OF THE  
STATE OF OREGON**

In the Matter of Transfer Application	)	FINAL ORDER APPROVING AN
T-10327, Klamath County	)	ADDITIONAL POINT OF
	)	APPROPRIATION, A CHANGE IN
	)	PLACE OF USE, AND A CHANGE IN
	)	CHARACTER OF USE

**Authority**

ORS 537.705 and 540.505 to 540.580 establish the process in which a water right holder may submit a request to transfer the point of appropriation, place of use, or character of use authorized under an existing water right. OAR Chapter 690, Division 380 implements the statutes and provides the Department's procedures and criteria for evaluating transfer applications.

**Applicant**

LISKEY FARMS INC.  
4650 LOWER KLAMATH LAKE RD.  
KLAMATH FALLS, OR 97603

**Findings of Fact**

**Background**

1. On February 28, 2007, Liskey Farms Inc. filed an application to change the character of use, add a point of appropriation, and change the place of use under Certificate 67664. The Department assigned the application number T-10327.
2. On May 1, 2007, the applicant submitted a transfer application map, identifying the proposed additional point of appropriation, place of use and character of use requested under Transfer T-10327.
3. On May 1, 2007, Tracy Liskey of Liskey Farms, Inc., stated that fish culture and space heating had occurred year round.
4. The applicant submitted a revised application on May 8, 2007, further clarifying the proposed changes under Transfer T-10327.
5. The right to be transferred is as follows:  
**Certificate:** 67664 in the name of LISKEY FARMS, INC. (perfected under Permit G-9547)  
**Use:** SPACE HEATING and FISH CULTURE

This is an order in other than a contested case. This order is subject to judicial review under ORS 183.484. Any petition for judicial review must be filed within the 60 day time period specified by ORS 183.484(2). Pursuant to ORS 536.075 and OAR 137-004-0080, you may either petition for judicial review or petition the Director for reconsideration of this order. A petition for reconsideration may be granted or denied by the Director, and if no action is taken within 60 days following the date the petition was filed, the petition shall be deemed denied.

9. Notice of the application for transfer was published on March 13, 2007, pursuant to OAR 690-380-4000. No comments were filed in response to the notice.
10. On May 22, 2007, the Department e-mailed a copy of the draft Preliminary Determination proposing to approve Transfer Application T-10327 to the applicant. The draft Preliminary Determination set forth a deadline in which the applicant could respond.
11. The applicant responded to the draft Preliminary Determination on May 23, 2007. The applicant provided a statement agreeing to the inclusion of a condition necessary to prevent enlargement of the right and requested that the Department proceed with issuance of the Preliminary Determination. Additionally, due to the complex nature of the project, the applicant requested additional time through October 1, 2012, to allow sufficient time to complete the proposed changes. The revised date for completion of the changes is as stated in this order.
12. On July 18, 2007, the Department issued a Preliminary Determination proposing to approve Transfer T-10327 and mailed a copy to the applicant. Additionally, notice of the Preliminary Determination for the transfer application was published on the Department's weekly notice on July 24, 2007, and in the *Herald and News* newspaper on August 22 and 29 and September 5 and 12, 2007, pursuant to ORS 540.520 and OAR 690-380-4020. No protests were filed in response to the notice.

***Transfer Review Criteria (OAR 690-380-4010)***

13. Water has been used within the last five years according to the terms and conditions of the right, and there is no information in the record that would demonstrate that the right is subject to forfeiture under ORS 540.610.
14. A pump, pipeline, and sprinkler system sufficient to use the full amount of water allowed under the existing right were present within the five-year period prior to submittal of Application T-10327.
15. Certificate 67664 does not have a duty limit. As defined by OAR 690-380-0100(2), the proposed character of use change could result in enlargement of the right if not conditioned so as to prevent use of more water than could have been beneficially used without waste for the existing authorized use. The best currently available information indicates that beneficial use of water for space heating and fish culture would not likely exceed 2,530 acre-feet per year.

16. The proposed changes, as conditioned to limit use to a total annual volume of 2,530 acre feet, would not result in enlargement of the right.
17. The proposed changes would not result in injury to other water rights.

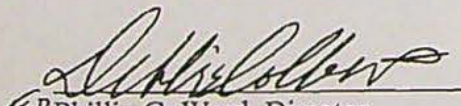

#### Conclusions of Law

The changes in character of use, place of use and an additional point of appropriation proposed in application T-10327 are consistent with the requirements of ORS 537.705 and 540.505 to 540.580 and OAR 690-380-5000.

#### Now, therefore, it is ORDERED:

1. The changes in character of use, place of use and an additional point of appropriation proposed in application T-10327 are approved.
2. Water right certificate 67664 is cancelled.
3. The right to the use of the water is restricted to beneficial use at the place of use described, and is subject to all other conditions and limitations contained in Certificate 67664.
4. Water shall be acquired from the same aquifer (water source) as the original points of appropriation.
5. The quantity of water diverted at the additional point of appropriation, together with that diverted at the original points of appropriation, shall not exceed the quantity of water lawfully available at the original points of appropriation.
6. The use of water under the right evidenced by Certificate 67664 shall be limited to a total annual volume of 2,530 acre feet.
7. The approved changes shall be completed and full beneficial use of the water shall be made on or before **October 1, 2012**. A Claim of Beneficial Use prepared by a Certified Water Rights Examiner shall be submitted by the applicant to the Department within one year after the deadline for completion of the changes and full beneficial use of the water.
8. When satisfactory proof of the completed changes is received, a new certificate confirming the right transferred will be issued.

Dated at Salem, Oregon this 17 day of October 2007.

confirms the right to use the waters of WELLS 1 AND 2 in the LOWER KLAMATH LAKE BASIN for SPACE HEATING AND FISH CULTURE.

The right has been perfected under Permit G-9547. The date of priority is AUGUST 17, 1981. The right is limited to not more than 4.90 CUBIC FEET PER SECOND, BEING 2.20 CFS FROM WELL 1 AND 2.70 CFS FROM WELL 2, or its equivalent in case of rotation, measured at the wells.

The wells are located as follows:

LOT 1 (SW 1/4 NE 1/4), LOT 2 (SE 1/4 NE 1/4), SECTION 34, T 40 S, R 9 E, W.M.; WELL 1 - 1520 FEET SOUTH AND 1780 FEET WEST; WELL 2 - 1760 FEET SOUTH AND 930 FEET WEST, BOTH FROM THE NORTHEAST CORNER OF SECTION 34.

The right shall conform to such reasonable rotation system as may be ordered by the proper state officer.

A description of the place of use under the right, and to which such right is appurtenant, is as follows:

LOT 1 (SW 1/4 NE 1/4)	SPACE HEATING
LOT 4 (SW 1/4 NE 1/4)	SPACE HEATING & FISH CULTURE
LOT 2 (SE 1/4 NE 1/4)	SPACE HEATING
SECTION 34	
TOWNSHIP 40 SOUTH, RANGE 9 EAST, W.M.	

The wells shall be maintained in accordance with the General Standards for the Construction and Maintenance of Water Wells in Oregon.

The right to the use of the water for the above purpose is restricted to beneficial use on the lands or place of use described.

