) TEMPORARY TRANSFER

Authority

ORS 540.570 establishes the process in which a district may submit a request to temporarily transfer a water right within district boundaries. OAR Chapter 690, Division 385 implements the statutes and provides the Department's procedures and criteria for evaluating district transfer applications.

Applicant

EAST FORK IRRIGATION DISTRICT
P.O. BOX 162
ODELL, OR 97044

Findings of Fact

1. On May 23, 2007, East Fork Irrigation District filed a district transfer application to temporarily change the place of use under a portion of Certificate 81340. The Department assigned the application number T-10393.
2. On June 14, 2007, the applicant submitted a new amended map and application to better describe the authorized place of use.
3. Notice of the application for transfer was published on May 29, 2007, pursuant to ORS 540.580 and OAR 690-385-4400. No comments were filed in response to the notice.
4. The portion of the right to be transferred are as follows:
Certificate: 81340, issued in the name of East Fork Irrigation District (confirmed by decree of the Circuit Court of the State of Oregon for Hood River County, recorded in the Order Record of the Water Resources Director, in Vol. 17, page 333)
Use: Irrigation (IR) of 4.2 acres
Priority Date: November 25, 1895
Rate: 0.052 cubic foot per second (cfs), which is equivalent to ONE-EIGHTIETH of one cfs
Source: East Fork Hood River, a tributary of Hood River

This is a final order in other than contested case. This order is subject to judicial review under ORS 183.484. Any petition for judicial review must be filed within the 60 day time period specified by ORS 183.484(2). Pursuant to ORS 536.075 and OAR 137-004-0080 you may either petition for judicial review or petition the Director for reconsideration of this order. A petition for reconsideration may be granted or denied by the Director, and if no action is taken within 60 days following the date the petition was filed, the petition shall be deemed denied.

8. The proposed change in place of use would not result in enlargement of the right.
9. The proposed change in place of use would not result in injury to other water rights

Conclusions of Law

The change in place of use proposed in Transfer Application T-10393 satisfies the requirements of ORS 540.574(3) and 540.570.

Now, therefore, it is ORDERED:

1. The proposed change in place of use to the water right evidenced by Certificate 81340 is approved.
2. The temporary transfer is effective for the 2007 irrigation season.
3. The right to the use of water is restricted to beneficial use at the place of use described and is subject to all other conditions and limitations contained in the District's water rights, related decree, and the Final Order approving T-10393.
4. The use of water on the lands from which the water right is transferred and at the new temporary place of use during the same irrigation season or calendar year is prohibited and may subject the district and landowner to civil penalties.

5. The use of water under this temporary transfer may be conditioned or revoked at any time to the extent necessary to avoid injury if the Department finds the transfer causes injury to any existing water right.
6. At the end of the 2007 irrigation season all uses of water under this temporary transfer revert automatically to the terms and conditions of the original water right permit, certificate, or adjudication as evidenced by a court decree.

Dated at Salem, Oregon this 3rd day of July, 2007.

Water Right and Diversion Transfer Comment Form

(ODFW provides to WRD so that WRD can make findings according to statutory requirements.)

Reference Transfer #: 10393

A. Please check box if you believe there is a potential for injury to an instream water right.

- ☐ The Oregon Department of Fish and Wildlife (ODFW) believes this proposed transfer may injure an instream water right(s) on

_____, tributary to _____. Because,
(Stream)

(Please attach any available supporting information.)

Note: This will prompt WRD to further evaluate and make a determination whether the transfer will injure an instream water right. (WRD is the agency that makes the determination of injury to a water right, while ODFW's role is to raise concerns and to evaluate proposed mitigation and net benefit to the resource if WRD requests concurrence with injury to an instream water right.)

B. Please check one of the following four boxes related to requiring a fish screen and/or by-pass device pursuant to ORS 540.525 or 540.532:

- ☒ 1. The new Point of Diversion (POD) requires a fish screening and/or by-pass device and is currently equipped with an appropriate fish screening and/or by-pass device.

Note: This option will yield the following:

Finding of Fact: The Oregon Department of Fish and Wildlife has determined that a fish screening and/or by-pass device is necessary at the new point of diversion to prevent fish from entering the diversion and/or safely transport fish back to the body of water from which the fish were diverted and that the diversion is currently equipped with an appropriate fish screening and/or by-pass device.

Condition: The water user shall maintain and operate a fish screening and/or by-pass device, as appropriate, at the point of diversion consistent with the Oregon Department of Fish and Wildlife's operational and maintenance standards.

- ☐ 2. The new Point of Diversion (POD) requires a fish screening and/or by-pass device prior to water being diverted. The diversion may be eligible for cost share assistance under ODFW's cost share program.

Option 2 should generally be selected if listed fish species are present at the point of diversion and/or the originating water right diversion is currently screened. If Option 2 is

selected, provide contact information on the "Fish Screening and Passage Information" sheet. The new diversion may be eligible for cost-share.

Note: This option will yield the following:

Finding of Fact: The Oregon Department of Fish and Wildlife (ODFW) has determined that a fish screening and/or by-pass device is necessary at the new point of diversion to prevent fish from entering the diversion and/or safely transport fish back to the body of water from which the fish were diverted and that the diversion is not currently equipped with an appropriate fish screening and/or by-pass device. This diversion may be eligible for screening cost share funds.

