Enclosure

BEFORE THE WATER RESOURCES DEPARTMENT OF THE STATE OF OREGON

In the Matter of Permit Amendment)	FINAL ORDER
T-10396, Deschutes County)	APPROVING AN ADDITIONAL POINT
)	OF APPROPRIATION

Authority

ORS 537.211 establishes the process in which a water right permit holder may submit a request to change the point of appropriation and/or place of use authorized under an existing water right permit.

Applicant

Indian Meadow Water Company Lynn Lounsbury, Manager P.O. Box 3 Sisters, Oregon 97759

Findings of Fact

- 1. On May 29, 2007, Indian Meadow Water Company filed an application for an additional point of appropriation under Permit G-12678. The Department assigned the application number T-10396.
- 2. The permit to be amended is as follows:

Permit:

G-12678, in the name of Indian Meadow Water Company;

Use:

Quasi-municipal including 1) Domestic, 2) Fire Protection, and 3) Irrigation

of 1.3 acres

Priority Date: June 10, 1988

Quantity:

1.47 cubic feet per second

Source:

Two wells, in the Deschutes River Basin.

Date of Complete Application of Water:

October 1, 2014

This is a final order in other than contested case. This order is subject to judicial review under ORS 183.484. Any petition for judicial review must be filed within the 60 day time period specified by ORS 183.484(2). Pursuant to ORS 536.075 and OAR 137-004-080 and OAR 690-01-005 you may either petition for judicial review or petition the Director for reconsideration of this order. A petition for reconsideration may be granted or denied by the Director, and if no action is taken within 60 days following the date the petition was filed, the petition shall be deemed denied.

5. Notice of the application for the permit amendment was published in the Department's weekly notice on June 5, 2007 pursuant to ORS 540.520(5). No comments were filed in response to the notice.

- 6. The change would not result in injury to other water rights.
- 7. The change does not enlarge the permit.
- 8. The change does not alter any other terms of the permit.

Conclusions of Law

The additional point of appropriation proposed by Permit Amendment Application T-10396 is consistent with the requirements of ORS 537.211.

Now, therefore, it is ORDERED:

The change and subsequent use of water shall be subject to the following conditions:

- 1. The combined quantity of water diverted at the new point of appropriation (Well 3), together with that diverted at the authorized points of appropriation, shall not exceed the maximum rate and duty allowed under Permit G-12678.
- Prior to water use from the proposed point of appropriation, the permittee shall install a
 meter or other suitable measuring device as approved by the Director. The permittee shall
 maintain the meter or measuring device in good working order.

The permittee shall allow the watermaster access to the meter or measuring device; provided however, where the meter or measuring device is located within a private structure, the watermaster shall request access upon reasonable notice.

The Director may require the permittee to keep and maintain a record of the amount (volume) of water used and may require the permittee to report water use on a periodic schedule as established by the Director. In addition, the Director may require the permittee to report general water use information, the periods of water use and the place and nature of use of water under the permit. The Director may provide an opportunity for the permittee to submit alternative reporting procedures for review and approval.

- 3. Water shall be acquired from the same aquifer as the original points of appropriation.
- 4. All other terms and conditions of Permit G-12678 remain the same.

5. Permit G-12678, in the name of Indian Meadow Water Company, is amended as described herein.

Dated at Salem, Oregon this 17 th day of Splinky, 2007.

FURTHER DEFINED AS WITHIN THE SERVICE BOUNDARY AS DEPICTED ON THE APPLICATION MAP, ON FILE AT THE WATER RESOURCES DEPARTMENT.

Measurement, recording and reporting conditions:

- A. Before water use may begin under this permit, the permittee shall install a meter or other suitable measuring device as approved by the Director. The permittee shall maintain the meter or measuring device in good working order.
- B. The permittee shall allow the watermaster access to the meter or measuring device; provided however, where the meter or measuring device is located within a private structure, the watermaster shall request access upon reasonable notice.
- C. The Director may require the permittee to keep and maintain a record of the amount (volume) of water used and may require the permittee to report water use on a periodic schedule as established by the Director. In addition, the Director may require the permittee to report general water use information, the periods of water use and the place and nature of use of water under the permit. The Director may provide an opportunity for the permittee to submit alternative reporting procedures for review and approval.

Prior to receiving a certificate of water right, the permit holder shall submit the results of a pump test meeting the department's standards, to the Water Resources Department. The Director may require water level or pump test results every ten years thereafter.

Before water may be used under the terms of this permit, Well 1 shall be reconstructed to insure groundwater production occurs from no shallower than 115 feet.

If substantial interference with a senior water right occurs due to withdrawal of water from any well listed on this permit, then use of water from the well(s) shall be discontinued or reduced and/or the schedule of withdrawal shall be regulated until or unless the Department approves or implements an alternative administrative action to mitigate the interference. The Department encourages junior and senior appropriators to jointly develop plans to mitigate interferences.