Norm,

Based on my discussions with co-workers and your clarification that the use would be for cooling towers associated with geothermal power production, it does not sound like there would any problem with developing the use under the transfer.

(25) "Industrial Water Use" means the use of water associated with the processing or manufacture of a product. These uses include, but are not limited to, construction, operation and maintenance of an industrial site, facilities and buildings and related uses. Examples of these uses include, but are not limited to, general construction; road construction; non-hydroelectric power production, including down-hole heat exchange and geothermal; agricultural or forest product processing; and fire protection. Such use shall not include irrigation or landscape maintenance of more than 1/2 acre.

Let me know if you have nay additional questions.

Gerry,

Sorry to bother you again.

I have been contacted by Raser Technologies concerning use of water under transfer T-10327 (add POA, chg pl use and use) and application G-16813.

I noticed the definition of "industrial use" includes non-hydro power. They are proposing to use approximately 400 acre feet of water under the transfer for their cooling towers.

Note: They will be pumping water from the wells into a re-circulation pond and pumping from the pond to the cooling towers. Water will be added to the re-circulation pond as needed for evaporation and seepage losses. It is assumed this will be about 400 acre feet per year. They will probably enter into some kind of Lease agreement with Liskey Farms for use of the water. Total Duty for the transfer is 2530 acre feet. It looks like the proposed place of use includes the entire ranch property.

Do you see any problem with developing this use as part of the proof for the transfer?

RE: Transfer T-10327

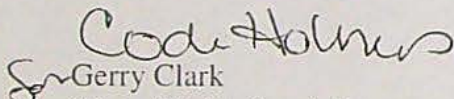

Dear Transfer Holder,

On September 5, 2017, the Department received the Claim of Beneficial Use that you submitted for the above referenced file.

Enclosed, you will find as refund check in the amount of \$200.00. You are receiving this check because the right involved in the transfer has a priority date prior to July 9, 1987. Due to the priority date of the right, there was no fee required to submit the Claim.

If you have any additional questions, please feel free to contact me at 503-986-0811.

Sincerely,

  
Gerry Clark

**A fee of \$200 must accompany this form for permits  
with priority dates of July 9, 1987, or later.**

**A fee of \$200 must accompany this form for any Transfer final orders  
including a water right with a priority date of July 9, 1987, or later.**

**Example – A transfer involves 5 rights and one of the rights  
has a priority date of July 9, 1987, or later, the fee is required.**

**Claims received without the correct fee of \$200 will be returned.**

**A separate form shall be completed for each permit.**

*In cases where a permit has been amended through the permit amendment process, a separate claim for the permit amendment is not required. Incorporate the permit amendment into the claim for the permit.*

This form is subject to revision. **Begin each new claim** by checking for a new version of this form at:  
[http://www.oregon.gov/owrd/pages/wr/cwre\\_info.aspx](http://www.oregon.gov/owrd/pages/wr/cwre_info.aspx)

The completion of this form is required by OAR 690-014-0100(1) and 690-014-0110(4).

Please type or print in dark ink. If this form is found to contain errors or omissions, it may be returned to you. **Every item must have a response.** If any requested information does not apply to the claim, insert "NA." **Do not delete or alter any section of this form unless directed by the form.** The Department may require the submittal of additional information from any water user or authorized agent.

"Section 8" of this form is intended to aid in the completion of this form and should not be submitted.

If you have questions regarding the completion of this form, please call 503-986-0900 and ask for the Certificate Section.

The Department has a program that allows it to enter into a voluntary agreement with an applicant for expedited services. Under such an agreement, the applicant pays the cost to hire additional staff that would not otherwise be available. This program means a certificate may be issued in about a month. For more information on this program see

## SECTION 3

### CLAIM DESCRIPTION

1. Point of diversion/appropriation name or number:

POINT OF DIVERSION/APPROPRIATION (POD/POA) NAME OR NUMBER (CORRESPOND TO MAP)	WELL LOG ID # FOR ALL WORK PERFORMED ON THE WELL (IF APPLICABLE)	WELL TAG # (IF APPLICABLE)
Well #1	Klam 14570 & Klam 14580	
Well #2	Klam 14569 & Klam 14581	
Well #3	Klam 55747 & Klam 56949	L-91938

Attach each well log available for the well (include the log for the original well and any subsequent alterations, reconstructions, or deepenings)

2. Point of diversion/appropriation source and, if from surface water, the tributary:

POD/POA NAME OR NUMBER	SOURCE	TRIBUTARY
Well #1	Hard gray shale	
Well #2	Hard gray shale	
Well #3	Gravel with pumice	

3. Developed use(s), period of use, and rate for each use:

POD/POA NAME OR NUMBER	USES	IF IRRIGATION, LIST CROP TYPE	SEASON OR MONTHS WHEN WATER WAS USED	ACTUAL RATE OR VOLUME USED (CFS, GPM, OR AF)
Well #1	Commercial, Industrial and Fish Culture		Year around	2.2 CFS
Well #2	Commercial, Industrial and Fish Culture		Year around	2.7 CFS
Well #3	Commercial, Industrial and Fish Culture		Year around	3.34 CFS
Total Quantity of Water Used				Wells #1, #2 & #3 used in combination for a total rate used of 4.9 CFS

4. Provide a general narrative description of the distribution works. This description must trace the water system from each point of diversion or appropriation to the place of use:

There are three wells connected by a system of pipelines and storage tanks. When the flow of water needed is less than the flow of any one of the wells, there are two 12,000 gallon storage tanks used as surge tanks (one for well #1 and another for well #2). When the tanks are nearly empty a float switch turns on either well #1 or #2 and refills the tank (well #3 is a back up well to be used in case well #1 or #2 is out of service). There is a system of pipelines as shown on the attached map. The pipe system delivers water to the greenhouses and the bypass water from heating the greenhouses is used in the ponds for rearing fish. There are two tanker fill stations as indicated on the attached map where water for dust control and construction is taken. The fill stations are where cement trucks take hot water for cold weather mixing of concrete. The geothermal water is also used for washing equipment (trucks, tractors etc.) and nursery pots and equipment. The hot water (190°F) is good for sterilizing nursery equipment and containers to control disease and pests.

Reminder: The map associated with this claim must identify the location of the point(s) of diversion, Donation Land Claims (DLC), Government Lots (GLot), and Quarter-Quarters (QQ).

5. Variations:

Was the use developed differently from what was authorized by the permit, permit amendment final order, or extension final order? If yes, describe below.

NO

(e.g. "The permit allowed three points of diversion. The water user only developed one of the points." or "The permit allowed 40.0 acres of irrigation. The water user only developed 10.0 acres.")

6. Claim Summary:

POD / POA NAME OR #	MAXIMUM RATE AUTHORIZED	CALCULATED THEORETICAL RATE BASED ON SYSTEM	AMOUNT OF WATER MEASURED	USE	# OF ACRES ALLOWED	# OF ACRES DEVELOPED
Well #1	2.2 CFS	2.49		Commercial, Industrial and Fish Culture	NA	NA
Well #2	2.7 CFS	3.36		Commercial, Industrial and Fish Culture	NA	NA
Well #3	In combination with #1 and / or #2 limit of 4.9 CFS	2.59		Commercial, Industrial and Fish Culture	NA	NA

## SECTION 4

### SYSTEM DESCRIPTION

Are there multiple PODs or POAs?

