540.580 and OAR 690-380-. If protests are not filed pursuant to OAR 690-380-4030, the application will be approved.

If application T-10363 is approved, the final order will include the following:

9. *The additional points of appropriation proposed in application T-10363 are approved.*
10. *Water right certificate 83368 is cancelled.*
11. *The right to the use of the water is restricted to beneficial use at the place of use described, and is subject to all other conditions and limitations contained in Certificate 81597 and any related decree.*
12. *Water shall be acquired from the same aquifer (water source) as the original points of appropriation.*
13. *The quantity of water diverted at the additional points of appropriation, together with that diverted at the original points of appropriation, shall not exceed the quantity of water lawfully available at the original points of appropriation.*

14. *When required by the Department, the water user shall install, maintain and operate an in-line flow meter or other suitable device for measuring and recording the quantity of water diverted. The type and plans of the measuring device must be approved by the Department prior to beginning construction and shall be installed under the general supervision of the Department.*
15. *The approved changes shall be completed and full beneficial use of the water shall be made on or before October 1, 2009. A Claim of Beneficial Use prepared by a Certified Water Rights Examiner shall be submitted by the applicant to the Department within one year after the deadline for completion of the changes and full beneficial use of the water.*
16. *When satisfactory proof of the completed changes is received, new certificates confirming the rights transferred will be issued.*

Now, therefore, it is ORDERED:

1. The additional points of appropriation proposed in application T-10363 are approved.
2. The right to the use of the water is restricted to beneficial use at the place of use described and is subject to all other conditions and limitations contained in Certificate 83368 and any related decree.
3. Water right certificate 83368 is cancelled.
4. Water shall be acquired from the same aquifer (water source) as the original points of appropriation.
5. The quantity of water diverted at the additional points of appropriation, together with that diverted at the original points of appropriation, shall not exceed the quantity of water lawfully available at the original points of appropriation.
6. When required by the Department, the water user shall install, maintain and operate an in-line flow meter or other suitable device for measuring and recording the quantity of water diverted. The type and plans of the measuring device must be approved by the Department prior to beginning construction and shall be installed under the general supervision of the Department.
7. The approved changes shall be completed and full beneficial use of the water shall be made on or before **October 1, 2010**. A Claim of Beneficial Use prepared by a Certified Water Rights Examiner shall be submitted by the applicant to the Department within one year after the deadline for completion of the changes and full beneficial use of the water.
8. When satisfactory proof of the completed changes is received, a new certificate confirming the right transferred will be issued.