Use of water under authority of this permit may be regulated if analysis of data available after the permit is issued discloses that the appropriation will measurably reduce the surface water flows necessary to maintain the free-flowing character of a scenic waterway in quantities necessary for recreation, fish and wildlife in effect as of the priority date of the right or as those quantities may be subsequently reduced.

STANDARD CONDITIONS

The wells shall be constructed in accordance with the General Standards for the Construction and Maintenance of Water Wells in Oregon. The works shall be equipped with a usable access port, and may also include an air line and pressure gauge adequate to determine water level elevation in the well at all times.

The use shall conform to such reasonable rotation system as may be ordered by the proper state officer.

Prior to receiving a certificate of water right, the permit holder shall submit the results of a pump test meeting the department's standards, to the Water Resources Department. The Director may require water level or pump test results every ten years thereafter.

Failure to comply with any of the provisions of this permit may result in action including, but not limited to, restrictions on the use, civil penalties, or cancellation of the permit.

This permit is for the beneficial use of water without waste. The water user is advised that new regulations may require the use of best practical technologies or conservation practices to achieve this end.

By law, the land use associated with this water use must be in compliance with statewide land-use goals and any local acknowledged land-use plan.

The use of water shall be limited when it interferes with any prior surface or ground water rights.

The Director finds that the proposed use(s) of water described by this permit, as conditioned, will not impair or be detrimental to the public interest.

Actual construction of the well shall begin within one year from permit issuance and shall be completed on or before October 1, 1998. Complete application of the water to the use shall be made on or before October 1, 1999.

Issued August /, 1996

Subject: T-10396: Indian Meadow Water Co.

Hi Kelly,

Per our phone conversation this morning, I reviewed our file to refresh my memory on the discrepancy in the location of the existing wells as shown on our permit amendment map and the location described on Permit G-12678. The discrepancy mainly concerned the easting distances from the north-south center line of section 28 and 33. Permit G-12678 lists well # 1 (north well) as being located 94 feet north and 1250 feet east from the south 1/4 corner of section 28 and lists the well # 2 (south well) as being 70 feet south and 1265 feet east from the north 1/4 corner of section 33.

The permit amendment maps shows well # 1 (north well) as being located 94 feet north and 1294 feet east from the north-south centerline of section 28 and shows well # 2 (south well) as being 70 feet south and 1307 feet east from the north-south centerline of section 33.

We believe the locations as described on the permit amendment map are correct as well # 1 and well # 2 were ground-truthed in the field relative to the storage tank location which in turn was accurately located using aerial photography.

Kelly, let us know if you have any other questions concerning T-10396.

Thanks,

Mathias

Reference: Permit Amendment T-10396

On May 29, 2007 we received your request for permit amendment. The application was accompanied by \$350.00. Our receipt 87813 is enclosed.

By copy of this letter, we are asking the Watermaster for a report regarding the potential for injury to existing water rights which may be caused by the change.

Except as provided under ORS 540.510(3) for municipalities, you may not use water in the new place of use, or from the new point of appropriation, until we issue a final order approving the application.

We will notify you if additional information or corrections to the application or map are required.

If you have any questions, please call the Transfer Section, (503)986-0900.

The holder of a water right may apply to permanently change an existing water use subject to transfer. A transfer application may involve any of the following changes: Point of diversion or appropriation (POD; POA); Additional point of diversion or appropriation (APOD; APOA); Historic POD (HIST); Place of use (POU); Character of use (USE); Instream (ISWR); Substitution (SUB); or Exchange (EXCH).

The holder of a water right subject to transfer may request to temporarily change the place of use of the water for up to 5 years and, if necessary to convey the water, to temporarily change the point of diversion or appropriation.

The holder of a water right permit may apply to change a point of diversion (POD) or appropriation (POA) or to change the place of use (POU).

Any person who provides comments within the comment period will receive a copy of the Department's preliminary determination of whether the application should be approved or rejected after the Department has completed a review of the application and will be provided an opportunity to protest the application and preliminary determination at that time. Comments should be sent to the Transfers Section at the Department's Salem office.

Permit Amendments

If you propose to amend multiple permits under this application, a <u>separate set of pages 3</u>
<u>through 7</u> must be provided for <u>each</u> permit. (<u>NOTE</u>: Concurrent changes to a water right must be filed <u>separately</u> on a transfer application.)

Ground Water Registration Modifications

• You may propose modification of only one ground water registration per application, unless in accordance with OAR 690-382-0300(2), the ground water registrations to be modified are layered. (NOTE: Concurrent changes to a water right must be filed separately on a transfer application.)