YES

If "YES" you will need to copy and complete Sections 4B through 4G for each POD/POA.

POD/POA Name or Number this section describes (only needed if there is more than one):

Well #1, Well #2 and Well #3

#### A. Place of Use

1. Is the right for municipal use?

NO

*If "YES" the table below may be deleted.*

**12. Additional notes or comments related to the system:****C. Groundwater Source Information (Well and Sump)**

1. Is the appropriation from ground water (well or sump)? **YES**

2. Describe the access port (type and location) or other means to measure the water level in the well:

¾ inch threaded port on the northeast side

3. If well logs are not available, provide as much of the following information as possible:

CASING DIAMETER	CASING DEPTH	TOTAL DEPTH	COMPLETION DATE OF ORIGINAL WELL	COMPLETION DATES OF ALTERATIONS	WHO THE WELL WAS DRILLED FOR	WELL DRILLED BY
See attached well logs Klam 14570 Klam 14580						

4. In addition to the information requested in item "3" above, provide any other information which may help the Department locate any well logs associated with this appropriation.

5. Is the appropriation from a dug well (sump)? **NO**

## D. Storage

1. Does the distribution system include in-system storage (e.g. storage tank, bulge in system / reservoir)

YES

If "YES" is it a: Storage Tank

YES

Bulge in System / Reservoir

NO

*Complete appropriate table(s), unused table may be deleted.*

2. Storage Tank:

MATERIAL (CONCRETE, FIBERGLASS, METAL, ETC.)	CAPACITY (IN GALLONS)	ABOVE GROUND OR BURIED
Steel	12,000 gallons	Above ground

3. Bulge in System / Reservoir:

NA		

## E. Gravity Flow Pipe

(THE DEPARTMENT TYPICALLY USES THE HAZEN-WILLIAM'S FORMULA FOR A GRAVITY FLOW PIPE SYSTEM)

1. Does the system involve a gravity flow pipe?

YES

*If "NO", items 2 through 4 relating to this section may be deleted.*

2. Complete the table:

PIPE SIZE	PIPE TYPE	"C" FACTOR	AMOUNT OF FALL	LENGTH OF PIPE	SLOPE	COMPUTED RATE OF WATER FLOW (IN CFS)

3. Provide calculations:

See attached sheet

Note: The 8" pipe listed above is the pipe from the storage tank for well #1 to the junction with the 12" pipeline. The 12" line is the same line also listed in the section for well #2 and #3.

4. If an actual measurement was taken, provide the following:

DATE OF MEASUREMENT	WHO MADE THE MEASUREMENT	MEASUREMENT METHOD	MEASURED QUANTITY OF WATER (IN CFS)
NA			

Attach measurement notes.

## F. Gravity Flow Canal or Ditch

(THE DEPARTMENT TYPICALLY USES MANNING'S FORMULA FOR CANALS AND DITCHES)

1. Is a gravity flow canal or ditch used to convey the water as part of the distribution system?

NO

## G. Reservoir

1. Does the claim involve a reservoir modified through a transfer?

NO

## Well #2

### B. Diversion and Delivery System Information

Provide the following information concerning the diversion and delivery system. Information provided must describe the equipment used to transport and apply the water from the point of diversion/appropriation to the place of use.

3. Provide calculations:

See attached calculation sheet.

Note: Well #3 is used as backup to well #1 & #2. For the calculation, the assumption is that pressure is limited by the lower of the two storage tanks. This calculation is rather academic in that the capacity of the pipeline is greater than the production of the well.

4. If an actual measurement was taken, provide the following:

DATE OF MEASUREMENT	WHO MADE THE MEASUREMENT	MEASUREMENT METHOD	MEASURED QUANTITY OF WATER (IN CFS)
NA			

Attach measurement notes.

## F. Gravity Flow Canal or Ditch

(THE DEPARTMENT TYPICALLY USES MANNING'S FORMULA FOR CANALS AND DITCHES)

1. Is a gravity flow canal or ditch used to convey the water as part of the distribution system?

NO

## G. Reservoir

1. Does the claim involve a reservoir modified through a transfer?

NO

## SECTION 5 CONDITIONS

All conditions contained in the permit, permit amendment, transfer final order, or any extension final order shall be addressed. Reports that do not address all performance related conditions will be returned.

### 1. Time Limits:

Permits, transfer final orders, and any extension final orders contain any or all of the following dates: the date when the actual construction work was to begin, the date when the construction was to be completed, and the date when the complete application of water to the proposed use was to be completed. These dates may be referred to as ABC dates. Describe how the water user has complied with each of the development timelines established in the permit, extension or transfer final order:

	DATE FROM PERMIT OR TRANSFER	DATE ACCOMPLISHED*	DESCRIPTION OF ACTIONS TAKEN BY WATER USER TO COMPLY WITH THE TIME LIMITS
ISSUANCE DATE	10-22-2007		
BEGIN CONSTRUCTION (A)		2007	Complete construction of well #3, install pipelines, install truck fill stations, install wash station, construct additional greenhouses, construct additional fish ponds.
COMPLETE CONSTRUCTION (B)	10-01-2012	2009	
COMPLETE APPLICATION OF WATER (C)	10-01-2012	2009	

\* MUST BE WITHIN PERIOD BETWEEN PERMIT, TRANSFER FINAL ORDER, OR ANY EXTENSION FINAL ORDER ISSUANCE AND THE DATE TO COMPLETELY APPLY WATER

### 2. Is there an extension final order(s)?

NO

*If "NO", you may delete item 3 in this section.*

### 4. Initial Water Level Measurements:

#### a. Was the water user required to submit an initial static water level measurement?

NO

*If "NO", items 4b through 4d relating to this section may be deleted.*

#### b. What month was the initial measurement to be taken in?

#### c. Was the measurement submitted to the Department?

NA

#### d. If the initial measurement was not submitted, provide that measurement now, if available:

DATE OF MEASUREMENT	MEASUREMENT MADE BY	METHOD	MEASUREMENT
NA			

5. Annual Static Water Level Measurements:

a. Was the water user required to submit annual static water level measurements? NO

6. Pump Test (Required for most ground water permits prior to issuance of a certificate)

a. Did the permit require the submittal of a pump test? NO

7. Measurement Conditions:

a. Does the permit, permit amendment, transfer final order, or any extension final order require the installation of a meter or approved measuring device? NO

8. Recording and reporting conditions

a. Is the water user required to report the water use to the Department? NO

9. Fish Screening

a. Are any points of diversion required to be screened to prevent fish from entering the point of diversion? NO

10. By-pass Devices

a. Are any points of diversion required to have a by-pass device to prevent fish from entering the point of diversion? NO

**Reminder: If by-pass devices were required, the COBU map must indicate their location in relation to the point of diversion.**

11. Other conditions required by permit, permit amendment final order, extension final order, or transfer final order:

a. Were there special well construction standards? NO

b. Was submittal of a ground water monitoring plan required? NO

c. Was the water user required to restore the riparian area if it was disturbed? NO

d. Was a fishway required? NO

e. Was submittal of a letter from an engineer required prior to storage of water? NO

f. Was submittal of a water management and conservation plan required? NO

g. Other conditions? NO

If "YES" to any of the above, identify the condition and describe the water user's actions to comply with the condition(s):

## SECTION 7

### CLAIM OF BENEFICIAL USE MAP

The Claim of Beneficial Use Map must be submitted with this claim. Claims submitted without the Claim of Beneficial Use map will be returned. The map shall be submitted on poly film at a scale of 1" = 1320 feet, 1" = 400 feet, or the original full-size scale of the county assessor map for the location.

