Authority

ORS 537.705 and 540.505 to 540.580 establish the process in which a water right holder may submit a request to temporarily transfer the place of use and, if necessary to convey the water to the temporary place of use, the point of appropriation authorized under an existing water right. OAR Chapter 690, Division 380 implements the statutes and provides the Department's procedures and criteria for evaluating transfer applications.

Priority Date: JUNE 18, 1980

7. Notice of the application for temporary transfer was published on May 29, 2007, pursuant to ORS 540.520 and OAR 690-380-4000. No comments were filed in response to the notice.
8. Water has been used within the last five years according to the terms and conditions of the rights, and there is no information in the record that would demonstrate that the rights are subject to forfeiture under ORS 540.610.
9. A pump, pipeline, and sprinkler system sufficient to use the full amount of water allowed under the existing rights were present within the five-year period prior to submittal of Transfer Application T-10392.
10. The proposed change would not result in enlargement of the rights.
11. The proposed change would not result in injury to other water rights. This finding is made through an abbreviated review recognizing that the transfer may be revoked under ORS 540.523(6) if the Department later finds that the transfer is causing injury to any existing water right.

Conclusions of Law

The temporary changes in place of use and an additional point of appropriation proposed in application T-10392 are consistent with the requirements of ORS 540.523 and OAR 690-380-8000.

Now, therefore, it is ORDERED:

- The changes in place of use and an additional point of appropriation proposed in application T-10392 are approved.
- The former place of use **shall not** be irrigated as part of this water right during the 2007 irrigation season.

3. The use shall revert to the authorized place of use at the end of the 2007 irrigation season. The authorization to use the additional point of diversion shall be terminated concurrently.
4. The approval of this temporary transfer may be revoked or modified if the Department finds the change causes injury to any existing water right.
5. A subsequent application for permanent transfer of Certificates 54428 and 54426 shall be subject to a full and complete review to determine consistency with the requirements of OAR Chapter 690, Division 380. Approval of this temporary transfer does not establish a precedent for approval of a subsequent application filed for a permanent transfer.
6. The use of water at the temporary place of use authorized by this transfer shall be in accordance with the terms and conditions of Certificates 54428 and 54426.
7. The time during which water is used under this approved temporary transfer does not apply toward a finding of forfeiture under ORS 540.610.
8. Prior to diverting water, the water user shall install an in-line flow meter or other suitable device for measuring and recording the quantity of water diverted. The type and plans of the measuring device must be approved by the Department prior to beginning construction and shall be installed under the general supervision of the Department. The water user shall maintain and operate the measuring device as required by the Department.

MEMORANDUM

DATE: 6/7/2007

TO: File T-10231, Golden Rule Farms
FROM: Donn Miller, Hydrogeologist
SUBJECT: Transfer Comments

I have looked at the well reports for the wells involved in this transfer application. Based on the water level elevations and locations, I conclude that all wells develop the same source, the main ground water reservoir of the Fort Rock Basin. The well separations and aquifer hydraulics should allow the proposed changes to occur without injury to existing rights.

Reference: Temporary Transfer 10392

On May 22, 2007 we received your water right transfer application. The application was accompanied by \$367.00. Our receipt 87705 is enclosed.

By copy of this letter, we are asking the Watermaster for a report regarding the potential for injury to existing water rights which may be caused by the change.

Pursuant to OAR 690-380-8010, the lands from which an irrigation water right is to be transferred and the land to which the right is to be transferred may not both receive water during the same season. If the temporary transfer is approved during an irrigation season and water has already been used at the currently authorized location during that season, then the temporary transfer will not take effect until the following season.

We will notify you if additional information or corrections to the application or map are required.

If you have any questions, please call the Transfer Section, (503)986-0900.