4. TYPE OF AMENDMENT OR MODIFICATION PROPOSED

Please check all of the following that apply:

Point of Diversion or Appropriation	Place of Use	Character of Use
□ Change (The old point of diversion or appropriation will not be used for the portion of the water right affected by the amendment or modification.) □ Additional (Both the old and new points of diversion or appropriation will be used for the portion of the water right affected by the amendment or modification.) □ Not Available for Ground Water Registrations □ Surface Water to Ground Water (A new point of appropriation will be used instead of the old point of diversion. The old point of diversion will not be used.)	□ All of the Permit or Registration will be exercised at a different location than currently authorized (Use of water at the current authorized location will be discontinued.) □ Only a portion of the Permit or Registration will be exercised at a different location than currently authorized (Use of water at a portion of the current authorized location will be discontinued.)	Not Available for Permit Amendments Change existing authorized use to the following proposed new use: Irrigation Municipal Quasi-municipal Commercial Industrial Domestic (indicate number of households): Other

Reason(s) for amendment/modification(s): The addition of a new well will add redundancy to the water supply and distribution system for Indian Meadow Water Company. This redundancy is needed should any of the two existing wells go down due to either maintenance or mechanical difficulties.

5. CURRENT PERMIT OR REGISTRATION INFORMATION

Permit or Registration to be Amended/Modified (check and complete one of the following): Permit to be 10/01/2014 Current Completion Date of Permit Amended: 12678 Ground Water NOTE: Concurrent changes to a water right must be filed separately on a transfer application. 11. SIGNATURES
For Ground Water Registration Modification Applications only, check the appropriate one and sign the application in the signature box below:
In accordance with OAR 690-382-0400(16)(a), I (we) understand that prior to Department approval of a permanent modification and upon my receipt of a draft Preliminary Determination for the proposed modification, I (we) will be required [pursuant to OAR 690-382-0700(5)] to provide the following landownership information and evidence demonstrating that I (we) are authorized to pursue the modification:
(a) A report of ownership and lien information that has been prepared by a title company within the last three months;
(b) A copy of written notification of the proposed modification provided by the applicant to <u>all</u> lien holder on the subject lands unless the report of ownership and lien information shows that a water right conveyance agreement has been recorded for the subject lands. If a water right conveyance agreement has been recorded for the subject lands, a copy of the recorded agreement and a listing of the owner(s) of the lands at the time the agreement was recorded must be submitted; and
(c) If the applicant is not <u>both</u> the person named on the ground water registration or the assignee and the owner of the lands to which the registration is appurtenant, as identified in the report of ownership and lien information, then either of the following must be provided:
A) Notarized statements consenting to the modification by all persons, other than the applicant, who are named on the ground water registration or identified as landowners in the report of ownership and lien information or who are authorized representatives of an entity to whom the interest in the water right has been conveyed as identified in a water right conveyance agreement; or
B) Documentation demonstrating that the applicant is authorized to pursue the modification in the absence of consent of the persons named on the ground water registration or the assignee <u>and</u> the owner of the lands to which the registration is appurtenant.
☐ I (we) affirm that the applicant is a municipality, as defined in ORS 540.510(3)(b), and that the right is in the name of the municipality or a predecessor. Therefore, pursuant to OAR 690-382-0400(16)(b), the applicant is NOT required to provide the above described report of ownership and lien information.
I (we) affirm that the applicant is an entity with the authority to condemn property and is acquiring the property to which the ground water registration proposed for modification is appurtenant by condemnation. Documentation is provided with this application supporting this statement. Therefore, pursuant to OAR 690-382-0400(16)(c), the applicant is NOT required to provide the above described report of ownership and lien information. (NOTE: Such an entity may only apply for recognition of a modification under this subsection if it has filed a condemnation action to acquire the property and deposited the funds with the court as required by ORS 35.265.)
For both Permit Amendment and Ground Water Registration Modification Applications, I (we) affirm that the information contained in this application is true and accurate.

PERMIT AMENDMENT APPLICATION
PERMIT NO. G-12678
INDIAN MEADOW WATER COMPANY, SISTERS, OREGON

Dear Kelly,

Please find attached the Application for a Permit Amendment to add a new point of appropriation to permit G-12678. The Indian Meadow Water Company is building redundancy into their system in order to provide reliable water supply to its users should one of their wells go down due to mechanical failure or for maintenance reasons.

Addition of the proposed points of appropriation requires an amendment to Permit No. G-12678. In this regard, the following materials are enclosed:

- 1. Application for a Permit Amendment to add a new point of appropriation.
- 2. Check in the amount of \$350 for the application fee.
- 3. Maps showing location of existing points and proposed point of appropriation.
- 4. Receipt from Deschutes County of a Land Use Compatibility Statement (final approval will forwarded upon receipt.)
- 5. Copy of permit G-12678.
- 6. Copy of well logs for the two authorize points of appropriation and for the new well proposed as a new point of appropriation.

Please contact me if you have any questions at (541) 504-9960 extension 233, or by email at mperle@newtonconsultants.com.

Sincerely,

Newton Consultants, Inc.