Provide a general description of the survey method used to prepare the map. Examples of possible methods include, but are not limited to, a traverse survey, GPS, or the use of aerial photos. If the basis of the survey is an aerial photo, provide the source, date, series and the aerial photo identification number.

Used aerial photo from ESRI World Imagery available online as of July 2017. Measurements are made using ArcView 10.4

#### Map Checklist

Please be sure that the map you submit includes ALL the items listed below.  
(Reminder: Incomplete maps and/or claims may be returned.)

- ☒ Map on polyester film
- ☒ Appropriate scale (1" = 400 feet, 1" = 1320 feet, or the original full-size scale of the county assessor map)
- ☒ Township, Range, Section, Donation Land Claims, and Government Lots
- ☒ If irrigation, number of acres irrigated within each projected Donation Land Claims, Government Lots, Quarter-Quarters
- ☒ Locations of fish screens and/or fish by-pass devices in relationship to point of diversion
- ☒ Locations of meters and/or measuring devices in relationship to point of diversion or appropriation
- ☒ Conveyance structures illustrated (pumps, reservoirs, pipelines, ditches, etc.)
- ☒ Point(s) of diversion or appropriation (illustrated and coordinates)
- ☒ Tax lot boundaries and numbers
- ☒ Source illustrated if surface water
- ☒ Disclaimer ("This map is not intended to provide legal dimensions or locations of property ownership lines")
- ☒ Application and permit number or transfer number
- ☒ North arrow
- ☒ Legend
- ☒ CWRE stamp and signature

Norm,

Based on my discussions with co-workers and your clarification that the use would be for cooling towers associated with geothermal power production, it does not sound like there would any problem with developing the use under the transfer.

(25) "Industrial Water Use" means the use of water associated with the processing or manufacture of a product. These uses include, but are not limited to, construction, operation and maintenance of an industrial site, facilities and buildings and related uses. Examples of these uses include, but are not limited to, general construction; road construction; non-hydroelectric power production, including down-hole heat exchange and geothermal; agricultural or forest product processing; and fire protection. Such use shall not include irrigation or landscape maintenance of more than 1/2 acre.

Let me know if you have nay additional questions.

Gerry,

Sorry to bother you again.

I have been contacted by Raser Technologies concerning use of water under transfer T-10327 (add POA, chg pl use and use) and application G-16813.

I noticed the definition of "industrial use" includes non-hydro power. They are proposing to use approximately 400 acre feet of water under the transfer for their cooling towers.

Note: They will be pumping water from the wells into a re-circulation pond and pumping from the pond to the cooling towers. Water will be added to the re-circulation pond as needed for evaporation and seepage losses. It is assumed this will be about 400 acre feet per year. They will probably enter into some kind of Lease agreement with Liskey Farms for use of the water.

Total Duty for the transfer is 2530 acre feet. It looks like the proposed place of use includes the entire ranch property.

Do you see any problem with developing this use as part of the proof for the transfer?

Norm

Enclosed is a copy of the order approving your water right transfer application.

A time to complete the transfer is given the order. YOU SHOULD GIVE PARTICULAR ATTENTION TO THE TIME LIMIT. The water right for any portion of the authorized change in use or change in place of use NOT carried out within the time allowed will be lost.

An extension of the time limit can be allowed only upon a showing that diligent effort has been made to complete the actual change within the time allowed.

You have the requirement to hire a Certified Water Right Examiner (CWRE) to complete a Claim of Beneficial Use report and map which must be submitted to this department within one year of the date you completed the change or within one year of the completion date authorized in the transfer, whichever occurs first.

Sincerely,

*Sarah Henderson*

**Authority**

ORS 537.705 and 540.505 to 540.580 establish the process in which a water right holder may submit a request to transfer the point of appropriation, place of use, or character of use authorized under an existing water right. OAR Chapter 690, Division 380 implements the statutes and provides the Department's procedures and criteria for evaluating transfer applications.

**Applicant**

LISKEY FARMS INC.  
4650 LOWER KLAMATH LAKE RD.  
KLAMATH FALLS, OR 97603

**Findings of Fact**

**Background**

1. On February 28, 2007, Liskey Farms Inc. filed an application to change the character of use, add a point of appropriation, and change the place of use under Certificate 67664. The Department assigned the application number T-10327.
2. On May 1, 2007, the applicant submitted a transfer application map, identifying the proposed additional point of appropriation, place of use and character of use requested under Transfer T-10327.
3. On May 1, 2007, Tracy Liskey of Liskey Farms, Inc., stated that fish culture and space heating had occurred year round.
4. The applicant submitted a revised application on May 8, 2007, further clarifying the proposed changes under Transfer T-10327.
5. The right to be transferred is as follows:

**Certificate:** 67664 in the name of LISKEY FARMS, INC. (perfected under Permit G-9547)  
**Use:** SPACE HEATING and FISH CULTURE

This is an order in other than a contested case. This order is subject to judicial review under ORS 183.484. Any petition for judicial review must be filed within the 60 day time period specified by ORS 183.484(2). Pursuant to ORS 536.075 and OAR 137-004-0080, you may either petition for judicial review or petition the Director for reconsideration of this order. A petition for reconsideration may be granted or denied by the Director, and if no action is taken within 60 days following the date the petition was filed, the petition shall be deemed denied.

9. Notice of the application for transfer was published on March 13, 2007, pursuant to OAR 690-380-4000. No comments were filed in response to the notice.
10. On May 22, 2007, the Department e-mailed a copy of the draft Preliminary Determination proposing to approve Transfer Application T-10327 to the applicant. The draft Preliminary Determination set forth a deadline in which the applicant could respond.
11. The applicant responded to the draft Preliminary Determination on May 23, 2007. The applicant provided a statement agreeing to the inclusion of a condition necessary to prevent enlargement of the right and requested that the Department proceed with issuance of the Preliminary Determination. Additionally, due to the complex nature of the project, the applicant requested additional time through October 1, 2012, to allow sufficient time to complete the proposed changes. The revised date for completion of the changes is as stated in this order.
12. On July 18, 2007, the Department issued a Preliminary Determination proposing to approve Transfer T-10327 and mailed a copy to the applicant. Additionally, notice of the Preliminary Determination for the transfer application was published on the Department's weekly notice on July 24, 2007, and in the *Herald and News* newspaper on August 22 and 29 and September 5 and 12, 2007, pursuant to ORS 540.520 and OAR 690-380-4020. No protests were filed in response to the notice.

