The applicant proposes to change the point of diversion therefrom to a point located 1,680 feet South and 400 feet West from the Northeast Corner of Section 12, being within the SE 1/4 NE 1/4, Section 12, Township 4 South, Range 13 East, WM.

Thomas J. Paul, Watermaster, has filed a statement to the effect that the proposed change in point of diversion may be made without injury to existing rights.

No objections having been filed and it appearing that the proposed change in point of diversion may be made without injury to existing rights, the application should be approved.

NOW, THEREFORE, it hereby is ORDERED that the requested change in point of diversion, as described herein, without loss of priority, is approved.

It is FURTHER ORDERED that the following provisions shall be effective when in the judgment of the Watermaster it becomes necessary to install headgates and measuring devices:

That the diversion works shall include an in line flow meter, a weir, or other suitable device for measuring the water to which the applicant is entitled;

That the type and plans of the measuring device be approved by the watermaster before the beginning of construction work and that the weir or measuring device be installed under the general supervision of said watermaster.

It is FURTHER ORDERED that the construction work shall be completed and the change in point of diversion of water made on or before October 1, 1983.

TO: TRANSFERS, WATER RIGHTS DIVISION

DATE: JULY 22, 1981.FROM: ** THOMAS J. PAULSUBJECT: WATER RIGHT TRANSFER APPLICATION NO. T-4391IN THE NAME OF FRED L. ASHLEY

In my opinion the proposed change in POINT of DIVERSION
MAY BE MADE WITHOUT INJURY ~~WOULD RESULT IN INJURY*~~ to an existing water right.

Headgate notices ~~HAVE~~ HAVE NOT been issued for diversion from the sources which
serves this right.

If for change in point of diversion, is there any intervening point of diversion
between the authorized and the proposed points of diversion? YES
(yes or no)

In my opinion, the order approving the subject transfer application should include
the following in regard to the appropriator installing suitable measuring devices
in the diversion works:

- (1) PRIOR to the diverting of water at the new point of diversion . . .
 X (2) When in the judgment of the watermaster it becomes necessary . . .

* The approval of this transfer application would result in injury to other water
rights because _____

THE CHANGE CAN BE APPROVED NOW THAT THE WHITE
RIVER DEGREE HAS BEEN CORRECTED. THE IRRIGATED LAND
AND WATER RIGHTS ARE NOW IN AGREEMENT.