Condition: Prior to diverting water, the water user shall install a fish screening and/or by-pass device, as appropriate, at the new point of diversion consistent with the Oregon Department of Fish and Wildlife's (ODFW) design and construction standards. Prior to installation, the water user shall obtain written approval from ODFW that the required screen and/or by-pass device meets ODFW's criteria. Prior to submitting a Claim of Beneficial Use, the water user must obtain written approval from ODFW that the required screening and/or by-pass device was installed to the state's criteria. The water user shall maintain and operate the fish screen and/or by-pass device, as appropriate, at the point of diversion consistent with ODFW's operational and maintenance standards.

- ☐ 3. The new Point of Diversion (POD) requires a fish screening and/or by-pass device. However, the diversion may be used for up to two years pending a determination of whether cost share assistance under ODFW's cost share program is available.

If Option 3 is selected, provide contact information on the "Fish Screening and Passage Information" sheet. Except in extraordinary circumstances, Option 3 should NOT be checked if listed fish species are present at the point of diversion, the originating water right diversion is screened, cost-share funds are currently available, or the diversion is not eligible for ODFW's cost-share program. If extraordinary circumstances are present, please explain:

Note: This option will yield the following:

Finding of Fact: The Oregon Department of Fish and Wildlife (ODFW) has determined that a fish screening and/or by-pass device is necessary at the new point of diversion to prevent fish from entering the diversion and/or safely transport fish back to the body of water from which the fish were diverted and that the diversion is not currently equipped with an appropriate fish screening and/or by-pass device. Listed fish species are not present at the point of diversion, the originating water right diversion is not screened, cost-share funds are not currently available, and the proposed diversion may be eligible for ODFW's cost-share program. A grace period of two years is appropriate until such time as cost share funds become available to assist in the construction of a fish screening and/or by-pass device. If cost share funds do not become available, the water user must screen within the indicated time period regardless of the availability of cost share funding.

Condition: Within two years after the date of this order, the water user shall install a fish screening and/or by-pass device, as appropriate, at the new point of diversion consistent with the Oregon Department of Fish and Wildlife's (ODFW) design and construction standards. Prior to installation, the water user shall obtain written approval from ODFW that the required screen and/or by-pass device meets ODFW's criteria. The water user may withdraw water at the new point of diversion without screening or by-pass devices until two years after the date of this order. Prior to submitting a Claim of Beneficial Use, the water user must obtain written approval from ODFW that the required screening and/or by-pass device was installed to the state's criteria. The water user shall maintain and operate the fish screen and/or by-pass device, as appropriate, at the point of diversion consistent with ODFW's operational and maintenance standards.

Oregon Department of Fish and Wildlife
Additional Fish Screening and Passage Information for the Applicant

(To be completed by ODFW for WRD to provide to the applicant.)

Transfer # 10393

The applicant should be aware that fish screening and passage may be required for certain changes in point of diversion if the boxes below are checked.

- ☐ Fish screening and/or fish by-pass devices are required as a condition of this transfer. The fish screen and/or by-pass device must meet ODFW's design, construction, operational and maintenance standards. Fish screening prevents fish from entering the diversion, while a by-pass device safely transports fish back to the body of water from which the fish were diverted.

Pursuant to ORS 498.306, cost share funds may be available to assist in the installation of fish screening and by-pass devices at diversions.

The applicant should contact the ODFW staff below to obtain additional information on the design, construction, operational, and maintenance standards for the required fish screening and/or by-pass device and to obtain information about ODFW's cost sharing program for screening and by-pass devices. **Prior to installation, the water user must obtain written approval from ODFW that the required screening and/or by-pass device meets ODFW's criteria.**

City/State/Zip: _____

- ☐ This transfer may trigger requirements for fish passage under ORS 509.585 because a new point of diversion will be constructed, an existing point of diversion's capacity will be increased, or an existing point of diversion will be abandoned. The applicant should contact the ODFW staff below for a determination of whether native migratory fish are or were present at the applicable location, which will determine whether fish passage must be addressed.

ODFW staff name: _____

Address: _____

City/State/Zip: _____

Phone: (____) _____

- ☐ 4. The new Point of Diversion (POD) does not currently require a fish screen and/or by-pass device, however, the permittee may be required in the future to install, maintain, and operate fish screening and/or by-pass devices.

Note: This option will yield the following:

Finding of Fact: The Oregon Department of Fish and Wildlife has determined that a fish screening and/or by-pass device may be required in the future at the new point of diversion to prevent fish from entering the diversion and/or safely transport fish back to the body of water from which the fish were diverted and that the diversion is not currently equipped with an appropriate fish screening and/or by-pass device.

Condition: Within one year after receiving written notification from the Oregon Department of Fish and Wildlife (ODFW) that a fish screening and/or by-pass device is required, the water user shall install a screening and/or by-pass device, as appropriate, at the new point of diversion. The fish screening and/or by-pass device must meet ODFW's design and construction standards. Prior to installation, the water user shall obtain written approval from ODFW that the required screening and/or by-pass device meets ODFW's criteria. Once installed the water user shall maintain and operate the fish screening and/or by-pass device, as appropriate, at the point of diversion consistent with ODFW's operational and maintenance standards.