***Transfer Review Criteria (OAR 690-380-4010)***

13. Water has been used within the last five years according to the terms and conditions of the right, and there is no information in the record that would demonstrate that the right is subject to forfeiture under ORS 540.610.
14. A pump, pipeline, and sprinkler system sufficient to use the full amount of water allowed under the existing right were present within the five-year period prior to submittal of Application T-10327.
15. Certificate 67664 does not have a duty limit. As defined by OAR 690-380-0100(2), the proposed character of use change could result in enlargement of the right if not conditioned so as to prevent use of more water than could have been beneficially used without waste for the existing authorized use. The best currently available information indicates that beneficial use of water for space heating and fish culture would not likely exceed 2,530 acre-feet per year.

16. The proposed changes, as conditioned to limit use to a total annual volume of 2,530 acre feet, would not result in enlargement of the right.
17. The proposed changes would not result in injury to other water rights.

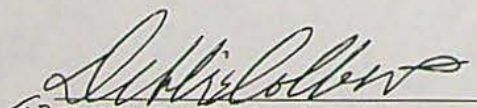

### Conclusions of Law

The changes in character of use, place of use and an additional point of appropriation proposed in application T-10327 are consistent with the requirements of ORS 537.705 and 540.505 to 540.580 and OAR 690-380-5000.

### Now, therefore, it is ORDERED:

1. The changes in character of use, place of use and an additional point of appropriation proposed in application T-10327 are approved.
2. Water right certificate 67664 is cancelled.
3. The right to the use of the water is restricted to beneficial use at the place of use described, and is subject to all other conditions and limitations contained in Certificate 67664.
4. Water shall be acquired from the same aquifer (water source) as the original points of appropriation.
5. The quantity of water diverted at the additional point of appropriation, together with that diverted at the original points of appropriation, shall not exceed the quantity of water lawfully available at the original points of appropriation.
6. The use of water under the right evidenced by Certificate 67664 shall be limited to a total annual volume of 2,530 acre feet.
7. The approved changes shall be completed and full beneficial use of the water shall be made on or before **October 1, 2012**. A Claim of Beneficial Use prepared by a Certified Water Rights Examiner shall be submitted by the applicant to the Department within one year after the deadline for completion of the changes and full beneficial use of the water.
8. When satisfactory proof of the completed changes is received, a new certificate confirming the right transferred will be issued.

Dated at Salem, Oregon this 17 day of October 2007.

### Notice of Preliminary Determination for Water Right Transfer T-10327

T-10327 filed by Liskey Farms, Inc., 4650 Lower Klamath Lake Rd., Klamath Falls, OR 97603, proposes a change in character of use, a change in place of use, and an additional point of appropriation under Certificate 67664. The right allows the use of 4.9 cfs (priority date August 17, 1981) from two wells in Sec. 34, T40S, R9E, W.M. (Lower

Klamath Lake Basin) for Space Heating and Fish Culture in Sec. 34. The applicant proposes to add a point of appropriation (Sec. 34, T40S, R9E, W.M.) located between the authorized wells, approximately 400 feet from each well; to change the place of use to Sec. 34 and 35; and to change the character of use to commercial, industrial, and fish culture. The Water Resources Department has concluded that the proposed transfer appears to be consistent with the requirements of ORS Chapter 540 and OAR 690-380-5000.

Any person may file, jointly or severally, with the Department a protest or standing statement within 30 days after the date of final publication of notice in the Department's weekly notice or of this newspaper notice, whichever is later. A protest form and additional information on filing protests may be obtained by calling (503) 986-0852. The last date of newspaper publication is September 12, 2007. If no protests are filed, the Department will issue a final order consistent with the preliminary determination. #9529 August 22, 29, September 5, 12, 2007.

SUBJECT: Transfer Application T-10327

Please find enclosed the Preliminary Determination indicating that, based on the information available, the Department intends to approve application T-10327. This document is an intermediate step in the approval process; water may not be used legally as proposed in the transfer application until a Final Order has been issued by the Department. Please read this entire letter carefully to determine your responsibility for additional action.

A public notice is being published in the Department's weekly publication simultaneously with issuance of the Preliminary Determination. The notice initiates a 30-day period in which any person may file either a protest opposing the decision proposed by the Department in the Preliminary Determination or a standing statement supporting the Department's decision.

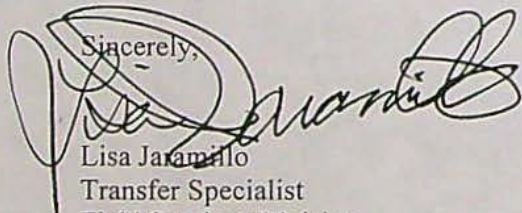

Because there is a change in character of use, the applicant is responsible for giving public notice of the transfer changes in a local newspaper having a general circulation in the area of the water right. **The notice must be published at least once a week for three consecutive weeks.** We have prepared the notice for you (enclosed). The deadline for individuals to file protests or standing statements is 30 days after the date of last publication. Please have the newspaper insert the date of last publication in the proper place. **After publication, the Department needs to receive an affidavit specifying the dates the notice was published.** Typically, the newspaper will prepare and mail an original *affidavit of publication* to the Department; however you will want to request specifically that they do so. The newspaper can mail the affidavit to me at the address above.

If no protest is filed, the Department will issue a Final Order consistent with the Preliminary Determination. You should receive a copy of the Final Order about 30 days after the close of the protest period.

If a protest is filed, the application may be referred to a contested case proceeding. A contested case provides an opportunity for the proponents and opponents of the decision proposed in the Preliminary Determination to present information and arguments supporting their position in a quasi-judicial proceeding.

Please do not hesitate to contact me at 503-986-0880 or [Lisa.J.Jaramillo@wrdd.state.or.us](mailto:Lisa.J.Jaramillo@wrdd.state.or.us) if I may be of assistance.

**Authority**

ORS 537.705 and 540.505 to 540.580 establish the process in which a water right holder may submit a request to transfer the point of appropriation, place of use, or character of use authorized under an existing water right. OAR Chapter 690, Division 380 implements the statutes and provides the Department's procedures and criteria for evaluating transfer applications.

**Applicant**

LISKEY FARMS INC.

**Findings of Fact**

***Background***

1. On February 28, 2007, Liskey Farms Inc. filed an application to change the character of use, add a point of appropriation, and change the place of use under Certificate 67664. The Department assigned the application number T-10327.
2. On May 1, 2007, the applicant submitted a transfer application map, identifying the proposed additional point of appropriation, place of use and character of use requested under Transfer T-10327.
3. On May 1, 2007, Tracy Liskey of Liskey Farms, Inc., stated that fish culture and space heating had occurred year round.
4. The applicant submitted a revised application on May 8, 2007, further clarifying the proposed changes under Transfer T-10327.
5. The right to be transferred is as follows:  
**Certificate:** 67664 in the name of LISKEY FARMS, INC. (perfected under Permit G-9547)  
**Use:** SPACE HEATING and FISH CULTURE

Pursuant to OAR 690-380-4030, any person may file a protest or standing statement within 30 days after the last date of publication of notice of this preliminary determination.

