10. Notice of the application for temporary transfer was published on July 24, 2007, pursuant to ORS 540.520 and OAR 690-380-4000. No comments were filed in response to the notice.
11. Transfer Application T-10435 proposes to temporarily transfer water rights within the boundaries of Ochoco Irrigation District. The district was notified of the proposed temporary transfer and did not provide any comments.
12. Transfer Application T-10435 proposes to temporarily transfer water rights served by a Bureau of Reclamation storage project. The Bureau was notified of the proposed temporary transfer and did not provide any comments.
13. Water has been used within the last five years according to the terms and conditions of the rights, and there is no information in the record that would demonstrate that the rights are subject to forfeiture under ORS 540.610.
14. A diversion structure, ditch and pumps sufficient to use the full amount of water allowed under the existing rights were present within the five-year period prior to submittal of Transfer Application T-10435.
15. The proposed change would not result in enlargement of the rights.
16. The proposed change would not result in injury to other water rights. This finding is made through an abbreviated review recognizing that the transfer may be revoked under ORS 540.523(6) if the Department later finds that the transfer is causing injury to any existing water right.

Conclusions of Law

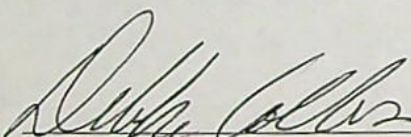

The temporary changes in place of use proposed in Transfer Application T-10435 are consistent with the requirements of ORS 540.523 and OAR 690-380-8000.

Now, therefore, it is ORDERED:

1. The changes in place of use proposed in Transfer Application T-10435 are approved.

2. The former place of use **shall not** be irrigated as part of these water rights during the 2007 irrigation season.
3. The use shall revert to the authorized place of use at the end of the 2007 irrigation season.
4. The approval of this temporary transfer may be revoked or modified if the Department finds the change causes injury to any existing water right.
5. A subsequent application for permanent transfer of Certificates 75487, 76013, 75489 and 76012 shall be subject to a full and complete review to determine consistency with the requirements of OAR Chapter 690, Division 380. Approval of this temporary transfer does not establish a precedent for approval of a subsequent application filed for a permanent transfer.
6. The use of water at the temporary place of use authorized by this transfer shall be in accordance with the terms and conditions of Certificates 75487, 76013, 75489 and 76012.
7. The time during which water is used under this approved temporary transfer does not apply toward a finding of forfeiture under ORS 540.610.
8. Prior to diverting water, the water user shall install an in-line flow meter, weir, or other suitable device for measuring and recording the quantity of water diverted. The type and plans of the measuring device must be approved by the Department prior to beginning construction and shall be installed under the general supervision of the Department. The water user shall maintain and operate the measuring device as required by the Department.
9. The water user shall maintain the existing headgate and shall make such improvements as may be required by the Department.
10. The use of the remaining water rights described by Certificates 76013, 75489 and 76012 shall continue to be in accordance with the terms and conditions of Certificates 76013, 75489 and 76012.

Reference: Temporary Transfer 10435

On July 19, 2007 we received your water right transfer application. The application was accompanied by \$472.23. Our receipt 88795 is enclosed.

By copy of this letter, we are asking the Watermaster for his report regarding the potential for injury to existing water rights which may be caused by the change.

Pursuant to OAR 690-380-8010, the lands from which an irrigation water right is to be transferred and the land to which the right is to be transferred may not both receive water during the same season. If the temporary transfer is approved during an irrigation season and water has already been used at the currently authorized location during that season, then the temporary transfer will not take effect until the following season.

We will notify you if additional information or corrections to the application or map are required.

If you have any questions, please call the Transfer Section, (503)986-0900.

We have put together maps for the 4 water rights that will be involved in the proposed temporary transfer. In order to easily show both the Place of Use and Point of Diversion we had to use a non-standard scale (1 inch = 2,300 feet). I am writing to request that the Department allow us to use this map scale for the transfer maps.

I have attached drafts of the 4 transfer maps that will be included with the transfer application, a separate map for each of the 4 water right involved in the proposed transfer. The maps for Certificates 75487 and 75489 show the entire Place of Use as the transfer will involve all or more than 67% of the Place of Use. The maps for Certificates 76012 and 76013 show only the portions of the Place of Use in the same Q-Q as the Place of Use involved in the proposed transfer since the proposed transfer will involve less than 67% of the Place of Use.

Let me know if these maps will be acceptable for the proposed temporary transfer. Thanks.

Ted

This map provided enough information for the area that the water rights will be transferred from; however, there appears to be portions of this water right (76012) also in T15S, R16E, S6 which is where the water rights will be transferred to. Do you have a similar 3111 map showing the Place of Use in this section?

Ted,

This morning I was finally able to access the Peoples Irrigation Company 3111 map (attached). Please review the attached map and let me know if it gives you the information you need in order to be able to characterize the remaining portion of the right in each of the quarter quarters from which you propose to transfer irrigation right. If not, then let me know and I'll respond to your request to not show the remaining right.

Subject: place of use map for temporary transfer application

Dorothy

As we discussed by phone, I am preparing a temporary water right transfer application for several water right, including Certificate 76012. Showing the location of the Place of Use for Certificate 76012 on the transfer map is problematic. I have map information available for the portions of the certificate that will be involved in the proposed temporary transfer (< 67%); however, I have not been able to locate map information for the other portions of this certificate, likely because Certificate 76012 is from decree and does not have the typical water right application and permit materials associated with it.

I am writing to request that I be allowed to show on the transfer map only the existing and proposed Place of Use of the portion of Certificate 76012 that will be involved in the temporary transfer.

Feel free to contact me at 503-239-8799 if we need to discuss this further. Thank you for your assistance.