9. Notice of the application for transfer was published on March 13, 2007, pursuant to OAR 690-380-4000. No comments were filed in response to the notice.
10. On May 22, 2007, the Department e-mailed a copy of the draft Preliminary Determination proposing to approve Transfer Application T-10327 to the applicant. The draft Preliminary Determination set forth a deadline in which the applicant could respond.
11. The applicant responded to the draft Preliminary Determination on May 23, 2007. The applicant provided a statement agreeing to the inclusion of a condition necessary to prevent enlargement of the right and requested that the Department proceed with issuance of the Preliminary Determination. Additionally, due to the complex nature of the project, the applicant requested additional time through October 1, 2012, to allow sufficient time to complete the proposed changes. The revised date for completion of the changes is as stated in this order.

***Transfer Review Criteria (OAR 690-380-4010)***

12. Water has been used within the last five years according to the terms and conditions of the right, and there is no information in the record that would demonstrate that the right is subject to forfeiture under ORS 540.610.
13. A pump, pipeline, and sprinkler system sufficient to use the full amount of water allowed under the existing right were present within the five-year period prior to submittal of Application T-10327.
14. Certificate 67664 does not have a duty limit. As defined by OAR 690-380-0100(2), the proposed character of use change could result in enlargement of the right if not conditioned so as to prevent use of more water than could have been beneficially used without waste for the existing authorized use. The best currently available information indicates that beneficial use of water for space heating and fish culture would not likely exceed 2,530 acre-feet per year.
15. The proposed changes, as conditioned, would not result in enlargement of the right.
16. The proposed changes would not result in injury to other water rights.

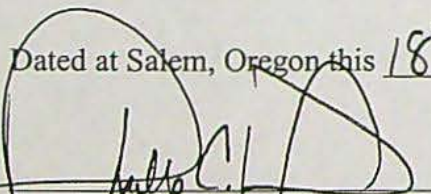

### Determination and Proposed Action

The changes in character of use, place of use and an additional point of appropriation proposed in application T-10327 appear to be consistent with the requirements of ORS 537.705 and 540.505 to 540.580 and OAR 690-380-5000. If protests are not filed pursuant to OAR 690-380-4030, the application will be approved.

*If application T-10327 is approved, the final order will include the following:*

- 1. The changes in character of use, place of use and an additional point of appropriation proposed in application T-10327 are approved.*
- 2. Water right certificate 67664 is cancelled.*
- 3. The right to the use of the water is restricted to beneficial use at the place of use described, and is subject to all other conditions and limitations contained in Certificate 67664.*
- 4. Water shall be acquired from the same aquifer (water source) as the original points of appropriation.*
- 5. The quantity of water diverted at the additional point of appropriation, together with that diverted at the original points of appropriation, shall not exceed the quantity of water lawfully available at the original points of appropriation.*
- 6. The use of water under the right evidenced by Certificate 67664 shall be limited to a total annual volume of 2,530 acre feet.*
- 7. The approved changes shall be completed and full beneficial use of the water shall be made on or before October 1, 2012. A Claim of Beneficial Use prepared by a Certified Water Rights Examiner shall be submitted by the applicant to the Department within one year after the deadline for completion of the changes and full beneficial use of the water.*
- 8. When satisfactory proof of the completed changes is received, a new certificate confirming the right transferred will be issued.*

Dated at Salem, Oregon this 18<sup>th</sup> day of July 2007.

**Notice of Preliminary Determination for  
Water Right Transfer T-10327**

T-10327 filed by Liskey Farms, Inc., 4650 Lower Klamath Lake Rd., Klamath Falls, OR 97603, proposes a change in character of use, a change in place of use, and an additional point of appropriation under Certificate 67664. The right allows the use of 4.9 cfs (priority date August 17, 1981) from two wells in Sec. 34, T40S, R9E, W.M. (Lower Klamath Lake Basin) for Space Heating and Fish Culture in Sec. 34. The applicant proposes to add a point of appropriation (Sec. 34, T40S, R9E, W.M.) located between the authorized wells, approximately 400 feet from each well; to change the place of use to Sec. 34 and 35; and to change the character of use to commercial, industrial, and fish culture. The Water Resources Department has concluded that the proposed transfer appears to be consistent with the requirements of ORS Chapter 540 and OAR 690-380-5000.

Any person may file, jointly or severally, with the Department a protest or standing statement within 30 days after the date of final publication of notice in the Department's weekly notice or of this newspaper notice, whichever is later. STATE OF OREGON  
COUNTY OF KLAMATH  
CERTIFICATE OF WATER RIGHT

THIS CERTIFICATE ISSUED TO

LISKEY FARMS, INC.  
4650 LOWER KLAMATH LAKE ROAD  
KLAMATH FALLS, OREGON 97603

confirms the right to use the waters of WELLS 1 AND 2 in the LOWER KLAMATH LAKE BASIN for SPACE HEATING AND FISH CULTURE.

The right has been perfected under Permit G-9547. The date of priority is AUGUST 17, 1981. The right is limited to not more than 4.90 CUBIC FEET PER SECOND, BEING 2.20 CFS FROM WELL 1 AND 2.70 CFS FROM WELL 2, or its equivalent in case of rotation, measured at the wells.

The wells are located as follows:

LOT 1 (SW 1/4 NE 1/4), LOT 2 (SE 1/4 NE 1/4), SECTION 34, T 40 S, R 9 E, W.M.; WELL 1 - 1520 FEET SOUTH AND 1780 FEET WEST; WELL 2 - 1760 FEET SOUTH AND 930 FEET WEST, BOTH FROM THE NORTHEAST CORNER OF SECTION 34.

The right shall conform to such reasonable rotation system as may be ordered by the proper state officer.

A description of the place of use under the right, and to which such right is appurtenant, is as follows:

LOT 1 (SW 1/4 NE 1/4)	SPACE HEATING
LOT 4 (SW 1/4 NE 1/4)	SPACE HEATING & FISH CULTURE
LOT 2 (SE 1/4 NE 1/4)	SPACE HEATING
SECTION 34	
TOWNSHIP 40 SOUTH, RANGE 9 EAST, W.M.	

The wells shall be maintained in accordance with the General Standards for the Construction and Maintenance of Water Wells in Oregon.

The right to the use of the water for the above purpose is restricted to beneficial use on the lands or place of use described.

WITNESS the signature of the Water Resources Director, affixed

**Date:** July 17, 2007  
**To:** Transfer File T-10327  
**From:** Lisa Jaramillo, Transfer Specialist   
**Re:** Clarification of the Proposed Character of Use Change

---

Today, I spoke with Tracey Liskey (applicant) regarding the proposed character of use change under his Transfer Application T-10327. The application indicated and/or made reference to the following proposed uses: commercial, geothermal, industrial and fish culture.

Because geothermal use is included under the industrial use classification, the transfer order will indicate a character of use change to: commercial, industrial and fish culture.

Mr. Liskey agreed that this was appropriate.

Dorothy, how I got to the duty condition in this transfer. my understanding is what could he use to a beneficial use without waste in the past, not what has he used. This is how I got to the 2530 ac-ft. Mr. Liskey came in and over the counter, we discussed the application, I told him, I felt without a duty on the certificate there could be enlargement of the right. During that conversation, he stated he understood, did not like. He stated he would prefer to stay at the full duty of 3500 something ac-ft, he did agree we needed to looking at numbers dealing with beneficial use without waste. He explained that we can sometime use the greenhouse water for the fish culture use but not all the time because of the heat or cold during the different seasons. I asked for a bottom line number for ac-ft that he used last year. The numbers seem to be to low for the uses involved, which he explained last year was low number because of the way the seasons were. so I asked him what kind of number that he could use without waste but to beneficial use. This was difficult so we worked using the full amount and worked backward. We figured using the max. 4.9 cfs 24-7 for a figure of over 3500 ac-ft per year. We both realized that number was to high, but he was ok with the 3500 ac-ft. He uses 2.0 cfs for fish culture and 2.9 cfs for space heating for an average of 3.6 cfs during the year to get to the 2530 ac-ft. Mr. Liskey and I took some time to figure what could be use at the extreme.

We both know this is a case by case situation, yes, I could have used a lower number and we had a lower number and I felt we needed to be higher so we settled on the 2530 ac-ft, but in the same situation with different we could have used an even higher number. I know they are at least using the water which is better then other cases we have.

Dorothy, after our discussion, Mr. Liskey did go talk to the partners in the corporation. They agreed to the 2530 ac-ft without a problem.

Bottom line, Mr. Liskey told me max. water he used and we cut to fit the season of uses to get to the 2530 ac-ft with a common sense involved.

Vern,

It seems really strange, but all I see in the file is the "cover sheet" from the watermaster review and the instructions for filling out the form. The actual review seems to be missing, so please re-send it.

Dorothy, sorry about the notes on this ones, I know I do it all the time. anyway. Mr. Liskey was in when were discussing his use. My thinking was since there was no duty and we were changing use we needed a duty to prevent injury. Mr. Liskey agreed after we discussed the topic for a while. He was not overjoyed with the idea of conditioning it with a duty but we got there.

Before I discuss with him we (you and I) talked about how to get there. I remember it being what could he use without waste and being beneficial, now that is probably not the words we used.

Because fish culture and space heating has really been greenhouse use can occur year round but the amount very depending on the timing. Example: less hot water in the summer time and more in the winter but we also have evaporation in the summer and not as much in the winter.

So the question came down to how much can you pump from each well. Which turned out to be 5.0 cfs but only for a small amount of the time. So I separated the uses which was almost impossible because he can use the water after space heating for fish culture. I think we said max. on fish 2.0 cfs and space heating or greenhouse could go to 2.9 cfs, but we needed to figure the use during the year. so we talked about min. for months. That is how we got to 2530 ac-ft that could be used.

I hope this make sense. If it is not enough I could try to figure more out. Vern

REFERENCE: Transfer Application T-10327

We are examining your water right transfer application.

There are a couple of questions that have come up while we are waiting on the application map to be submitted.

*fish culture  
all year  
cold season*

To understand the potential impact of the change on other rights, we want to confirm when during the year the space heating and fish culture uses are occurring. Has the "space heating" use been year round or during only a portion of the year? When during the year is water used for "fish culture"? If the uses cover different time periods, could you please explain when each use may be occurring?

The Department cannot approve a change that would enlarge use of water under a right. In order to avoid enlargement of the right that is proposed to be changed from "space heating and fish culture" to "\_\_\_\_\_", we need to know the amount of water used during the year. What quantity has been used in the past, what is reasonable and an appropriate quantity of water that could have been diverted under the existing authorized uses? Water Right Certificate 67664 does not describe a duty allowed during the year. The amount of water that could be beneficially used without waste under the existing right may be substantially less than the "face value" of the right at a constant diversion of water (24/7) throughout the authorized period of use. There could be significant potential for enlargement of the water right without understanding what could reasonably have been used beneficially for the original use. Could you provide information on what might be reasonable and an appropriate quantity of water used for space heating and fish culture under this right being proposed to be transferred?

Please submit the information by **May 10, 2006** to Vern Church, Water Resources Department, 5170 Summers Lane, Klamath Falls, OR 97603. If you have any questions, please call me at 541-883-4182.

## Oregon Water Resources Department Memorandum

**Date:** 4 April 2007  
**To:** OWRD Transfer Section Files  
**From:** Jerry Grondin, OWRD Hydrogeologist  
**Subject:** Ground Water Transfer Application Review  
Transfer Application Number: T-10327  
Application: G-9874, Permit: G-9547, Certificate: 67664  
Applicant: Liskey Farms, Inc. (Tracey Liskey)

Liskey Farms, Inc. has applied for a transfer to add a third ground water point of appropriation (POA) to two existing POA and to change the character of water use.

In addition to the transfer, Liskey Farms, Inc. has concurrently and separately applied for a new ground water right to pump 1,500 gpm (3.34 cfs) from the third POA for geothermal use and to reinject the non-contaminated water after use.

### **Injury Assessment of the Proposed Transfer:**

OAR 690-380-100 (definitions) notes "(3) 'Injury' or 'Injury to an existing water right' means a proposed transfer would result in another, existing water right not receiving previously available water to which it is legally entitled."

#### Closest Water Right Well:

The proposed change by water right transfer T-10327 may be made **without "injury"** as defined by OAR 690-380-100 given the closest neighboring water right well should continue receiving previously available water to which it is legally entitled despite a possible increased drawdown.

#### Klamath River:

Given the distance from the river, the close distance between the 3 wells relative to the distance to the river, and the currently available values to calculate ground water interference, the proposed change by water right transfer T-10327 may be made **without "injury"** as defined by OAR 690-380-100. It is anticipated a water right dependent upon the river may continue receiving previously available water to which it is legally entitled.

#### Lower Klamath Lake:

The proposed change by water right transfer T-10327 may be made **without "injury"** as defined by OAR 690-380-100 given a water right dependent upon the lake is likely outside the State of Oregon jurisdiction.

### **Conclusion:**

The proposed change by water right transfer T-10327 may be made **without "injury"** as defined by OAR 690-380-100.

The holder of a water right may apply to permanently change an existing water use subject to transfer. A transfer application may involve any of the following changes: Point of diversion or appropriation (POD; POA); Additional point of diversion or appropriation (APOD; APOA); Historic POD (HIST); Place of use (POU); Character of use (USE); Instream (ISWR); Substitution (SUB); or Exchange (EXCH).

The holder of a water right subject to transfer may request to temporarily change the place of use of the water for up to 5 years and, if necessary to convey the water, to temporarily change the point of diversion or appropriation.

The holder of a water right permit may apply to change a point of diversion (POD) or appropriation (POA) or to change the place of use (POU).

Any person who provides comments within the comment period will receive a copy of the Department's preliminary determination of whether the application should be approved or rejected after the Department has completed a review of the application and will be provided an opportunity to protest the application and preliminary determination at that time. The Director may presume that the transfer would be allowed by, and compatible with comprehensive plans unless an affected local government informs the Director otherwise within 30 days of this notice. Comments should be sent to the Transfers Section at the Department's Salem office.

On February 28, 2007 we received your water right transfer application requesting use change, and an additional point of appropriation for use of water from WELL 1 & 2, tributary to LOST RIVER. The application was accompanied by \$700. Our receipt 86430 is enclosed.

By copy of this letter, we are asking the Watermaster for his report regarding the potential for injury to existing water rights which may be caused by the change.

Your application will be examined to determine if additional information is needed. You will be contacted following this examination.

Except as provided under ORS 540.510(3) for municipalities, you may not use water for the new use, in the new place of use or from the new point of diversion until the transfer application has been approved. In order to avoid any possible forfeiture of the water right, you should continue to use the water as described by your existing water right. If the land is sold before the transfer is approved, the buyer's consent to the transfer will be required unless a recorded deed or other legal document clearly established that the water right was not conveyed in the sale.

We will notify you if additional information or corrections to the application or map are required.

**Before submitting your application to the Department, be sure you have:**

- Answered each question completely.
- Included all the required attachments.
- Provided original signatures for all named deed holders, or other parties, with an interest in the water right.
- Included a check payable to the Oregon Water Resources Department for the appropriate amount.

**10. SIGNATURES**

- Check one of the following, as appropriate, and sign the application in the signature box below:

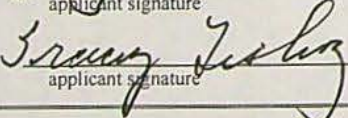

☒ In accordance with OAR 690-380-3000(13)(a), I (we) understand that prior to Department approval of a permanent transfer and upon my receipt of a draft Preliminary Determination for the proposed transfer, I (we) will be required [pursuant to OAR 690-380-4010(5)] to provide the following landownership information and evidence demonstrating that I (we) are authorized to pursue the transfer:

- (a) A report of ownership and lien information that has been prepared by a title company *within the last three months*;
- (b) A copy of written notification of the proposed transfer provided by the applicant to all lien holders on the subject lands unless the report of ownership and lien information shows that a water right conveyance agreement has been recorded for the subject lands. *If a water right conveyance agreement has been recorded for the subject lands, a copy of the agreement and identification of the owner of the lands at the time the agreement was recorded must be submitted; and*
- (c) If the landowner identified in the report of ownership and lien information is not the applicant, a notarized statement consenting to the transfer (*attached*) signed by the landowner identified in the report or an authorized representative of the entity to whom the interest in the water right has been conveyed as identified in a water right conveyance agreement or other documentation demonstrating that the applicant is authorized to pursue the transfer in the absence of the consent of the landowner.

☐ I (we) affirm that the applicant is a municipality, as defined in ORS 540.510(3)(b), and that the right is in the name of the municipality or a predecessor. Therefore, pursuant to OAR 690-380-3000(13)(b), the applicant is NOT required to provide the above described report of ownership and lien information.

☐ I (we) affirm that the applicant is an entity with the authority to condemn property and is acquiring the property to which the water right proposed for transfer is appurtenant by condemnation. Documentation is provided with this application supporting this statement. Therefore, pursuant to OAR 690-380-3000(13)(c), the applicant is NOT required to provide the above described report of ownership and lien information. (NOTE: Such an entity may only apply for a transfer under this subsection if it has filed a condemnation action to acquire the property.)

- I (we) affirm that the information contained in this application is true and accurate.

TO: TRANSFER DEPT. AND WATER RIGHTS DEPT.

Liskey Farms has a certificate of water right, permit # G-9547 for space heating and fish culture. To this water right we would like to add a new point of appropriation and add a new point of use. The water right has two wells or points of appropriation, we would like to add one more existing well and tie all three together. The wells on the water right would continue to heat the existing greenhouses and fish ponds, the additional well would be used for an additional greenhouse. We would like to tie the three wells together for emergency reasons, like a loss of a pump. We would also like to change the use to commercial, this would allow for more diversity, like producing electricity before the greenhouse heating.

In addition to the above transfer, we are also asking for a new water right on the additional well. We would like to have a water right of 3.4 cfs for better heating of the new greenhouse and other Ag related projects. This new water right would also have a rejection well. We hope that this would end up as a non consumptive use.

We are doing this process in two steps, the above transfer and the water right. Either one would work by itself, but both would work the best. In considering these two processes, please keep in mind that these are mainly for heating and the large percentage of water will be used during the winter. Plus the new water right should be non consumptive use.

If there are any questions or need additional information please call Tracey Liskey at 541-891-1531.

Thank you for your consideration,

**Before submitting your application to the Department, be sure you have:**

- Answered each question completely.
- Included all the required attachments.
- Provided original signatures for all named deed holders, or other parties, with an interest in the water right.
- Included a check payable to the Oregon Water Resources Department for the appropriate amount.

**10. SIGNATURES**

- Check one of the following, as appropriate, and sign the application in the signature box below:

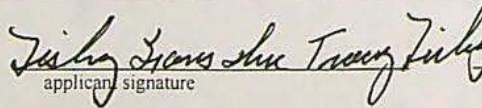

- ☒ In accordance with OAR 690-380-3000(13)(a), I (we) understand that prior to Department approval of a permanent transfer and upon my receipt of a draft Preliminary Determination for the proposed transfer, I (we) will be required [pursuant to OAR 690-380-4010(5)] to provide the following landownership information and evidence demonstrating that I (we) are authorized to pursue the transfer:

- (a) A report of ownership and lien information that has been prepared by a title company *within the last three months*;
- (b) A copy of written notification of the proposed transfer provided by the applicant to all lien holders on the subject lands unless the report of ownership and lien information shows that a water right conveyance agreement has been recorded for the subject lands. *If a water right conveyance agreement has been recorded for the subject lands, a copy of the agreement and identification of the owner of the lands at the time the agreement was recorded must be submitted; and*
- (c) If the landowner identified in the report of ownership and lien information is not the applicant, a notarized statement consenting to the transfer (attached) signed by the landowner identified in the report or an authorized representative of the entity to whom the interest in the water right has been conveyed as identified in a water right conveyance agreement or other documentation demonstrating that the applicant is authorized to pursue the transfer in the absence of the consent of the landowner.

- ☐ I (we) affirm that the applicant is a municipality, as defined in ORS 540.510(3)(b), and that the right is in the name of the municipality or a predecessor. Therefore, pursuant to OAR 690-380-3000(13)(b), the applicant is NOT required to provide the above described report of ownership and lien information.

- ☐ I (we) affirm that the applicant is an entity with the authority to condemn property and is acquiring the property to which the water right proposed for transfer is appurtenant by condemnation. Documentation is provided with this application supporting this statement. Therefore, pursuant to OAR 690-380-3000(13)(c), the applicant is NOT required to provide the above described report of ownership and lien information. (NOTE: Such an entity may only apply for a transfer under this subsection if it has filed a condemnation action to acquire the property.)

- I (we) affirm that the information contained in this application is true and accurate.

## For Local Government Use Only

The following section must be completed by a planning official from each county and city listed unless the project will be located entirely within the city limits. In that case, only the city planning agency must complete this form.

This deals only with the local land-use plan. Do not include approval for activities such as building or grading permits.

### Please check the appropriate box below and provide the requested information

☒ Land uses to be served by proposed water uses (including proposed construction) are allowed outright or are not regulated by your comprehensive plan. Cite applicable ordinance section(s): ART 54 KCLDL

☐ Land uses to be served by proposed water uses (including proposed construction) involve discretionary land-use approvals as listed in the table below. (Please attach documentation of applicable land-use approvals which have already been obtained. Record of Action/land-use decision and accompanying findings are sufficient.)  
If approvals have been obtained but all appeal periods have not ended, check "Being pursued".
